RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "‡."

American Railroad Journal.

Saturday, October 19, 1872.

Stock Exchange and Money Market.

Influenced largely by the recent Treasury negotiations, the available supply of Money has been much more liberal, and call loans have been quoted decidedly easier for the borrowing interest, ranging toward the close from as low as the almost nominal rate of 2 per cent. in exceptional instances, to the legal rate of 7 per cent., with the bulk of the later dealings, in this line, reported at from 4@6 per cent. per annum, on a less urgent inquiry for accommodation. The banks have been freer in their offerings of aid, though more reserved than private lenders, whose offerings have been in excess of the more pressing wants of the Street firms, leading to the remarkable depression in rates. The discount market has been more active, with a much readier sale noted for the better grades of commercial paper at from 7 for the very choicest of short date notes, to 12 per cent. per annum, forg ood names. Some rumors were current towards the close to the effect that it was probable that the Secretary of the Treasury will re issue whatever amount he deems necessary of the $44,000,000 legal tenders withdrawn by Secretary McCulloch; but these rumors were not confirmed. The Money movement seemed quite favorable to continued ease at the latest moment.

The U. S. Sub-Treasury office last week received $11,328,274 of currency, and $4,474,032 of gold, the latter including $2,692,000 from customs; and disbursed $7,483,922 of currency and $7,701,813 of gold, the latter embracing $213,942 of coin interest. The city banks reduced their loan and discount average about 1½ millions during the week, and added to their outstanding circulation slightly. The U. S. Sub-Treasury held a currency balance on Wednesday morning of $21,041,107, and a coin reserve of $53,028,338.

The city banks, in their latest return, show an increase of $3,843,700 of legal tender notes, $2,273,900 of specie, and $3,559,100 of deposits, also a contraction of $1,512,000 in their loan and discount averages, and addition of $133,700 to their item of circulation. The city bank exchanges, last week, averaged 133¾, and thus far, this week, about 144 millions daily. The banks now hold $3,575,000 of specie and legal tender notes more than the 25 per cent. of their liabilities required by the National Banking Act.

The specie reserve of the city banks according to the latest return is $12,217,800, against $9,277,700 same time last year. The city bank deposits are now $189,709,300 against $215,182,100, week ending Oct. 14, 1871. The legal tender reserve amounts to $45,759,400, against $50,841,900 same time last year. The circulation now stands at $27,737,900 against $30,324 000 same time last year. The loans are now $268,298 300 against $293,511,000 at this date last year.

The coin reserve of the city banks is now about 12¼ millions as against about 29½ millions on the 20th of July; the legal tender reserve is about 45¾ millions against about 55⅛ millions on the statement of June 15th; and the deposits are now down to 189¾ millions, against 247½ millions on the 20th of July.

Government revenues were less productive, last week, especially in the form of excises. The excises yielded within the week about 1⅛ millions, and thus far in the current fiscal year beginning with July 1, 1872, $38,768,922. The customs at the port of New York last week were $2 537,011; and at the outports, equal to about $850,000, all in coin or coin certificates.

Under the Treasury programme for October, Government proposes to sell, Gold, as follows: Thursday Oct. 24th, $1,000,000; Thursday, Oct. 31st, $1,000,000. And to buy in, Five Twenties, as follows: Wednesday, Oct. 23nd, $1,000,000; Wednesday, Oct. 16th, $1,000,000;

The Gold speculation has been of less absorbing interest, and the fluctuations in the premium, comparatively unimportant. The floating supply was fair. The customs demand was equal to about half a million a day. The export drain was unusually light. The range of the price during the week has been from 112¼@113¼, and the closing quotation on Wednesday was 113 against 112½ the preceding Wednesday. The specie outflow last week, was $157,774. The Gold Exchange Bank clearances have averaged about 56⅛ millions per day during the week.

The customs demand for Gold last week, aver-

aged $448,650 a day; thus far, this week, it has averaged $501,000 a day, or equal to a weekly aggregate of $3,006,000. The arrivals of specie from Europe, Havana and other foreign ports last week were $20,293 and since Jan. 1, 1872 were $4,993,893 against $8,311,267 same time in 1871. The total customs revenue of the Government, in coin, at this port, since January 1, has been $122,224,181 against $128,690,996 during the same time in 1871.

Government has disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt, since January 1, 1872, $60,575,529, against $65,886,253 during the same time in 1871.

The export drain of specie was $157,774 last week, against $515,308 same week preceding year. The shipments since January 1, 1872, have been $60,233,983 against $56,717,537 during the same portion of 1871.

Foreign Exchange has been more active and decidedly higher, greatly to the relief of the export trade of the port. Bankers' sixty day bills on London closed on Wednesday at 108¾@109; sight bills on London, 110¼@110½.

The week's exports hence of domestic produce have been to the currency value of $6,114,056.

Government securities have been more sought after and quoted firmer, with the chief call for the favorite issues from investment buyers.

On Wednesday, Government bought in only $94,100 of the offered Five-Twenties from 112 74 @112 87. The aggregate offering was 812,650 at from 112 74@113⅛.

U. S. sixes of 1881 at the close on Wednesday of the current week were quoted at 116¼@116⅛; U. S. Five-Twenties of 1862, 115⅞@116⅛; U. S. Five-Twenties of 1864 at 115⅞@116⅛; U. S. Five-Twenties of 1865, 116@116¼; U. S. Five-Twenties of 1865 consolidated, 114⅛@114⅞; U. S. Five-Twenties of 1867, 114¾@115; U. S. Five-Twenties of 1868, 114¾@115; U. S. Ten-forties at 108⅜@108½ U. S. Fives of 1881 (Funding Loan) 110⅞@111⅛; Six per cent. currency bonds, 113@113¼.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Oct. 2.	Oct. 9.	Oct. 16.
Consols	92⅜	92⅝	92⅜
U. S. 5-20s, 1865	93⅜	93⅞	*91¼

New Fives of 1881...	89¼	89⅛	*88⅝
Erie	38½	38⅞	42

* Ex Nov. coupon.

State bonds have been more sought after and quoted firmer.

Railway and Miscellaneous share property has been decidedly more active and quoted much higher, on a buoyant speculative movement in the leading stocks.

Railway Mortgage Loans have been in fair investment demand at well supported prices, Central Pacific Sixes have been more freely purchased closing from 99@99¼.

In the Metal line, business has been quiet, generally; Ingot Copper has been in light demand and quoted cheaper; sales 125,000 lbs. at 32c.@32¼c., for prompt and November deliveries. Scotch Pig-iron has been moderately active, but lower and irregular under increased offerings of outside lots; sales, 425 tons Glengarnock, part at $54 50@$55, but chiefly at a lower rate; 300 tons Eglinton, part at $52; 200 tons Summerlee, at $55@$56 per ton. American Pig-iron steady and in fair demand; 400 tons sold at $55@$56 for No. 1. Of Iron rails, 1,000 tons English sold at $70, gold, cash; market weaker. And of Russian Sheet-iron, 50 packs Stained sold on private terms. Lead, Spelter and Zinc quiet; 50 tons ordinary Foreign Lead sold at $6 40, gold; and 15 casks Musselman Sheet Zinc at 8¾c., gold. Tin very dull, with Straits and English quoted at 33¼c.@33½c.; and Charcoal Plates at $12 75, gold.

General business has been less active, in the way of domestic produce, with prices quoted variable. Flour, Wheat, Corn, Oats, Pork, and Cotton, however, left off with more steadiness. Middling upland cotton, closed on Wednesday at 19½ cts. per lb. The receipts at all the ports, since Sept. 1, have been 359,404 bales, against 229,798 bales same time in the preceding year; exports 95,000 bales against 65,600 bales in the previous year; stock at the ports at latest dates, 192,923 bales against 146,427 bales same date 1871.

At the Live Stock Markets, Beeves have been in less confident demand at 9@13½cts.; Veals in fair request at 7½@10½ cts.; Sheep at 4½@6½; cts.; Lambs, 6@8½ cts.; Swine, at 5¼@5¾ cts. per lb., all live weight. The week's receipts were 10,226 Beeves, 2,568, Veal Calves, 29,940 Sheep and Lambs, and 42,040 Swine.

Foreign goods have been attracting more attention, and prices of most articles, in the line, have been held with firmness. The week's imports of foreign goods reached the amount of $6,606,985 including $1,403,240 of dry goods.

Ocean freights have been less active, at easier rates, closing somewhat irregularly.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Washington Fire Insurance Company.

The vacancy caused by the death of President Satterlee, of the Washington Fire, has been filled by the election of Mr. Augustus E. Masters to the presidency of the company. Mr. Masters is a wealthy and influential gentleman, prominent in New York business circles, although a resident of Brooklyn. There can be no doubt that his official connection with the company will prove an important acquisition. A previous acquaintance with the company's affairs, as a member of its finance committee, has fitted Mr. Masters for the performance of the routine duties of his new position. Mr. George B. Satterlee retains the vice-presidency, and Mr. Lothrop the secretaryship of the company. It is unnecessary to state that the Washington is in admirable condition financially, having just made a five per cent. dividend, and retaining a fair margin of surplus besides. The good name of the company has been always sustained, and under the efficient administration of Secretary Lothrop the need be no fear as to any slackening of the Washington's grasp of public confidence, nor any doubt as to a full dessert thereof.—*Spectator.*

☞ Work has been begun on the Oakdale section of the Massachusetts Central Railroad.

Illinois Central Railroad.

The statement of this Company for the month of September, 1872, is as follows:

LAND DEPARTMENT.

Acres Construction Lands Sold	1,388.30 for	$10,812 13
Acres Inter't Fund Lands Sold	80 for	432 00
Acres Free Lands Sold	for	
Total sales during the m'th of September, 1872	1,468.30 for	$11,244 13
To which add Town Lot Sales	for	
Total of all	1,468.30 for	$11,244 13

Cash collected in September, 1872.... $45,221 76

ESTIMATED EARNINGS—TRAFFIC DEPARTMENT.

	In Illinois. 707 Miles,	In Iowa. 402 Miles.	Total. 1,109 Miles.
Freight	$375,256 00	$104,265 00	$479,521 00
Passengers	127,294 50	47,751 55	175 046 05
Mails	6,375 00	3,059 33	9,434 33
Other sources	93,625 00	2,340 67	95,965 67
Tot'l Sept.'72	$602,550 50	$157,416 55	$759,967 05
Total actual earn'gs, Sept., 1871	$729,076 88	$161,210 42	$890,287 30

☞ Messrs Dean, McGinnis & Co., bankers, 30 Broad St., New York, have brought out in this market the 7 per cent. bonds of the New York, Kingston and Syracuse Railroad, which are offered at 95, the interest on them being payable semi-annually in London and New York. The road will be an important link in the route to the Great West; it is well built, and there is every reason to supposed that but little time will elapse before the bonds are taken up; and this particularly because its earnings are already sufficient to pay the interest on the bonds.

☞ The New Castle and Franklin Railroad Company have let the building of their road from where it connects with the New Castle and Beaver Valley Railroad, a distance of twenty-one miles. The balance of the road, being from the latter point to Stoneboro, will be let as soon as the engineers make the necessary surveys.

☞ Bucksport, Me., has voted to take $70,000 additional stock in the railroad from that town to Bangor, making $135,000 of corporate subscriptions in all. This is an addition to $115,000 in private subscription, which is to be at once increased.

☞ The contract for the construction of a railroad tunnel from the St. Louis and Illinois bridge to the site of the Union Depot has been awarded to Wm. S. Kraenka & Co. for $788,704, and work will begin at once.

☞ The St. Joseph and Denver road is completed to within thirty miles of Fort Kearney, and there, for some cause, track laying has ceased for the present.

☞ The track of the Texas International Railway is about finished to Jacksonville, 118 miles from Hearne.

☞ The iron on the Davenport and St. Paul Railroad is laid two miles north of Delaware Center, Minn.

☞ Iron is being laid on the Escanaba end of the Chicago and Northwestern Railroad.

TO CAPITALISTS.

A DESIRABLE HOME INVESTMENT.

First Mortgage Gold Bonds

OF THE

New York, Kingston and Syracuse

RAILROAD,

PAYING 7 PER CENT. GOLD, FREE FROM U. S. GOV'T TAX.

PRINCIPAL AND INTEREST PAYABLE IN GOLD.

This road passes through the richest agricultural region of the state, and is speedily reaching completion. It is the most direct line between the great lakes and deep water navigation of the Hudson River from LAKE ONTARIO and the GREAT WEST.

The 78 miles of the road now in operation is unusually well built, and its net earnings already paying 7 Per Cent., Gold, on the cost of construction and its equipments.

We are now offering these bonds at 95 and accrued interest, feeling warranted in recommending them to our friends and investors generally as a safe and most desirable investment

Pamphlets with maps furnished, with full particulars, on application to

DEAN, McGINNIS & CO.,

Bankers, 30 Broad St., N. Y.,

And at the Office of the Company,

18 WILLIAM ST., N. Y.

☞ Hereafter there will be through connection between Washington and Leesburg and Hamilton. The connection between the Alexandria and Washington Railroad and the Washington and Ohio Railroad is completed, and cars leaving Washington can now go through to the end of the Washington and Ohio road.

☞ The estimated earnings of the Erie Railway for the week ending October 7, 1872, were $413,183; against $407,004 in 1871—an increase of $6,179. From April 1, to October 7, 1872, the earnings were $9,921,686 against $9,912,821 for the corresponding period of 1871, an increase of $8,865.

☞ The contract for extending the Carbondale and Shawneetown Railroad from Marion to a point on the Cairo and Vincennes road, has been let to Messrs. Decker, Hartford & Jones. The contract embraces about 16¼ miles of road bed, which is to be completed by the middle of November.

☞ Work is being pushed briskly on the Valley (Va.) railroad between Harrisonburg and Staunton. All of the sections are under contract except six light ones. The recent action of the stockholders at their Salem meeting has made the friends of the road cheerful along the line.

☞ The Bedford and Bridgeport Railroad has been leased by the Pennsylvania Railroad Company, and will hereafter be known as the Bedford Division of the Pennsylvania Railroad.

☞ Surveyors are locating a railroad from Meredith Village through Centre Harbor Village, Moultonborough and Tamworth to Conway, N. H. It will be about thirty miles long.

☞ The Milwaukee and Northern Railroad will be completed to Menasha about the 25th of this month.

Journal of Railroad Law.

RAILROAD COMPANIES—INJURIES TO ANIMALS—THE COURT WILL NOT REVERSE A JUDGMENT UPON THE EVIDENCE, WHERE IT IS CONFLICTING.

The facts in the late case of The Pittsburg, Cincinnati and St. Louis Railway Co. *vs.* Hume, (34 Ind., 326,) are fully and clearly stated in the following opinion by—

Downey, J.—The only error assigned in this case is that the court improperly refused to grant a new trial on the motion of the appellant.

The action was brought by the appellee against the appellant to recover the value of a sow and six pigs, alleged to have been killed by the locomotive and cars of the defendant, by the negligence of the defendant, at a point on said road, where the road was not securely fenced. The action was commenced before a justice of the peace, where there was judgment for the plaintiff. The defendant appealed to the Common Pleas, where, after an amendment of the complaint, and a general denial thereof filed, there was a trial by the court and finding again for the plaintiff.

The defendant moved the court for a new trial for the following reasons: first, the finding of the court is contrary to law; second, the finding of the court is not sustained by, and is contrary to the evidence in the case.

This motion was overruled by the court, and final judgment was rendered, from which the defendant appealed to this court.

The evidence is made part of the record by a bill of exceptions, and shows the following facts: The sow and pigs were killed at or near the crossing of a public highway. The witnesses differ in their statements as to whether it was at the crossing or near to the same. The train was going west. There was a cow-pit across the railroad track on each side of highway.

Miles Cook, on the behalf of the plaintiff, says, he was trying to drive the stock off the track, when he saw the train coming from the east. Where the stock were on the track it was not fenced on the south side, for a distance of two hundred yards, the fence being down. When he found he could not succeed in driving the stock from the track, he climbed up on the bank, until the train passed. The engine struck the animals east of the east cow-pit. He saw them struck; found one pig dead in the east cow-pit, the sow and three pigs between the east cow-pit and the place where the county road crosses the railroad track. The cow pit on the east side of the road was so nearly filled with dirt that it was not more than a foot deep.

James McCorkle testified that he passed by soon after the occurrence, saw a sow and six pigs killed, one pig was in the east cow-pit, four more between the cow-pits, and two pigs were dropped two rods west of the west cow-pit.

On behalf of the defendant, one witness, Michell Toby, says he saw the hogs on the crossing shortly before the train came along, did not see the cars strike them. On being told of the occurrence, he went to the place, and found the sow and three pigs killed between the cattle guards, thrown on each side of the railroad track right where the dirt road, which is a county road, crosses the railroad. Two of the pigs were carried by he cars west of the west cattle guard. There was blood all along from where they were struck. From appearances, thinks they were all struck west of the east cattle guard, between the two cattle-guards, on the dirt road crossing. Examined the railroad track east of the cattle guard, and found no hog tracks, no blood, or any signs of hogs having been struck east of the east cattle-guard. There was no pig in the east cattle-guard.

Daniel Berk and John Laisy, witnesses for the defendant, went with Foley, and described the position of the dead animals and the appearances in the same way as Foley did.

It is at once evident that there is no such state of evidence here, as will justify us in saying that the Common Pleas erred in refusing to grant a new trial. The witness Cook seems, of all of them, to have had the best opportunity to know exactly how and where the killing took place. The other witnesses speak only of appearances after the event occurred. According to the testimony of Cook, the hogs when struck by the locomotive were on the railroad track, east of the east cow-pit. Had the road been fenced, and the cow-pit been in good condition, it seems to us that the hogs would not have been at this point on the road. Had the evidence established the fact that the hogs were at the crossing of the public highway, when killed, the defendant would not have been liable for negligence.

The judgment is affirmed with ten per cent. damages and costs.

Homesteads for Soldiers and Sailors.

An Act to amend an act relating to soldiers' and sailors' homesteads.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the act entitled "An act to enable honorably discharged soldiers and sailors, their widows and orphan children, to acquire homesteads on the public lands of the United States," approved April fourth, eighteen hundred and seventy-two, be, and the same is hereby, amended so as to read as follows: That every private soldier and sailor who has served in the army of the United States during the recent rebellion for ninety days, or more, and who was honorably discharged, and has remained loyal to the Government, including the troops mustered into the service of the United States by virtue of the third section of an act entitled "An act making appropriations for completing the defenses of Washington, and for other purposes," approved February thirteenth, eighteen hundred and sixty-two, and every seaman, marine, and officer, who has served in the navy of the United States, or in the marine corps, during the rebellion, for ninety days, and who was honorably discharged, and has remained loyal to the Government, shall, on compliance with the provisions of an act entitled "An act to secure homesteads to actual settlers on the public domain," and the acts amendatory thereof, as hereinafter modified, be entitled to enter upon and receive patents for a quantity of public lands (not mineral) not exceeding one hundred and sixty acres, or one quarter section, to be taken in contract form, according to legal subdivisions, including the alternate reserved sections of public lands along the line of any railroad or other public work, not otherwise reserved or appropriated, and other lands subject to entry under the homestead laws of the United States: *Provided*, That said homestead settler shall be allowed six months after locating his homestead, and filing his declaratory statement, within which to make his entry and commence his settlement and improvement: *And provided also*, That the time which the homestead settler shall have served in the army, navy or marine corps aforesaid shall be deducted from the time heretofore required to perfect title, or if discharged on account of wounds received, or disability incurred in the line of duty, then the term of enlistment shall be deducted from the time heretofore required to perfect title, without reference to the length of time he may have served: *Provided, however*, That no patent shall issue to any homestead settler who has not resided upon, improved, and cultivated his said homestead for a period of at least one year after he shall commence his improvements as aforesaid.

Section 2. That any person entitled under the provisions of the foregoing section to enter a homestead who may have heretofore entered under the homestead laws, a quantity of land less than one hundred and sixty acres, shall be permitted to enter under the provisions of this act so much land contiguous to the tract embraced in the first entry as, when added to the quantity previously entered, shall not exceed one hundred and sixty acres.

Second 3. That in case of the death of any person who would be entitled to a homestead under the provisions of the first section of this act, his widow, if unmarried, and in case of her death or marriage, than his minor orphan children, by a guardian duly appointed and accredited at the Department of the Interior, shall be entitled to all the benefits enumerated in this act subject to all the provisions as to settlement and improvements therein contained: *Provided*, that if such person died during his term of enlistment, the whole term of his enlistment shall be deducted from the time heretofore required to perfect the title.

Section 4. That where a party at the date of his entry of a tract of land under the homestead laws, or subsequently thereto, was actually enlisted and employed in the army and navy of the United States, his service therein shall, in the administration of said homestead laws, be construed to be equivalent, to all intents and purposes, to a residence for the same length of time so entered: *Provided*, That if his entry has been canceled by reason of his absence from said tract while in the military or naval service of the United States, and such tract has not been disposed of his entry shall be restored: *And provided further*, That if such tract has been disposed of, said party may enter another tract subject to entry under said laws; and his right to a patent therefor may be determined by the proofs touching his residence and cultivation of the first tract and his absence therefrom in such service.

Section 5. That any soldier, sailor, marine officer, or other persons coming within the provisions of this act may, as well by an agent as in person, enter upon said homestead by filing a declaratory statement as in pre-emption cases: *Provided*, That said claimant in person shall within the time prescribed make his actual entry, commence settlements and improvements on the same, and thereafter fulfill all the requirements of this act.

Section 6. That the Commissioners of the General Land Office shall have authority to make all needful rules and regulations to carry into effect the provisions of this act.

Approved June 8, 1872.

☞ The Directors of the Chicago, Burlington and Quincy and Burlington and Missouri Railroads have agreed to consolidate their interests by a perpetual lease of the latter to the former after the award to the Chicago, Burlington and Quincy stockholders of a dividend of 25 per cent. in 7 per cent. bonds, equal dividends to be paid on both stocks after the merging of the two lines as agreed upon. The stockholders will be invited to vote upon the question at a meeting to be held on the 24th of December next.

☞ At a meeting of the new board of directors of the Cincinnati and Great Northern Railroad Company, recently held in Dayton, O., Hon. J. C. McKeemy was elected President of the Board; W. A. Weston of Greenville, O., Secretary; and James T. Brady, of Pittsburg, Pa., Treasurer.

☞ The Philadelphia *Ledger* of 14th inst., reports the net anthracite coal tonnage for the week ending on the 5th inst., from all sources, at 445,048 tons, and for the year 15,019,503 tons, against 11,119,855 tons to the same date last year, being an increase in the tonnage of anthracite coal of 3,899,650 tons. The production of bituminous coal for the week was 54,493 tons, and for the year 1,931,240 tons, against 1,694,343 tons to the corresponding time last year—an increase of 237,897 tons. The total production of all kinds of coal for the week was 499,541 tons, and for the year 16,950,743 tons, against 12,814,196 tons to corresponding time last year, showing an increase of 4,136,547 tons.

☞ At the annual meeting of the stockholders of the Ohio and Mississippi Railroad Company held in Cincinnati on the 10th inst., Samuel U. F. Odell, of New York, Lewis B. Parsons, of St. Louis, and James D. Lehmer, of Cincinnati, whose terms of service had expired, were re-elected directors for the ensuing year; and at a meeting of the board of directors subsequently held, Daniel Torrance was re-elected President and Albert N. Christie, Vice President.

☞ The Milwaukee *Wisconsin* says that the new road between that city and Chicago will be completed in fifty days, and trains will run on the new line between the two cities by the 25th of November.

☞ The traffic receipts of the European and North American Railway for September, 1872, were $28,937 31, against $26,914 09 in September, 1871, and $19,921 11 in September, 1870.

☞ The Milwaukee, Manitowoc and Western Railway is making good progress between Port Washington and Milwaukee.

Board of Engineers of the Fourth Avenue Improvement.

Office, Grand Central Depot.

NEW YORK, October 11th, 1872.

Notice to Contractors.

AS MISAPPREHENSION EXISTS AMONGST Contractors in regard to the manner of doing a portion of the work upon the Fourth Avenue Improvement between 79th Street and Harlem River, it is hereby ordered, that the proposals already received be returned to the parties making them, and that the whole of the work between the points mentioned be re-opened to bidding from all Contractors.

Sealed proposals for the same will be received at this Office until 2 O'Clock P. M. of the 22nd Inst.

Plans, Specifications and Blank Proposals are now ready.

ALLAN CAMPBELL,
ALFRED W. CRAVEN,
EDW. H. TRACY,
J. C. BUCKHOUT,

Locomotives for Sale.

SEVEN LOCOMOTIVE ENGINES FOR SALE, built for Peruvian Railways—all for Standard gauge of 4 feet 8½ inches. Five built at Rogers Locomotive Works, and two at Danforth Works; all of the very best materials, designs and finish. Six have cylinders of 17 inches x 22 inches, with six driving wheels of 49 inches diameter, and one pair truck wheels—One a tank engine, cylinders 10½ inches x 18 inches. Driving wheels four, 34 inches diameter. These engines sold on account of the construction of the railway they were intended for being suspended for a time. For further particulars apply to

W. W. EVANS,
47 Exchange Place,
Oct. 7, 1872. New York.

ROGERS CO. ENGINES, FOR PACASMAYO RY, PERU.

4 Engines, Mogul design—
Gauge, 4 feet 8½ inches.
Cylinders, 17 inches x 22 inches.
6 Driving wheels, 48½ inches diameter.
2 Truck wheels, 30½ inches diameter.
Furnace, steel.
Flues, 165 iron, 10 feet 8 inches long, 2 inches diameter.
Fuel, Soft Coal.
Tender tank, to hold 2,000 Winchester Gallons.
Weight, empty, about 63,000 pounds; loaded 71,500 pounds.
Price, $18,500.

DANFORTH ENGINES, FOR PACASMAYO RY.

2 Engines, Mogul design—
Gauge, 4 feet 8½ inches.
Cylinders, 17 inches x 22 inches.
6 Driving wheels, 49 inches diameter.
2 Truck wheels, 30 inches diameter.
Furnace, Steel.
Flues, 175 iron, 10 feet 4 inches long, 2 inches diameter.
Fuel, Soft Coal.
Tender tank to hold 2,000 Winchester Gallons.
Weight, empty, about 63,000 pounds; loaded, 71,500 pounds.
Price, $17,500.

ROGERS ENGINE, PACASMAYO RY.

1 Tank engine—
Gauge, 4 feet 8½ inches.
Cylinders, 10½ inches x 18 inches.
4 Driving wheels, 34 inches diameter.
No truck wheels.
Steel Furnace.
Flues, 65 iron, 9 feet 10 inches long, 2 inches diameter.
Fuel, Soft Coal.
Tank, 400 gallons.
Price, $11,500.

THE WHARTON
Safety Railroad Switch.

☞ **BOTH RAILS of the main track absolutely immovable, continuous and unmutilated.** ☜

This Switch provides perfect safety for both the main track and the side track, besides removing all switches from the main track as effectually as if there were no sidings on the whole line.

They have been in use on various important Railroads for over two years, and have repeatedly saved passenger trains from destruction, when running at high speed, (from 30 to 45 miles per hour,) at places where by accident the Switch had been left set for the siding.

Address,

ABRAHAM BARKER, Pres't,
Or WM. WHARTON, Jr., Sup't,
Of the Wharton R.R. Switch Co.,
28 South 3d St., Philada., Pa.

CAMP'S IMPROVED DUMPING CAR.

(Used by the American Dredging Company.)

RIGHTS FOR SALE BY

N. H. CAMP,

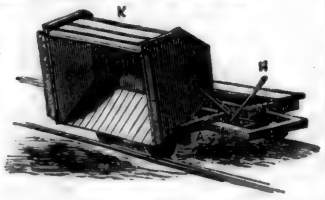

Fig. No. 1, Car Loaded. Fig. No. 2, Car Dumped.

TO DUMP THE CAR.

The Brakeman seizes the lever H, and raises it, thus removing the step from under the box-support A, when the weight of the load causes the box to roll over to the position shown in Fig. 2.

To replace the box in readiness for another load.

The Brakeman, standing on the platform, reaches over, and grasping the corner of the box, pulls it back to its place.

Address, N. H. CAMP,

HAND'S IMPROVED DUMPING CART.

PATENTED APRIL 4th, 1871.

THE MOST PERFECT YET INVENTED.

Can be dumped by a single motion of one hand while you hold the horse with the other.

The tail-board being attached to the shafts, lifts of its own accord when the cart is dumped, as seen on the right of the engraving. As soon as the load is dumped all you have to do is to start the horse, and the cart will resume its proper position, as seen in the left of the engraving, hook itself and replace the tail-board, without any assistance of the driver whatever. The shafts are attached to the outside of the body, near the hubs, which gives the horse great control over the cart, and prevents the body from playing from side to side as they do when the shafts are pivoted underneath.

Manufactured and for Sale by **WILLIAM & HENRY HAND,**

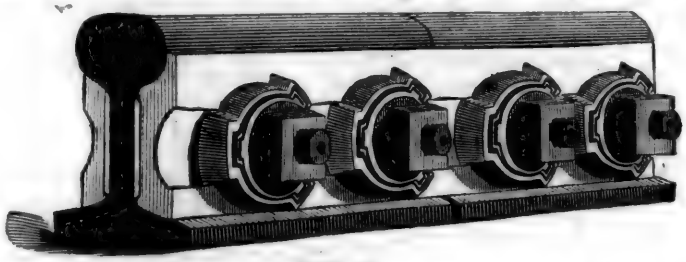
FISHER'S PATENT

Wrought Iron

RAIL JOINTS,



MADE BY

FISHER & NORRIS,

TRENTON, N. J.

The Superiority of these Joints has been proved by eight years' use on different Roads.

PRATT'S PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

Chesapeake and Ohio Railroad.

Despatches from the western division of the Chesapeake and Ohio Railroad say that on Wednesday last, the 23d instant, there remained but forty miles of track to be laid to unite the two completed portions. The grading and preparation of the road-bed will be out of the way of the track-layers, and the line opened by December next.

In this connection it is important to note that it is announced from Washington that orders have been received in Georgetown for Cumberland coal on English account, the same to be shipped to the East and West Indies and South America. This is the first indication of a portending change in the currents of coal and iron movements. The Chesapeake and Ohio Railroad, which will be open within a few weeks, will be enabled to deliver the superior bituminous coals of the Kanawha Valley at the seaboard ports at the same or even less prices than the Cumberland coal, which must be hauled over the 116 feet grades of the Baltimore and Ohio line. Cannel coal, of which about 900,000 tons are annually imported for gas and parlor uses, can be furnished by way of the Chesapeake and Ohio at from $9 to $10 per ton, against $15 to $18, the present cost of the imported articles.

TO INVESTORS.

To those who have funds to invest in large or small amounts, or who wish to increase their income from means already invested in other less profitable securities, we recommend, after full investigation, the Seven-Thirty Gold Bonds of the Northern Pacific Railroad Company. Bearing seven and three-tenths per cent. gold interest, (equal now to 8¼ currency,) and sold at par, they yield an income considerably more than one-third greater than U. S. 5-20's. They are Coupon and Registered, the lowest denomination being $100, the highest, $10,000.

Nearly one-third of the Main Line of the Road will be completed and in operation with a large business the present season. All the property and Rights of the Company, including a most valuable Land Grant averaging about 23,000 acres per mile of road, are pledged as security for the first mortgage bonds now offered.

All marketable stocks and bonds are received in exchange at current prices. Descriptive pamphlets and maps, showing Route of road, Connections, Tributary Country, &c., will be furnished on application.

JAY COOKE & CO.,

New York, Philadelphia and Washington.

FINANCIAL AGENTS NORTHERN PACIFIC RAILROAD COMPANY.

☞ The office of General Superintendent of the Boston and Albany Railroad has been abolished, and the management of the line is entrusted to three Division Superintendents—Walter H. Barnes having charge of the Eastern Division, extending from Boston to Worcester, with headquarters at Boston; C. O. Russell of the Middle Division, from Worcester to Pittsfield, with headquarters at Springfield; and J. B. Chapin of the Western Division, from Pittsfield to Albany, with headquarters at Albany.

The Northern Route to the Pacific.

The War Department has recently received from Captain S. C. Kellogg, of the Fifth United States cavalry, an official report of the military expedition which accompanied the surveying party of the Northern Pacific Railroad from the point in Dakota where that road crosses the Missouri River to the crossing of the Yellowstone River in Montana, near the mouth of the Powder River. The military escort consisted of 537 enlisted men and 34 company officers, and was commanded by General Stanly. The entire expedition, including troops, Indian scouts, teamsters and railroad engineers, numbered 757. Its object was to complete the final locating survey of the railroad line across the western half of Dakota from the Missouri to the Yellowstone River. On two or three occasions straggling parties of Indians appeared on the flanks of the column and fired upon the troops, probably with the hope of creating a stampede which would enable them to capture or steal horses and mules. They were easily driven off in all cases without serious fighting, and entirely without loss on the part of the escort.

The expedition ascended the valley of Heart River, a tributary of the Missouri, crossed the low divide between the Missouri and the Yellowstone, and followed down the valley of O'Fallon's Creek to the Yellowstone river. The mouth of Powder River was reached on August 18th, where a salute was fired, and the expedition prepared to return eastward. The return march was made at the rate of four or five miles per day, which enabled the engineers to make careful surveys and effect a final location of the railroad line across the section of country referred to, being a distance of about 235 miles. A practicable and excellent route was found without difficulty, and without any serious divergencies from a straight line. The river valleys along which the line mainly runs were found to be uniformly fertile, and the "bad lands" which are represented on most maps as covering a large part of the region traversed were almost wholly avoided by the route taken. Grass was abundant all the way from the Mis-

souri to the Yellowstone, and good water was found at convenient intervals during the entire march. Extensive beds of ignite and semi-bituminous coal were found at frequent intervals for a distance of one hundred and fifty miles. Timber exists in considerable quantities, especially in the river valley, and consists mainly of oak, ash and cottonwood. The expedition was made without accidents or mishaps of any kind, and resulted, as above stated, in the discovery and location of an excellent railroad route.

Great Western Railway of Canada.

REPORT OF THE DIRECTORS FOR THE HALF-YEAR ENDING JULY 31, 1872.

The receipts on capital account during the half-year to July 31, 1872, amounted to £13,779 arising as follows:—Five per cent. prefenence stock in anticipation of the final instalment, £120; ditto, paid up in full for conversion into ordinary shares, £11,557; together, £11,677; less difference in exchange on 121 shares transferred from Canada to London, £6; leaving £11,671; shares issued on conversion of preference stock during the half-year at the rate of five shares for every £100 stock—£84,300 stock converted into 4,215 shares, of £20 10s. each, £86,408; less preference stock cancelled on conversion, £84,300; leaving £2,108; making the total as above, £13,779. The total receipts on capital account amounted on 31st July, 1872, to £6,573,357. The charges on capital account during the half-year amounted to £168,108. Of this sum the engineer's report shows an expenditure for roadway, sidings, station buildings, &c., and a proportion of the cost of steel rails laid in the track, amounting altogether to £18,768; land purchases for station extensions, principally at Detroit, absorb £13,220; car purchases, as stated in the mechanical superintendent's report, to the extent of £31,907. For the Glencoe loop line £98,889 has been expended, and £747 for small disbursements in respect of the Brantford branch. The total expenditure to 31st July, 1872, amounted to £6,153,671, leaving a balance of £419,687 at the credit of capital account. The receipts and expenditure on revenue account for the half-year have been as follows:—

Gross receipts		£550,735
Working expenses, including renewals and all charges		329,437
		£221,298
From which is deducted—		
Interest on bonds, &c	£37,827	
Discount and charges on conversion of American currency	34,703	
Amount set aside for renewal of ferry steamers	2,000	
Loss on working the Erie and Niagara railway	554	
Alteration of gauge account—proportion charged this half year	9,100	
		84,184
		£137,114
Add profit on working Galt and Guelph railway		1,725
		£138,839
Add surplus from last half-year		5,644
Amount available for dividend		£144,483

The dividend for the half-year on the 5 per cent. preference stock amounts to £7,021, and from the balance the Directors recommend a dividend on the ordinary shares at the rate of 6½ per cent. per annum, payable in London on the 26th October, which will absorb £135,977, leaving £1,486 to be carried forward to the next half-year. The aggregate revenue receipts (exclusive of those of the Galt and Guelph, the Wellington, Grey, and Bruce, and the Erie and Niagara Railways) exhibit a gross increase of £91,821, which consist of—

Increase in way passenger traffic	£13,896
" through passenger traffic	20,148
" way freight and live stock traffic	19,721
" through freight and live stock traffic	36,233
" mails and express freight	1,823
	£91,821

The net revenue would have shown a larger increase had not the rates and fares continued low—indeed a little less than in the corresponding period. The through live stock traffic has been carried at so diminished a rate as compared with the half-year ending July 31st, 1871, as to cause a decrease in the net earnings of the company from this source of the sum of 54,000. It is satisfactory to observe that the receipts for local or way traffic amount to 40 per cent. of the total earnings. The receipts and ordinary working expenses per train mile for seven corresponding half-years, compare as follows in sterling:—

Half-year ending	Gross earnings per train mile.	Working expenses per train mile.
	s. d.	s. d.
July 31, 1866	9 10¼	4 9
" 1867	8 10¼	4 2¾
" 1868	8 5	4 8¾
" 1869	8 0	4 8
" 1870	7 8½	4 7
" 1871	7 9½	4 5
" 1872	7 9¼	4 6

The higher rate of wages and the advance in the prices of many descriptions of stores have adversely affected the working expenses during the past half-year. The following table exhibits the receipts and expenses for seven corresponding half-years:—

RECEIPTS.

Half-year ending	Passengers, mails, and sundries.	Freight and live stock.	Rents.	Total.
	£	£	£	£
July, 1866	172,731	169,577	854	343,162
July, 1867	165,367	199,221	1,116	365,704
July, 1868	155 082	200,619	948	356,649

July, 1872	329,437	59,82

The discount and charges on the conversion of American currency for the half-year amounted to £34,703, as compared with £20 731 in the corresponding half-year. The gold purchases were made at an average of 112 1-16, the average rate of gold being 112¼; the price of gold during the half-year has fluctuated between 109 and 115¼. Last half-year the average rate of gold purchases was 111 1-16th, and in the corresponding half year 111¼. The comparatively larger loss by exchange arises both from the higher rate, and from increased earnings in American currency; and from the conversion into gold for the balance brought over from last half-year, together with the entire amount of greenbacks collected, so that no unconverted balance is now carried over. Last half-year $170 037 60, and in the corresponding half-year $128,737 12 American funds were carried forward unconverted to the following half-year. The new car ferry steamer Transit to replace the old boat now broken up, is completed and in use. The cost of it—£14,707—has been provided out of the renewal fund for ferry steamers, and a balance of £15,510 still remains at the credit of that fund. The same half-yearly amount as heretofore (£9,100) has been charged to revenue towards defraying the cost of alteration of gauge. The only remaining portion of the line where the broad 5ft. 6in. gauge is retained, is the 76 miles between London and Hamilton. The expense of maintaining the extra rail and the inconvenience of working the mixed gauge have determined the directors to remove and dispose of the third or outer line of rails. The entire system of the Great Western will then be the uniform gauge of the United States, viz., 4 ft. 8½ in. In conformity with the principle stated in the last report, a fixed rate per mile run has been charged for repairs and renewals of locomotives and cars, whether expended or not. This charge has exceeded the actual expenditure in the past half year, and there stands at the credit of a suspense account for reconstruction and renewal of engines and cars, on July 31, 1872, a sum of £16,688. The condition of the permanent way and rolling stock is reported to be highly satisfactory by the president and vice-president, who have recently returned from a personal inspection of the railway. The full advantage of the durability of steel rails has not yet been felt, but it will be seen by a table given in the engineer's report that during the past half-year the cost of maintenance and renewals estimated upon the basis of the train mileage is less than the average expenditure for the last six years, although since 1867 the freight tonnage carried has increased nearly threefold. It may be observed that the gross earnings upon the main line during the past half-year have amounted to the sum of $10,408 per mile of open railway, being the largest earnings of any single track railway. The directors are led to conclude that the maximum amount of traffic which can safely be carried on a single line of rails, even with extended sidings, has now been reached. The increasing demands of the through business will tax the resources of the company to the utmost in the coming year; but with the relief to be afforded by the Glencoe loop line, the increased sidings between Glencoe and Windsor, the new car ferry boat, and the augmented equipment of rolling stock, the directors have no doubt the traffic will be successfully conducted. The engineer states in his report that the Glencoe loop line is fast approaching completion, and it is satisfactory to find that the works will be finished for an outlay within the estimate originally framed. The directors have negotiated an arrangement with the board of the Grand Trunk Railway Company in respect of the International bridge and its approaches, now under construction, on the principle of accepting half the liabilities of the bridge construction bridge capital, cost and maintenance, that is, joint-ownership and management, withequal division of earnings from other sources. The agreement will be laid before the shareholders for their approval. An agreement will also be submitted to lease the London and Port Stanley Railway for a period of 21 years at an annual rental of $20,000. This line is 27 miles in length, and running north and south connects the western extremity of the Glenceo loop line at St. Thomas with the main line at London. By the control of this short line the rolling stock on the loop line can be repaired at the London workshops, and the company will obtain at Port Stanley the most convenient access to the coalfields of Ohio. As cord wood for fuel is becoming scarce along the main line, this facility for obtaining coals will prove most important. The arrangement sanctioned by the shareholders at the last general meeting, for the purchase at the price of £75,000 of the Erie and Niagara Railway, has been frustrated owing to difficulties between the parties who claimed to be owners of this short line of 31¼ miles. The object of this acquisition was to obtain a junction at the eastern end of the main line with the Glencoe loop line. This intention can be equally well accomplished by the use of the Welland Railway; the board, therefore, propose to enter into an agreement with the directors of the Welland Railway to use for a term of 21 years a distance of 15 miles of it, between the points where it intersects the main line at St. Catherine's and the loop line. An agreement to

secure running powers over the Hamilton and Lake Erie Railway will also be submitted to the meeting. This road is in course of construction, and will run from the city of Hamilton to Port Dover on Lake Erie. This agreement is made in conjunction with other railway companies, and is based upon the equitable principle of payment according to the tonnage carried over it by each company. The engineer's report gives the progress of the test or drainage tunnel under the Detroit River. When this is completed the practicability of constructing the railway tunnel will be demonstrated. It is proposed to provide the capital for this purpose by the issue of bonds on the joint guarantee of the Great Western and the Michigan Central Railways, the tolls on traffic passing through the tunnel being applied to pay interest on the bonds, and provide a sinking fund for their redemption. An agreement to carry this out will be laid before the shareholders. The Wellington, Grey, and Bruce Railway has been worked from Guelph to Clifford, 55¼ miles, during the half-year, and thus far the expectation formed of its value has been realized. During the past half-year it has been worked within 70 per cent. of its gross earnings, and has yielded additional earnings to the Great Western, from interchange of traffic, to the extent of $46,432 86, and in the two years since the first short section of it was opened, of $144,785 38. Since the termination of the half-year further sections, to Walkerton and to Paisley, 29 miles beyond Clifford, have been partially worked, and in a few weeks it is expected the entire line will be completed to Southampton, on Lake Huron. The receipts and expenditure of the Detroit and Milwaukee Railroad have been as follows for the half-year ending June 30, 1872:—Gross earnings, £134,215; working expenses, taxes, &c., £99,463; balance to meet interest on bonds, £34,752. The through traffic of this road is increasing, but the local traffic has decreased owing to the new lines of railway crossing it at Grand Haven, Grand Rapids, Ionia, and Holly. It is hoped that the gradually increasing population of the northern peninsula of the State of Michigan will compensate for this diversion of traffic. On the other hand, the Great Western is benefited by the additional country opened up by these new railways. Since the last general meeting Mr. M. K. Jesup, of New York, has resigned his seat at the board, and the directors have the satisfaction of stating that Mr. John Cleghorn, one of the directors of the North Eastern Railway, has been unanimously elected to fill the vacancy. At the coming meeting the following directors go out of office by rotation, but are eligible, and offer themselves for re-election:—Sir Thomas Dakin, Mr. Gilson Homan, Mr. John Cleghorn. The auditors likewise retire from office, but are re-eligible; they are—Mr. John Young, of Messrs. Turquand, Youngs, and Co., Mr. Sidney Smith, and Mr. Samuel Spreull, in Canada.

Directors.—Alderman Sir Thomas Dakin, Cree Church lane, London, president. Gilson Homan, Esq., Sandford House, Kirkstall, near Leeds, vice-president. Honble. John Carling, M. P., London, Ontario, Canada; John Cleghorn, Esq., 3 Spring Gardens, S. W.; Thomas Faulconer, Esq., 66, New Finchley road, N. W.; Edward H. Green, Esq., 22, Old Broad-street, London; Donald MacInnes, Esq., Hamilton, Ontario, Canada; Honble. William MacMaster, Senator, Toronto, Ontario, Canada; Paul Margetson, Esq., Clapham Common; George Smith, Esq., 28, Albemarle-street, W.; William Weir, Esq., 10, Princesterrace, Dowanhill-gardens, Glasgow.

☞ The Carolina *Spartain* says that the Atlanta and Richmond Air-Line Railway is now completed to Black's, forty-eight miles this side of Charlotte. From Charlotte to Garibalda, the first station on the road, is thirteen miles, to Gastonia twenty-two miles, to King's Mountain thirty-five miles, to Whitaker's forty-three miles, and to Black's forty-eight miles.

Rutland Railroad.

At a special meeting of the Rutland Railroad Company, held in Rutland, Vt., on the 21st inst., it was voted to accept the act recently passed by the Vermont Legislature, and to authorize the issue of coupon obligation bonds or promissory notes of $100, $500 and $1,000 each, to an amount not exceeding $1,500,000, to bear date November 1, 1872, payable in thirty years, interest at 8 per cent. per annum, payable semi-annually, for the purpose of raising means to pay the indebtedness of the company, the bonds to be secured by a mortgage of its franchise, railroad and property, exclusive of such rolling stock as is already mortgaged for the payment of $500,000 seven per cent. and $500,000 eight per cent. equipment bonds, and subject to the lease or contract to the managers of the Vermont Central and Vermont and Canada railroads, the principal and interest to be payable in the city of Boston; the mortgage to be made in trust to Jacob H. Loud and Jacob Edwards; any vacancies to be filled by directors. The bonds shall be sold only to retire an equal amount of claims against an indebtedness of the company now outstanding, or in exchange thereof. The coupon bonds issued may be exchanged into registered in sums of one thousand dollars each, at the option of the holders of the coupon bonds. The president submitted the form of mortgage, which was accepted.

The following resolution was also adopted:

Whereas, There has been issued as authorized by former votes an amount of preferred stock in excess of the sum of $4,800,000, which excess has been used as collateral security for the indebtedness of the company, it is therefore

Resolved, That as fast as the indebtedness of the company is reduced and the stock used as collateral removed, it shall be canceled until the amount issued shall not exceed $4,300,000 par value, which shall hereafter be the limit of amount of preferred stock.

In response to inquiry, Gov. Page said the rents payable on the lease were secured by accepted orders on the Connecticut River and Cheshire Railroads, up to fifty thousand dollars per month, and that the money has been promptly paid, and on the semi-annual settlement, July 1, a balance of seventeen thousand dollars, which has been paid in payment for stock and equipments of the road. The notes of the Vermont Central were taken for about $225,000, all of which have matured and been paid, and the Central now owes them nothing. The contract had been carried out by them in every particular, and the lease was so guarded that they could not escape its full payment. He also stated that if the bonds authorized shall be issued the payment of dividends on the preferred stock will be resumed as early as August, possibly in February.

All the votes taken were unanimous, the meeting was entirely harmonious, and the best of spirit prevailed throughout its proceedings. All seemed pleased with the financial exhibit made of the affairs of the corporation.

☞ It appears that the extent of new line opened in Hungary last year was 122½ German miles. At the close of December, 1870, the total extent of line in operation was 457½ German miles, and in the first eight months of this year a further extent of 74 German miles was opened for traffic. It follows that at the close of August, 1872, Hungary possessed 654 German miles of railway.

Consolidation of the Chicago, Burlington and Quincy and Burlington and Missouri River R. R. Cos.

A joint circular from the directors of the Chicago, Burlington and Quincy and the Burlington and Missouri River Railroad Companies to the stockholders states the following as the terms of the consolidation agreed on by the directors which is to be submitted to the stockholders at meetings to be held on the 24th of December next:

After careful examination the unanimous conclusion was reached that, in equalizing the value of the stock of the respective companies, it would be just and equitable to consider the value of the stock of the Burlington and Missouri River Railroad Company to be of par value, and that of the Chicago, Burlington and Quincy Railroad Company to be at a premium of 25 per cent. above its par value; this difference in the values of the two stocks to be adjusted and equalized by issuing to the holder of every share of stock in the Chicago, Burlington and Quincy Railroad Company $25 in the seven per cent. bonds of that company. The basis of union was accordingly agreed upon, subject to the ratification of the stockholders of the respective companies.

It was thought that the safest and most practicable mode of obtaining the object sought would presently be by a lease in perpetuity by the Burlington and Missouri River Company to the Chicago, Burlington and Quincy Company, and a sale and conveyance of the lands and other property of the former to the latter; in consideration of which the Chicago, Burlington and Quincy Railroad Company is to assume all leases, contracts and obligations of whatsoever kind, pay and discharge all debts and liabilities of the Burlington and Missouri River Railroad Company, make to the stockholders of that company the same dividends that it shall make to its own, and also secure to them the same benefits and emoluments that its own stockholders may receive or become entitled to. And your directors recommend that such, for the present, be the process for uniting the two companies.

When by legal decision or legislative action the construction to be placed on the laws of Illinois and Iowa relating to consolidation of railroad companies shall be made certain and satisfactory it will be advisable that there should be, and it is agreed there shall be, effected a complete consolidation of the two companies, share for share, or an absolute sale and conveyance of the one to the other.

The stockholders of the Chicago, Burlington and Quincy Railroad Company are requested to send their proxies to A. T. Hall, treasurer of that company, at Chicago, Ill.; and those of the Burlington and Missouri River Railroad Company to C. E. Perkins, superintendent, at Burlington, Iowa.

☞ A certificate of incorporation of the Lake Erie and Elyria Railroad Company has been filed with the Secretary of State of Ohio. Capital stock, $150,000. Termini on or near Black river, Lorain county, and in or near the village of Elyria. Corporators, Russell H. Penfield, Wm. H. Root, Horace Penfield, C. W. Johnston and Charles G. Finey.

☞ The Tasmanian Main Line Railway Company, Limited, have received advices from their agent in Hobart Town of the first quarter's guaranteed interest having been duly paid over to the credit of the company by the Tasmanian Government, in accordance with the contract.

☞ Work has commenced on the new railroad between Chicago and Richmond Junction, another force is between Geneva and Elkhorn, and subcontracts are being given from Elkhorn to Whitewater, and other sections through to Jefferson.

Commerce of New York.

The foreign imports at New York for the month of August, 1871 and 1872, are officially stated as follows:

	1871.	1872.
Entered for consumpt'n.	$23,609,684	$23 353,778
Do. for warehousing	12,389,981	12,239,624
Free goods	2,067,145	7,298,732
Specie and bullion	386,395	94,956
Total entered at port	$38,403,205	$42,987,075
Withdrawn fr. wareh'use	12,596,633	22,874,347

The foreign imports at New York for the eight months from January 1, were:

	1871.	1872.
Entered for consumpt'n.	$143,664,064	$141,994,041
Do. for warehousing	102,483,304	138,845,932
Free goods	19,875,945	30,149,565
Specie and bullion	5,255,087	2,914,438
Total entered at port	$271,278,400	$313,903,956
Withdrawn fr. wareh'se.	85,735,447	112,706,798

The duties received at New York for eight months from January 1, were:

	1871.	1872.
Six months	$73,692,107 93	$73,822,709 76
In July	11,934,957 33	7,251,160 35
In August	16,932,839 65	19,335,156 81
Eight months	$102,559,904 91	$100,409,026 92

The exports from New York to foreign ports in the month of August, were:

	1871.	1872.
Domestic produce	$18,900,769	$19,569,529
Foreign free goods	148,519	325,153
Do. dutiable	461,249	569,061
Specie and bullion	2,701,287	2 586,148
Total exports	$22,211,824	$23,049,891
Do. exclusive of specie.	19,510,537	20,463,743

The exports from New York to foreign ports for eight months from January 1, were:

	1871.	1872.
Domestic produce	$146,314,092	$139,152,085
Foreign free goods	803,155	1,066,046
Do. dutiable	5,324 890	6,765,083
Specie and bullion	55,489,604	56,949,735
Total exports	$207,931,741	$203,932,949
Do. exclusive of specie	152,442,137	146,983,214

Central Railroad of Iowa.

The report of this company for the year ending December 31, 1871, shows that there were in operation at the commencement of year 179 miles of road, and at its close 202 miles, and that 31 miles (from Albia southeastward to Moulton) were partly graded. The President recommended that the section be completed the current year, and the securities placed on the New York Stock Exchange. The connections with St. Louis and St. Paul had not worked well; it not being possible to arrange trains so as to make close connections. The earnings, however, increased from an average of $1,625 71 per mile in 1870 to $2,380 56 in 1871. The gross earnings of the road in 1871 were:

From freight	$265,669 80
From passengers	130,129 22
From express, mails, &c	23,393 97
Total	$419,192 99

The expense of operation during the year, including taxes, insurance, rent of track and car service, was $299,813 39, leaving $119,379 60 for net earnings. These net earnings, the Superintendent says, represent in fact only six months working of the road at its present capacity, the cost of repairs, in other words, of finishing the road after it was turned over by the contractors in February, having absorbed the entire earnings during the next four months. The ratio of expenses to earnings during the six months from July to December was 54.78 per cent.

The Treasurer's report gives the following general balances:

Capital stock	$4,644,630 00
First mortgage bonds	3,564,000 00
Second mortgage bonds	609,000 00
Bills and accounts payable	408,997 33
Total	$9,226,627 33
Cost of road and equipment prior to 1871	$8,390,845 34
New construction	435,411 70
New rolling stock and machinery	264,186 59
Material on hand	70,359 91
Bills and accounts receivable	58,676 43
Cash	7,147 36
Total	$9,226,627 33

The company had on hand unsold, at the close of the year, bonds issued under the first and second mortgages, to the amount of $452,000.

The cash cost of the twenty-three miles of new road built by the company during the year, was $17,020 55 per mile. This, the engineer says, was by far the cheapest portion of the whole road, the line running for three-fourths of the way over a level prairie.

Canada Pacific Railway.

Mr. Marcus Smith, the engineer in charge of the Pacific Coast division of the Canadian Pacific Railway Survey, arrived here on the 26th from the Chilcoaten and Bute Inlet country. Mr. Smith in going to that country left Alexandra on the 29th of July last with a train of twenty mules laden with provisions, three Indians and an axeman, and proceeded for some distance on the old Bella Coola route. With the assistance of some Indians the provisions were taken down the lake and river to the Engineer's camp, about 25 miles from the depot. On the 13th August, (having left the provisions) Mr. Smith started back and retraced the same route as far as the east end of Tatlah Lake with the mule train. No difficulty would be experienced in supplying the party with provisions from the depot, Indians having been supplied for packing purposes. Mr. Smith then turned down the Chilanco River, emptying into the Chilcoaten about 30 miles from Tatlah Lake, and then down the latter river to its mouth, explored the country in its neighborhood, and returned up the west side of the Fraser to Soda Creek. He there gave instructions to Mr. McLennan as to the routes to survey in order to meet the coast party from the head of Bute Inlet. Mr. Green's party commenced at the west end of Lake la Hache about the middle of July, and followed the valley by Williams' Lake down to the Fraser, which river they crossed about a fortnight ago, and are now not far from Riskey's ranch, in the direction of Tatlah Lake, following the route marked out for them by Mr. Smith. Mr. Mahood's party are on a line between the North Thompson and Lake la Hache, and are expected to arrive in a few weeks where Mr. Green commenced. His party will then, if necessary, be sent on to Tatlah Lake to survey the gap between Green's party and Tiedman's. Mr. Smith has now completed his explorations west of the Fraser, and has given final instructions for the survey of that line, and is now on his way eastward to Tete Jaune Cache, and will explore the Horsefly country and the headwaters of the Clearwater and Thompson rivers on his way. Mr. Fleming will probably be met somewhere on the North Thompson. Mr. Smith will then descend the river to Kamloops, and will devote the rest of the season to the examination of the routes across the Cascade range, terminating at New Westminster or Burrard Inlet. Mr. Smith refrains from giving any opinion as to the merits of any of the various routes until an examination is made of all of them. So far, however, judging from very careful surveys, he finds the country not so difficult as was expected, and it is hoped that a good line of railways can be obtained even through the Cascade range at less cost than was ant d.—*Cariboo B. C. Sentinel.*

Vermont Central Railroad.

At a meeting of parties interested in the affairs of the Vermont Central and Vermont and Canada Railroads, held in Boston on the 9th inst., the committee of conference submitted their report, from which it appears that the floating debt, above all assets, was on June 1, 1872, $1,528,914 85. Of this sum about $1,300,000 has been expended for additions to the trust property, and the remainder is due to the deficit between receipts and expenditures since the lease of the Ogdensburg and Rutland roads.

The trustees believe that the Ogdensburg Railroad will pay a profit in the course of the year 1874, and that the Rutland Railroad and its connections east of Lake Champlain will become of direct profit in the course of two years.

If this debt is now funded, the trustees claim that the earnings of the combined roads will soon be sufficient to pay the expenses, the rent to all the leased roads, the interest on all the classes of bonds, except perhaps the second mortgage bonds. If, however, they may not be able to pay promptly the rent and interest due December 1, they would issue scrip which they would expect to soon pay off.

To accomplish this, they recommend that it should be funded in thirty-year bonds issued by the trustees at 8 per cent. These bonds are to be issued under a decree of the Court of Chancery of Vermont, from which the trustees derive their appointment, which empowers them to issue $2,500,000 thirty-year bonds, at 8 per cent., and provides that $700,000 of these shall be left with the New England Trust Company, as security for that amount of bonds due in 1875, leaving $1,800,000 now to be placed, which is the amount required to pay the floating debt, and this it is which the stock and bondholders and the creditors of the company are invited to subscribe for.

In view of the state of the money market, and the necessity of some special inducement to subscribers, it has been decided to offer these bonds at ninety per cent., to be paid for in three instalments, November 1, December 1, and January 1, 1873.

Accompanying the report of the committee was the following agreement:

The subscribers hereby agree to take the amount of the Vermont Central Railroad Company's income and extension bonds, specially authorized by the Court of Chancery, set against there names respectively, and to pay therefor 90 per cent. of the par value thereof and accrued interest, to wit: $300 November 1, 1872; $300 December 1, 1872, and $300 January 1, 1873, with interest from November 1, 1872, on each $1,000 bond; interest at the rate of 8 per cent will be upon all payments in advance. This subscription is not to be binding unless the amount of $1,000,000 of the loans is subscribed for by October 26, 1872.

☞ The work on the Missisquoi and Clyde Rivers Railroad, from Richford to Newport, is progressing rapidly, and men are at work both day and night. Iron is being laid at both ends, and from the west has nearly reached the line of Troy. The through line from Montreal to Boston will be in good running order by the first of January.

Vermont and Canada Railroad.

The annual meeting of the stockholders of this corporation was held at St. Albans, Vt., on the 17th inst. Hon. W. C. Smith, the President, in opening the meeting, said that though the road was under temporary embarrassments, it is yet strong in its condition, strong in its resources, strong in its ability to meet, as the directors believe, all its obligations. Considerable discussion was had respecting the old board of directors and the past management of the road. Mr. Edwards explained that the great improvements made at St. Albans and Burlington partly accounted for the increase of capital. Mr. F. A. Brooks was satisfied that stockholders were more frightened than hurt. The road to-day is just as well worth three millions as it was worth thirteen hundred thousand when its debt was only that amount. He admitted that the managers had made mistakes, but contended that they were errors of judgment and not of intent.

The ballot for Directors resulted in the almost unanimous election of Francis A. Brooks, James A. Nichols, John Porter, Wm. T. Hart, Benj. P. Cheney, Wm. Mixter and Worthington C. Smith.

The President stated the condition of the road to be: Stock, $3,000,060; the corporation had issued their guarantee of the notes of the trustees and managers for $1,000,000 more; there are $2,000,000 of equipment bonds; an obligation on the part of the trustees and managers for the interest on $500,000, which is known as the S. S. and C. seven per cent. bonds; an obligation of the trustees and managers for the interest on $500,000 of the bonds of the Missisquoi road at seven per cent., and the others were all at eight per cent. interest.

Western Union Telegraph.

At the annual meeting of this company, held in this city on the 16th inst., the following gentlemen were elected directors for the ensuing year: William Orton, James H. Banker, Horace F. Clark, Alonzo B. Cornell, Harrison Durkee, Augustus W. Greenleaf, Edwin D. Morgan, O. H. Palmer, Augustus Schell, John Steward, E. B. Wesley, Hugh Allan, Nathan A. Baldwin, William D. Bishop, Ezra Cornell, William E. Dodge, Sheppard Gandy, Norvin Green, John A. Griswold, Wilson G. Hunt, George Jones, C. Livingston, E. S. Sanford, Hiram Sibley, Z. G. Simmons, Moses Taylor, Daniel Torrance, George Walker and Stillman Witt. The number of votes cast was 278,116, representing stock amounting to $27,811,600. From the report read on the occasion by President Orton we learn that on the 30th of June, 1872, the company operated 62,082 miles of line with 137,199 miles of wire, through 5,237 offices. The increase during the year past was 6000 miles of line, 16,039 miles of wire, and 631 offices. To perform the labor required the company has in its employ 8,347 operators, who last year transmitted 12,444,495 messages, being an increase of 1,788,422 over the year preceding. The gross receipts for year were $8,437,095 77, the expenses $5,666,863 16, leaving a net profit of $2,770,232 61, which is an increase over the last year of $819,646 92 in the gross receipts, $562,075 97 in the expenses, and $257,570 95 in the net profit. The present Western Union system dates from the consolidation of the United States, the Southwestern and the American companies, in 1866, and its net profits during the six years ending June 30, 1872, amounted to $17,116,694 23. Of this sum $4,856,879 34 was distributed to the stockholders in dividends, and $1,898,401 98 disbursed for interest on the company's bonds. The balance—$10,361,412 91—was expended in the construction of new lines, the erection of additional wires, and the purchase of telegraph property.

Catawissa Railroad Lease.

Under the terms of the lease of the Catawissa Railroad to the Philadelphia and Reading Railroad company, the former road with all its property and franchises passes under the control of the latter for 999 years; the lessors to pay 30 per cent. of the gross receipts per annum, and the lessees bind themselves to pay promptly the interest on all the funded debts of the Catawissa of whatsoever nature; and further, to pay to the Catawissa company the first year $154,000 in cash; the second year the interest and $178,000; the third year the interest and $202,000; the fourth year and ever after, the interest and $226,000. The Catawissa railroad is to issue $1,000,000 new stock, to bear interest in 1874 of two and one-third per cent; in 1875 of four and two-thirds per cent, and in 1876, and ever after, seven per cent.

Holders of preferred Catawissa stock are granted the privilege to subscribe in the ratio of 43 shares for every 100 shares in stock, and to pay for the same by relinquishing all claims for arrears of dividends. In case the receipts for any one year fall short of the amount named above, for said year, the Reading Railroad Company have no claim on the receipts of any other year.

The Catawissa railroad extends from Williamsport to Tamanend, a distance of ninety-four miles. In 1871 this comparatively short line carried 42,971 tons of merchandise, mostly coal and iron. The earnings for the past year were: From passengers, $73,570; freight, $559,792; mail, $4,944; miscellaneous, $16,041. Net revenues from operations in 1871 were $202,514, from which was paid for the year a dividend of 7 per cent., disbursed semi-annually. The stock of the road amounts to $3,359,500; the bonds to $1,740,350; a total of $5,099,850. The cost of road and equipment is $5,126,500.

Bedford and Bridgeport Railroad.

Last week we were invited to accompany an excursion party on the Huntingdon and Broad Top Railroad and the Bedford and Bridgeport Railroad into the Cumberland coal fields. The latter road has just been finished, and forms a continuation of the Broad Top road to the State line, at which point it connects with a branch road of the Cumberland and Pennsylvania Railroad (also just finished), the whole forming a new outlet for the coal of that region and for passenger travel, connecting two important points on two great trunk lines, viz: Huntingdon, on the line of the Pennsylvania Railroad, and Cumberland, on the line of the Baltimore and Ohio Railroad, the distance between these two places being 89 miles. As a coal route from Mount Savage to the waters of South Amboy, the distance is considerably less than the route now used for this coal via the Baltimore and Ohio Railroad and its canal connections to New York, with the further advantage of its being an all rail route for shipments the whole year round. The coal tonnage of the Cumberland and Pennsylvania Railroad last year was 2,345,153 tons, and is increasing largely each year. We noticed among the coal operators of that region the most friendly disposition towards this new avenue, and there seems to be but little doubt that it will be used to its full capacity. The Huntingdon road becomes important in view of these new connections and business. Iron ores of good quality are plentiful throughout the length of the road, and the furnaces recently erected have been very successful. On the Broad Top part of this line we noticed important improvements being made to the road. The excursion party was much pleased with what they saw of the region.—*Phila. Ledger Oct.* 17.

THE INDIANA
AND
ILLINOIS CENTRAL
RAILWAY COMPANY'S
First Mortgage 7 per cent.
GOLD BONDS.
$3,500,000.

This is an EAST AND WEST ROAD RUNNING ON THE 40TH PARALLEL FROM INDIANAPOLIS, IND., TO DECATUR, ILL., 152 miles; through the richest agricultural and mineral country of both states; and connecting at termini with the GREAT THROUGH ROUTES to the East and West.

It is the only East and West road in a belt averaging 30 miles wide, and passes through the best part of the rich

BLOCK COAL FIELD

of Indiana, in which the COMPANY OWNS 2,000 ACRES OF BLOCK COAL LANDS. It owns, also, 30,000 acres of Farming lands.

$1,400,000 IN CASH HAS BEEN ALREADY EXPENDED ON THIS ROAD, of which 30 miles in Illinois are finished and in operation. Fifty-five miles more, completing the Western Division, Decatur to the Coal Fields, will be completed this fall and the whole road in 1873.

Upwards of TWO MILLIONS OF DOLLARS more are pledged to the enterprise, partly by counties, towns and individuals along the line, but chiefly by wealthy capitalists, among whom are W. H. GUION (of WILLIAMS & GUION), SIDNEY DILLON, JAY COOKE & CO., CLARK, DODGE & CO, J. & W. SELIGMAN, VIBBARD, FOOTE & CO., and PAUL S. FORBES, of New York, BENJ. E. BATES, of Boston, HENRY LEWIS, of Philadelphia, and GEO. M. PULLMAN, of Chicago.

Bonds $1,000 each, payable in 30 years, principal and interest in *Gold, free of Government Tax.* Sinking Fund 2½ per cent. on Gross Earnings.

For sale at 90 and accrued interest by the Financial Agents of the Co. (of whom pamphlets and information may be obtained.)

Walker, Andrews & CO.,
NO. 14 WALL STREET.

☞ Despatches received at St. Paul from Dakota announce the arrival at Fort Rice of Colonel Stanley's Yellowstone military expedition. The track laying on the Dakota division of the Northern Pacific Railroad is progressing at the rate of three miles per day. The grading is nearly completed to the Missouri river, and trains now run to within forty miles of the crossing. The Yellowstone division, extending into Montana, is being prepared for the contractor.

American Railroad Journal.

Saturday, October 26, 1872.

Stock Exchange and Money Market.

Money, as a rule, has been in much better supply, the city banks, as well as private lenders, having been more liberal of accommodation, while the demand, as well from speculative as from mercantile sources, has been less urgent. Call loan rates have been quoted at from 3@7, with the bulk of the business on the basis of 5 per cent. to the more prominent street borrowers. Commercial credits were rated at from 8½@12 generally at 10@12 per cent. per annum, for the more marketable grades of paper, which met with more favor among lenders. Opinions differed widely throughout the week, as to the advisability of the Secretary of the Treasury re-issuing whatever amount he deems necessary of the $44,000,000 legal tenders withdrawn by Secretary McCulloch. The discussion, on some of the days of the week, was quite animated. The City banks last week, greatly augmented the strength of their reserves, and closed the week, on rising averages. Over 11 millions were added to the deposit, and nearly seven millions to the legal tender line. The specie item was increased about half a million. The loan and discount average was enlarged about 2¼ millions.

The U. S. Sub Treasury office last week received $4,873,623 of currency, and $3,953,189 of gold, the latter including $2,737,000 from customs; and disbursed $2,928,237 of currency and $3,133,166 of gold, the latter embracing $547,420 of coin interest. The city banks increased their loan and discount average about 2¼ millions during the week, and reduced their outstanding circulation slightly. The U. S. Sub-Treasury held a currency balance on Wednesday morning of $23,258,686, and a coin reserve of $52,683,466.

The city banks, in their latest return, show an increase of $6,827,000 of legal tender notes, $407,700 of specie, $11,322,100 of deposits, and of $2,259,300 in their loan and discount averages, with a contraction of $31,600 in their item of circulation. The city bank exchanges, last week, averaged 136½. The banks now hold $7,987,075 of specie and legal tender notes more than the 25 per cent. of their liabilities required by the National Banking Act.

The specie reserve of the city banks according to the latest return is $12,625,500, against $10,101,400 same time last year. The city bank deposits are now $201,031,400 against $203,791,000, week ending Oct. 21, 1871. The legal tender reserve amounts to $52,586,400, against $50,014,700 same time last year. The circulation now stands at $27,706,300 against $30,294,300 same time last year. The loans are now $270,557,600 against $288,580,100 at this date last year.

The coin reserve of the city banks is now about 12⅝ millions as against about 29½ millions on the 20th of July; the legal tender reserve is about 52½ millions against about 55½ millions on the statement of June 15th; and the deposits are now down to 201 millions, against 247¼ millions on the 20th of July.

Government revenues have been yielding rather more liberally, since our last. The excises yielded within the week about 2½ millions, and thus far in the current fiscal year beginning with July 1, 1872, $41,120,362. The customs at the port of New York last week were $2,580,906; and at the outports, equal to about $875,000, all in coin or coin certificates.

Under the Treasury programme for October, Government proposes to sell, Gold, as follows: Thursday, Oct. 31st, $1,000,000. And to buy in, Five Twenties, as follows: Wednesday, Oct. 16th, $1,000,000.

Gold has been moderately active. The speculative demand has been good, while the customs drain has been up to a fair average. The export call has been comparatively limited. The price, through the week has shown firmness, with, toward the close, some indications of buoyancy. The range of the price during the week has been from 112⅝@113⅜, and the closing quotation on Wednesday was 113½ against 113 the preceding Wednesday. The specie outflow last week, was $626,388. The Gold Exchange Bank clearances have averaged about 52 millions per day during the week.

The customs demand for Gold last week, averaged $456,120 a day. The arrivals of specie from Europe, Havana and other foreign ports

last week were $88,349 and since Jan. 1, 1872 were $5,082,242 against $8,319,299 same time in 1871. The total customs revenue of the Government, in coin, at this port, since January 1, has been $124,970,496 against $131,646,153 during the same time in 1871.

Government has disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt, since January 1, 1872, $61,150,949, against $66,895,226 during the same time in 1871.

The export drain of specie was $626,388 last week, against $601,843 same week preceding year. The shipments since January 1, 1872, have been $60,860,871 against $57,319,380 during the same portion of 1871.

Foreign Exchange has been moderately dealt in and quoted steady. Bankers' sixty day bills on London closed on Wednesday at 108¾@109; sight bills on London, 110¼@110½.

The week's exports hence of domestic produce have been to the currency value of $5,366,824.

Government securities have been quite scarce in the open market, and have been in very good investment demand at firmer prices.

On Wednesday, Government bought in a million of the offered Five-Twenties at from 112 49 @117 74. The aggregate offering was 2,424,800 at from 112 48@112 99.

U. S. sixes of 1881 at the close on Wednesday of the current week were quoted at 116½@116¾; U. S. Five-Twenties of 1862, 115⅞@116⅛; U. S. Five-Twenties of 1864 at 115⅞@116⅛; U. S. Five-Twenties of 1865, 116@116¼; U. S. Five-Twenties of 1865 consolidated, 114¾@114⅞; U. S. Five-Twenties of 1867, 115@115⅛; U. S. Five-Twenties of 1868, 114⅞@115; U. S. Ten-forties at 108½@108¾ U. S. Fives of 1881 (Funding Loan) 110⅞@111⅛; Six per cent. currency bonds, 118¼@118¾.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Oct. 9.	Oct. 16.	Oct. 23.
Consols	92⅝	92⅜	92¼
U. S. 5-20s, 1855....	93⅞	*91¼	*91
" 1867	92¾	92⅞	92⅝

New Fives of 1881...	89⅛	*88⅝	*88½
Erie	38⅞	42	41

* Ex Nov. coupon.

State bonds have been in more general demand and quoted stronger in price, as a rule.

Railway and Miscellaneous share property has been very brisk and quoted decidedly stronger, in the instances of the leading speculative favorites, such as Pacific Mail, and Western Union Telegraph, in which the dealings have been remarkably extensive.

Railway Mortgage Loans have been in more general request at firmer prices. Central Pacific Sixes have been more sought after, closing from 99⅞@100⅛.

The Metal trade has been very slow since our last. There has been a very moderate demand noted for Ingot Copper, with sales reported of 100,000 lbs, at 32c.@32¼c.; and 50,000 lbs. English at 29c., the best selected. Iron has been dull throughout, with prices quoted essentially as before. Sales, 961 tons Eglinton, at auction, at Philadelphia, at $45@$48 50, which rates were much below the market. The less favorable foreign advices tended to check operations, though with supplies well under control, holders were firm in their views. Pig Lead was dull and somewhat nominal on the basis of 6½c.@6⅝., gold, for ordinary foreign. Spelter was unusually active, with sales reported of 250 tons Silesian at 6⅞c., gold, showing a firm market. Tin has been unusually quiet on the basis of previous quotations.

Telegraph advices report that of the Chesapeake and Ohio through line of railway only about forty miles remain to be completed to form the connection between the eastern and western divisions of the road, which are now in full operation, and that the probability is that the small unfinished portion will also be ready for work in a few weeks. The whole line, from the docks below Richmond to the Ohio River terminus, it is now announced, will be ready for trains early in December next. The company are now making contracts for the delivery of large quantities of bituminous and cannel coal at the seaboard wharves, and have already a large traffic from the mines of the Kanawha to the Ohio navigation. It is claimed that there is probably no railroad in the United States whose route is so rich in Iron Ores and Coals as that of the Chesapeake and Ohio, while its location is such as to command for these products the widest distribution to the best markets.

General business has been fairly active in the line of domestic produce. Breadstuffs, Provisions, Petroleum, Naval Stores, Hops and Cotton have been more freely dealt in. Prices, however, have been variable, closing, in most instances, more steadily. Middling upland cotton, closed on Wednesday at 19⅝ cts. per lb. The receipts at all the ports, since Sept. 1, have been 460,728 bales, against 320,939, bales same time in the preceding year; exports 141,500 bales against 98,500 bales in the previous year; stock at the ports at latest dates, 233,425 bales against 185,192 bales same date 1871.

At the Live Stock Markets, Beeves have been in moderate demand and quoted firmer at 9@14½ cts.; Veals in good request at 7½@11cts.; Sheep rather quiet at 4½@7 ; cts.; Lambs, 6@8⅜ cts.; Swine, at 5¼@5½ cts. per lb., all live weight. The week's receipts were 9,559 Beeves, 2,740 Veal Calves, 27,001 Sheep and Lambs, and 44,680 Swine.

Foreign goods have been in moderately active request, with rather more firmness apparent on the part of holders. The week's imports of foreign goods reached the amount of $5,801,197 including $1,780,610 of dry goods.

Ocean freights have been moderately active, but at easier and irregular rates, closing somewhat stronger.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

☞ The Directors of the Boston and Albany Railroad have created the office of General Manager, and filled it by the appointment of Mr. Wm. Bliss, who has been the efficient General Freight Agent for several years.

Banking House of FISK & HATCH,

No. 5 Nassau Street, New York.

Deposits received, on which we allow interest at the rate of four per cent. per annum. Special arrangements made with Savings Banks and others depositing large amounts.

We issue Certificates of Deposit available in all parts of the country, and bearing interest in case of special deposit.

We make Collections for merchants and others in all parts of the country.

Orders for Investment Stocks and Bonds executed at the Stock Exchange, on commission, for cash.

We deal in Government Bonds, and make a specialty of a few First Class Investment Securities, which we can recommend with confidence, viz:—

Chesapeake and Ohio Bonds, six per cent, gold.

Central Pacific Bonds, six per cent, gold.

Western Pacific Bonds, six per cent, gold.

The Chesapeake and Ohio Bonds can now be purchased at rates which render them a very desirable investment, and admit of a considerable advance in price upon the completion of the road.

The Road is so nearly completed that trains are expected to run over the whole line in December, after which the securities will be introduced at the Stock Exchanges, when they should soon take rank with Central Pacifics and other first class Bonds, on finished Roads.

The Central Pacific Bonds are quoted at all the principal Stock Exchanges of the world, and are held as the favorite American security in the European markets, where a large proportion of the entire issue has been absorbed. They are now comparatively scarce in this market.

We buy and sell either of the foregoing at current market rates.

Full information furnished upon application at our office, in person or by mail.

FISK & HATCH.

☞ The Philadelphia *Ledger* of 22d inst., reports the net anthracite coal tonnage for the week ending on the 12th inst., from all sources, at 332,786 tons, and for the year 15,151,286 tons, against 11,302,393 tons to the same date last year, being an increase in the tonnage of anthracite coal of 3,858,893 tons. The production of bituminous coal for the week was 59,992 tons, and for the year 1,987,332 tons, against 1,739,464 tons to the corresponding time last year—an increase of 247,868 tons. The total production of all kinds of coal for the week was 457,661 tons, and for the year 17,138,628 tons, against 13,041,446 tons to corresponding time last year, showing an increase of 4,097,182 tons.

☞ Mr. William Merritt, the accomplished superintendent of the Boston and Maine Railroad, has returned from his foreign trip. He has gained greatly in health, and the travelling public will be glad to know that he will soon resume his important duties. Mr. Merritt has served the Boston and Maine long and faithfully, and well deserves the high reputation which he holds as an experienced and able railroad man.

TO CAPITALISTS.

A DESIRABLE HOME INVESTMENT.

First Mortgage Gold Bonds

OF THE

New York, Kingston and Syracuse

RAILROAD,

PAYING 7 PER CENT. GOLD, FREE FROM U. S. GOV'T TAX.

PRINCIPAL AND INTEREST PAYABLE IN GOLD.

This road passes through the richest agricultural region of the state, and is speedily reaching completion. It is the most direct line between the great lakes and deep water navigation of the Hudson River from LAKE ONTARIO and the GREAT WEST.

The 78 miles of the road now in operation is unusually well built, and its net earnings already paying 7 Per Cent., Gold, on the cost of construction and its equipments.

We are now offering these bonds at 95 and accrued interest, feeling warranted in recommending them to our friends and investors generally as a safe and most desirable investment

Pamphlets with maps furnished, with full particulars, on application to

DEAN, McGINNIS & CO.,

Bankers, 30 Broad St., N. Y.,

And at the Office of the Company,

18 WILLIAM ST., N. Y.

☞ The First Mortgage Bonds of the New York, Kingston, and Syracuse Railroad—a very important route—are now being introduced into the market by Messrs. Dean, McGinnis & Co., bankers, of this City. This road passes through some of the richest counties of the State of New-York, tapping the main lines of the New York Central and other railroads, and so onward to the great cities of the West. The Bonds are placed on the market at 95, which should insure their being all taken up in a very short time. The interest on them, 7 per cent., is payable in gold, semi-annually, in New York and London. According to the engineer's report, this road, so far as yet constructed, is one of the best in the country—and, as it is thoroughly equipped, and its present earnings are sufficient to pay the interest on the Bonds, its Bonds may be looked upon as an eligible security.

☞ The Missouri, Kansas and Texas railroad is opened to Caddo station, thirty miles south of Aetoka. Trains are now run within twenty three miles of the Red river. Orders have been issued for the vigorous prosecution of the road to Dennison, Texas, which place is rapidly assuming the proportions of a city. The great bridge across Red river will be ready for the track by the 15th of November.

☞ Work on the Massachusetts Central Railroad, according to the Clinton *Courant*, is making favorable progress. Between forty and fifty miles are ready for the ties, but no track will be laid before next spring. One thousand men are at work on the line.

☞ It is rumored that the Boston and Providence Railroad Company, having bought the Stoughton branch, is seriously considering the matter of extending that road to North Bridgewater.

Journal of Railroad Law.

RAILROAD COMPANIES—INJURIES TO ANIMALS—WHERE BOUND TO MAINTAIN FENCES.

The facts in the late case of The Jeffersonville, Madison and Indianapolis Railroad Company *vs.* Parkhurst, (34 Ind., 501,) are fully and clearly stated in the following opinion by—

PETTIT, C. J.—This suit was brought before a justice of the peace, by the appellee, against the appellant, for killing a cow by its train of cars. There was a judgment for the appellee before the justice, and appellant appealed to the said court of Common Pleas. Trial, and judgment for appellee in that court, from which it is brought to this court by the appellant.

The errors assigned in the record are, first, that the court erred in giving instructions one, two, three, four, five and six, excepted to by appellant; second, the court erred in refusing to give instruction one, asked by appellant, and excepted to; third, that the verdict was contrary to the evidence; fourth, that the court overruled the motion of appellants for a new trial; fifth, the court overruled demurrers to the first and second paragraphs of the complaint.

Upon the saying that the first shall be last, and the last shall be first, we will commence with the last assignment; and upon this it is enough to say that, as no objection in any form was taken to these paragraphs in the Common Pleas court, though they were demurred to before the justice of the peace, and the demurrer by that officer overruled, we cannot inquire as to their sufficiency.

We cannot reverse, affirm or modify, the rulings or judgment of a justice of the peace brought before us in this form. We can only take notice of the proceedings of the Court of Common Pleas.

As to the fourth assignment, we think there was no error in overruling the motion for a new trial.

As to the third assignment, we have only to say, that it is not known to our law or practice as an assignment of error, and can only be regarded as an argument or reason under the fourth assignment of error.

As to the second assignment of error, refusing to give instruction asked, which was as follows: "If the jury find from the evidence that the cow in question came upon the railroad track and was killed, within the corporate limits of the city of Franklin, then the plaintiff cannot recover on the first paragraph of the complaint herein," there was no error in refusing to give this asked instruction. The Indianapolis and Cincinnati R. R. Co. *vs.* Parker, 29 Ind, 471, and cases cited there.

The first assignment of error is the giving of instructions, which are as follows:

1st. This is an action by the plaintiff against the defendant to recover damages for the killing of a cow on the track of the defendant, in Johnston county, and the plaintiff sets up in his complaint two grounds of recovery.

"2nd. The first paragraph of the complaint alleges that the cow was killed at a point on the railroad where it was the duty of the defendant to fence against stock, and that the defendant had not so fenced in her track, by reason of which the cow strayed upon the track, and was thus killed.

"3d. The second paragraph of the complaint alleges that the defendant so carelessly and negligently ran her locomotive and cars over the road, that the cow was killed by reason of such negligence in the defendant.

"4th. To enable the plaintiff to recover on the first paragraph of the complaint, he must show that the place where the cow strayed upon the railroad was at a point where the company were bound to fence the road, and that such point was not so fenced, or that such point was where the company were bound to maintain a cattle-guard, and that such guard was not in proper condition to keep stock off the track of the road.

"5th. If you should find from the evidence in this case that the place where the cow got on the track was inside the corporate limits of the City of Franklin, you must further find that such place was not at the crossing of any street or alley, or at a point where, from the necessary use of the grounds, it would be unlawful or unreasonable to require the railroad company to maintain a fence, before the road would be liable for not fencing.

"6th. The railroad company would not be bound to erect and maintain cattle guards at the crossings of the public streets and alleys inside the corporate limits of the City of Franklin, nor would said road be bound to fence the lots lying on either side of her track between the crossings of such streets or alleys over the railroad; but beyond such crossings the road would be bound to maintain her fences and guards, the same as if running outside the corporation."

We think and hold that there was no error in giving these instructions, and that they were clearly the law of, and proper in the case. The appellant could not complain of them.

The judgment is affirmed, with ten per cent. damages and costs.

Western Maryland Railroad.

The annual meeting of the stockholders of this company was held in Baltimore on the 16th inst., Nathan Harris., Esq., presiding. The president submitted the reports of the general superintendent, chief engineer and treasurer, which were read and approved.

The general superintendent reports the working of the road for the year to have yielded $188,192 72, and expenditures $154,008 68, showing a surplus of $34,184 04, and states that the road has been greatly improved by the use of 190 tons of new rails, 15,892 new cross-ties, and 13,237 perches of stone, five bridges having been renewed, and heavy stone abutments erected at three of them. The equipment has also been increased with 3 locomotives, 4 passenger coaches, 21 freight cars, 5 hand, and 6 truck cars.

The chief engineer's report shows that the construction of the Baltimore division is progressing satisfactorily, and will probably be completed by June, 1873. The work on the Williamsport division has been suspended, the contractors having stopped the work and left the locality. New contracts will be entered into and the work pushed forward.

The treasurer's report shows the receipts from freights, passengers, mail service, &c., to be $197,707 06; expended for transportation, repairs, machinery, cars, bridges, &c., $160,193 85; interest on loans and funded coupons, $30,474 83. The loans on the second preferred bonds have been placed at a much lower rate of interest than formerly; $525,000 of bonds, endorsed by the city, have been surrendered and cancelled, and $1,000,000 city stock received, of which $667,300 has been sold at full market rates, leaving $332,700 unsold and held as a separate fund, as required by the ordinance granting the loan.

The election for five directors, on the part of the stockholders, was proceeded with, and the old board—J. K. Longwell, Geo. W. Harris, John Welty, Issac Motter, and Joshua Biggs, Esqs.—were unanimously re-elected for the ensuing year.

The Port Royal Railroad.

On yesterday morning we stated that the track of the Port Royal Railroad had been completed from this city to the Savannah river, and that the first train would run on Tuesday afternoon. Major Geo. T. Jackson, of the Port Royal Railroad Company, desirous of giving our citizens an opportunity of judging how the work was progressing, got up an excursion over the road to the bridge, and issued invitations to the Mayor and the City Council and a number of our leading citizens. The excursion train was to leave the Union Depot at half-past three o'clock, and when that hour arrived a large and very pleasant party filled the cars. Among those present were President King, and Messrs. D. E. Butler, George T. Jackson, Stevens Thomas, W. W. Clarke, J. S. Hamilton, and M. H. Stovall, Directors, and Col. S. K. Johnson, Superintendent of the Georgia Railroad, Mayor Estes, and others.

The train consisted of two handsome passenger coaches and an engine, under the charge of Conductor Henry Edmondston.

A pleasant ride of a few minutes brought the train and its passengers to the trestle work, a short distance from the bridge. Here the party left the cars, and proceeded on foot a short distance to the Savannah river. They found the work upon the bridge, which is to span that stream, rapidly progressing. The piers—seven in number, including the abutments—are of brick work, but of the most substantial and durable character. The foundation consists of piling driven as deeply into the bed of the river as was practicable and, above the piling, three feet of solid timber. Upon this foundation the piers rise, made of Augusta brick and the finest quality of cement. When completed the bridge will be one of the handsomest structures of the sort in the country. It is believed—if no adverse circumstances intervene—that the bridge will be finished by the first day of December. Major Jackson's portion of the road—extending thirty miles from the other bank of the Savannah—will be ironed and ready for use by that time. It is thought that the lower end of the route will be finished thirty days later, and by the first day January Augusta will have a short and direct line of railway connecting her with deepest and finest harbor on the coast of the South Atlantic.—*Augusta Chronicle, Oct.* 16.

Finances of Texas.

The following figures are from a statement furnished by the Texas State Comptroller, under date September 20th, in response to inquiries:

The assessed value of property in the State for the year 1871, per rolls, is $220,290,524. For 1872, but few rolls have been received, which have not yet been compiled. The total taxation for 1871 is $6,309,846 15. The fund to be expended in erecting the schoolhouses does not pass through this office. This character of expenditures should be made from the one per cent. school tax, levied by the Board of School Directors, which is provided by law "for the purpose of building schoolhouses and maintaining schools." The amount of this tax, upon above valuations for 1871, if collected, would be $2,202,905 24, and is subject to the uncontrolled disbursements of the Superintendent of Public Instruction. There has been disbursed (from funds received at the State Treasury) during the fiscal year ending August

31, 1872, to teachers and employees, the sum of $496,596 14. For this disbursement vouchers have been filed in this office.

The debt of the State on the 4th of March, 1872, was $338,969 66. The present indebtedness is $2,724,969 66. The prospective liability of the State, arising from laws providing for subsidy to railroad companies, is $12,000,000, to be paid in bonds of the State, bearing eight per cent. interest, and redeemable in thirty years, making an annual requirement of $1,200,000, to which may be added the annual interest upon subsisting debt, which will closely approximate $160,000.

☞ A correspondent of a Roman paper, *La Riforma*, writing from Tunis, gives an account of the opening of the railway from Tunis to the Goletta, on the 31st of August. The Bey, with his family and ministers, the diplomatic and consular corps, and the heads of all religious bodies were on the train, and on its arrival at Goletta partook of a banquet. Two days later, the road was opened for regular traffic, and the ticket offices were thronged with persons desirous of trying the new means of locomotion. Over five thousand passengers were carried that day, and as many more the next.

☞ James H. Hoyt, General Superintendent of the New York and New Haven Railroad, who resigned on the 1st inst. had held that position for nineteen years, and during his long administration not a single passenger lost his life by collision of trains or mismanagement.

OFFICE OF THE PORT ROYAL RAILROAD CO., 39 South St., New York.

THE Coupons of the Port Royal Railroad Co's Bonds, due Nov. 1st, will be paid at the Office of the Company at maturity.

R. H. THAYER, Treasurer.

Locomotives for Sale.

SEVEN LOCOMOTIVE ENGINES FOR SALE, built for Peruvian Railways—all for Standard gauge of 4 feet 8½ inches. Five built at Rogers Locomotive Works, and two at Danforth Works; all of the very best materials, designs and finish. Six have cylinders of 17 inches x 22 inches, with six driving wheels of 49 inches diameter, and one pair truck wheels—One a tank engine, cylinders 10½ inches x 18 inches. Driving wheels four, 34 inches diameter. These engines sold on account of the construction of the railway they were intended for being suspended for a time. For further particulars apply to

W. W. EVANS, 47 Exchange Place, New York.

Oct. 7, 1872.

ROGERS CO. ENGINES, FOR PACASMAYO RY, PERU.

4 Engines, Mogul design—
Gauge, 4 feet 8½ inches.
Cylinders, 17 inches x 22 inches.
6 Driving wheels, 48½ inches diameter.
2 Truck wheels, 30½ inches diameter.
Furnace, steel.
Flues, 165 iron, 10 feet 8 inches long, 2 inches diameter.
Fuel, Soft Coal.
Tender tank, to hold 2,000 Winchester Gallons.
Weight, empty, about 63,000 pounds; loaded 71,500 pounds.
Price, $18,500.

DANFORTH ENGINES, FOR PACASMAYO RY.

2 Engines, Mogul design—
Gauge, 4 feet 8½ inches.
Cylinders, 17 inches x 22 inches.
6 Driving wheels, 49 inches diameter.
2 Truck wheels, 30 inches diameter.
Furnace, Steel.
Flues, 175 iron, 10 feet 4 inches long, 2 inches diameter.
Fuel, Soft Coal.
Tender tank to hold 2,000 Winchester Gallons.
Weight, empty, about 63,000 pounds; loaded, 71,500 pounds.
Price, $17,500.

ROGERS ENGINE, PACASMAYO RY.

1 Tank engine—
Gauge, 4 feet 8½ inches.
Cylinders, 10½ inches x 18 inches.
4 Driving wheels, 34 inches diameter.
No truck wheels.
Steel Furnace.
Flues, 65 iron, 9 feet 10 inches long, 2 inches diameter.
Fuel, Soft Coal.
Tank, 400 gallons.
Price, $11,500.

HAND'S IMPROVED DUMPING CART.

PATENTED APRIL 4th, 1871.

THE MOST PERFECT YET INVENTED.

Can be dumped by a single motion of one hand while you hold the horse with the other.

The tail-board being attached to the shafts, lifts of its own accord when the cart is dumped, as seen on the right of the engraving. As soon as the load is dumped all you have to do is to start the horse, and the cart will resume its proper position, as seen in the left of the engraving, hook itself and replace the tail-board, without any assistance of the driver whatever. The shafts are attached to the outside of the body, near the hubs, which gives the horse great control over the cart, and prevents the body from playing from side to side as they do when the shafts are pivoted underneath.

Manufactured and for Sale by **WILLIAM & HENRY HAND,**

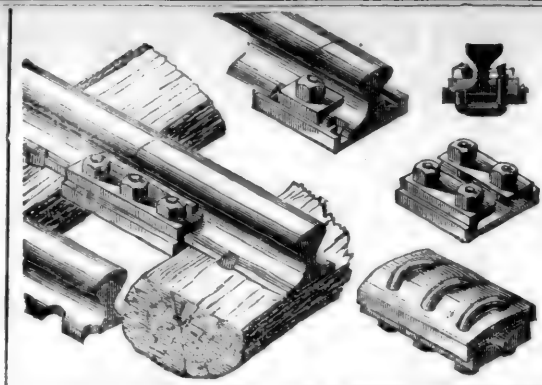
RAILROAD IRON

Of every Size, Weight and Pattern,



For Steam and Street Roads.

ROLLING STOCK & SUPPLIES.

Old Rails Re-Rolled & Exchanged for New.

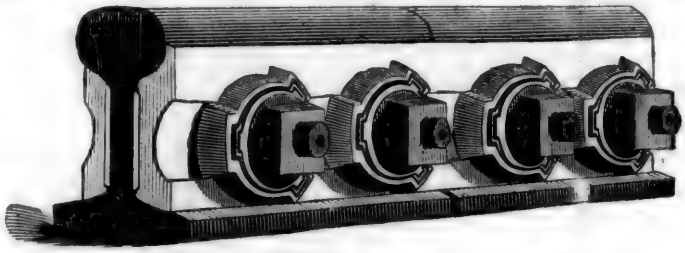
☞ Special attention paid to the Purchase and Sale of Old Railroad and Scrap Iron.

CONSIGNMENTS SOLICITED.

FISHER'S PATENT

Wrought Iron

RAIL JOINTS,



MADE BY

FISHER & NORRIS,

TRENTON, N. J.

The Superiority of these Joints has been proved by eight years' use on different Roads.

PRATT'S PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

RAILROAD IRON.

ENGLISH and AMERICAN Railroad Iron for delivery in New York and other markets in the United States and England. For sale by

St. Louis and Southeastern Railway.

The Frankfort (Ky.) *Yeoman*, of October 22nd, says articles of consolidation between the St. Louis and Terre Haute Railway Company of Illinois, and the Indiana, Evansville, Henderson and Nashville Railway of Kentucky, and St. Louis and Southeastern Railway Company, Kentucky division, and the Nashville, Chicago and St. Louis Railway Company, were, on Friday last filed with the Secretary of State, under the name of the St. Louis and Southeastern Railway Company, consolidated. It is further understood that the board of trustees may adopt the name of the St. Louis, Evansville, Henderson and Nashville Railway, instead of the consolidated name, or may use such name in the business. The capital stock of the consolidated company shall be $1,660,000, divided into 160,000 shares, 60,000 of which shall be held as preferred stock and the balance common. This stock shall be exchanged share for share with that held by the stockholders of the several companies so consolidated. The stockholders will meet in Evansville to-day for the purpose of electing their board of trustees. The board is authorized to borrow money on bonds or other evidences of debt not exceeding $21,000 per mile of stock.

NOVEMBER INVESTMENTS

We continue to sell at par, adding accrued interest, the First Mortgage Gold Bonds of the Northern Pacific Railroad Company. On the completion of this season's contracts, there will be FIVE HUNDRED AND SEVENTEEN miles of the main line of the Road in operation, uniting Lake Superior with the Missouri River, and securing the large traffic of the Northwest. This amount of Road also entitles the Company to Ten Million Four Hundred Thousand Acres of Land, located in Central Minnesota, Eastern Dakota, and in the Columbia Valley on the Pacific Coast. The Bonds are secured by a first mortgage on the Road, its Traffic and Franchise, and on the entire Land Grant received from the Government. The rate of interest is Seven and Three-Tenths Gold —equivalent to about Eight and a Quarter per cent. in currency. Believing the security to be ample and the rate of interest satisfactory, we recommend these bonds as a desirable investment. Holders of United States Five-Twenties and high-priced corporate securities may materially increase both their principal and their interest income by exchanging for Northern Pacifics.

JAY COOKE & CO.,

New York, Philadelphia and Washington.

☞ We learn from the Detroit *Tribune* that the locomotive is rapidly making its way eastward, from Amherstburg, on the Canada Southern Railway. The work of track-laying is progressing at the rate of a mile and a half per day. The engine is now out some ten miles from the town and going forward every twenty-four hours, to the great delight of the people on the route. It is expected that the whole line will be opened this fall. The line north from St. Thomas is progressing equally as well, and will be completed nearly as soon as the main line.

Present Condition of the Northern Pacific Railroad.

It is announced that by the middle of November this new road will be completed to the Missouri River, 452 miles west of Duluth. This will be an addition of 200 miles since Spring. Trains have been running daily between Duluth and the Red River since April last, and new rolling stock is ready to equip the extension.

On the Pacific side in Washington territory a small section of 25 miles has been some time in operation. Forty miles more of track will be completed before the close of the season. Adding the completed portion on the Pacific side to the Eastern section it gives a total of 517 miles of track laid in little more than two years from the commencement of work. When the delays encountered the first year in making the surveys and deciding on the best line through the forest region are considered, the result is marvelous, and attests the energy with which the work is pushed forward. Some idea of the work accomplished will be conveyed by stating that the finished portion of the road in November will exceed in length the New-York Central, with all its lateral and branch lines included.

Besides the actual construction, the work of surveying and locating the entire line across the continent has proceeded with vigor. The exploring parties have fought a few scattering Indians, but have carried their surveys successfully to the Yellowstone. The portion of the road now in operation has a large and increasing local traffic. It intersects the Red River at Moorhead, and from Glyndon, eleven miles east of Red River, a new railroad is being constructed northward up the valley to Pembina, where it will meet and join a line now being built southward from Fort Garry. It commands the eastward bound freight and travel of the British settlements in Manitoba, and also of the Hudson's Bay Company. It will also be the outlet of a large portion of the grain grown in Minnesota.

When the contracts for this season are completed, the company will have a permanent business in the great traffic of the Upper Missouri River, with all the Government transportation in the North-West. A few miles beyond the point where the railway strikes the Missouri the river bends to the westward, and is navigable for steamboats for 1,000 miles of water way from the railroad crossing to Fort Benton, at the foot of the Rocky Mountains, in Western Montana.

Nearly forty steamers have been employed during a single season in the trade of these upper waters.

In April next, at the opening of navigation, there will be direct communication, east and west, by rail and river, from Lake Superior, in longitude 92 degrees, to the populous districts in West-

ern Montana, in longitude 110 degrees. From this point westward it is about 400 miles through the passes of the Rocky Mountains to that portion of the Columbia River whence it is navigable to the Pacific.

The finished sections of road entitle the Company to about ten million acres of land, granted by the Government, constituting an area about twice the extent of Massachusetts. Ten million contiguous acres belonging to the Government are at the same time rendered habitable and salable. The lands are situated on either side of the line, and principally consist of excellent farming land, with the productive soil characteristic of all the prairie region. Settlers have already applied for more than a quarter of a million of acres. The company has already begun the cancellation of its seven-thirty first mortgage bonds by the proceeds of its sales of land, and is accomplishing its great work with the utmost success and economy.

There is a prospect of a large emigration of the tenant farmer class from England in the coming Spring. One colony alone, recently formed there, through its pioneer agents secured a tract in Clay County, in Minnesota, of 185,000 acres directly on the line of railway. The intended settlement is to be named Yeovil, after a town in the West of England whence the majority of the colonists will come. The first contingent of this colony numbers about 2,000; the remainder will follow in 1873.

The bureau having in charge the Land Department of the road has built and furnished convenient reception-houses for the free accommodation of intending settlers and their families while engaged in selecting their farms. One of these is at Duluth, another at Brainerd, where the road crosses the Mississippi, and a third at Glynden, in the Red River Valley. Emigrants used to trundle with their ox-carts over forlorn and desolate prairies, and bivouac where the night found them. It is quite different now. They are carried in comfort to the very sites of their future homes—and the organization of the system is such that they are protected from imposition or spoliation from the time they leave their old homes across the water till they begin the foundation of their new ones under the sunset. Every able-bodied and industrious man and woman who comes hither makes the nation richer and contributes to the general prosperity, and in this view the condition and prospects of the road are a source of legitimate congratulation. Arrangements are making for pushing construction east and west during 1873.—*N. Y. Tribune.*

Carolina Narrow Gauge R. R.

In February last an act was passed by the North Carolina Legislature to charter the Carolina Narrow gauge Railroad in that State. The road is designed to run from Chester to York in South Carolina, and from thence in a direct line to Lenoir, North Carolina, passing through the towns of Dallas, Lincoln and Newtown, North Carolina, a distance of about one hundred miles. The road is to be a narrow gauge road, and the cost of its building and equipment will be about $7,000 per mile. The country through which it passes is a very rich grain bearing section, the product of which goes now by the way of Charlotte, North Carolina, to Baltimore. The president avers that corn which is now sold in that section for forty cents per bushel, costs about twenty-four cents transportation to Baltimore, and from Baltimore to Charleston as much more. Hence consumers at the latter place are compelled to pay double prices. He contends that by the completion of the new road, it can be taken direct to Charleston at a cost of about fifteen cents, a very material reduction in the price. The cost of the construction of the road being so much less, and the cost of running expenses being also so much less than that of the ordinary broad gauge road, will enable the new road to transport freight at proportionately lower rates, and by this means it is thought that a large and valuable trade will be diverted to Charleston. The capital stock of the road is fixed at $700,000. It is proposed to raise $200,000 by private subscription, and as soon as this shall have been done, the various counties through which the road will pass have promised to subscribe the balance.

Grand Trunk Railway of Canada.

REPORT OF THE DIRECTORS FOR THE HALF-YEAR ENDING JUNE 30, 1872.

The gross receipts upon the whole undertaking have been		£869,479
Deduct—The ordinary working expenses (being at the rate of 68.48 per cent., against 68.26 of the corresponding half of last year)	£595,416	
The renewals, &c., for the permanent way and works in the half-year debited to revenue.	76,781	
		672,197
Leaving an available balance earned in the half-year of		£197,282
Less amount of sundry expenditure as per revenue account		21,820
		£175,462
Deduct—Loss on American currency		10,635
Balance		£164,827
To this sum of		£164,827
has to be added the balance carried from the net revenue account of last half-year of		1,650
Making a total balance of		£166,477
From this, however, has to be deducted the amount of postal and military revenue due for the half-year to the postal bondholders of		16,339
Leaving the balance of		£150,138
Applicable for the following payments, viz.:—		
Interest on hired cars		£23,020
Interest, &c., paid on lands		1,775
Interest on mortgage to bank of Upper Canada		4,424
Interest on loans, bankers' balances, promissory notes, European exchange, &c		852
Interest on British American Land Company's debentures		616
Interest on Montreal Seminary debentures		616
Interest on Island Pond debentures		2,700
Half-yearly instalment on Portland sinking fund		2,568
Atlantic and St. Lawrence lease (in full)	29,088	
Detroit line lease (in full)	11,250	
Montreal and Champlain Railway	14,075	
Buffalo and Lake Huron	27,500	
		81,913
1st equipment bonds interest	15,000	
2nd " "	15,000	
		30,000
Balance carried forward		1,653
		£150,138

Comparing this half-year with the corresponding period of 1871, the gross receipts show an increase of £93,597, or 12.06 per cent. There was an increase in the passenger receipts of £6,278 or 2.40 per cent., and in the freight receipts of £87,050, or 15.02 per cent. The total number of passengers carried was 733,748 against 764,376, and the tonnage of freight was 737,361 against 666,092 tons. The falling off in the number of passengers mainly arose from there having been a smaller number of emigrants than last year. The average receipt per passenger was 6s. 5d. against 6s., and per ton of freight 16s. 3d. against 15s. 5d. The following table gives the numbers of passengers and tons of freight conveyed each half year since 1863, with the average receipts per passenger and per ton of freight for the same periods:—

	Passengers.			Freight.		
Half-year.	Nos.	Average per passenger. s.	d.	Tons.	Average per ton. s.	d.
1872, June	733,748	6	5	737,361	6	3
1871, Dec.	961,432	6	1	789,331	15	5
1871, June	764,376	6	0	666,092	15	5
1870, Dec.	937,879	5	11	691,301	14	0
1870, June	700,334	6	5	612 959	14	6
1869, Dec.	892,697	6	3	611,809	15	7
1869, June	655,850	6	9	520,881	16	0
1868, Dec.	804,815	6	9	557,157	16	3
1868, June	619,298	6	8	505,987	16	1
1867, Dec.	794,213	6	10	527,227	15	4
1867, June	623,227	6	8	489,647	15	1
1866, Dec.	792,487	7	2	523,685	15	5
1866, June	638,708	7	0	497,292	15	4
1865, Dec.	784,346	7	2	523,830	15	5
1865, June	596,571	6	3	477,837	16	11
1864, Dec.	722,446	6	6	443,930	16	1
1864, June	523,284	6	0	430,034	16	3
1863, Dec.	529,782	6	5	372,984	15	1
1863, June	395,056	6	0	339,484	17	3

The working expenses for the half year amounted, including renewals, to £672,197, or 77.31 per cent., as against £596,417, or 76.87 per cent. of the gross receipts for the corresponding period of 1871. Exclusive of renewals, of the ordinary working expenses were £595,416 against £529,636, or 68.48 per cent. against 68.26 per cent. of the receipts. Early in the year a heavy and rapid rise took place in the cost of all materials, and in the price of labour. The average increase in wages has exceeded 10 per cent., and the increase in the cost of fuel has exceeded 15 per cent. There was also a large additional consumption of fuel in the past half-year, in consequence of the winter 1871 2 having continued six weeks longer than in ordinary seasons. The general rise in the price of wood has rendered it difficult to obtain the necessary supplies except at greatly increased prices, and it has become desirable to provide for the consumption of coal. Arrangements have therefore been made for a supply of 40,000 tons from the Nova Scotia mines, for next year's delivery. The high prices which have ruled in this country for coals are somewhat increasing in their value on the American Continent, and it is not likely that the use of coal will result in any considerable saving on past expenditure for wood fuel; but the use of coal will probably check the further increase in the price of wood which would otherwise undoubtedly have taken place. The total train-miles run were 3,280,362, against 3,153,981, showing an increase of 126,381. The increase in the car mileage was 2 889,869 miles. The cost per train mile in the locomotive department was 33.36 cents, against 29.05 cents for June, 1871, and in the car department the cost per mile was 0.870 of a cent, against 0.819. This increase of cost was mainly due to the causes already referred to. The loss on the conversion of the American currency amounted in the half year to £10,635 against £7,129, arising from a higher rate of exchange and larger receipts from the through traffic. The President is still in Canada, where he has, during the past two months, been examining the actual condition and enquiring into the prospects of the undertaking; and the board learn from his letters that he has been engaged in many important matters, in regard to which he will, after his arrival, have much information to afford. As he may be unable, however, to sail from New York until the end of the present month, it becomes necessary to adjourn the half yearly meeting advertised for the 31st instant. That meeting will, therefore, be held *pro forma*, and will be adjourned until Thursday, 28th of November, when it is expected that Mr. Allport, who has accompanied

the president, will also be able to attend. The half yearly reports of the engineer and mechanical superintendent are appended, as is also the list of stock and bondholders whose names are now registered in the Company's books.—By order of the board,

J. GREEN, pro Secretary.

Grand Trunk Railway Offices,
21, Old Broad street, London, E. C.,
October 10, 1872.

DIRECTORS.—Richard Potter, Esq., Standish-house, Gloucester, president. Thomas Baring, Esq., M. P., Bishopsgate-street, E. C.; Charles John Brydges, Esq., Montreal; Hon. James Ferrier, Montreal; Robert Gillespie, Esq., 35, Onslow square; Kirkman Daniel Hodgkinson, Esq., M. P., Bishopsgate-street; Grosvenor Hodgkinson, Esq., M. P., Newark; Graham Menzies, 83, Queen's gate, W.; William Molson, Esq., Montreal; John Swift, Esq., 23, Great Cumberland-place, W.; Captain Tyler, Wyvenhoe hall, near Colchester; Lord Wolverton, 67, Lombard-street, E. C.

Nashville and Chattanooga Railroad.

The Nashville and Chattanooga Railroad owns the main line from Nashville to Chattanooga, Tenn., 151 miles; a branch from War Trace (56 miles southeast of Nashville) southwest to Shelbyville, 8 miles, and a branch from Bridgeport, Ala., (133 miles southeast of Nashville) northeast to Jasper, Tenn., 14 miles. It thus has 173 miles of road.

The Nashville, Memphis and St. Louis Railroad (late Nashville and North western), which is now substantially owned by this company, extends from Nashville west to Huntingdon, Tenn., 109 miles, and thence north-west to the Mississippi at Hickman, Ky., 63½ miles, being thus 172½ miles long.

The following is an abstract of the annual report:

The gross earnings for the past fiscal year, from passengers, freight and mail have been	$1,800,757 70
Total expenses	1,258,264 93
Net income	$542,492 77

Out of this the following payments have been made:

Interest on company's bonds	$103,860 00
$23,700 on State loan, paid in State bonds and coupons, cost	14,220 00
Interest on bonds paid to U. S. Government	40,000 00
Interest on bonds of Nashville and North-western Railroad, endorsed by the Nashville and Chattanooga Railroad Company	2,400 00
Damages on account of flood at Chattanooga in 1867	9,275 66
Capital stock bought in	1,319 62
Real estate and depot grounds	23,720 54
For locomotive engines	105,288 24
Expenses and lawyers' fee in settling with the U. S. Government claim	27,000 00
For new bridges	62,485 55
27 bonds on hand of the Nashville and Chattanooga Railroad Company; 22 of the State of Tennessee, and 3 of the City of Memphis bonds on hand	35,812 20
Old dividends paid	1,068 06
Stock in Edgefield and Kentucky Railroad Company, cost	165 00
6 per cent. dividend on $2,021,373 30.	121,294 40
Total expenditures	$547,909 27
Amount overpaid	$5,416 50

Liabilities credited:

For new railroad iron	$90,745 25
For new bridges	72,668 74
Real estate and depot grounds	19,250 00
Total new liabilities	$182,663 99

The large increase of $434,821 45 in receipts of freight last year over the year previous, is as gratifying to the directors as they trust it will be satisfactory to the stockholders.

The falling off in passenger earnings, and from rents and privileges is the experience of all principal roads in the South; which leads to the conclusion that scarcity of money was the principal cause of this falling off.

NASHVILLE AND NORTH-WESTERN RAILROAD.

This road, now purchased and operated by the Nashville and Chattanooga Railroad Company, shows the earnings from freight, passage, &c., to be $616,329 78. During the same time $982,526 has been paid on account of operating this road, renewing the track and bridges, purchasing equipments, &c.

The notes of the company with interest have been given for these amounts, falling due at different dates in the next twelve months, to which will be added $21,240, the cost of the "iron draw" in the Tennessee River bridge at Johnsonville.

The earnings of the road increased over the year 1869-'70 $200,240 01, and over the year 1868 69 to the amount of $362,295 26, from the beginning of which year we may date the opening of this road for business, practically although in bad condition at that time. The road will now compare very favorably with most of the Southern roads.

To operate this road and bring it up to its present condition, adding the amount paid for cars and, increase in motive power, depot grounds, &c., has cost $831,927 50 over and above the earnings received from it, counting from the 1st of September, 1868, date of first lease. Its importance to the Nashville and Chattanooga Railroad as a connection is shown by the through freight business, amounting to $243,063 91 for the last year, while for the year previous it amounted to only $75,178 64.

HUNTINGDON AND JACKSON BRANCH.

The construction of the branch between Huntingdon and Jackson was postponed until the title of the Nashville and Chattanooga Railroad Company to the Nashville and Northwestern road could be clearly established, about which there is now no doubt. This will give the shortest route, *via* the Nashville and North-western Railroad, to Mobile and New Orleans, and much the shortest route to Memphis.

Northern Railway of Canada.

The Canadian Directors have the honor to submit their report for the half year ending 30th June, 1872, with the usual returns of income and expenditure, details of accounts, and auditors' reports.

The gross traffic receipts from all sources have amounted to $390,271 03, as against $364,441 76 for the corresponding period of 1871, being an increase of $25,829 27 or 6.61 per cent. in favor of the last half year.

The ordinary working expenses of the half-year have amounted to $238,364 79, as against $229,561 02 in 1871, being at the rate of 61.07 per cent. of the gross earnings in comparison with 62.98 per cent. in the previous half year.

The additional outlay on works of extension has been $63,164 50, as against $46,927 25 in 1871.

The net revenue of the half year available for dividend has been $88,741 74, as against $87,953 49 in 1871. After payment of current dividends on all classes of company's bonds, a balance has been carried forward to the credit of revenue account.

The Directors are happy to report that the lines of the Northern Extension Railway Company are in rapid progress of construction. Twenty-two miles of the line between Barrie and Orilla have been in traffic operation during the last six months, and the earnings have been most satisfactory, and sufficient in amount to meet all interest liabilities, without any recourse to the guarantee of this company under the lease. A further length of the Muskoka branch, to the village of Atherly, will be opened for traffic on or about the 15th instant. Of the North Grey branch, 12½ miles to Thornbury were opened on the 2d instant, and the traffic is already active and satisfactory.

The traffic on the main line has been more active, and its earnings have reached a higher standard than at any previous period. Due to the late opening of navigation and to the insufficiency of lake craft, the trade of the line has been considerably embarrassed, and would seem to indicate the absolute necessity of immediate additions to the rolling stock equipment, to the shipping facilities at Toronto, and to some organization which will place lake transport on a sufficient basis to relieve the line of the freight constantly awaiting shipment.

Serious damage was done to the breakwater at Collingwood during last winter, and the necessity of restoration was so apparent in the public interest that a conditional grant of $35,000 was made last session by the Dominion Legislature. The Directors are now in negotiation with the authorities of Collingwood upon the subject, and they are not without hope that some arrangement may be arrived at which may secure the reconstruction of the works on the terms required by the Legislature.

JOHN BEVERLY ROBINSON, President.
Toronto, September 4, 1872.

Charlotte, Columbia and Augusta Railroad.

At the regular annual meeting of the stockholders of this company, held in Columbia, S. C., on the 22d ult., 18,306 shares of stock being represented in person or by proxy, the following gentlemen were elected directors for the ensuing year: Jno. B. Palmer, A. B. Davidson, J. H. Rion, W. R. Roberston, H. Robertson, J. H. McMaster, B. D. Hansard, South Carolina; H. B. Plant, S. D. Heard, Josiah Sibley, Jno. J. Cohen, Georgia; Wm. Johnston, R. R. Bridgers, J. W. Thompson, North Carolina; A. S. Budford, Virginia; W. T. Walters, Maryland; M. K. Jesup, New York; and B. F. Newcomer, Maryland.

Col. Jno. B. Palmer, of Columbia, S. C., was elected President of the Company.

Mr. B. F. Newcomer introduced the following resolution, which was unanimously adopted:

Resolved, That with a view of adjusting and providing for the payment of the floating debt of the company, and for the purpose of fully completing, equipping and operating its line of railroad, the President and Directors are hereby authorized and empowered to issue a series of one thousand bonds for the sum of one thousand dollars each, bearing interest at the rate of seven per centum per annum; and to secure the payment of said bonds they are hereby authorized to execute a mortgage on the railroad and all other property and franchise of the company, or any part thereof. The said bonds to be dated and made payable at such time, and to be signed, attested and otherwise executed in such manner as the said President and Directors may determine upon.

It was decided to hold the next annual meeting on the first Tuesday after the second Monday of November, 1873, at Columbia, South Carolina.

☞ The certificate of incorporation of the West End Union Station House and Junction Railroad Company of Cincinnati, with a capital stock of $125,000, was filed with the Secretary of State on the 25th ult. The Ohio and Mississippi Railroad Company and the Marietta and Cincinnati Railroad Company (as reorganized) are the parties to the Association, the object of which is to build a union depot in the Twenty-first ward of Cincinnati, and building a union track to unite the roads of the companies.

☞ Engineers are surveying a railroad route from Hancock, Maryland, through Fulton county, to the Broad Top coal regions.

Alabama and Chattanooga Railroad.

The following is the order issued by Governor Smith, which places this road in full possession of the new receivers and managers as tenants at will of the State of Georgia. It will be seen that the supreme power and authority of the State is fully acknowledged:

Executive Department,
State of Georgia,
Atlanta, Ga., October 7, 1872.

Whereas, William J. Haralson and Louis Rice, claiming to be receivers of the Alabama and Chattanooga Railroad, under decree of the Circuit Court of the United States in and of the State of Alabama, and J. C. Stanton, claiming to be general manager of said road, have, in writing, under their hands and seals, admitted the possession of said road lying and being in the State of Georgia, by the authorities of the State to be and to have been rightful and proper;

And whereas, The said parties have agreed to hold possession of said road under this State, and as the tenants at will of the Governor of this State, and to deliver the same on request to the said authorities without question as to their right to demand such possession:

And whereas, the said parties have also admitted that the State of Georgia, by its legal authorities, in case of refusal to deliver such possession, has the right to take the same by force; and have further admitted that, if either of said parties or their assigns shall set up claim to said possession adverse to the rights of said State of Georgia, such claim shall be an abandonment of the right and possession of said parties;

And whereas, The true interests of the State of Georgia require that said road shall be repaired and operated without expense to the State, and which cannot be done if the State, by its authorities, continues to operate the same;

It is therefore ordered, That W. T. Wofford, the receiver of the State of Georgia, the sheriff of Dade county and his deputies, and all other agents of this State, having and holding possession of the Alabama and Chattanooga Railroad in this State, without delay, deliver up the possession of the same to said Wm. J. Haralson and Louis Rice or their duly authorized agents; and the said Wm. J. Haralson and Louis Rice be, and they are hereby authorized to have and hold possession of said railroad lying within said State, as tenants at will of the Governor of this State, subject to be dispossessed of the same at any time, when the said Governor or his successors in office shall deem such dispossession fit and proper; and in every respect the said receivers shall hold said possession upon the terms specified in their written agreement delivered to the Governor of Georgia, bearing date of the 4th of October, 1872; and that they shall have no other rights, powers or privileges than such as are granted or allowed them in said written agreement.

The following document explains itself:

Georgia, Fulton County.—In consideration that His Excellency, James M. Smith, Governor of Georgia, will, upon the signing and delivery of this paper to him, deliver to us possession of so much of the A. and C. R. R. as is in said State, which he holds under the laws of Georgia:

We, Wm. J. Haralson and Lewis Rice, (claiming to be receivers appointed by the Circuit Court of the U. S. and for the State of Alabama under a bill filed by Seth Adams *et al. vs.* the A. and C. R. R. Co. *et al.*) and J. C. Stanton as general manager of said road, accept said possession held as aforesaid under said Smith as such Governor, and recognize the rightfullness of the possession of said road in the agents of said State under the laws of said State up to this date.

We agree to re-deliver possession thereof to said Governor and his successors in office, or his or their agents or appointees at any time upon demand of us or our successors or assigns without questioning the authority to make such demand; and that if such possession is not delivered peaceably, he has the right to take it per force.

And in case we or either of us or our successors or assigns shall set up any claim to such possession in opposition to said rights of said Governor, it shall be considered an abandonment of the right of possession given to us under this agreement.

Said receivers or their agents shall also have the right to surrender the possession of said road to the said Governor or his agents at any time.

Provided, nevertheless, that if hereafter said Governor or his successors in office shall demand possession of said road in said State, and the peaceable possession thereof shall be delivered to him, then after such possession so delivered, nothing in this paper shall be binding on us or such Governor; nor shall we be stopped or bound by any admission, attornment, recital or agreement herein, but we and such Governor shall stand in all respects as if this arrangement were never made.

In witness whereof, we have hereunto set our hands and affixed our seals the day and year first aforesaid.

Wm. J. Haralson, Receiver.
Lewis Rice, Receiver.
J. C. Stanton, Gen. Manager.
By Dan'l S. Printup, as
Attorney and Agent.

Signed, sealed and delivered in the presence of
N. J. Hammond,
Not. Public Fulton Co., Ga.

Pittsburg, Cincinnati and St. Louis Railway.

The financial condition of this company is exhibited in the annexed official statement made to the Committee on Stock List of the New York Stock Exchange—application having been made to have the securities of the company placed on call:

The Pittsburg, Cincinnati and St. Louis Railway Company was organized May 1, 1868, by the consolidation of the Steubenville and Indiana Railroad Company, the Holiday's Cove Railway Company, and the Pan Handle Railroad Company, under the laws of the States of Ohio, West Virginia and Pennsylvania. Length of road from Birmingham, opposite Pittsburg, to Newark, Ohio, 159 miles; one-half interest in Central Ohio Railroad, from Columbus to Newark, Ohio, 33 miles; branch from Cadiz Junction to Cadiz, Ohio, eight miles. Total, two hundred miles. Capital stock, 200,000 shares of $50 each. Of which 60,000 was preferred seven per cent. stock, and 140,000 shares common stock. There are also in the hands of the company 75,000 shares preferred stock, created by special action of the shareholders at their annual meeting February 5, 1872. Of this 70,000 shares preferred stock 60,000 shares are to be issued to the Pennsylvania Railroad Company at par for payment of that amount borrowed of that company for the purpose of improving and further equipping the road, leaving to be hereafter issued as occasion may require 10,000 shares. The funded debt of the company is: First-mortgage consolidated 7 per cent. bonds, dated August 1, 1868; maturing August 1, 1900, interest payable February 1 and August 1 at the office of the Pennsylvania Railroad Company in Philadelphia—$10,000,000; denomination, $1,000 each. First mortgage six per cent. bonds, dated May 1, 1864, maturing May 1, 1884, interest payable monthly, according to series (of which there are 12), at the agency of the company in New York, $3,000,000, denomination, $1,000 each; first mortgage 7 per cent. bonds, dated Sept. 1, 1864, maturing Jan. 1, 1890, interest payable Jan. 1 and July 1, at the office of the Pennsylvania Railroad Company, in Philadelphia, $775,000, denomination, $1,000 each. The company has an additional debt, incurred for equipment, double track, extension of side tracks, depots, shops and other improvements, amounting to $3,925,971 56. Of this debt $3,049,893 21 are held by the Pennsylvania Railroad Company ($3,000,000 of which, as already stated, is payable in preferred stock at par, and the remainder in income bonds of the Columbus, Chicago and Indiana Central Railroad at par), and $876,078 35 are held by the Pennsylvania Company. To meet this debt the company holds securities to the amount of $4,104,000.

The following roads are leased by this company, viz: Chartiers railway, 23 miles; Little Miami, Columbus and Xenia Railroad, 197 miles; Columbus, Chicago and Indiana Central Railway, 587; Jefferson, Madison and Indianapolis Railroad, 210; St. Louis, Vandalia and Terre Haute Railroad, 165. Total, 1,159 miles.

Lynchburg and Danville Railroad.

At a meeting of the stockholders of the Lynchburg and Danville (Va.) railroad, held in Lynchburg, on the 15th inst., the proposition of consolidation made by the directors of the Orange, Alexandria and Manassas Railroad Company was accepted, and the contract signed by the representatives of both roads. The basis of consolidation is that the shares of the consolidated company shall be of the par value of $50 each, the stockholders of the Orange and Alexandria Company receiving share for share, and in the other receiving two shares for each share so held, the present par value of the Lynchburg and Danville shares being $100.

The chief engineer of the Lynchburg and Danville road reported the work on the road progressing rapidly; that the work upon the first division, extending from Lynchburg south, a distance of thirty-three miles, will be finished during next month, with the exception of the tunnel in Lynchburg and the masonry of Stanton river bridge. The former, under favorable circumstances, can be completed before the close of winter. The second division will be finished by the end of the year.

This extension of the Orange and Alexandria Railroad will unite at Danville with the road to Greensborough, North Carolina, although of a different gauge, which ramifies through all the Southern States. It is contemplated in the same interest to build a road to Statesville that will give even better advantages to the increased trade of Baltimore. The latter link of the one gauge in the system of roads will give from Baltimore an additional continuous line of rail piercing the very centres of the Carolinas, traversing through Georgia and to the coast, all feeders of the main line that has its nearest eastern terminal at this city.—*Balt. Sun.*

Milwaukee and Northern Railway.

The steady progress of this road to the north is exceeding the highest anticipations of its projectors. The track is already laid to Menasha Junction, 84 miles from this city; and the iron is being laid at the rate of one mile per day towards Menasha, 16 miles further. If the weather continues as favorable as it has been, cars will be running to Menasha, 99 miles distant, by the 1st of November. At Menasha, the road will tap the Wisconsin Central Railroad, which is already completed 140 miles to the northwest, passing through Stevens Point. It will also meet there the travel of the Northwestern Railroad coming down from Marquette, on Lake Superior. The road will be finished to Green Bay, 110 miles distant, by the 1st of January.

Probably no road was ever projected from this city which is likely to produce such marked advantages to Milwaukee, it being an air-line, and thus the nearest and most direct route to the north. It has compelled the Northwestern Railroad to construct the Fond du Lac air-line. It has also compelled the Wisconsin Central to finish the road from Manitowoc to Milwaukee. It is not too much to say that the construction of a single hundred miles of railway will necessitate the termination in this city of 800 miles of other railroad. It now promises to be one of the great trunk roads of the state; for its projectors are determined to carry it to the inexhaustible beds of iron west of Green Bay, and thence to Lake Superior. Its Vice President, E. B. Greenleaf, is one of those clear-headed, practical and careful men who thoroughly comprehend the necessity of what

is to be done, and do that in time.—*Mil. Wis, Oct.* 16.

James River and Kanawha Canal.

From Major Alderson, who has just returned from the Greenbrier region, we learn that the work of surveying for the proposed steamboat canal, to be called the James River and Kanawha canal, across the State of West Virginia, to unite the waters of the the James and Ohio rivers, has been finished.

Last winter Congress made an appropriation of $50,000 for the purpose of making this survey. The proposed canal is to be over 200 feet wide, wide enough to admit of the passage of steamboats carrying three hundred tons. It will follow the James and Jackson rivers to the foot of the Allegheny mountains, at a point a few miles from Covington, where it is proposed to make a tunnel under the mountains, nine miles long, and of the full width of the canal. This tunnel will be over 2,000 feet above tide-water. Two miles from the western end of this tunnel the canal will enter the Greenbrier river, near the iron bridge of the Chesapeake and Ohio Railroad over the stream. It is proposed to lock and dam the Greenbrier, New and Kanawha rivers to a point five miles below Charleston.

The engineers found the greatest fall in the three rivers at Richmond Falls, on the New river. At this point they found a fall of over sixty feet per mile for three miles. The falls of the Kanawha are 640 feet above tide water. Two miles above the falls the water was found to be 104 feet in depth, the deepest place in the three rivers.

It is proposed to furnish water for the nine-mile tunnel, spoken of above, from a large reservoir to be made on Howard's creek, two miles from the tunnel, and connecting it with the canal by means of another tunnel. The engineers think that it will not take longer than two years to cut the large tunnel through the mountains. The supply of water for the purposes of the canal they consider amply sufficient. As low as the rivers are now, they found the discharge of water from the Greenbrier river to be 60,000 gallons per minute, and from the New river over 20,000 per minute.—*Wheeling Register.*

The New Baltimore Railroad.

In October, 1869, an unusually high freshet in the Schuylkill and its affluents flooded the line of the Baltimore railway between Gibson's Point, below Gray's Ferry and the Lazaretto, interrupting the usual course of travel for about a week. To avoid such a mischance in the future the company determined to construct a new line of road along the range of "upland," which skirts the old line at an average distance of about a mile to the northwest. The new road is so far completed that a special train was taken over it on Saturday afternoon. The line is a double track of steel rails, one track being of American steel, and the other of English for purposes of comparison as to durability.

Everything about the new line is constructed in the most substantial manner. The bridges and culverts are of massive masonry; the station-houses are either of stone or brick, and all of them of exceedingly tasteful architecture. The line leaves the old road immediately at the west end of Gray's Ferry bridge, and passing to the "upland," through a deep cut, follows the plateau of high land for a distance of about twelve miles, and again unites with the present road about a mile east of Chester station. Following this high ground, some of which is rolling country, it has been quite an expensive piece of road to construct but it avoids at once the chance of interruption by freshets, and the necessity for draw-bridges over the numerous affluents of the Schuylkill, which it crosses.—*Phila. Ledger, Oct.* 21.

☞ Work has been commenced on three divisions of the Texas Pacific Railroad—from Dallas, east, from Sherman, east, and from Long View, west. The company's office at Marshall has been commenced.

CHESAPEAKE AND OHIO RAILROAD.

A telegram to the Richmond *Dispatch*, from Huntington, West Virginia, which is the present contemplated terminus of the Chesapeake and Ohio railroad, says that a number of railroad officials have been in consultation in that place on the contemplated extensions. The *Dispatch* says:

"The survey for the Symmes creek line from Huntington to Dayton, Ohio, via Hillsboro', has been completed, and a very favorable route is reported. The distance from Huntington to Dayton is 157 miles. A route from Dayton to Chicago for the contemplated extension of the Symmes creek road has been examined, and the distance on a direct line found to be 249 miles between these points. The engineer corps in charge of Captain Dandridge, recently engaged upon the Symmes creek line, has been directed by Gen. Huntington to make an immediate survey of an alternate line from this city, via Portsmouth and Piketon to Hillsboro.' Active operations will commence at once for an early completion of the Lexington and Big Sandy road westward from this city. The track layers upon the Chesapeake and Ohio road have averaged five and a half miles per week through this month. Less than forty miles remain to unite the eastern and western divisions, upon which work is being vigorously pushed forward."

Vicksburg, Pensacola and Ship Island R. R.

The Vicksburg *Times* says that the work on this road is progressing finely. Grading has commenced within one mile of the elevator, which is nearly finished to Big Bayou, four and one-half miles from the city, and from this point the road-bed, with all the bridges and culverts, are finished to a point within one and one-half miles of Big Black, a distance of 14 miles. The bridge across Big Bayou is 436 feet in length, and is constructed with seasoned 12 by 12 cypress. The three and a half miles between Big Bayon and the city, on which hands are at work, will be completed to the upper line of Reading's plantation within one month. We were assured that the work would be finished to Big Black within ten days. The gauge of the road is to be three feet. The Warrenton switch is also completed, ready for the ties, and is 5,800 feet in length.

The company is considering three routes from Big Black—one route leaves Port Gibson to the right, running up the north fork of Bayou Pierre, crossing the New Orleans and Jackson Railroad at Hazelhurst. Another which is being considered is to run up the south fork of Bayou Pierre and cross the New Orleans and Jackson Railroad, at Brookhaven; and still a central route, crossing the other road at Beauregard. Vicksburg subscribed to the stock of this road $100,000, and Warren county $300,000. It is expected that other counties through which it will pass will also give aid.

Maryland Coal for Bombay.

That the effect of the present high prices of coal in England is being sensibly felt in the United States is evident by the fact that within a few days past the Consolidation Coal Company, of Georgetown, has received orders, transferred from Liverpool, England, for large quantities of Cumberland coal to be shipped to Bombay, Point de Gal, Auden, (East Indies,) Madeira, Alexandria, (Egypt,) Rio Janeiro, Aspinwall, St. Thomas, Martinique, Havana, Valparaiso, and several other distant points. This circumstance is unprecedented in the history of the Cumberland coal trade. The coal will be mainly shipped in foreign bottoms from Georgetown. The American bark Orient is now loading at the Consolidation Company's wharves for Aspinwall. In a few days quite a number of foreign vessels will doubtless be in the Potomac to fill the orders referred to.—*Washington Star,*

$5,000,000.

SAFE AND PROFITABLE INVESTMENT.

THE CHICAGO AND CANADA SOUTHERN

First Mortgage Sinking Fund

THIRTY YEARS'

7 PER CENT. GOLD BONDS

At 90 and Accrued Interest in Currency.

Interest Payable April and October.

REGISTERED OR COUPON PAYABLE IN LONDON OR NEW YORK.

This road, with the Canada Southern, forms the new Trunk Air Line from Buffalo to Chicago. It is under the same control and management, and is being built by the same parties who built the Canada Southern: Milton Courtright, John F. Tracy, David Dows, Wm. L. Scott, Henry Farnam, R. A. Forsyth, John M. Burke, M. L. Sykes, Jr., all Directors both in the Chicago and Northwest and the Chicago and Rock Island; George Opdyke, of the New York Midland; Sidney Dillon, Daniel Drew, John Ross, David Stewart, Samuel J. Tilden, Kenyon Cox, and other prominent railroad men. The road is being rapidly built, in the best possible manner, with 60 lbs. steel rails throughout its entire line, and will be completed during the coming year; nearly one-half of the road will be completed and in running order by the 1st of January next; so that the *entire line*, from Buffalo to Chicago, will, within that time, be in successful operation. The builders of this Road control enough of the leading lines running from Chicago to insure an enormous business from the start. Taking into consideration the important fact, patent to all who study the statistics of trade, "That the present Trunk Lines, *now* taxed to their utmost capacity, are not affording facilities equal to the great and constantly-increasing demand for transportation, and that this Road, through its entire length, being practically STRAIGHT AND LEVEL, and SHORTER by THIRTY-FIVE MILES THAN BY ANY OTHER NOW BUILT, or THAT CAN BE BUILT, it must be apparent that this line is not only needed, but must be a great success. The proceeds of these bonds will complete and equip the entire road, and we confidently recommend them as a most safe and profitable investment.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, November 2, 1872.

Stock Exchange and Money Market.

Money has been more active and firmer in price. The speculative inquiry for aid has been quite brisk, and the offerings have been on a restricted scale, both at bank and from private hands. The fluctuation as to rates, however, have been unusually frequent, and extreme, within the range of 4@7 per cent. on call, with several negotiations reported at the full legal rate in gold, during the most severe pressure for accommodation on the part of needy stock firms. The activity was in part, due to speculative manipulations of the supply, with a view to influencing values at the Stock Board, where the dealings have been extensive, and the changes in prices more violent than customary even on this speculative market. The discount business has been seriously checked by the stringency in the call loan line, and even the best grades of commercial paper have been less salable within the range of 9@12 per cent. per annum. The city banks have been weakened considerably in the line of their specie and legal tender reserves, more especially in the specie average, which has been reduced about 1⅞ millions. Their deposit line has been augmented about 2⅛ millions. They enlarged their loan and discount average about 4⅜ millions. The U. S. Sub-Treasury added moderately to its coin reserve, while reducing its currency balances about 2⅛ millions. Money closed up quite stringently for speculative borrowers on the basis of 7 per cent.

The U. S. Sub-Treasury office last week received $3,685,952 of currency, and $3,432,120 of gold, the latter including $2,245,000 from customs; and disbursed $3,296,421 of currency and $5,898,210 of gold, the latter embracing $547,420 of coin interest. The city banks increased their loan and discount average about 4⅜ millions during the week, and again reduced their outstanding circulation slightly. The U. S. Sub-Treasury held a currency balance on Wednesday morning of $23,688,717, and a coin reserve of $50,061,075.

The city banks, in their latest return, show a decrease of $244,800 of legal tender notes, and of $1,830,200 of specie, with an increase of $2,171,103 of deposits, and of $4,367,400 in their loan and discount averages, also a contraction of $20,300 in their item of circulation. The city bank exchanges, last week, averaged 146½. The banks now hold $5,415,300 of specie and legal tender notes more than the 25 per cent. of their liabilities required by the National Banking Act.

The specie reserve of the city banks according to the latest return is $10,795,300, against $10,702,100 same time last year. The city bank deposits are now $203,202,500 against $203,342,200, week ending Oct. 28, 1871. The legal tender reserve amounts to $52,342,100, against $49,670,500 same time last year. The circulation now stands at $27,686,000 against $49,670,500 same time last year. The loans are now $203,202,500 against $283,342,200 at this date last year.

The coin reserve of the city banks is now about 10¾ millions as against about 29½ millions on the 20th of July; the legal tender reserve is about 52⅜ millions against about 55½ millions on the statement of June 15th; and the deposits are now down to 203¼ millions, against 247¼ millions on the 20th of July.

Government revenues have been on a moderate scale, since our last. The excises yielded within the week about two millions and thus far in the current fiscal year beginning with July 1, 1872, $43,103,450. The customs at the port of New York last week were $2,117,329; and at the outports, equal to about $700,000, all in coin or coin certificates.

Gold has been more confidently dealt in, especially early in the week, and the price then ruled firmer, the demand having been mainly speculative. The later transactions were lighter in amount, and indicative of weakness. The range of the price during the week has been from 112⅜@113⅜, and the closing quotation on Wednesday was 112⅜@112½ against 113½ the preceding Wednesday. The specie outflow last week, was $1,416,536. The Gold Exchange Bank clearances have averaged about 65¼ millions per day during the week.

The customs demand for Gold last week, averaged $374,167 a day. The arrivals of specie from Europe, Havana and other foreign ports last week were $119,250 and since Jan. 1, 1872, were $5,301,492 against $8,888,854 same time in

1871. The total customs revenue of the Government, in coin, at this port, since January 1, has been $127,218,269 against $134,347,868 during the same time in 1871.

Government has disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt, since January 1, 1872, $64,700,633, against $69,945,203 during the same time in 1871.

The export drain of specie was $1,416,536 last week, against $413,825 same week preceding year. The shipments since January 1, 1872, have been $62,276,907 against $57,733,061 during the same portion of 1871.

Foreign Exchange closed tamely, and in favor of buyers. Bankers' sixty day bills on London closed on Wednesday at 108¾@108⅞; sight bills on London, 110⅛@110¼.

The week's exports hence of domestic produce have been to the currency value of $5,470,104.

Government securities have been strong in price on very meagre offerings, checking business though the investment inquiry has been good.

On Wednesday, Government bought in $359,250 of the offered Five-Twenties at from 112 36 @112 87. The aggregate offering was only 868,550 from 112 36@112 86.

U. S. sixes of 1881 at the close on Wednesday of the current week were quoted at 116½@116⅝; U. S. Five-Twenties of 1862, 115⅝@115⅞; U. S. Five-Twenties of 1864 at 115⅝@115⅞; U. S. Five-Twenties of 1865, 116¼@116½; U. S. Five-Twenties of 1865 consolidated, 114⅜@114⅝; U. S. Five-Twenties of 1867, 114¾@115; U. S. Five-Twenties of 1868, 114½@114¾; U. S. Ten-forties at 108⅛@108⅜ U. S. Fives of 1881 (Funding Loan) 111@111½; Six per cent. currency

* Ex Nov. coupon.

State bonds have been in moderate request, but irregular in price.

Railway and Miscellaneous share property has been quite active, but unusually variable as to values, especially the speculative favorites, such as Pacific Mail, Western Union Telegraph, North Western, and Lake Shore shares.

Railway Mortgage Loans have been in fair investment demand at steady prices. Central Pacific Sixes have been in request closing from 100½@101.

In the Metal line, there has been rather more animation. Copper has been quoted steady, but has been inactive; sales, 50,000 lbs. Ingot at 32c. cash. Scotch Pig-iron has been more freely purchased at steadier prices, with sales reported, since our last, of 121 tons Glengarnock at $53@54; 50 tons Gartsherrie at $54; 150 tons Carnbro on private terms; and 700 tons Monklin at $51@$52 here, and $48 at Philadelphia. Of American Pig, 200 tons No. 2 Crane sold at $53; market firm; Wrought Scrap-iron has been active and quoted at $45; sales, 2,000 tons No. 1 (Philadelphia) on private terms. Of Russian Sheet-iron 200 pks. sold on private terms. Iron Rails have been quiet, but held with confidence on the basis of $78, gold, for English, and $85@$87 50, currency, for American. Lead and Spelter inactive at former figures. Pig-tin dull and heavy; sales, 5 tons English at 32¼c., gold, with Straits quoted at 32¾c.@33c., gold. Tin plates have been in light demand at yielding prices; sales 200 boxes assorted Charcoal at $12 37½. gold; 2,000 boxes Charcoal Terne on private terms. Of Sheet Zinc 25 casks Musselman sold at 8⅝., gold.

General business has been on a restricted scale, the prevalence of the horse plague impeding deliveries of both produce and merchandise. The leading kinds of produce, attracted less attention. Breadstuffs were cheaper. Provisions rather firmer. Middling upland cotton, closed on Wednesday at 19 cts. per lb. The receipts at all the ports, since Sept. 1, have been 588,611 bales, against 416,387, bales same time in the preceding year; exports 190,500 bales against 139,100 bales in the previous year; stock at the ports at latest dates, 257,893 bales against 216,980 bales same date 1871.

At the Live Stock Markets, Beeves have been in less demand at 9@14½ cts.; Veals in fair request at 7½@11½cts.; Sheep less active at 4@7; cts.; Lambs, 6@8½ cts.; Swine, at 5¼@5½ cts. per lb., all live weight. The week's receipts were 8,170 Beeves, 1,855 Veal Calves, 27,431 Sheep and Lambs, and 59,476 Swine.

Foreign merchandise has been generally less freely dealt in, Sugars and Coffee have been exceptionally active, and quoted firmer. The week's imports of foreign goods reached the amount of $7,459,511 including $2,284,027 of dry goods.

Ocean freights have been less active, at easier rates, closing however, with more firmness.

At the auction sale of Scranton Coal on Wednesday 75,000 tons were disposed of at about steady prices, ranging from 3 65@4 70 per ton of 2,240 lbs.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Chesapeake and Ohio Railroad.

The Western States of America, enjoying such cheap lands, fertile soil, and genial climate, have naturally drawn, and are still drawing, so many millions of the industrious settlers from the farther east, that the influence of the agricultural and mineral products of the west are felt in the leading markets of the world. The cotton of the southern states, the wheat, corn, tobacco, hemp, meats and hides of the middle, western and northwestern states, and the petroleum of West Virginia and Pennsylvania have long been exported in immense quantities; the time is rapidly approaching when the same region will furnish also vast quantities of coal, pig and wrought iron, ores, hides, &c., &c. The principal drawback hitherto has been that the number of lines of transportation reaching from the seaboard ports of the west has been altogether too few to move the surplus of the west to market, and high rates have been the consequence.

This deficiency of the means of transportation is now about to be remedied, to a large extent, by the completion of the new line reaching from our most central and commodious harbor on the North Atlantic coast, westward to the head of the Ohio and Mississippi Valleys. This great work, whose progress we have frequently had occasion to notice, is now so nearly completed that the officers of the company can speak with certainty of the opening of the whole line for traffic from the navigation of the western rivers to that of the ocean early in the new year. By means of a liberal expenditure on the part of the State of Virginia many years ago, the benefits of which inure to the present company, the CHESAPEAKE and OHIO, this line was so laid as to cross the intervening elevation by a shorter line and by remarkably easy grades, so that it will be admirably adapted to the immense work of moving the western crops to the seaboard for distribution.

The Financial Agents of the company, Messrs. Fisk & Hatch, following their usual custom, have published in a small pamphlet, for the information of the Bondholders and others, a description of the present condition of the work and the prospective traffic of the road, which is so full and truthful an account of the present state of the transportation problem that we regret we cannot re-produce it in full in our columns, as it will be interesting to all parties who follow the progress of internal improvements. The statements therein concerning the valuable deposits of iron and coal along the route, and the advantages of shipment and market are well known here to merchants and iron men; and the coal traffic, both to the east and west, may readily be believed to yield a gross earnings sufficient to make it an independent and prosperous road without reference to the through traffic it must share with the existing lines, or the local traffic in grain, live-stock, tobacco, &c., which it must inevitably receive. The company can therefore indicate with certainty the very items of business from which the revenues and profits are to be earned, as given in their estimates.

Toledo, Detroit and Canada Southern R. R.

The Detroit *Tribune*, of 24th ult., says that the contractors on this road are pushing forward their work vigorously, and the line is progressing satisfactorily. The grading between Toledo and the Ohio and Michigan boundary is getting well forward and a bridge across the river Raisin is being built by the Toledo Bridge Company. It is to be a Howe Truss Bridge, of three spans of 150 feet each, built on stone piers and will cost $20,000. Two vessel loads of iron have been delivered at Trenton and the work of laying the iron between Trenton and Toledo will soon be commenced. The bridge across the Detroit river is being pushed forward rapidly and the work on the Canadian line is rapidly advancing toward completion.

☞ The Missisquoi and Clyde River Railroad, from Richford to Newport, Vt., is being pushed rapidly to completion. Iron is being laid at both ends, and the through line from Montreal to Boston is expected to be in good running order by January 1, 1873.

☞ The Uniontown *Genius* says that the engineers of the Hempfield Railroad extension have located their road to Dawson station on the Pittsburg, Washington and Baltimore Railroad, crossing the river at that point.

TO CAPITALISTS.

A DESIRABLE HOME INVESTMENT.

First Mortgage Gold Bonds

OF THE

New York, Kingston and Syracuse

RAILROAD.

PAYING 7 PER CENT. GOLD, FREE FROM U. S. GOV'T TAX.

PRINCIPAL AND INTEREST PAYABLE IN GOLD.

This road passes through the richest agricultural region of the state, and is speedily reaching completion. It is the most direct line between the great lakes and deep water navigation of the Hudson River from LAKE ONTARIO and the GREAT WEST.

The 78 miles of the road now in operation is unusually well built, and its net earnings already paying 7 Per Cent., Gold, on the cost of construction and its equipments.

We are now offering these bonds at 95 and accrued interest, feeling warranted in recommending them to our friends and investors generally as a safe and most desirable investment

Pamphlets with maps furnished, with full particulars, on application to

DEAN, McGINNIS & CO.,

Bankers, 30 Broad St., N. Y.,

And at the Office of the Company,

18 WILLIAM ST., N. Y.

BANKING HOUSE OF

FISK & HATCH,

No. 5 NASSAU STREET, NEW YORK.

DEPOSITS received, on which we allow interest at the rate of four per cent. per annum. Special arrangements made with Savings Banks and others depositing large amounts.

We issue CERTIFICATES OF DEPOSIT available in all parts of the country, and bearing interest in case of special deposit.

We make COLLECTIONS for merchants and others in all parts of the country.

Orders for INVESTMENT STOCKS and BONDS executed at the Stock Exchange, on commission, for cash.

We deal in GOVERNMENT BONDS, and in the following FIRST CLASS RAILROAD SECURITIES, which we can recommend with confidence, from a thorough knowledge of their character and value, viz:

CHESAPEAKE and OHIO BONDS, 6 Per Cent, Gold. Denominations $100, $500, $1,000. Interest May and November.

CENTRAL PACIFIC BONDS, 6 Per Cent. Gold. Denominations $1,000 each. Interest January and July.

WESTERN PACIFIC BONDS, 6 Per Cent, Gold. Denominations $1,000 each. Interest January and July.

Owing to the present high rate of interest and consequent dullness in American Securities in Europe, and the demand for money here to move the crops, the present is a favorable time to make investments in these favorite Securities, as they can just now, for the above reasons, be purchased below their usual market prices, and a considerable advance is reasonably certain.

Full information furnished upon application at our office, in person or by mail.

FISK & HATCH.

Journal of Railroad Law.

RAILROAD COMPANIES—LIABILITY FOR NON DELIVERY OF FREIGHT BY REASON OF NOT KNOWING SHIPPING MARKS INDICATING CONSIGNEE.

The case of The Great Western Railway of Canada *vs.* W. Ward Wheeler, (20 Mich., 419,) was an action on the case brought by W. Ward Wheeler, in the circuit court for the County of Wayne, against the Great Western Railway of Canada, for neglecting to deliver two casks of zinc received by the Railway Company at Suspension Bridge to be conveyed to plaintiff at Detroit. The plea was the general issue. The evidence on the trial showed that the goods were delivered to the Company at Suspension Bridge on the 12th of April, 1866, in two casks, marked "W. W. W. Detroit, Mich;" that they arrived in Detroit on the 14th of April and remained in the warehouse of the company until the 26th of April, when the warehouse was destroyed by fire, and the goods so much damaged as to be useless.

The jury found a verdict for the plaintiff.

The following is the opinion of the Court delivered by—

GRAVES, J.—The defendant in error sued the company to recover the value of two casks of zinc brought over the railway and deposited in the depot of the company on the 14th day of April, 1866, and destroyed by fire, which consumed the depot on the night of the 26th of the same month. The goods were marked "W. W. W." and had nothing else upon them to indicate to whom they were consigned. In consequence of this the company claimed they had no information as to the consignee and could do nothing more than to warehouse the goods on their arrival, until the consignee should appear, or in some way be pointed out to them. The defendant in error urged that the company were chargeable with notice that goods marked as these, were meant for him, and in order to prove this, he testified that, occasionally from September 1863, to November 1865, the company had brought zinc for him, marked like that in question, and that in more than one instance it had been delivered to him by the company without his interference. He further testified that on two or three earlier occasions, he called for zinc, which he then expected, and saw the agent on the subject, who, he says, knew his mark perfectly well. He did not recollect who this agent was, but thought it was McDonnell. The witness was unable to fix the date of any of these interviews or deliveries. The company gave evidence with a view to show that none of their agents in April, 1866, had any knowledge that the mark upon the zinc in question, signified the defendant in error, and further gave evidence to prove that it was the business of the delivery clerk to attend to the delivery of goods to the consignees, and that such clerk had been several times changed within a year or two before the fire, and that the clerk employed in the month of April, 1866, had been in the company's service for sometime before.

In view of the testimony given on the subject, the court at the instance of the defendant in error, instructed the jury as follows: "If the jury find that the defendants had frequently received, transported and delivered to plaintiff before the shipment of the goods sued for, goods of the same nature and description and marked in the same manner it is evidence tending to show that the company's agent knew that "W. W. W." was the shipping mark of the plaintiff. The plaintiff in error then requested the court to charge that "the plaintiff is bound to show that some of the officers or agents of the company, who were such when these goods arrived here, were chargeable with notice that they were intended for the plaintiff. It is not enough to show that former officers and agents were chargeable with such notice." But the Circuit Judge being in doubt, as he stated to the jury, about the law involved in this request, refused to give the direction prayed for, and advised the jury "that it was not necessary that this agent who had this knowledge was in the employ; if the company knew it before by any of its agents that would be sufficient."

We think in this charge and refusal the court erred. The case was not one in which the jury could rightly infer a continuance of knowledge in the company in consequence of notice to a former agent.

In fact, if admitted that the mark upon the goods had been understood by former agents as the mark of the plaintiff below, was an isolated and transient one, and capable of affecting the company only, because the latter as principal was identified with the agents possessing the knowledge so far as to make such knowledge in the agent, the knowledge of the company. Any change of agency which would remove that knowledge from the company's service would sever all connection between the company and the means of knowledge, so effectually exclude all idea of notice through the medium of former agents. The subject of notice in this case had no relation to any usage, system, course of business, or persistently impressive circumstance upon which a presumption could be raised that knowledge of it once brought home to an agent must permanently attach to the corporation. From the nature of the thing the notice could only attach to the principal, so long as the knowledge should remain present in the agency. A corporation has no memory except through its agents and its records, and while the letters "W. W. W." might appear in the company's books, the meaning ascribed to them by defendant in error would not. The circumstance that these letters personated this or that individual would still be an extrinsic fact known or unknown to the agent, and if unknown to the agent, then unknown to the Company.

We feel called on to observe farther, that when carriers are receiving daily a multitude of differing packages for distribution, delivering among a very large number of persons of whom a considerable portion at least, must be strangers to the agents, a notice to an agent on one or more occasions, that certain arbitrary marks indictate ownership in a particular person, ought not to affect the principal with notice of the same fact in any future transaction, unless it is affirmatively shown that the agent at the time of the latter transaction actually remembers the previous notice, and in view of the circumstances has reason to suppose that the same marks still denote the same ownership. And where one, instead of having his goods marked with his name, chooses to adopt some arbitrary or equivocal mark or device, which any other has an equal right to employ, he should be considered as thereby taking upon himself any risk of failure of the goods to reach him, in consequence of such imperfect marking, and should at his peril see that the carrier in each instance understands the complete significance of his mark or device.

The record presents some other questions, but as they will probably not arise on another trial, we do not consider them.

The judgment below must be reversed with costs, and a new trial ordered.

Judgment reversed.

Baltimore and Potomac Railroad.

That part of the Baltimore and Potomac Railroad from Bowie Station through Prince George's and Charles counties, Md., to Pope's Creek, on the Potomac, forty-nine miles, is now about completed. The road from Baltimore to Washington has been in regular running order some months. The ballasting on the Pope's Creek branch, as the road through Prince George's and Charles counties is called, will not be finished, however, before next January, when trains will be run regularly. During the early part of the week a trial passenger trip was made from Bowie to Pope's Creek for inspection purposes by a number of officers of the Baltimore and Potomac Railroad Company, which showed satisfactory progress. It is understood that trains are now running from Marlboro to Baltimore, which occasionally bring heavy freights of tobacco and other Maryland produce. At the Pope's Creek terminus there are as yet no buildings whatever, though the site and its nearness to deep water, and other advantages, it is expected will soon invite enterprise as at Crisfield, Md. The distance from Pope's Creek to Baltimore is seventy-three miles. Bowie Station, the point of divergance from the Baltimore and Washington line, is twenty-four miles from Baltimore, and the distance from Baltimore to Washington is forty-one miles.—*Balt. Sun.*

MARYLAND COAL FOR ENGLAND.

In this shifting world of ours no wise law or pithy maxim can hold good against the modern instances. "Carrying coals to Newcastle" has been a pet phrase for illustrating an absurdity, but now we have it as a practical fact. Several hundred thousand tons of American coal have recently been purchased on orders transferred from England, to the United States. The greater portion of these purchases is of the soft or bituminocs coal of Maryland and Pennsylvania, as the consumption of that kind of coal, which greatly resembles the English production, is much greater in Europe than anthracite or hard coal. A large number of these English orders will be filled at the Cumberland mines. Several vessels have already left Georgetown with cargoes of soft coal for foreign countries, and others are expected to arrive and clear before the close of navigation. Only last winter we were quarreling about the duty on English coal, and already we have become exporters instead of importers.—*Balt. Am.*

☞ The Philadelphia *Ledger* of 28th inst., reports the net anthracite coal tonnage for the week ending on the 19th inst., from all sources, at 462,860 tons, and for the year 15,898,558 tons, against 12,030,883 tons to the same date last year, being an increase in the tonnage of anthracite coal of 3,867,672 tons. The production of bituminous coal for the week was 52,169 tons, and for the year 2,039,198 tons, against 1,784,827 tons to the corresponding time last year—an increase of 254,371 tons. The total production of all kinds of coal for the week was 515,029 tons, and for the year 17,937,756 tons, against 13,815,710 tons to corresponding time last year, showing an increase of 4,122,046 tons.

Colorado Railroads.

A correspondent of the Baltimore *Sun*, writing from Denver under date Oct. 6, says:

The Colorado Central Railroad is progressing lively, and is now about sixteen miles west of Golden, running through Clear Creek canyon. This road is being built on the narrow-gauge principle, and promises to compare favorably with the Denver and Rio Grande Railway, which is proving such a success. This road is designed to run from Denver to Golden broad gauge, thence by narrow gauge to Central Black Hawk and Georgetown, passing through Idaho. Its principal traffic east will be ore, which comes to this point by teams. By this enterprise all the second-class ore lying at the mines will soon find an eastern market. There is also another railroad under way from Gulesburg to Golden, and it is expected will be finished in the next eight months. These improvements are in the interests of the Union Pacific Railroad, and superintended by T. E. Sickles, of the Union Pacific Railroad.

Our board of trade met last night to take into consideration the issuing of bonds and building a branch road from Denver to Fort Morgan, to intersect the road from Gulesburg going to Golden, to be known by the name of the Denver and Platte Valley Railroad. I think this road will be built.

☞ The first forty-five miles of the road-bed of the Wisconsin Valley Railroad is ready for the iron. Strong efforts are making to put the track down this fall.

☞ The Lee and West Stockbridge Railroad is making good progress and it is intended to have it in running order in September, 1873.

☞ The contractors have resumed work on the disputed portion of the Athol and Enfield Railroad at Springfield.

Locomotives for Sale.

SEVEN LOCOMOTIVE ENGINES FOR SALE, built for Peruvian Railways—all for Standard gauge of 4 feet 8½ inches. Five built at Rogers Locomotive Works, and two at Danforth Works; all of the very best materials, designs and finish. Six have cylinders of 17 inches x 22 inches, with six driving wheels of 49 inches diameter, and one pair truck wheels—One a tank engine, cylinders 10½ inches x 18 inches. Driving wheels four, 34 inches diameter. These engines sold on account of the construction of the railway they were intended for being suspended for a time. For further particulars apply to

W. W. EVANS,
47 Exchange Place,
New York.

Oct. 7, 1872.

ROGERS CO. ENGINES, FOR PACASMAYO RY, PERU.

4 Engines, Mogul design—
Gauge, 4 feet 8½ inches.
Cylinders, 17 inches x 22 inches.
6 Driving wheels, 48½ inches diameter.
2 Truck wheels, 30½ inches diameter.
Furnace, steel.
Flues, 165 iron, 10 feet 8 inches long, 2 inches diameter.
Fuel, Soft Coal.
Tender tank, to hold 2,000 Winchester Gallons.
Weight, empty, about 63,000 pounds; loaded 71,500 pounds.
Price, $18,500.

DANFORTH ENGINES, FOR PACASMAYO RY.

2 Engines, Mogul design—
Gauge, 4 feet 8½ inches.
Cylinders, 17 inches x 22 inches.
6 Driving wheels, 49 inches diameter.
2 Truck wheels, 30 inches diameter.
Furnace, Steel.
Flues, 175 iron, 10 feet 4 inches long, 2 inches diameter.
Fuel, Soft Coal.
Tender tank to hold 2,000 Winchester Gallons.
Weight, empty, about 63,000 pounds; loaded, 71,500 pounds.
Price, $17,500.

ROGERS ENGINE, PACASMAYO RY.

1 Tank engine—
Gauge, 4 feet 8½ inches.
Cylinders, 10½ inches x 18 inches.
4 Driving wheels, 34 inches diameter.
No truck wheels.
Steel Furnace.
Flues, 65 iron, 9 feet 10 inches long, 2 inches diameter.
Fuel, Soft Coal.
Tank, 400 gallons.
Price, $11,500.

A. W. LADD,

HAND'S IMPROVED DUMPING CART.

PATENTED APRIL 4th, 1871.

THE MOST PERFECT YET INVENTED.

Can be dumped by a single motion of one hand while you hold the horse with the other.

The tail-board being attached to the shafts, lifts of its own accord when the cart is dumped, as seen on the right of the engraving. As soon as the load is dumped all you have to do is to start the horse, and the cart will resume its proper position, as seen in the left of the engraving, hook itself and replace the tail-board, without any assistance of the driver whatever. The shafts are attached to the outside of the body, near the hubs, which gives the horse great control over the cart, and prevents the body from playing from side to side as they do when the shafts are pivoted underneath.

MANUFACTURERS OF

C. V. MEAD. R. L. HUTCHINSON.
R. S. MANNING. G. W. NORTON.

Post Office Address, Box 588, TRENTON, N. J.

YORK CAR WORKS.

ESTABLISHED IN 1852.

Billmeyer & Smalls,

YORK, PENN.

This old established firm continue to build all kinds of Freight Cars to order.

Narrow Gauge Cars

having received their special attention, they are prepared to receive orders and to deliver promptly. A contract has just been made with the pioneer Narrow Gauge Road—3 ft. Gauge—on this Continent—(The Denver and Rio Grande R. W.)—for 100 cars; also for a Georgia Road.

Comparative weights of Narrow and Full Gauge Cars sent by mail free of charge.

C. Billmeyer. D. E. Small. J. H. Small.

CHAS. J. PUSEY,

78 BROADWAY,

NEW YORK.

American & English Rails,

LOCOMOTIVES and CARS,

FISH PLATES, SPIKES, &c., &c.,

SOLE AGENT FOR

Atkins Bros' Pottsville Rolling Mills.

Special attention given to filling orders for Small ***T and Street Rails,*** of every weight and description.

Old Rails Bought or Re-Rolled, as Desired.

P. O. Box 5222.

EDWARD J. ETTING,

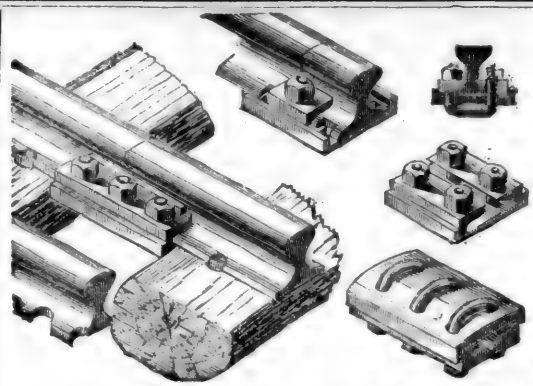
105 Walnut St., Philadelphia,

MANUFACTURERS' AGENT FOR THE SALE OF

AMERICAN AND FOREIGN

RAILROAD IRON

Of every Size, Weight and Pattern,



For Steam and Street Roads.

ROLLING STOCK & SUPPLIES.

Old Rails Re-Rolled & Exchanged for New.

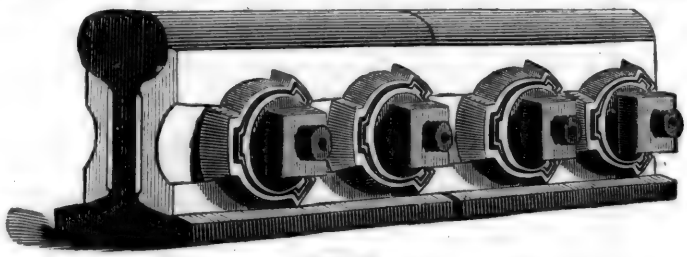
☞ Special attention paid to the Purchase and Sale of Old Railroad and Scrap Iron.

CONSIGNMENTS SOLICITED.

FISHER'S PATENT

Wrought Iron

RAIL JOINTS,



MADE BY

FISHER & NORRIS,

TRENTON, N. J.

The Superiority of these Joints has been proved by eight years' use on different Roads.

PRATT'S PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail,* with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

RAILROAD IRON.

ENGLISH and AMERICAN Railroad Iron for delivery in New York and other markets in the United States and England. For sale by

S. W. HOPKINS & CO.,

New York, Saturday, November 9, 1872.

Monroe and Dubuque R. R.

After long years of struggling and weary effort and discouraging delay, at last the important section of road between Monroe, the present terminus of the Southern Wisconsin Railroad, and Dubuque, on the west bank of the Mississippi, is to be completed. Yesterday the section between Monroe and Shullsburg, about thirty miles, or one half of the whole distance from Monroe to Dubuque, was let to efficient contractors, who will proceed immediately to work.

The backers of this enterprise are the Milwaukee and St. Paul R. R., and the Lafayette and Mississippi R. R. In the course of 1873 the whole line will be completed to Dubuque, where this road can form connections with the Dubuque and Pacific R. R. already completed 400 miles west of that city. The company which built the great bridge across the Mississippi at that point, is compelled by its charter to grant facilities to other railroads to cross its bridge equal to those now granted to the Illinois Central R. R. This provision becomes very important, as it will enable the Monroe and Dubuque R. R. to construct its depot within Dubuque city limits. This road when constructed, will bring an enormous business here from Central Iowa, in the form of wheat, corn, and pork, and invite the return of merchandise from our warehouses. For over twelve years the inhabitants of Southern Wisconsin have longed for the completion of this road, and now they are to see its fulfillment.—*Milwaukee Wisconsin, Oct.* 30.

NOVEMBER INVESTMENTS

We continue to sell at par, adding accrued interest, the First Mortgage Gold Bonds of the Northern Pacific Railroad Company. On the completion of this season's contracts, there will be FIVE HUNDRED AND SEVENTEEN miles of the main line of the Road in operation, uniting Lake Superior with the Missouri River, and securing the large traffic of the Northwest. This amount of Road also entitles the Company to Ten Million Four Hundred Thousand Acres of Land, located in Central Minnesota, Eastern Dakota, and in the Columbia Valley on the Pacific Coast. The Bonds are secured by a first mortgage on the Road, its Traffic and Franchise, and on the entire Land Grant received from the Government. The rate of interest is Seven and Three-Tenths Gold —equivalent to about Eight and a Quarter per cent. in currency. Believing the security to be ample and the rate of interest satisfactory, we recommend these bonds as a desirable investment. Holders of United States Five-Twenties and high-priced corporate securities may materially increase both their principal and their interest income by exchanging for Northern Pacifics.

JAY COOKE & CO.,

New York, Philadelphia and Washington.

☞ The income of the Boston and Albany Railroad for the year ending September 30, 1872 was $9,259,598 81; the expenses, $6,896,984 12; and the net income, $2,862,614 69. In 1871, the income was $7,962,342 40; the expenses, $5,807,-859 44; and the net income, $2,154,982 96—showing an increase in gross income of $1,297,256 41; in expenses of $1,089,624 68; and in net income of $207,631 78. The number of passengers carried in 1872 was 5,247,576; do. carried one mile, 113,-047,831. Tons of freight carried, 2,782,901; do. carried one mile, 290,064,965.

Commerce of New York.

The foreign imports at New York for the month of September, 1871 and 1872, are officially stated as follows:

	1871.	1872.
Entered for consumpt'n.	$21,432,482	$17,298,016
Do. for warehousing....	8,869,861	9,143,531
Free goods....	2,708,233	7,849,413
Specie and bullion.....	331,679	2,088,045
Total entered at port...	$33,342,255	$36,379,005
Withdrawn fr. wareh'use	12,889,575	15,156,684

The foreign imports at New York for the nine months from January 1, were:

	1871.	1872.
Entered for consumpt'n.	$165,096,546	$159,292,057
Do. for warehousing...	111,353,165	147,989,463
Free goods....	22,584,178	37,998,958
Specie and bullion.....	5,586,766	5,002,488
Total entered at port...	$304,620,655	$350,282,961
Withdrawn fr. wareh'se.	98,625,022	127,868,482

The duties received at New York for nine months from January 1, were:

	1871.	1872.
Six months.....	$73,692,107 93	$73,822,709 76
In July....	11,984,967 33	7,251,160 85
In August....	16,932,839 65	19,835,156 81
In September	15,733,891 86	18,274,126 81
Nine months	$118,293,796 77	$118,683,153 78

The exports from New York to foreign ports in the month of September, were:

	1871.	1872.
Domestic produce.....	$20,100,569	$18,950,574
Foreign free goods.....	193,707	81,297
Do. dutiable.....	569.026	652,927
Specie and bullion.....	2,130,320	1,432,635
Total exports	$22,993,622	$21,117,433
Do. exclusive of specie.	20,863,302	19,684,798

The exports from New York to foreign ports for nine months from January 1, were:

	1871.	1872.
Domestic produce.....	$166,414,661	$158,102,659
Foreign free goods.....	996,862	1,147,348
Do. dutiable	5,898 916	7,418,010
Specie and bullion.....	57,619,924	58,382,370
Total exports.....	$280,925,363	$225,050,382
Do. exclusive of specie.	173,305,439	166,668,012

☞ East Windsor, Conn., has subscribed $110,-000 to the capital stock of the Connecticut Central Railroad Company. This action, it is said, insures the building of the road.

Tonnage of New York.

The official returns of the tonnage of the port of New York for the year ending June 30, 1872 give the following statistics:

	Vessels.	Tonnage.
Sailing vessels under permanent register, which enables them to engage in trade with foreign as well as domestic ports.	495	331,013.01
Steamers under permanent register	78	119,351.00
Sailing vessels under temporary register	276	128,911.23
Steamers under temporary register	12	11,468.00
Total under register	861	590,743.24
Sailing vessels under permanent enrollment and license engaged in the coasting trade exclusively	1,213	107,289.04
Steamers under permanent enrollment and license engaged in the coasting trade exclusively	479	174,621.12
Sailing vessels under temporary enrollment and license	78	17,335.15
Steamers under temporary enrollment and license	4	910.87
Sailing vessels under 20 tons licensed only	317	3,668.25
Canal boats under permanent enrollment and license	1,242	126,885.44
Barges under permanent enrollment and license	246	55,051.60
Steamers under 20 tons licensed only	20	176.76
Total under enrollment and license	3,599	485,938.23
Total under register	861	590 743.24
Aggregate number of vessels and the tonnage of the port.	4,460	1,076,681 47

The official report of tonnage for the year ending June 30, 1871, was as follows:

	Vessels.	Tonnage.
Vessels under permanent register	561	450,898.18
Vessels under temporary register	234	134,642.13
Total	795	585,540.31
Vessels under permanent enrollment and licensed	3,946	548,936.10
Vessels under temporary enrollment and licensed	80	15,922.00
Vessels under 20 tons, licensed only	476	5,460.92
Total under enrollment and license	4,502	570,319.02
Total under register	795	585,540.31
Aggregate number of vessels and tonnage in 1872	5,297	1,155,859 33

These figures exhibit a decrease of 837 in the number of vessels and 79,177.86 in the tonnage since 1871.

☞ The St. Mary's *Beacon* states that two corps of engineers of the Southern Maryland Railroad, one operating from Point Lookout by way of St. Mary's river, and the other from Mechanicsville by way of Leonardtown, have formed a junction at or near the Clifton Factory and Great Mills, thus connecting the entire line of surveys from Point Lookout to a point in Prince George's county on the line of the Baltimore and Potomac road. A large force of hands and carts are at work between Mechanicsville and Leonardtown. The energy displayed gives hope that they will soon have an early communication by rail with the cities of Baltimore and Washington.

Wisconsin Central Railroad.

On the south end of the line 115 miles of this road are completed. The passenger trains run as far north as Stevens Point, 62 miles; from thence north passenger and construction trains run 42 miles farther. Beyond the Point, to which the iron is laid, the road is being graded in sections all the way through to Ashland. The whole distance from Menasha to Ashland is 255 miles. At the Ashland end the docks are being built and a contract for the construction of the road between Ashland and the Penoka Iron Range, 30 miles, was let, to be finished November 15. This work can not be done as soon as that. There are two locomotives and a construction train on that end, and there is iron at Ashland and more to be delivered there this month, to complete the road as far as the Penoka Range.

Six miles from Ashland the road will cross the White River on a handsome and substantial iron trestle bridge, now mostly on the ground and being erected. The bridge is 1,700 feet long and 109 feet high, and is manufactured at Buffalo, N. Y. The abutments are of red sandstone, similar to that of which the Milwaukee court house is constructed. Near that is another bridge, 600 feet long, also built of iron, which will be finished within a month.

The owners of the Penoka iron mines are now opening their mines, and the railroad company has contracted to transport the ore for 20 years. The road is contracted to be completed by a year from next September. G. Colby, of Boston, is President of the company, and George Reed of Menasha, Vice President.—*Green Bay Advocate Oct* 26.

☞ The directors of the Boston and Albany Railroad have decided to substitute steel for iron rails upon the road as fast as practicable. About 9000 tons of steel rails have already been purchased in Europe, 4000 tons of which will be delivered this year and 5000 next year, and they will be laid as fast as received. This policy is dictated not only by regard to the safety and comfort of the traveler, but by a wise economy. This is evident from the fact that of 1,200 tons of iron rails laid last year, 800 tons have been taken up as unsafe or useless.

☞ On the 17th of October the Board of Public Works of Virginia received from the Orange, Alexandria and Manassas Railroad Company the sum of $842,000 in State bonds, in full settlement of the deferred payments of the company on its purchase of the State's interest in the road. In March last the company paid $188,000 in State bonds on this purchase, making the whole amount thus paid by the company $1,030,000, which goes to the reduction of the public debt.

☞ It is announced that the Great Western Railway Company of Canada will pay a dividend at the rate of 6½ per cent. per annum on the operations of the past half-year. Mr. John Cleghorn, one of the Directors of the North Eastern Railway Company, has been elected to a seat at the board of the Great Western Railway of Canada, vacated by the resignation of Mr. M. K. Jesup, of New York.

☞ The whole of the Lee and New Haven Railroad has now been sub let. Kelly & Rogers of West Stockbridge have the first five miles, and C. C. Churchill of Hastings, New York, the remaining twenty miles. The road is now being located.

☞ The rails on the Boston and Maine Railroad extension are laid between Salmon Falls and Wells Village.

Wisconsin Central Railroad.

The Wisconsin Central Railroad, which is under contract to be finished by November 1, 1873, is progressing rapidly and well from its eastern terminus toward Penoka Gap, and is finished to a point north and west of Stevens' Point, which promises to become an important place, as the machine shops of the company are located there. From Penoka Gap to Ashland, the ground to be worked is of such a character as to make it extremely difficult to prosecute the work, and several sub-contractors have already given it up as a bad job. It is completed to White River, a distance of five miles, and a bridge is being built which delays matters considerably. Twenty-seven miles remain to be completed between Penoka Gap, where there are immense iron mines, of the finest quality of ore, and White River. It has been reported that work would have to be suspended on the road on account of the failure of some of the contractors to fulfill the conditions imposed, but this is not so, for it is now decided that building shall progress all winter. Some ideas of the difficulties of the work may be formed from the fact that it has cost the contractors $70 per ton to send supplies out to their working force, as everything had to be carried on the backs of pack men.—*Mil. Wis.*

Wilmington and Western Railroad.

The Wilmington and Western Railroad, which was formally opened on the 19th ult., by a celebration at Landenburg, Pa., is designed as a section of a line that will open up a trunk line to connect the Great West with Wilmington, Delaware. It is said the road traverses a rich and fertile agricultural region. The new road was chartered in 1867 by the Delaware Legislature, and its construction was commenced seventeen months ago. The whole of the capital stock of the company has been actually paid in. In length it is nineteen miles, and the present western terminus is Landenberg, in Delaware county, Pa. At this point it forms a junction with the Delaware and Pennsylvania Railroad, which starts at Pomeroy, on the Pennsylvania Central. This is an important line, running from the interior of Pennsylvania down into Delaware, and thence affords a connection with the Eastern Shore of Maryland.

Statistics of Manufactures of the United States.

The tabulation of statistics of manufactures of the United States for the year ending June 1st, 1870, as returned at the ninth census, has just been completed at the census office. The number of establishments is 252,149; the number of steam engines 40,191, with a horse power of 1,215,711; number of water-wheels 51,017, with a horse-power of 1,130,416. The average number of hands employed during the year was 2,150,984, of whom 1,615,594 were males above 16, 823,768 females above 15, and 114,626 children and youths.

The amount of capital invested was $2,118,247,069; of wages paid, $775,621,593. The value of the material consumed was $2,488,291,952; of product, $4,232,625,896; of this production $18,040,644 is returned from the State of Alabama; $185,410 from Arizona; $4,629,284 from Arkansas; 66,594,556 from California; 2,852,820 from Colorado; $161,065,474 from Connecticut; $178,570 from Dakota; $16,791,882 from Delaware; $9,292,173 from the district of Columbia; 4,685,403 from Florida; $31,196,115 from Georgia; $1,047,624 from Idaho; $205,560,672 from Illinois; $108,617,278 from Indiana; $46,534,822 from Iowa; $11,775,823 from Kansas; $54,625,809 from Kentucky; $24;161,905 from Louisiana; $79,497,521 from Maine; $87,593,613 from Maryland; 553,912,558 from Massachusetts; $118,394,676 from Michigan; $23,110,700 from Minnesota; $8,154,758 from Mississippi; $206,213,429 from Missouri; $2,494,511 from Montana; 5,738,512 from Nebraska; $15,870,589 from Nevada; $71,088,249 from New

Hampshire; $169,237,732 from New Jersey; $1,489,868 from New Mexico; $785,194,651 from New York; $1,921,527 from North Carolina; $269,713,610 from Ohio; $6,877,387 from Oregon; $712,178,944 from Pennsylvania; $111,418,354 from Rhode Island; $985,898 from South Carolina; $34,862,626 from Tennessee; $11,517,302 from Texas; $2,343,019 from Utah; $32,184,696 from Vermont; 38,364,222 from Virginia; $2,851,052 from Washington; $241,180,051 from West Virginia; $77,214,326 from Wisconsin, and $765,424 from Wyoming.

New York, Providence and Boston Railroad.

		246,922 13
Surplus		$154,991 96

Compared with the previous year the receipts of 1872 show an increase of $90,274 60, with an increase in expenditures of $80,838 31, making the increase in net receipts, $9,436 29. The president in his report says:

The receipts in each department of our business have been larger than in any previous year, and excluding dividend on stock held in steamboat Company, are $125,000 in excess of those of 1871. There is an apparent increase in expenditures of about $80,000, the larger portion being for filling in the pile work at Poquonnock river and Munford's Cove. This work, which has been progressing for years, is now nearly completed, and a large saving in the annual outlay for repairs will thereby be effected. The road has received requisite repairs, and is now in good running order.

A second track has been laid between Providence and Wickford, with a superior quality of 60 pound English rails, and proves a great service in moving expeditiously the increasing number of trains. A branch track has also been laid from our main line to Providence river, about one and one-fourth mile. There has also been laid 116 tons new and 725 tons re-rolled iron, and 18,633 ties; 5,512 rails have been repaired at our shops and relaid.

The number of miles run is 441,485, at a cost of 12.676 cents per mile for fuel.

The superintendent recommends that the double track be continued from Wickford to Kingston, seven miles, in time for the next summer business. It would be well that you authorize the directors to have a second track laid, not only to Kingston, but in case the business of the road warrant it, from that point to Stonington. The probable outlay of the entire distance—30 miles—will be about $300,000.

In April last we resumed the payment of quarterly dividends, and confidently rely on their continuance.

We have no floating debt, and the construction account, which was opened last year, has been charged with no rolling stock except two locomotives, the other items carried to the account are for second track, and for enlargement of ferry, &c.

Since the completion of the new ferry boat on the Thames river, there has been a marked increase in through travel.

More than half a million passengers—a larger number by 50,000 than in any previous year—have been carried over the road without loss of life or any serious accident, a result affording ample proof of the vigilance and skill which our worthy superintendent and his associates have exhibited, entitling them to your hearty thanks.

The number of passengers carried over the road the past two years is as follows:

	1871.	1872.
Through passengers	130,452	152,962
Local passengers	333,163	363,948
Commuters	82,004	97,301

The amount of freight transported over the road the past two years is as follows:

	1871. Tons.	1872. Tons.
Through freight	153,214	171,134
Local freight	56,863	58,543

CONSTRUCTION ACCOUNT.

New engines	$20 000 00
New ferry boat	2,346 42
New scales	1,074 26
Second track	236,013 40
Track from main line to Prov. river	15,293 42
Alteration ferry slips	5,430 13
Real estate	9,000 00
	$289,157 63

STOCK and BONDS.

Superintendent.—A. S. MATHEWS.

Treasurer.—HENRY MORGAN.

Secretary.—F. B. NOYES.

Chesapeake and Ohio Railroad—Opening of the Iron and Coal Deposits of Virginia.

Office of FISK & HATCH, 5 Nassau St.,
NEW YORK, November 1st, 1872.

By the close of the present year, or early in January, 1873, the CHESAPEAKE AND OHIO RAILROAD will be completed and open for traffic from the wharves at its present eastern terminus, immediately below Richmond, to the head of continuous navigation, at Huntington, on the Ohio River, 420 miles.

The portions of the road now in operation and completed, are as follows, viz.:

From Richmond, westward, to the White Sulphur Springs	227 Miles.
From Huntington, the western terminus on the Ohio River, eastward, to Ganley	90 "
Additional miles completed westward from White Sulphur	65 "
Total completed	382 Miles.

Leaving a gap between Richmond and the Ohio River of only 38 miles, upon which the rails are being laid at the average rate of three-fourths of a mile per day; and the grading, masonry, bridging, &c., are so nearly completed, that tracklaying can be continued without material interruption until the whole is finished.

In connection with this announcement, a brief review of the character, advantages and prospects of the Chesapeake and Ohio Railroad will not be out of place, and cannot fail to be of interest to those to whom this communication is addressed.

The opening of this new East and West line of communication is an event of the highest importance, both to the populous States of the Atlantic seaboard and to the producing regions of the great West, and is destined to exert a marked influence upon the solution of the problem, so much discussed, of the cheaper transportation of Western products to the sea.

The great significance of a through line of railroad, leading directly from the best harbor and the most westerly indentation of deep water on the North Atlantic coast line, into the very heart

of the Ohio and Mississippi Valleys, with their twelve thousand miles of connected and constant navigation, having grades lighter than those between New York and Philadelphia, and with an abundance of cheap fuel along its route, must be apparent to those who produce, and those who trade in or consume the great staples of commerce.

The virtual monopoly hitherto enjoyed by the three or four lines of communication penetrating the West, has added to the cost of its products the highest rates for transportation which they could be made to bear, and limited the area and extent of production to a degree that has attracted the attention of all classes interested, more than almost any other question of our times. The closing of the lake navigation by storms and ice during four months of the year, and the limited capacity of the Erie Canal at its best, have hitherto left so large a surplus of produce subject to rail transportation over long distances, that high rates have inevitably followed, profits have been swept away, and production and shipment discouraged.

The means of transportation and distribution between the East and the West have not kept pace with the increase of population and production. The following, from a recent issue of the Chicago *Tribune*, forcibly illustrates how much the need of a new and efficient line of transport is felt at the West:

HIGH FREIGHT CHARGES.

"It is becoming a serious question what is to be done with the grain products of the country. During the last sixty days there has been a general advance in the rates of freights all over the country, and the effect is crushing upon those who produce the lower-priced varieties of grain. This advance has not affected the wheat growers so much, because there is comparatively very little wheat going forward. This is, however, accidental. As an illustration, let us give some figures. The cost of moving corn from a point one hundred miles distant from Chicago, by way of the lakes and Erie Canal, including the intermediate charges, to New York, is 41½c. This does not include any charge or profit in that city. The price of corn in New York is 65c. Allowing 3c. per bushel to cover profits and expenses in New York, there is left to the producer just 21c. per bushel for his corn. In oats the case is even worse. It costs to deliver oats from a point like distant from Chicago, in the boat at New York, 31c. per bushel. Oats are selling in New York at 40@44c. If 2c per bushel be allowed for expenses and profits in New York, there is left to the producer 6c. to 10c. per bushel for his oats at the place of growth. Of course, there is a limit beyond which wheat, corn and oats cannot be transported except at a cost equalling or exceeding the value of the article. The rate of freights on oats has almost reached that point now. They may be still further advanced until they prohibit the transportation of corn, and even of wheat. The present freight charges to New York are nearly double the average rates of last year, and the advance in freights is of necessity taken from the price of the grain in the hands of the producer."

For years the residents along the banks of the Ohio and Mississippi and their numerous tributaries have been devising plans by which their cotton, breadstuffs, provisions, fruits, tobacco, hemp, and minerals, might be cheaply shipped to the American and European seaboard cities. The route *via* the Mississippi and Gulf of Mexico, besides involving such a loss of distance and time, is found to be attended with insuperable difficulties, and the demand for cheap freights has continued to increase, and to seek other outlets.

It has been estimated that the average cost of moving heavy freights on these inland streams is but three mills per ton per mile, while the average cost of the same class of freights by all rail lines can not be less than four or five times that of the water lines.

Nothing can be more certain, therefore, than that a line of railroad affording a short, economical and reliable portage between cheap river transportation which is available at all seasons, and an Atlantic port favorable for distribution and shipment, will command a freighting business limited only by its capacity.

The Chesapeake and Ohio Railroad reaching the cheap navigation of these western streams at the head of navigation on the Kanawha River, (during the season in which this river is navigable), only 342 miles from tide water, and at the head of continuous navigation at low water on the Ohio River, only 420 miles from tide-water, is the shortest portage between uninterrupted water carriage at the West and an Atlantic port, while it enjoys all the conditions of economical, continuous and profitable operation.

At Huntington, its terminus on the Ohio, steamers and barges may at all seasons of the year transfer to the cars their cargoes brought direct from New Orleans, Shreveport, Yazoo, Memphis, Fort Smith, Tuscumbia, Nashville and Paducah in the southwest; from St. Paul, Fort Benton, Omaha, Leavenworth, Burlington, Quincy, Keokuk and Peoria in the northwest; and from St. Louis, Cairo, Louisville, Cincinnati in the mid-west, and receive in return the fabrics and wares of Eastern manufactories and imported merchandise for transport to those points. Grain, live stock, meats and other products can be delivered at the river terminus of the Chesapeake and Ohio Railroad from the various points of the Mississippi River system, at less cost than it is possible to place freight from the same localities so far eastward by any other route, and from thence find the shortest and cheapest rail transportation to the seaboard, that can be reached by floating cargoes at all seasons.

All the more northerly routes by which the economy of water transportation can be secured to any considerable extent are available for only a portion of the year, during which they are always overcrowded. Water communication with the Western termini of the other roads reaching the Ohio River from the East is impracticable for several months in the year in consequence of low water or ice in the Upper Ohio. Communication with the open sea and coastwise navigation from their Eastern termini at Philadelphia and Baltimore are also frequently interrupted by ice.

The water communications at both ends of the Chesapeake and Ohio Railroad are comparatively constant and uninterrupted. The Chesapeake Bay is always free from ice, and the navigation of the Ohio River as low down as the terminus of this road is rarely obstructed.

The economy of this route for the transportation of Western products to Atlantic ports is therefore continuous and available throughout the year.

In addition to these advantages of a short and economical portage between continuous and unobstructed cheap water transportation, the Chesapeake and Ohio Railroad will soon have direct and low grade all rail connections with the principal produce and railroad centers of the West, and with the entire system of western railroad communication.

The ELIZABETHTOWN, LEXINGTON, and BIG SANDY RAILROAD, which will form the last link in the shortest and easiest line to and from Louisville, St. Louis, and the Southwest is already in operation under lease to the *Louisville, Cincinnati and Lexington* Company, from Lexington to Mount Sterling, 33 miles. The remainder of the distance, 85 miles, from Mount Sterling to a connection with the Chesapeake and Ohio, has been carefully surveyed and will be completed at an early day.

The SOUTHERN OHIO RAILROAD COMPANY, whose purpose is to complete the line from Dayton to the Ohio River, at a point opposite Huntington, so as to afford a short and favorable connection for the Northwestern cities over this route, have been prosecuting their surveys and improving their lines.

The CINCINNATI and CHESAPEAKE Railroad Company, have also made careful surveys of their line following the Valley of the Ohio, from Huntington *via* Portsmouth to Cincinnati, which establish the important fact that the road can be cheaply and rapidly constructed with grades *not exceeding* 15 *feet per mile throughout.*

The importance of this line, and the value of the connection which it will form with the Chesapeake and Ohio, are strongly appreciated at Cincinnati and throughout the populous and wealthy towns and counties along the route.

Another important result of the completion of the Chesapeake and Ohio Railroad, will be the very great stimulus it will impart to the COAL and IRON industries, and the various branches of manufacture associated therewith, in the Ohio valley, and along its line in Virginia and West Virginia.

While the Extension of the road to the Ohio river has been under construction, mining engineers and exploring agents of capitalists have been traversing the great iron ore belt of Virginia and the coal beds of the Kanawha and New rivers. Large tracts of valuable mineral lands have been purchased by practical miners and iron-workers from Europe, Pennsylvania and other States, as the result of these examinations.

The natural advantages and attractions for the investment of capital in coal mining extend for a hundred miles along the line of the road; and advantageous locations for iron furnaces, rolling mills, foundries, and iron works of various kinds, are found along almost the entire road. The time cannot be far distant when the various industries requiring cheap iron, coal, timber, water-power and cheap transit, will cluster along 300 miles of the Chesapeake and Ohio Railroad and create a local traffic which alone would render it one of the most valuable railroads in America.

Some of the most prosperous and profitable railroads in the country derive their revenues almost exclusively from the transportation of iron and coal; and those railroads which traverse prolific regions of iron and coal have been uniformly remunerative. The receipts of the Reading Railroad from the transportation of coal alone for the year ending Nov. 30, 1871, amounted to $8,287,248 14.

We think it is no exaggeration to say that there is no railroad in the United States whose route is so rich in iron ores and coals as that of the Chesapeake and Ohio, or whose location is better calculated to command for these products the widest distribution to the best markets.

Prof. T. S. Ridgway, a mining engineer and geologist of repute, who has had more than thirty years' experience in the field, has made a full and careful examination of the minerals of commerce along the line of the road. The concluding summary of his Report,* in relation to coal and iron ores, is as follows:

MAGNITUDE OF THE DEPOSITS.

"The lower coal measures, which I have just described in detail, are comprised in twenty-four seams, eleven of which—containing an *aggregate thickness of fifty-one feet*—are workable. The pick and shovel may disclose new beds in addition.

"Any attempt to estimate, by calculation, the amount of coal contained within a given number of miles of your road would be futile. Without deeming it necessary to resort to a trigonometrical survey of even a small portion of the field, it is quite obvious, even to the practised miner, that there are above the water level, between Big Sewell Mountain and Charleston, within five miles on either side of the line on your road, thousands of millions of tons. The same seams could, of course, be reached by pits of moderate depth, between Charleston and Huntington; and the amount of coal available from West Virginia is incalculably large—sufficient, allowing for a normal ratio of increase in consumption, to supply the Western markets for a thousand years to come.

ADVANTAGES FOR IRON AND STEEL MANUFACTURE.

"Reviewing the ground between a point in the Piedmont District of Virginia, say Gordonsville, and the point where your line debouches on the Ohio, Huntington, a distance of 325 miles, as traversed by your road, I find an almost constant succession of the minerals prominently used in the mechanic arts and commerce; and I am convinced, from the way in which they are presented at the surface, from their abundance and variety, and from their proximity to, and elevation above, the road, that all the elements of successful, continuous, and profitable coal mining and manufacture are here found closely associated, and under the most favorable conditions for use. The iron ores are especially rich, of great variety; the carboniferous limestone is especially superior for fluxing purposes; the several kinds of coal, are, in their several ways specially adapted for the manufacture, refining and working in iron and steel; and I am decidedly of the opinion that both the crude metal, and its more finished products, may be produced along this portion of your road at less cost, or, in other words, so as to yield a larger profit, than in even the most favored localities in other States. Having heretofore investigated and reported upon various furnaces, and having in view the cheapness of coal and charcoal, fuel, labor in Virginia (colored), and the resources of water power, I am satisfied that pig iron can be made at numerous points along the road at from $18 to $20 per ton.

* Copies of this Report, with Geological Map, may be had on application at the office of the CHESAPEAKE & OHIO R. R. Co., 54 William Street, or at the Banking House of DISE & HATCH, 5 Nassau Street, N. Y.

"The fact that good serviceable coal can be placed in your cars at $1 per ton, exclusive of royalty, is one of the first importance, both to the workers in iron, and to the immense distribution of coal for various uses throughout the Mississippi Valley. It will be observed also that, unlike most railroads, by the establishment of iron-works between these extreme points, a reciprocity of freights would follow, the cars passing one way loaded with coal, and the other with ores. The light grades of your line will not only admit of this interchange, but also enable you to distribute the minerals to the works along the line at less cost, and also add to the net revenues of the Company. Finally, there is no better outlet for coal and manufactured iron and other products to the Mississippi Valley on the one hand, by means of the 12,000 miles of internal navigation, added to the vast net-work of railroads with which the Chesapeake and Ohio Stem Line is destined to be connected; or, on the other hand, to the Seaboard Cities by way of the cheap coast navigation which your line reaches at its eastern terminus on the Chesapeake Bay."

To understand the value of these resources it is only necessary to glance at the growth of the Coal and Iron trade of the world and of the United States within the past few years.

Mr. Abram S. Hewitt in his very able and eloquent address before the American Institute of Mining Engineers, says:

"In 1856 I had occasion to trace the history of the manufacture of iron, and established what may be termed its law of development, rather rude indeed, but plainly dependent upon the growth of population and the spread of civilization throughout the world. At that time the annual production of iron had reached about 7,000,000 tons, of which Great Britain produced 3,500,000 tons, and the United States about 1,000,000 tons. The consumption of Great Britain was 144 pounds, and of the United States, 84 pounds, while the average consumption of the world was only 17 pounds per head, of population. It was shown that the consumption per head was steadily on the increase, and that consequently the annual production was enlarging so rapidly as to double once in 14 years; and it was predicted, after making due allowances for all the drawbacks, such as the wars which have unhappily taken place in the interval, beyond any possible expectation, that in 1875 the production of iron would surely reach 14,000,000 tons. The actual returns show that in 1871 the production amounted to 13,500,000 tons, and in 1872 the limit 14,000,000 will undoubtedly be passed, so that the estimate made in 1856 is more than realized. Meanwhile the consumption has risen in England to 200 pounds, in the United States to 150 pounds, and in the whole world to 30 pounds, per head. It is not possible to convey a more striking idea of the progress of the world, during the last 17 years, than this statement affords. The consumption of iron measures the progress of civilization, and it is impossible not to believe that the whole world will ultimately require as much iron per head as we now use in the United States, when a total annual production of over 70,000,000 tons will be required. But, if these figures seem to be at all wild, no one can for a moment doubt that the next 17 years will double the present annual production of iron, bringing it up to 28,000,000 tons per annum; and I feel quite safe in asserting that the beginning of the twentieth century, which some among you may hope to see, will witness an annual production of over 40,000,000 tons.

"You need not be told that iron is produced at less money-cost in Great Britain than any other quarter of the globe. This has enabled her to produce about one-half of the total annual make. Of the 7,000,000 tons made in 1855, Great Britain produced 3,585,906 tons, and, of the 13,500,000 tons produced last year, she turned out nearly 7,000,000 tons. It is evident, however, that there are limits in the way of raw material and labor beyond which Great Britain cannot go. While I see no reason to doubt that there will be a steady increase in production, it is evident that she will not be able to supply hereafter, as heretofore, so much as half the annual wants of the world for iron. But, allowing this proportion to Great Britain, there will still remain 14,000,000 tons to be made by the rest of the world. The history of the trade, as well as the natural resources of the several nationalities, prove that the bulk of this additional product can only be made in the United States. We are, in fact, the only people who have kept pace with Great Britain in the ratio of increase. In 1855, when Great Britain produced 3,500,000 tons, we produced 1,000,000 tons. In 1872, when Great Britain will produce 7,000,000 we produce 2,000,000 tons—the quantity produced in Great Britain in 1847, showing that we are only 25 years in arrear of her magnificent production. At the same rate, therefore, we could make 7,000,000 tons in 1897. But, as Great Britain cannot possibly maintain her rate of increase, there does not seem room for a doubt that our annual production will reach at least 10,000,000 and will probably amount to 15,000,000 tons before the close of the present century. This means that 25,000,000 to 40,000,000 tons of iron ore shall be annually extracted from our mines, and that our coal-production will exceed 100,000,000 tons per annum, required for iron and other branches of industry. It means that an investment of capital to the amount of $500,000,000 at least, and probably $1,000,000,000, shall be made in opening mines, erecting works, and supplying the requisite machinery of production."

The following figures will give an idea of the growth of Coal production and consumption in the United States:

The Anthracite Coal trade of Pennsylvania amounted in 1840, to 959,973 tons; in 1850, it had increased to 8,358,899 tons; in 1860, to 8,513,128 tons; and in 1870, to 16,849,899.

These figures cover a single variety of Coal and the Coal area of part of a single State only. The statistics of the production of Bituminous Coal would show an equal or greater ratio of increase.

It is safe to assume, in view of the rapid increase in the manufacture of iron and in the numerous other industries in which Coal is employed, and the constantly widening field of Coal consumption in place of wood, as the forests disappear, that the ratio of increase in the demand for Coal—especially for the bituminous varieties in which the route of the Chesapeake and Ohio Railroad abounds—will in the next ten years, exceed enormously that of any previous period.

The recent remarkable advance in the price of coal and iron, steel and allied manufactures, in the markets of Great Britain and continental Europe, is giving a great impulse to the rapid development of coal mining and iron manufacture in this country, and especially on the line of the Chesapeake and Ohio Railroad.

Coal and pig-iron have risen from 50 to 150 per cent. in value in the principal markets of Great Britain. The limited coal-bearing territory of England is being probed and bored anew, and every device tried to satisfy the demand for coal and iron. The novel spectacle is seen of coal being imported from Belgium and Holland to the North of England, while iron ores have long been exported from Sweden, Norway, and Spain, to supply the deficiency of English mines. The cheap labor of England which has enabled her hitherto to supply so large a proportion of the iron consumption of the world, is itself disappearing: and the flow of labor and capital to America, combined with our natural advantages for these two important branches of industry, must render the United States the great iron and coal producing country of the future.

These facts add a new importance and value to our rich deposits of iron ore and coal, and to the lines of communication which open them to market. Already American coal is taking the place of the English article as fuel in several ports hitherto supplied exclusively with the latter. Orders have recently been transferred from Liverpool, England, for the large supply of large quantities of bituminous coal from American ports, to be shipped to Madeira, Rio Janiero, Aspinwall, St. Thomas, Martinique, Havana, Valparaiso, and other distant points.

The bituminous coals of the Kanawha and New River Valleys are of superior quality for shipping and fuel purposes. These coals can be delivered over the light grades of the Chesapeake and Ohio Railroad, at low rates, and placed on board vessels at a point on deep water much more accessible, and 160 to 180 miles nearer the open sea, than those at which the Cumberland and Allegheny coals, with which the Eastern markets have hitherto been supplied, are delivered for shipments.

The Baltimore and Ohio Railroad delivered at its wharves and depots in Baltimore, during the past year, 1,500,000 tons of the Cumberland coal. The same amount delivered from the Kanawha and New River coal mines by the Chesapeake and Ohio at its seaboard terminus, would yield to the road upwards of $5,000,000 in freights; and it is believed this amount will be reached within two or three years.

Parties operating mines on the Kanawha and New Rivers have already made and are making contracts for the transportation of large amounts of coal over the Chesapeake and Ohio Railroad in both directions.

There will be a large demand for the Kanawha cannel coal for gas purposes and for use in grates, and large quantities, already mined and sold to gas companies at the East, are awaiting transportation over the railroad for delivery on board vessels at Richmond. The importations of cannel coal into this country have been nearly 850,000 tons per annum; and the average price in New York $14 to $18 per ton. This whole supply may be drawn from the Kanawha mines at a large reduction in cost, which must lead to a greatly increased consumption, and there can be no doubt that a very large proportion of the cannel coal consumed on the Atlantic seaboard, hitherto mostly imported, will hereafter pay freight to the Chesapeake and Ohio Railroad.

The coal traffic to the West is also destined to be of great importance and value to the Chesapeake and Ohio Railroad. The common fuel of the Western prairies, and of the towns and cities of the Ohio and Mississippi Valleys, is bituminous coal. The manufactories of the West, of course, depend almost wholly on coal for their operation. They, in common with the whole lower Mississippi Valley, from the Ohio to the Gulf of Mexico, have been dependent hitherto upon coal shipped from the region near Pittsburg, subject to the risks, uncertainties and delays of the navigation above the terminus of the Chesapeake and Ohio Railroad. The quantity of coal from Pittsburg passing Huntington, in a single year, was 60,000,000 bushels, equal to 2 143,000 tons. The amount of coal received at Cincinnati during the past year is stated at 36,894,000 bushels, or over 1,300,000 tons.

It has been estimated by business men in Cincinnati, that not less than $3,000,000 per annum, on the basis of past consumption and the average cost for the past two years, would be saved to that city alone, by a continuous connection with the Kanawha coal fields.

As the bituminous coals of the Kanawha are equal in all respects, for use in the Ohio and Mississippi River markets, to those from Pittsburg, and as they can be delivered at Cincinnati and other river points at a less average cost, and with far greater certainty and regularity at all seasons of the year, it is reasonable to assume that in time a large proportion of the coal supply for these markets will be drawn from the line of the Chesapeake and Ohio Railroad, thus giving to the road a very large and profitable westward coal traffic.

Recent explorations more than confirm all that has hitherto been said of the variety, richness and abundance of the IRON ORES along the line of the Chesapeake and Ohio Railroad, and their superior quality and value for the purposes of commerce.

They consist of very rich Brown hematites, magnetic, fossiliferous, argillaceous, specular and other varieties, required for the manufacture of superior qualities of iron and steel, which can be produced, as shown by actual demonstration upon the line of this road cheaper than anywhere else in the United States.

In the immediate vicinity of the Iron Ores there is an abundance of LIMESTONE, suitable for iron manufacture, and the railroad will bring within easy reach the cheap and abundant coals of the New River and Kanawha, which are especially adapted for the use of iron furnaces.

These favorable conditions for the manufacture of iron have attracted increased attention during the past six months. Large tracts of iron ore lands have been taken up. Arrangements have been already made for the erection of several large furnaces on the line of the road, those previously in operation are preparing for renewed activity and enlarged production, and numerous other similar enterprises are in progress and under consideration.

These movements are but the beginning of what it is believed will, in a few years, render the line of the Chesapeake and Ohio Railroad the chief iron manufacturing district of the United States.

In connection with the Iron and Coal, the variety and abundance of TIMBER in close proximity to them becomes of great importance, and is attracting attention to the line of this road, as possessing unusual advantages for the various manufactures in which cheap iron, fuel and timber are essential, such as car building, the manufacture of agricultural implements, &c.

Arrangements have recently been made by parties possessing ample capital, for the erection at Huntington, the western terminus of the road, of a very extensive Car Wheel establishment, which, from present indications, will be followed in quick succession by other manufacturing enterprises of equal magnitude and importance.

The rich and productive AGRICULTURAL LANDS of the Valleys of Virginia, offer great inducements to immigration and settlement, and are proving especially attractive to the class of English agriculturists of considerable means who are seeking homes and landed estates in America, and to whom the soil and climate of Virginia are more inviting than those of the Far West.

During the past Summer, a considerable number of this class have purchased lands and settled in the vicinity of Staunton and Gordonsville, and the subject of emigration to and settlement in Virginia, is attracting so much attention and exciting so much interest in England, that arrangements have been made for a series of public meetings to be held during the coming winter, through the populous' middle counties of that country, at which well-informed citizens of Virginia have been invited to present the information so eagerly desired on this subject. These English settlers all bring money enough to pay for their lands, and to improve and develop them to the highest state of productiveness.

The beauty, productiveness and salubrity of the Valley of Virginia, will, under the new order of things which the completion of the railroad is introducing, attract a large agricultural population, and furnish an important addition to the local traffic in agricultural products.

The present TRADE of the City of Richmond is of far greater magnitude and importance, in its bearings upon the business of the Chesapeake and Ohio Railroad, than is generally supposed.

The flour Mills of Richmond are probably the most extensive in the United States. The "*Haxall*" and "*Galligo*" brands have a world-wide reputation, and are considered superior to any other for shipment to South American and other tropical and semi-tropical ports, owing to the influence of the climate in which they are ground. The Richmond flouring mills have therefore long commanded those markets to the extent of their ability to supply them. Their receipts of wheat during the past two years have been entirely inadequate to the demand for their flour and the capacity of the mills, leaving a yearly deficiency of over 3,000,000 bushels, equal to 90,000 tons, per annum, or 80 car loads per day. The additional amount required will be drawn from the West upon the opening of the Chesapeake and Ohio Railroad, and there is no doubt that when an ample supply of wheat can be relied upon at a reasonable cost of transportation, the flour business of Richmond will be largely increased.

The ships which take the flour of Richmond to South America and the West Indies, will bring back to that port return cargoes of coffee and sugar, with which the Western markets can be supplied, to a considerable extent, by importation at Richmond and transportation over the Chesapeake and Ohio Railroad, at less cost and in better condition than through any other channel.

Probably one-half at least of the coffee imported into the United States, which amounted in 1871 to 322,000,000 pounds, is consumed west of the Alleghanies. When the coffee ships, waiting orders at Hampton Roads, can place their cargoes on board cars there, or at the Richmond Docks, for transportation westward, it is believed that a large proportion of the coffee required for the Western markets will find its way over the Chesapeake and Ohio Railroad.

The water power of Richmond is among the finest in the country, and its manufactures of iron, heavy machinery, agricultural implements, &c., are gaining an extended reputation. The celebrated Tredegar Iron Works are already competing successfully with the best establishments elsewhere in the manufacture of cars, car-wheels bridge-iron, heavy castings, &c., for the West, with the cost of transportation heretofore greatly against them. With the opening of the Chesapeake & Ohio Railroad their facilities for supplying the Western railroads and markets with their products will be unsurpassed, and they will send an immense tonnage over the Road.

Richmond will also have a large trade in Western corn, oats and bacon for neighboring markets, and for North and South Carolina and coastwise consumption.

Richmond at the East and Louisville at the West are the leading TOBACCO MARKETS of this country. There are now at Richmond between 50 and 60 tobacco manufacturing establishments, in which about 5,000 hands are employed. A large proportion of the tobacco of Virginia, Kentucky, Tennessee and Missouri, will hereafter seek this market over the Chesapeake & Ohio Railroad for manufacture or shipment.

From the foregoing, it is apparent that the present trade of Richmond will ensure a large tonnage to the Railroad, without reference to the great increase in her domestic and export trade, and in her manufactures, which the completion of the Railroad, and direct communication with the West, is certain to create.

The celebrated *White Sulpher Springs*, one of the most beautiful and attractive watering places in the country, together with the *Old Sweet, Warm, Rockbridge Alum*, and other widely known MEDICINAL SPRINGS of the Alleghanies, have during the past Summer attracted a great increase of pleasure travel, though they have as yet been accessible by rail from the Eastward only. With the opening of the road through to the West, there will be an enormous increase of this travel, as these springs will be the favorite and most accessible watering-places and Summer resorts for the people of the entire West and Southwest.

This brief review of the advantages of the Chesapeake and Ohio Railroad, the investigations and researches of the past year, and the movements of capital and enterprise in the direction of the various industries for which the line of the road is so remarkably adapted, during the last few months, warrant the belief that the development of its business will be more immediate and rapid, and of greater magnitude than we have hitherto ventured to predict.

For the year ending Sept. 30th, 1872, the earnings of its disconnected portions, without mineral or through business, and with the rolling stock and motive power of the road, and the energies of the Company almost entirely devoted to the work of construction, were about $850,000 and steadily increasing, reaching in the month of August $114,000, or at the rate of nearly $1,400,000 per annum.

These indications as to the immediate business and requirements of the Road have led to a larger outlay than was at first contemplated, before its opening for business, the Directors being convinced that the necessary additional expenditure for thorough and permanent work and enlarged equipment, made now, must yield a large return in the early future of the Road.

Permanent embankments, masonry of the most substantial character, and the best Iron Bridges known to engineering skill have been adopted instead of trestle-work and wooden structures; Steel instead of Iron rails have been laid upon a portion of the route, where the demand upon the endurance of the track would be the heaviest and the contracts and orders for Locomotives, Coal cars and other equipment have been increased. The following will show the motive power and rolling stock with which the through line will begin business early in the coming year.

Locomotives	63
Passengers Cars	33
Baggage, Mail, and Express Cars	22
Box, Stock, and other Freight Cars	600
Coal and Mineral Cars	490

The company are also constructing a Tunnel under Church Hill, from their present Depot at Richmond to the Docks, toward the cost of which the City of Richmond has voted $300,000 besides granting to them free of cost the right of way along the entire water front of the city, which is of great value.

To meet these enlarged views and improved plans, and to fully prepare and equip the road for the business awaiting it, the Company have issued $5,000,000 in SEVEN PER CENT BONDS, payable in twenty years, from July 1st, 1872, or redeemable at the option of the Company after five years, and convertible into any Mortgage Bonds, which they may hereafter issue. Interest payable semi-annually on the first days of January and July. Principal and interest payable in gold in the City of New York.

A large proportion of these Bonds have already been sold, and the proceeds of the issue will be sufficient to fully complete and liberally equip the main line from Richmond to the Ohio River and leave the Company free from floating debt.

The Chesapeake and Ohio Railroad occupying the middle belt of temperature of the United States, comparatively free from the extremes of heat and cold, will have its Eastern terminus on the central and most commodious harbor of the Atlantic Coast, where navigation is never obstructed by ice, and where the largest vessels in the world can lie directly alongside its track; and its Western terminus on the Ohio River, at a point from whence transportation by water is more continuous and unobstructed throughout the year, than from any other point reached by rail from the East.

A bridge spanning the Ohio River, at this point, will connect it with all the great railroad lines of the West and Northwest, and it will have a nearly air-line connection, via Lexington and Louisville, with St. Louis, and the Pacific Railroads.

For a great portion of the Southwest it will be the most direct and economical route for passengers and freight to the great markets of the Atlantic Coast and Europe.

Its route is lined with iron ores and coals, unequalled in variety, quantity, quality and accessibility, by those of any equal area in the world, the beautiful and productive valleys of Virginia, immense virgin forests of valuable and marketable timber, salt wells, mineral springs and a profusion of almost all the natural resources with which a region of country can be enriched.

With these striking features, and the advantages which it possesses over the East and West through lines, in its low grades, slight curves and the economy with which it can be operated and maintained, it cannot fail to attract the attention and excite the interest of every intelligent man who notes its position and traces its course on the map, and to afford the profoundest satisfaction to every capitalist and investor who has any direct interest in the railroad itself, or in the resources and industries to which its completion is imparting so wonderful and rapid a development.

This magnificent work, which has for years been steadily cutting its way through the Blue Ridge and the Alleghanies, and upon the western half of which, the constant labor of over 5,000 men has been employed during the past three years, is now substantially completed at a cost of over $35,000,000.

We believe it is not too much to predict that within a very few years it will become one of the greatest thoroughfares in America; with a large and populous manufacturing city at Huntington, its Western terminus; with the city of Richmond taking its place among the leading manufacturing and commercial cities of the East; with its deep-water terminus on the Chesapeake Bay one of the principal points for the shipment of American products to foreign ports and their distribution along the Atlantic Coast; with lines of Ocean Steamers connecting it direct with the chief commercial ports of Europe; with iron furnaces and coal mines thronging its route and crowding it with their products, and exhibiting a growth and development of business which has not been excelled by that of any of the great highways of commerce in the history of the country.

FISK & HATCH,

Financial Agents Chesapeake & Ohio R. R. Co.

American Railroad Journal.

Saturday, November 9, 1872.

Stock Exchange and Money Market.

Election day having been a legal holiday in New York, under State law, the business of the week has been confined to five working days. The movements in the financial as well as the commercial line have been checked to some extent by the political excitement of the week. Money has been rather close and active, in the way of call loans, which have been generally on the basis of the legal rate of 7 per cent, the exceptional negotiations were reported at 6, and even 5 per cent. The discount market has been working somewhat less satisfactorily for the borrowing interests, and rates on the best grades of business paper have been quoted from 10@12 per cent. per annum. The city banks have been further weakened in the line of their legal tender reserve, while gaining in the specie average, which has been augmented about 1⅛ millions. Their deposit line has been about 1¼ millions. They enlarged their loan and discount average about 2⅞ millions. The U. S. Sub-Treasury reduced its coin reserve about 3⅝ millions while increasing its currency balance slightly.

Under the Treasury programme for November Government proposes to sell, at least, four millions of Gold, or one million on each Thursday, and to buy in four millions of Five Twenties, or one million on each Wednesday, of the month.

The U. S. Sub Treasurer under instructions from Washington, gives official notice, to the holders of 3 Per cent. Temporary Loan Certificates, issued under the Acts of March 2, 1867, and July 25 1868, to the effect that all such certificates bearing date May 15, 1868, of the denomination of $5,000, between the numbers four thousand five hundred and ninety-two (4,592), and five thousand one hundred and seventy-seven (5,177) inclusive, and of the denomination of $10,000, between the numbers four thousand seven hundred and seventy-six (4,776) and four thousand eight hundred (4,800) inclusive, will be paid on presentation at his office; and that from and after the 31st day of December, 1872, certificates will cease to bear interest, and will be no longer available as a portion of the lawful money reserve of any National Banking Association.

The 1st of November schedule of the Public Debt of the United States, shows a further deduction of the Principal of the Public debt since Oct. 1 of $5,228,417. There is an increase of Greenback Circulation, since Oct. 1, of $4,566,666, and a decrease of Greenback 3 per cent. Certificates, in place of new National Bank Circulation issued, of $1 555,000. This increase of Greenbacks is explained as having been made under the discretionary authority of the Secretary to re issue, temporarily or otherwise, any part of the $44,000,000 Greenbacks retired under the repealed Act of 1866, but not canceled as affecting the fixed limit, of Four Hundred Millions Legal Tender Notes, authorized by the several Acts of Congress.

The U. S. Sub-Treasury office last week received $4 703,241 of currency, and $3,910,672 of gold, the latter including $2,573,000 from customs; and disbursed $4,702 884 of currency and $7,518.117 of gold, the latter embracing $2,233,000 of coin interest. The city banks increased their loan and discount average about 2⅞ millions during the week, and again reduced their outstanding circulation slightly. The U. S. Sub-Treasury held a currency balance on Wednesday morning of $23,652,382, and a coin reserve of $47,048,743.

The city banks, in their latest return, show a decrease of $605,600 of legal tender notes, with an increase of $1,093,300 of specie, and of $1,202,800 of deposits, also an addition of $2,907,300 to their loan and discount averages and a contraction of $94 800 in their item of circulation. The city bank exchanges, last week, averaged 150⅛ millions. The banks now hold $5,625,975 of specie and legal tender notes more than the 25 per cent. of their liabilities required by the National Banking Act.

The specie reserve of the city banks according to the latest return is $11,888 600, against $12,982 900 same time last year. The city bank deposits are now $204,405,500 against $207,427,400, week ending Nov. 4, 1871. The legal tender reserve amounts to $51,736 500, against $51,572 200 same time last year. The circulation now stands at $27,591,200 against $30,225 000 same time last year. The loans are now $277,832,800 against $281,970,900 at this date last year.

The coin reserve of the city banks is now about 11⅞ millions as against about 29⅛ millions on the 20th of July; the legal tender reserve is about 51¼ millions against about 55½ millions on the statement of June 15th; and the deposits are now down to 204¼ millions, against 247½ millions on the 20th of July.

Government revenues have been yielding moderately since our last. The excises yielded within the week about 2⅛ millions, and thus far in the current fiscal year beginning with July 1 1872, $45,280,694. The customs at the port of New York last week were $2,410,434; and at the out ports, equal to about $800,000, all in coin or coin certificates.

Gold has been depressed and quoted much weaker as to price, with a less active business reported. The supply has increased by the Government coin interest disbursement, but was largely under speculative control, making a somewhat stringent market for borrowers of cash gold. The range of the price during the week has been from 111⅜@112⅝, and the closing quotation on Wednesday was 112⅝@ against 112⅜ the preceding Wednesday. The specie outflow last week was $1,172,557. The Gold Exchange Bank clearances have averaged about 51 millions per day during the week.

The customs demand for Gold last week, averaged $428 870 a day. The arrivals of specie from Europe, Havana and other foreign ports since Jan. 1, 1872, were $5,301,492 against $8,388,854 same time in 1871. The total customs revenue of the Government, in coin, at this port, since January 1, has been $129,755,269 against $136,935,617 during the same time in 1871.

Government has disbursed through the U. S Sub-Treasury here, on account of the coin interest on the public debt, since January 1, 1872, $66,933,177, against $72,727,052 during the same time in 1871.

The export drain of specie was $1,172,557 last week, against $488,161 same week preceding year. The shipments since January 1, 1872, have been $63,449,464 against $58,221,222 during the same portion of 1871.

Foreign Exchange has been in less demand and weak as to values, on free offerings of bills. Bankers' sixty day bills on London closed on Wednesday at 108⅜@108⅝; sight bills on London, 109¾@110.

The week's exports hence of domestic produce have been to the currency value of $5,227,617.

Government securities have been in limited supply and quiet, with prices easier, in sympathy with the Gold decline.

On Wednesday, Government bought in $428,000 of the offered Five-Twenties at from 111 87 @111 87. The aggregate offering was only $907,900@111 87@112 24.

U. S. sixes of 1881 at the close on Wednesday of the current week were quoted at 116¼@116½; U. S. Five-Twenties of 1862, 115⅝@111¾; U. S. Five-Twenties of 1864 at 112@112¼; U. S. Five-Twenties of 1865, 114@114½; U. S. Five-Twenties of 1865 consolidated, 114⅜@114⅝; U. S. Five-Twenties of 1867, 114⅜@114⅝; U. S. Five-Twenties of 1868, 114@114½; U. S. Tenforties at 108¼@108½ U. S. Fives of 1881 (Funding Loan) 100½@110; Six per cent. currency Sixes from 114⅛@114½.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Oct. 23.	Oct. 30.	Nov. 6
Consols	92¼	92½	92⅜
U. S. 5-20s, 1865	*91	91¼	91¼
" 1867	92⅝	93¼	93⅛
" 10-40s	87⅝	88	88
New Fives of 1881	*88½	89	89
Erie	41	43½	43¼

* Ex Nov. coupon.

State bonds have been in less request, and unsettled in price, closing tamely.

Railway and Miscellaneous share property has been less freely dealt in, and prices have fluctuated rather widely, closing, however, with rather more steadiness.

Railway Mortgage Loans have been moderately sought after for investment at about previous prices. Central Pacific Sixes have been in better request, closing firmly at 99⅞@100⅛.

The Metal trade has been unusually slack. Copper has been dull and weak; sales 50,000 lbs. Ingot at 31¾c., and 25,000 lbs. English at 29c. @29½c. Iron has been less active, and under some urgent offerings of poor lots of Scotch Pig, the market has shown heaviness; sales 600 tons Scotch Pig, various brands, part Glengarnock, at $53, but mostly on private terms; and 200 tons Allentown Pig at $55. Lead, Spelter, Tin, and Zinc dull at former figures.

Foreign goods have been less sought after, with the advantage, in most instances, in favor of purchasers. The week's imports of foreign goods reached the amount of $6,487,625 including $1,734,488 of dry goods.

Ocean freights have been moderately active, but at irregular rates, closing however, with rather more steadiness.

General business has been less active, the political excitement of the week operating against free dealings, in the commercial line. Values have been quoted easier, as a rule. Middling upland cotton, closed on Wednesday at 19½ cts. per lb. The receipts at all the ports, since Sept. 1, have been 691,677 bales, against 493,584, bales same time in the preceding year; exports 245,000 bales against 176,000 bales in the previous year; stock at the ports at latest dates, 302,660 bales against 249,840 bales same date 1871.

At the Live Stock Markets, Beeves have been in fair demand at 7¾@15 cts.; Veals at 7½@11½ cts.; Sheep from 4½@7 cts.; Lambs, 6½@8¾ cts.; Swine, at 5½@5⅝ cts. per lb., all live weight. The week's receipts were 8,870 Beeves, 1,775 Veal Calves, 25,569 Sheep and Lambs, and 38,780 Swine.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—St. Louis, Kansas City and Northern pref., 68; Boston, Hartford and Erie R. R., 8⅝; New Jersey Southern R. R., 28; Pacific R. R. of Mo., 59⅞; New York, New Haven and Hartford R. ☞ The management of the Grand Trunk Railway having determined to adopt the standard American gauge, the section from Port Sarnia to Stratford will be first changed, and thence to Buffalo. The matter has been so planned as to interfere but slightly with the traffic of the road. It is expected to have the job completed by the 12th of November.

☞ At the close of 1871, as appears by an official return, France had 10,755 miles of line in working, or in French measure 17,240 kilometres.

BANKING HOUSE OF FISK & HATCH,
No. 5 Nassau Street, NEW YORK.

☞ WE REC IVE DEPOSITS AND ALLOW interest on balances: issue CERTIFICATES OF DEPOSIT available in all parts of the country, MAKE COLLECTIONS in all parts of the Unnited States and Canada, and execute orders for STOCKS and BONDS at the STOCK EXCHANGE, on commission, for cash.

We deal in GOVERNMENT BONDS, and in the following FIRST CLASS RAILROAD SECURITIES which we can recommend for safe investment from a thorough knowledge of their character and value, viz:

CHESAPEAKE and OHIO BONDS, six per cent. gold, $100, $500 and $1,000 denominations. Interest May and November.

CENTRAL PACIFIC BONDS, six per cent. gold, denominations $1,000. Interest January and July.

WESTERN PACIFIC BONDS, six per cent., gold, denominations $1,000. Interest January and July. All of which we buy and sell at current market prices.

We have just published, in connection with the payment of the November interest on the Bonds of the CHESAPEAKE AND OHIO RAILROAD COMPANY, and the early opening of the road through to the Ohio River, a full statement of its advantages, character and prospects, and interesting geological Reports of the iron, coal and other minerals along it route, which may be had upon application.

FISK & HATCH.

A DESIRABLE HOME INVESTMENT.

First Mortgage Gold Bonds

OF THE

New York, Kingston and Syracuse

RAILROAD,

PAYING 7 PER CENT. GOLD, FREE FROM U. S. GOV'T TAX.

PRINCIPAL AND INTEREST PAYABLE IN GOLD.

This road passes through the richest agricultural region of the state, and is speedily reaching completion. It is the most direct line between the great lakes and deep water navigation of the Hudson River from LAKE ONTARIO and the GREAT WEST.

The 78 miles of the road now in operation is unusually well built, and its net earnings already paying 7 Per Cent., Gold, on the cost of construction and its equipments.

We are now offering these bonds at 95 and accrued interest, feeling warranted in recommending them to our friends and investors generally as a safe and most desirable investment

Pamphlets with maps furnished, with full particulars, on application to

☞ The Calumet and Hecla Mining Company will pay its usual quarterly dividend of $5 per share on 80,000 shares, on the 15th of November, which, with two extras of $5 each in July and October, will be at the rate of $2.400,000 in dividends per annum. Competent judges estimate that the net profits of this company for 1872 cannot fall short of $3,200,000, equal to $40 per share.

$5,000,000.

SAFE AND PROFITABLE INVESTMENT.

THE CHICAGO AND CANADA SOUTHERN

First Mortgage Sinking Fund

THIRTY YEARS'

7 PER CENT. GOLD BONDS

At 90 and Accrued Interest in Currency.

Interest Payable April and October.

REGISTERED OR COUPON PAYABLE IN LONDON OR NEW YORK.

This road, with the Canada Southern, forms the new Trunk Air Line from Buffalo to Chicago. It is under the same control and management, and is being built by the same parties who built the Canada Southern: Milton Courtright, John F. Tracy, David Dows, Wm. L. Scott Henry Farnam, R. A. Forsyth, John M. Burke, M. L. Sykes, Jr., all Directors both in the Chicago and Northwest and the Chicago and Rock Island; George Opdyke, of the New York Midland; Sidney Dillon, Daniel Drew, John Ross, David Stewart, Samuel J. Tilden, Kenyon Cox, and other prominent railroad men. The road is being rapidly built, in the best possible manner, with 60 lbs. steel rails throughout its entire line, and will be completed during the coming year; nearly one-half of the road will be completed and in running order by the 1st of January next; so that the *entire line*, from Buffalo to Chicago, will, within that time, be in successful operation. The builders of this Road control enough of the leading lines running from Chicago to insure an enormous business from the start. Taking into consideration the important fact, patent to all who study the statistics of trade, "That the present Trunk Lines, *now* taxed to their utmost capacity, are not affording facilities equal to the great and constantly-increasing demand for transportation, and that this Road, through its entire length, being practically STRAIGHT AND LEVEL, and SHORTER by THIRTY-FIVE MILES THAN BY ANY OTHER NOW BUILT, or THAT CAN BE BUILT, it must be apparent that this line is not only needed, but must be a great success. The proceeds of these bonds will complete and equip the entire road, and we confidently recommend them as a most safe and profitable investment.

Redemption and Restoration of Lands.

AN ACT to provide for the redemption and sale of lands held by the United States under the several acts levying direct taxes, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That all the lands now owned or held by the United States, by virtue of proceedings under the act entitled "An act for the collection of direct taxes in insurrectionary districts within the United States, and for other purposes," approved June seventh, eighteen hundred and sixty two, and under acts supplementary thereto, or upon the same subject matter, may be redeemed and restored to such persons as shall make application therefor to the Secretary of the Treasury, through the Commissioner of Internal Revenue, within two years from the passage of this act, and furnish satisfactory evidence that such person or applicant in each case was, at the time the United States acquired title thereto, the legal owner of such land, or the heir at law, or devisee, (or grantee, in good faith, and for valuable consideration,) of such legal owner; but before such redemption shall be awarded and title restored on any such application and proof, such applicant shall pay into the treasury of the United States the direct tax charged against the lands described in such application, together with the cost of advertising and of the sale of said lands, and all other proper charges against the same, and interest on said tax from the date of its assessment at the rate of ten per centum per annum, and interest on said costs and charges at the same rate, from the time they accrued and were payable: *Provided however*, That if any other person or persons than such applicant shall in any case make satisfactory evidence to said Department that he or they, after the acquisition of title by the United States, and before the passage of this act, made valuable and permanent improvements on said land in good faith and under color of legal title, it shall then be the additional duty of such applicant for redemption to pay to such person or persons the reasonable value of such permanent improvements at the time of actual redemption; and if the applicant and such person or persons fail to agree and amicably settle such claim for improvements, then the value thereof shall be assessed and reported to the Secretary of the Treasury, under oath, by three competent and disinterested freeholders, residents of the county or parish in which such land is situate, who shall be appointed for that purpose by the United States district judge of the district where the lands are situate, upon information from the Secretary of the Treasury that a claim for compensation for such permanent improvements is pending in any case, and unadjusted by the parties thereto. It shall also be the duty of said board of freeholders to state in their report the nature of said improvements, when they were made, by whom, and the reasonable value thereof, as aforesaid, and any other facts that may be in their judgment material to a fair and just determination of the rights of the parties. They shall send one copy of such report to the Secretary of the Treasury, and file a duplicate thereof in the office of the highest court of record of the State, in the county or parish where such land is situate. The reasonable fees of said board shall be borne and paid equally by the parties to said controversy.

Section 2. That whenever the foregoing conditions have been complied with, and redemption and restoration of title has been awarded in any case by the Secretary of the Treasury, it shall be the duty of the Commissioner of the Internal Revenue to make out a certificate of release of the interest and title of the United States in and to such lands, in duplicate, which shall be approved, in writing; by the Secretary of the Treasury, and his approval indorsed thereon, and then one copy thereof shall be delivered to such applicant and the other filed in the office of said Commissioner.

Section 3. That the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, shall, as soon as may be after the passage of this act, prescribe and promulate such rules and regulations, not inconsistent with the provisions of this act, as may be necessary and proper to facilitate the execution of this act and secure the most speedy and least expensive attainment of the purpose hereof that is practicable.

Section 4. That if, at the expiration of the time hereinbefore allowed for redemption, there shall remain any of said lands unredeemed, it shall then be the duty of the said Commissioner of Internal Revenue, under the direction of the Secretary of the Treasury, to proceed to sell at public auction, as soon as may be consistent with the public interests, the lands not redeemed and restored, and to release and convey the same to the purchasers in the manner aforesaid, and in the mean time and until so sold to release the same.

Section 5. That all lands now owned by the United States acquired under the provisions of any of the United States direct tax acts, situated in the State of South Carolina, including all tracts or lots of land purchased under "army and navy" sales, not paid for in full at the present time, shall be included in the provisions of this act: *Provided however*, That the applications of the "army and navy" sales, shall for six months after the passage of this act, have precedence so far as relates to the land purchased by them.

Section 6. That all money derived from the sale of "school-farm" lands, under the provisions of section eight of an act entitled "An act to continue in force and to amend 'An act to establish a bureau for the relief of freedmen and refugees, and for other purposes,'" approved July sixteen, eighteen hundred and sixty-six, and which money is now in the custody of the Freedmen's Bureau, be, and the same is hereby, appropriated for the use and support of free public schools in the parishes of Saint Helena and Saint Luke, South Carolina, in equal parts, to be expended under the direction and control of a special board of three commissioners, who shall be appointed by and act under the direction of the Secretary of the Treasury, and shall be duly sworn that they will faithfully discharge their duties as such commissioners, and shall give such good and sufficient bonds therefor as said Secretary shall require, and who shall not receive more than one hundred dollars per year each for their services.

Section 7. That the provisions of this act shall not be construed to apply to or embrace any lands, farms, plantations, or lots which are now, in whole or in part, used or occupied by the United States for national cemeteries, or for the burial of the dead, or other public purposes, or which have been set apart to any such purpose, or which, under the instruction of the President of the United States, have been reserved for military or naval purposes, or such lot of land on Hunting Island, South Carolina, as may be necessary as a site for the erection of a light-house.

Section 8. That the premises known and designated as block one hundred and twenty-three on the plat of the late commissioners of direct taxes for said State, in the town of Beaufort aforesaid, now occupied as a court house for the county of Beaufort, in said State, be, and the same are hereby, released unto said county, for the public uses of said county; and that all sums of money due to the United States on account of said premises, be, and they are hereby, released in favor of said county.

Section 9. That section two of an act entitled "An act for the relief of purchasers of land sold for direct taxes in the insurrectionary States," approved May ninth, eighteen hundred and seventy-two, be, and the same is hereby, amended to read as follows:

"Section 2. That in all cases where the owner of any land sold for taxes as aforesaid, his heirs or assigns, has recovered or shall recover the same from the purchaser, his heirs or assigns, without collusion on his or their part, by the judgment of any United States court, by reason of a failure, without his or their fault or neglect, of the title of the purchaser derived from said sale, the Secretary of the Treasury, on the payment into the treasury, by the clerk, of the money deposited with him as aforesaid, and on being satisfied that any purchaser, his heirs or assigns, without his or their collusion, has been evicted from or turned out of possession of any such land by the judgment of any United States court, in the manner before mentioned, is hereby authorized, out of any money in the treasury not otherwise appropriated, to repay to the person or persons entitled thereto a sum of money equal to that originally paid by the purchaser of the land so recovered, if the same has been paid into the treasury, or to any person legally authorized to receive the same for the United States."

Approved June 8, 1872.

Journal of Railroad Law.

RAILROAD COMPANIES—INJURY TO ANIMALS—DAMAGES.

The facts in the late case of The Indianapolis, Pittsburg and Cleveland Railroad Company *vs.* Mustard, (34 Ind., 50,) are fully and clearly stated in the following opinion by

WORDEN, J.—This was an action by the appellee against the appellant for injuring and killing a cow belonging to the plaintiff by the engine and cars of the appellant upon her railroad where the same was not properly fenced. Trial by the court, finding and judgment for the plaintiff, a motion for a new trial being overruled.

It appears by the evidence that the plaintiff's cow being upon the railroad track was struck by the pilot of an engine and carried or dragged along the track some distance, and then thrown off; that one of her legs was cut entirely off, except a small portion of the skin, and another leg broken; that she was so badly injured that she could not recover. She lay in this condition a day or two when the plaintiff killed her but did nothing further with her; and she was afterwards buried by the employees of the defendant.

During the progress of the trial, the defendant, for the purpose of "fixing the damages," offered to prove the value of the cow after she was thus hurt, but the testimony being objected to, it was excluded. Under the circumstances we cannot say that this was error. The plaintiff, out of motives of humanity, doubtless, and to end her misery, killed the cow, but derived no benefit whatever from her defunct carcass, and then she was taken charge of by an employee of the defendant who performed her final obsequies by consigning her to the earth, where she could be a source of profit to no one.

Had the plaintiff actually received some benefit from the cow after she was hurt or killed, the question would have been a different one. We take it to be quite clear on principle, that if a railroad company, or any private individual, kill the animal of another, under circumstances that render the company or the individual liable therefor, the rule of damages will be the value of the animal, unless the case calls for vindictive or punitory damages; and these damages are not to be diminished by the value of the dead, unless the owner thereof in some way derives an actual benefit therefrom or does some act evincing an election to appropriate the dead animal to himself. A man whose animal is wrongfully killed is not obliged to take the dead animal in part pay for the living one.

We regard the case before us as substantially one of killing. The cow must have died from her injuries and the defendant is responsible for her full value.

We have examined the evidence in the cause and are satisfied that the finding of the court, in respect to the damages assessed, and also in respect to the liability of the defendant accords with the preponderance thereof.

The judgment below is affirmed, with costs and five per cent. damages.

Judgment affirmed.

Imports of Dry Goods.

The imports of foreign dry goods at New York for the month of October, were :

ENTERED FOR CONSUMPTION.

European and North American Railway.

On Saturday evening representatives of the European and North American Railway Company of New Brunswick (Western Extension, from St. John), and the European and North American Railway Company in Maine, met in St. John, and after arranging conditions, signed an agreement for a consolidation of the two companies into one which shall have the complete control of the whole line from this city to St. John. This agreement will be submitted to a meeting of the stockholders on the 8th of November, and if ratified, will go into effect on the first of December, when a new board of officers will be chosen—five Directors being taken from the New Brunswick Company and eight from the Maine Company. Until that date, however, the road will be run under its present management.—*Bangor Whig.*

☞ The Philadelphia *Ledger* of 4th inst., reports the net anthracite coal tonnage for the week ending on the 26th ult., from all sources, at 444,514 tons, and for the year 16,326,684 tons, against 12,516,728 tons to the same date last year, being an increase in the tonnage of anthracite coal of 3,819,956 tons. The production of bituminous coal for the week was 63,150 tons, and for the year 2,102,718 tons, against 1,828,966 tons to the corresponding time last year—an increase of 273,732 tons. The total production of all kinds of coal for the week was 507,655 tons, and for the year 18,439,402 tons, against 13,815,710 tons to corresponding time last year, showing an increase of 4,093,713 tons.

THE INDIANA
AND
ILLINOIS CENTRAL
RAILWAY COMPANY'S
First Mortgage 7 per cent.
GOLD BONDS.
$3,500,000.

This is an EAST AND WEST ROAD RUNNING ON THE 40TH PARALLEL FROM INDIANAPOLIS, IND., TO DECATUR, ILL., 152 miles; through the richest agricultural and mineral country of both states; and connecting at termini with the GREAT THROUGH ROUTES to the East and West.

It is the only East and West road in a belt averaging 30 miles wide, and passes through the best part of the rich

BLOCK COAL FIELD

of Indiana, in which the COMPANY OWNS 2,000 ACRES OF BLOCK COAL LANDS. It owns, also, 30,000 acres of Farming lands.

$1,400,000 IN CASH HAS BEEN ALREADY EXPENDED ON THIS ROAD, of which 30 miles in Illinois are finished and in operation. Fifty-five miles more, completing the Western Division, Decatur to the Coal Fields, will be completed this fall and the whole road in 1873.

Upwards of TWO MILLIONS OF DOLLARS more are pledged to the enterprise, partly by counties, towns and individuals along the line, but chiefly by wealthy capitalists, among whom are W. H. GUION (of WILLIAMS & GUION), SIDNEY DILLON, JAY COOKE & CO., CLARK, DODGE & CO, J. & W. SELIGMAN, VIBBARD, FOOTE & CO., and PAUL S. FORBES, of New York, BENJ. E. BATES, of Boston, HENRY LEWIS, of Philadelphia, and GEO. M. PULLMAN, of Chicago.

Bonds $1,000 each, payable in 30 years, principal and interest in *Gold free of Government Tax.* Sinking Fund 2½ per cent. on Gross Earnings.

For sale at 90 and accrued interest by the Financial Agents of the Co. (of whom pamphlets and information may be obtained.)

CAMP'S IMPROVED DUMPING CAR.

(Used by the American Dredging Company.)

RIGHTS FOR SALE BY

N. H. CAMP,

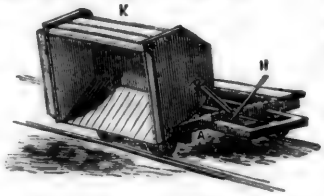

Fig. No. 1, Car Loaded. Fig. No. 2, Car Dumped.

TO DUMP THE CAR.

The Brakeman seizes the lever H, and raises it, thus removing the step from under the box-support A, when the weight of the load causes the box to roll over to the position shown in Fig. 2.

To replace the box in readiness for another load.

The Brakeman, standing on the platform, reaches over, and grasping the corner of the box, pulls it back to its place.

HAND'S IMPROVED DUMPING CART.

PATENTED APRIL 4th, 1871.

THE MOST PERFECT YET INVENTED.

Can be dumped by a single motion of one hand while you hold the horse with the other.

The tail-board being attached to the shafts, lifts of its own accord when the cart is dumped, as seen on the right of the engraving. As soon as the load is dumped all you have to do is to start the horse, and the cart will resume its proper position, as seen in the left of the engraving, hook itself and replace the tail-board, without any assistance of the driver whatever. The shafts are attached to the outside of the body, near the hubs, which gives the horse great control over the cart, and prevents the body from playing from side to side as they do when the shafts are pivoted underneath.

Manufactured and for Sale by **WILLIAM & HENRY HAND,**

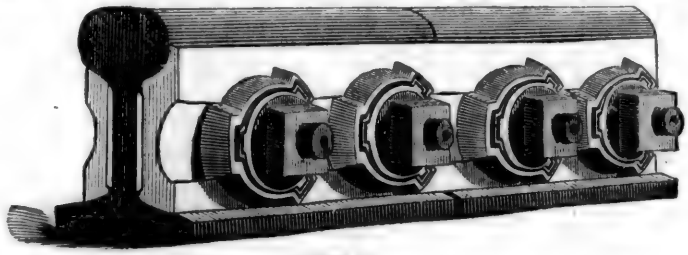
FISHER'S PATENT

Wrought Iron

RAIL JOINTS,



MADE BY

FISHER & NORRIS,

TRENTON, N. J.

The Superiority of these Joints has been proved by eight years' use on different Roads.

PRATT'S PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

Iron Production.

The iron production is attracting much attention in England as well as in the United States, and there as here the views of consumers and producers in regard to supply and demand during 1872 are naturally far apart, but it is safe to say, without leaning to the side of either, that both production and consumption promise to be largely increased. It appears from the report of the Secretary of the National Association of Bar Iron Manufacturers that the production of the Lehigh region of this State in 1871 was 275,000 tons, while its full capacity is 378,000; the Schuylkill region, with a capacity of 160,300 tons, also falling below it about 18,000 tons. The total production of pig iron for the year is returned at 1,850,000 tons, which it is calculated would have been greater by 250,000 tons except for the troubles in the coal mines. This item, at $36 a ton or thereabouts, the Working Men's Benevolent Association may add to the debt they owe the country on account of their foolish strike; but the folly not being repeated there is nothing at present visible to hinder the omission of this minus quantity in the total of the current year. The Lehigh region is increasing its present producing power by new furnaces, with a capacity of 27,000 tons; and the Shenango Valley is building new works capable of making annually 94,000 tons. In the absence of statistics, impossible to be obtained, as to the number and capacity of furnaces which will be in blast during the year, these figures are at any rate highly suggestive, and indicate a prosperous state of the pig iron manufacture, but little affected by the reduction of duty from $9 to $7 a ton.—*Phila. Ledger.*

Brooklyn Steam Transit Company.

The original incorporators of the Brooklyn Steam Transit Company had a meeting on the 9th inst., at the office of the New York Bridge Company, Fulton street, Brooklyn. The corporators present were J. S. T. Stranahan, A. A. Low, S. B. Chittenden, Wm. C. Kingsley, Samuel McLean, Cyrus P. Smith, A. S. Barnes, Demas Barnes, Benj. F. Tracey, Chas. E. Bill, Henry A. Kent, Robert Turner, John Jefferts, Edward W. Fiske, Henry W. Slocum, William Richardson, John H. Prentice, and William W. Goodrich. Mr. Stranahan occupied the chair, and Mr. Goodrich acted as Secretary. After a good deal of desultory conversation, a resolution was passed appointing a committee of nine, with power to locate the route, open books for subscription to the capital stock of the company, and arrange a plan for the organization of the Board, with a view of commencing the construction of the road at an early day. The Committee is constituted as follows: W. C. Kingsley, S. B. Chittenden, Demas Barnes, Robert Turner, John Lefferts, Edward Fiske, John T. Martin, Jacob J. Bergen and Alexander McCue, with J. S. T. Stranahan as Chairman. The charter of the company granted in the Winter of 1871 gives power to construct any description of railroad in any part of the County of Kings. It is the purpose of the Brooklyn Steam Transit Company to construct an underground railroad. The route will be from Fulton Ferry under the new bridge to the corner of Washington and Sands streets, thence into Adams street to Fulton, near the City Hall, thence into Schermerhorn street, and up to Flatbush avenue, and along Flatbush avenue to Flatbush. At this point two surface roads will branch off—one to Bay Ridge and Coney Island, the other to East New York, to connect with all the railroads on Long Island. By this means Fulton Ferry will be made the termini for all the Long Island Railroads.

☞ We learn that the Directors of the Eastern Railroad Company have decided to immediately add the Miller platform to all their cars, and the work has already commenced in earnest at their shops in Portland. We should be glad to learn also that they had decided to adopt the Wharton Patent Safety Railroad Switch; there would then be an end not only to "telescoping," but to "misplaced switches" also.

From the Toledo Blade.

The Triumph of Western Engineering.

We have on our table a paper read before the "Civil Engineers' Club of the Northwest," at Chicago, last September, by our fellow townsman, E. D. MASON, "On the physical characteristics of the Missouri River and the means used for Directing and Controling its Channel at St. Joseph, Mo."

The work which this paper describes, was built in connection with the great iron bridge now building across the Missouri River at St. Joseph, and, as we gather from a hasty perusal, has two objects: first, to ensure the continuance of the channel of the River through the draw-spans; and, secondly, to make the channel flow along the old levee in front of the town.

The Missouri River, the greatest commercial highway of the North-west, is so little known, that for the information of our readers we quote at length from Col. MASON'S paper:

When the headwaters of the Missouri River pass the city of St. Joseph, they have traveled 2,500 miles and are increased by all the streams flowing down the eastern slope of the Rocky Mountains between the thirty-ninth and fiftieth parallels of north latitude.

The river at that point is the drainage of 413,000 square miles of water-shed, upon which there is an annual rain-fall of 19½ inches.

The elevation of low water in the Missouri River at St. Joseph is stated by "Humphreys and Abbot" to be 756 feet above tide water. The mean elevation of its surface is therefore, 760 feet above the tide water. It has about 480 miles further to go before joining the Upper Mississippi near Alton, where it is 381 feet above the level of the sea. Fourteen hundred miles above St. Joseph, Captain Reynolds found the surface to be 2,194 feet above tide water.

Its average slope, therefore, for about nineteen hundred miles, is ninety six one-hundredths of a foot per mile; but the slope is not exactly uniform. Between eight hundred and a thousand miles above St. Joseph, it is one and one tenth feet; between four hundred and six hundred miles above, it is one foot; and from St. Joseph to the Mississippi River it is seventy-nine one-hundredths of a foot per mile.

A careful survey for seven miles in the vicinity of St. Joseph, and observations for a year, show an average slope of eighty-two one-hundredths of a foot per mile.

This great river, navigable for 2,000 miles at all seasons except when frozen over, has been, until within a few years, the only means by which

commercial intercourse could be effected between St. Louis and the western part of Missouri and Iowa and the Northwest Territories and it is to-day the only way by which ordinary traffic can be carried on above Omaha.

The particular character of the Valley of the Missouri at St. Joseph is thus described in this paper:

The distance between the bluffs of the Missouri in the vicinity of St. Joseph is from four to six miles. They are generally rocky, composed of nearly horizontal strata of limestone, sandstone, soapstone, and drift, and covered with a marl concretion sometimes called loess, supposed by some geologists to be identical with the loess bluffs of the Rhine upon which grow the famous vineyards. There are sometimes breaks in this rocky formation; the city of St. Joseph is built in one about four miles wide; but the bluff is continuous, and a gap between the rock formation is generally filled with loess like that which caps the bluffs above and below.

The valley between these boundries is a an alluvial plan, through which the rivercuts its way from bluff, to bluff, making eight complete crossings in a distance of thirty miles, measured in the direction of its general course. These windings of the river leave tongues of land alternately reaching from one bluff to within a few thousand feet of the other. Inhabitants of the towns built opposite the points of one of these tongues of land, have usually a constant fear less some flood may cut through the base of the peninsula, letting the channel run along the opposite bluff, thereby leaving them miles inland. Such cases have occured within the last few years; one at Forest City about twenty five miles above, and one at Hamburg, near Nebraska City.

The tortuous course of the River is described particularly as follows;

Beginning three miles above the town, the river leaves a rocky bluff on the east side and runs nearly west across the valley to the rocky bluff at Belmont; thence, with a sharp curve, it returns to a loess bluff in the upper part of the town, called Prospect Hill; thence, with an easy curve to the south, with a radius of about 7,000 feet, it now flows along the clay bank in front of the town for about three miles, when, having acquired a due west course, it crosses the valley again and strikes the bluff above Palermo, about three and a half miles south of Belmont. Thus the river has flowed about eighteen miles to accomplish seven of its general course.

At the medium height of water, the River has a "sectional area of 25,450 square feet; mean volocity, three and seventy-five one-hundredths miles per hour; discharge per second, 130,975 cubic feet."

Col. MASON, in this paper, presents a theory of the formation of the Valley through which the River flows that agrees in the main with the views expressed by Prof. WINCHELL, of the Michigan University; that is, that formerly it was the drainage of a great inland sea, and that the River of to-day is but a brook compared with that which cut its way through the plains years ago.

The exceedingly unstable character of the channel of the Missouri is illustrated by the statement that "the embankment forming the west approach to the bridge will rest for three-fourths of a mile upon a part of the third deposit. At that distance from the river the approach reaches the first formation. *Every part of this space has been occupied by the river within the past fifty years.*"

The magnitude of the work of which this paper treats is expressed in the following terms.

The problem was to stop the river where it was then running, and drive it three thousand feet east and through the bar and against the clay bank, which was its Eastern shore ten years ago. Work was begun for this purpose in October last, and by the first of August following all of our objects were accomplished.

To do this, two principal and five auxiliary dykes were built. One of the principals is about 2,000 feet long and the other 1,200. The amount of material used and the cost is given for the largest work. The woodwork of BEARD'S Dyke, the longest one, is from sixty to seventy feet wide at the base, thirty feet wide at the top, and from twelve to thirty-six feet deep. The lower side is vertical. This woodwork is surmounted with a wall of rip-rap averaging twelve feet wide and three feet high, placed three feet from the lower edge of the woodwork. The bulk of the dyke as it now stands is 56,000 cubic yards, of which 3,000 cubic yards is rap-rap, and the rest brush and trees, with the interstices filled with sand. Its cost, including engineering and superintendence, was $32,600, and it was built in four months time, and the amount of work done by the River, controlled by the dykes, is stated to be—excavation, 5,000,000 cubic yards, and deposits 8,000,000, in four months time. The cost of the principal work is $32,600 and the cost of the whole will be about $60,000.

The controlling of the channels of the Missouri and Mississippi Rivers is a matter of great importance, and the Government Engineers have given much study and spent large sums of money for its accomplishment. Their value to the people as highways is proven when a city like St. Joseph, of 25,000 inhabitants will vote freely to pay such sums as we have mentioned to "keep the track in repair;" and we remember that two years ago the citizens of that place were ready to vote an expenditure of $200,000 for the purpose of improving and controlling the channel of the River in the vicinity of that city.

The subject of improving the navigation of this River has become of such political importance that, in the election of members of Congress from districts along the Missouri River, to be opposed to an appropriation for that purpose is to be defeated. The Government has expressed its policy by appropriating $300,000 for the improvement of the Mississippi in the St. Louis district, from Alton to South St. Louis, and we understand the work is going on and that at the "Alton Cut Off" the same plan for dykes has been adopted as that used by Col. MASON at St. Joseph.

We are inclined to the opinion that Col. MASON got his ideas of brush and stone dykes, which he so fully describes in his paper, from the works of the Dutch Engineers about the Haarlem Lake in Europe; but his application of it to the management of the great Rivers of the West is new and we wish him, for himself and the people interested, complete success.

☞ Track on the Green Bay and Lake Pepin Railway is now laid to Plover. The bridging and grading on the line of the road to its junction with the West Wisconsin Railway will be completed by the 15th of November. Side tracks are now completed to Merrilon, and everything is in readiness to commence laying the iron from that point eastward. It is expected that the road will be completed to Merrilon by the 1st of December.

The Pan Handle Route.

But few of our readers are aware that the first five miles of the Pan Handle route claim the distinction of being among the costliest of any railroad in the United States. The bridge at St. Louis with its approaches, and one or two other points, may perhaps exceed it in this regard. Within this distance from the Union Depot there are two tunnels aggregating nearly four thousand feet in length, both of them peculiarly difficult of construction. There are two iron bridges, measuring together over three thousand feet in length; very costly retaining walls along the side hill on the river sections, measuring over eight thousand feet in length, and an enormous embankment over Cork's Run, over a hundred feet high. All of these are finished for double track.

The lessees have overcome most discouraging obstacles in making a railroad in all respects equal to the Pennsylvania road itself, but they are about through with the job, and the time table of next spring will, we anticipate, show that the long wished for accommodation trains for Mansfield and the Chartiers Valley have been put on.

The work on the Corks Run Tunnel, located four miles from the city, is being rapidly pushed forward. The total length of this tunnel is 2,400 feet, that of the one in Pittsburg being about 1,400. The tunnel was originally constructed for one track alone; but owing to the increase of business on the road the company was compelled to widen it and they are now laying a double track. They commenced work in April, 1870, and were obliged to do some heavy cutting at both ends of the tunnel in order to make suitable outside approaches. These approaches are each one-fourth of a mile in length. On the first of next month the company expect to have all but about 250 feet finished, and the whole work is to be completed by the first of March, 1873. The widening of the tunnel proper costs $150 per lineal foot and the widening of both approaches will amount in the aggregate to $60,000. —*Pittsburg Chronicle.*

Memphis and Charleston Railroad.

The earnings of this road for the year ending June 30, 1872, were as follows:

From passengers		$630,423 00
" freight		670,009 26
" mails		42,684 99
" express		22,547 78
" other sources		38,450 99
		$1,404,116 02
Expenses, viz:		
Conducting transp	$312,596 46	
Motive power	286,597 43	
Maintenance of way	236,250 85	
Maintenance of cars	114,946 94	
		950,391 69
Receipts above operating expenses proper		$453,724 33
From which deduct cost of new rolling stock and permanent work		197,057 13
Leaving actual net receipts		$256,667 20

For the year ending June 30, 1871, the gross earnings were $1,417,441 46, the operating expenses $894,522 35, and the net revenue $522,919 11—showing a decrease in earnings of $13,325 44, with an increase in operating expenses of $55,869 34, making the decrease in net revenue, $69,194 78. The operating expenses in 1872 include the McMinnville and Manchester and Winchester and Alabama Railroads, amounting to $28,533 41. The whole expenditures during 1871 for operating and extraordinary expenses were $1,199,006 56; and for 1872, $1,174,448 82—showing a decrease in expenditures of $51,557 74, and an actual increase in net receipts of $38,232 80. There was an increase in freight earnings of $50,826 34; with a decrease in earnings from passengers of

$34,910 21, from mails of $206 25, from express of $13,452 22, and from rents of $15,583 10—making the net decrease, as stated above, $13,325 44. The President in his report says:

Of the decrease in passenger business $9,669 31 is in local, and $38,584 35 in through. The receipts of the Winchester and Alabama Railroad, $6,527 00, and McMinnville and Manchester Railroad, $6,816 45, being included in the amount of entire passenger business, serve to reduce the loss to this extent.

There is little reason to doubt that the loss in through business is due mainly to the opening of a competing route, *via* Selma, Rome and Dalton Railroad, for New Orleans travel, while the active competition of the Nashville and Chattanooga and Northwestern roads for travel between Memphis and Chattanooga has, to some extent, reduced our receipts.

Receipts from express service show a heavy decrease, resulting from the Virginia road having no arrangement with the Southern Express Company, forcing that business over other lines that would otherwise pass over ours.

Our connections have supplied cars to a greater extent than heretofore for the joint through traffic, reducing our car rents very materially, and cutting off greatly the revenue from earnings of our cars in their service.

Freight shows an increase of		$50,826 34
From this, however, should be deducted:		
Receipts of the Winchester and Alabama Railroad	$12,249 72	
Receipts of the McMinnville and Manchester Railroad	7,856 05	
		20,105 77
Leaving increase of this business on Memphis and Charleston Railroad		$30,720 57

of which $9,572 65 is local, and $21,147 92 through business.

Our through freight tonnage has increased largely in excess of increased earnings, owing to the low rates prevailing, consequent upon active competition. We were cut off from St. Louis during the best shipping season on account of low water in the fall, and the river being closed by ice during the winter, the trade from that point finding an outlet entirely by the all rail line *via* Nashville, and forcing us to depend wholly on low priced merchandise from Eastern cities and cotton from Memphis to employ our equipment.

A comparison of the statement of cotton shipped this year, with that of the one preceding, shows a decrease of 9,689 bales, or about 11 per cent. of local cotton, and that nearly 6,000 bales of that produced on the line of road found a market in New Orleans, shipments being made *via* Grand Junction, reducing our revenue both as to the carriage of the staple and the returning trade.

Through cotton increases 13,639 bales, notwithstanding a decrease of 11,955 bales from the line of the Mississippi Central Road, depriving us of a considerable revenue from this loss directly, as well as affecting the trade we would otherwise have had returning, had this cotton been marketed at Memphis. We have, therefore, as before remarked, depended wholly upon the increased shipment of Eastward bound cotton, in which there is shown to be 23,511 bales more than in the previous year from Memphis alone. Our shipments from this point in the aggregate are 89,236 bales, receipts being 66,046; the latter decreasing 15,920 bales, affecting materially our revenue.

Comparing expenses with the previous year, the cost of operating has increased 6¼ per cent., while gross expenses decrease 4¼ per cent. Mileage of trains shows an increase of 23 7-10 per cent., due in part to operating the Winchester and Alabama and the McMinnville and Manchester roads, but mainly to an increase in the volume of through freight on the main line, which, being carried at low rates, does not give us an increase in receipts.

It has been shown that after providing for operating and extraordinary expenses, we had:

Remaining from gross receipts		$256,667 20
Amount of interest on funded debt and interest and exchange account		304,067 92
Showing a deficit of		$47,400 72
Against a deficit last year of		101,340 36

From the report of the Chief Engineer it will be seen that the large increase in extraordinary expenses in this department is due to the extensive renewals of iron, being largely in excess of our estimate of last year.

Ordinary expenses also show an increase amounting to $17,080 15, arising mainly from replacing ties, fastenings and worn rails.

You are referred to the condensed balance sheet of the Division Treasurers for a full understanding of the financial condition of the company, cost of road, equipment and other particulars; also to the Treasurer's supplemental statement of 1st of August, showing your assets and liabilities as well as receipts and expenses since the close of the year. Your assets being estimated at real value are as follows:

Liabilities		$528,913 75
Of which at least $20,000 might be charged off being old balances that will never be called for, and to retire the remainder we have the following assets at cash valuation:		
Stock in S. and N. Alabama Railroad, say	$6,000 00	
Stock in Shelby Co. Turnpike Co	3,000 00	
Stock in National Bank of Huntsville	8,000 00	
Hotel at Huntsville	6,000 00	
Bills receivable	20,000 00	
Sinking fund	1,000 00	
United States	5,000 00	
Post Office Department	20,000 00	
Due from railroads	15,000 00	
Due from agents	5,000 00	
Due from individuals	40,000 00	
Indorsed coupons	4,000 00	
Lands and lots	20 000 00	
Cash	22,000 00	
	$175,000 00	
Cost of Manchester and McMinnville and Sparta Railroads	155,517 39	
		330,517 39
		$197,796 36

We have also a claim against the State of Tennessee amounting to about $90,000, and hope to recover of our claim against the United States Government an amount sufficient to pay off our entire debt without trespassing upon the rental from the Southern Railway Security Company.

In accordance with the terms of the lease entered into on March 5, 1872, the Southern Railroad Security Company, after making a full and complete inventory of the property of the company transferred to it under that agreement, assumed control of the road on the 1st day of July last, since which they have been operating it under the direction of Captain Joseph Jaques, General Manager, without any material change in its organization.

The Main Line of the Memphis and Charleston Railroad extends from Memphis, Tenn., eastward to Stevenson, Ala., 272 miles. It has two branches—one from Moscow to Somerville, Tenn., 13 miles, and the other from Tuscumbia to Florence, Ala., 6 miles.

The road and its equipment was transferred to the Southern Security Company on the 1st of July, at which time the rolling stock consisted of 48 locomotives, 32 passenger coaches, 2 sleeping, 4 mail, 6 baggage, 1 paymaster's 523 box, 200 platform, 18 stock and 2 wrecking cars.

Miles run on passenger trains, 495,932; on freight trains, 369,126; on wood, construction and switching trains, 126,637—total, 991,695. Total cost per mile run, 24.1.

The receipts per mile of road operated were $4,841 78; expenses, do., $3,277 21. Receipts per train mile run, $155 66; expenses, do., $104 81.

Number of through passengers carried, 40,864; local, do., 249,526—total, 290,390.

The shipments of cotton over the road in 1872 were 188,313 bales, against 184,463 bales in 1871—an increase of 3,850 bales.

BALANCE SHEET, June 30, 1872.

Construction		$6,485 232 25
Incidental to construction		1,026.471 60

President.—M. J. WICKS.

Directors.—By the stockholders: W. B. Waldran, George P. Beirne, James J. Donegan, Joseph C. Bradley, Albert H. Jones, R. C. Brinkley, Pitser Miller, M. J. Wicks and John D. Rather. By the City of Charleston: W. S. Hastie and Edward Willis; and By the State of Tennessee: Joel L. Pullman, John M. Carmack and J. W. Crocker.

Secretaries and Treasurers.—E. Div., SAM. R. CRUSE, and W. Div., GEO. ROBERTSON.

Superintendents.—E. Div., CHAS. S. WILLIAMS, and W. Div., C. L. ANDERSON.

Chief Engineer.—NILES MERIWETHER.

From the Pottsville Miners' Journal.

Distribution of Coal in the New England States.

We frequently hear complaints made by the consumers of coal, that the rates of transportation are too high on the coal railroads leading from the Coal Regions to the sea-board. This is a mistake. The rates of transportation on the coal railroads are exceedingly low compared with the transportation on other roads. The Baltimore and Ohio Railroad charges 1¼ cents per ton per mile on through rates, on an undulating road, and on the Philadelphia and Reading Railroad on coal transported to Port Richmond the rates of toll and transportation does not nett the company over 1¼ cents per ton per mile. On coal for consumption in Philadelphia and on the line, the rates are higher, and these are kept up to enable them to compete with the companies centering at New York for the Eastern trade at lower rates. On some kinds of coal the rate of toll and transportation does not nett them over one cent. per ton per mile, during a portion of the season. The Delaware and Hudson Company transport coal north to Buffalo, and other points on the Lakes as low as one cent per ton per mile, in order to reach those markets, and all the rates, where there is competition, are equally as low.

We are led to these remarks from finding the following statement of the rates charged on New England roads for the transportation of coal from the seaboard into the interior, compiled from official reports by MR. SAWARD for his *Freight and Coal Circular*, which shows that in some instances these rates are enormously high in comparison. The facilities also for receiving coal are very meagre, and the expenses from this source alone, in the shape of demurrage, &c., frequently ranges from 25 to 40 cents a ton on coal. The manufacturing interests of New England ought to see that this is remedied, and the press of New England would greatly benefit their interests by calling the attention of the people to this subject:

RATES CHARGED ON COAL BY THE RAILROADS DOING BUSINESS IN MASSACHUSETTS—DERIVED FROM THE OFFICIAL REPORTS.

We have often called attention to the fact that the charges made for carrying coal, by the railroads, from the seaboard to the interior have been excessive, and that a correct schedule was difficult to be had, but the Railroad Commissioners of Massachusetts paid particular attention to this subject, and have secured many reductions. From their report for the year 1871 we extract the following valuable data:

The Fitchburg, 50 miles in length on its main line, with the Marlboro branch, 13 miles, and the Peterboro and Shirley branch, 23 miles, charges a uniform rate of 2¼ cents per ton per mile.

The Boston and Lowell, 55 miles in length on its main line, with Lowell and Lawrence branch, 13 miles, and Salem and Lowell 25 miles, charges as follows:

Between	5	and	15	miles,	.07½c.	per ton	per m.
"	15	"	30	"	.04¾c.	"	"
"	30	"	50	"	.03¾c.	"	"
"	50	"	100	"	.03c.	"	"

They carried 57,000 tons of coal from Boston in 1871.

The Boston and Maine, 111 miles from Boston to Portland; its Newburyport branch is 14 miles; for its main line in Massachusetts (38 miles) its charges are as follows:

Between	5	and	15	miles,	.07 6-10c.	per ton	per m.
"	15	"	30	"	.03½c.	"	"

This road carried 65,000 tons of coal in 1871.

The Boston and Providence, 44 miles in length, charges the following rates on coal:

Between	5	and	15	miles,	$0.60	per ton.
"	15	"	30	"	1.00	"
"	30	"	50	"	1.60	"

This road supplies Hyde Park, Jamaica Plain, Mansfield, Attleboro, etc. Carried 103,000 tons of coal in 1871.

Connecticut River, 52 miles in Massachusetts, from Springfield to South Vernon makes the following rates: 5 to 30 miles, .05 cents per ton per mile. 30 to 50 miles, .03 cents per ton per mile. Carried 67,000 tons of coal in 1871.

New Haven and Northampton, 83 miles in length, 32 of which is in Massachusetts, charges for from 50 to 100 miles .02 61-100 cents per ton per mile. Carried 20,500 tons of coal in 1871.

Old Colony and Newport, 114 miles in length, including Plymouth branch, 26 miles; Assonet, 3½ miles; charges on coal the following schedule:

Between	5	and	15	miles,	.03 11-15c.	per ton	per m.
"	15	"	30	"	.02 2-5c.	"	"
"	30	"	50	"	.02 22 25c.	"	"
"	50	"	100	"	.02 2-7c.	"	"

Carried 37,000 tons of coal in 1871.

South Shore, 21 miles in length, from Boston to Cohassett, charges .04 20 28 cents per ton per mile on coal.

Providence and Worcester, 43 miles in length, from Providence, R. I., to Worcester, Mass., makes the following charges on coal; On 10 and less than 500 gross tons at one shipment, $2.25 per ton; on 500 and less than 5,000 tons annually to one person or firm, $2 per ton; above this quantity $1.75 per ton; (but reductions are contemplated.) Competing roads charge but $1.50, and to points above Worcester $1 25 per ton. Owns 461 coal cars. Carried 101 800 tons in 1871.

The Norwich and Worcester road did not answer the questions of the Commissioners. The road is 59 miles in length, from Norwich to Worcester, and 17 miles in Massachusetts; they own 208 coal cars, and carried 58,000 tons of coal in 1871.

The Vermont and Massachusetts road, 88 miles in length, from Fitchburg to Brattleboro, and 136 from Boston, charges as follows on coal:

Between	5	and	15	miles,	13cts.	per ton	per mile.
"	15	"	30	"	08cts.	"	"
"	30	"	50	"	05cts.	"	"
"	50	"	66	"	04cts.	"	"

Carried 340,000 tons of coal in 1871.

The Taunton Branch, 11 miles in length, charges 04 6-11 cts. per ton on coal. Carried 1,300 tons of coal in 1871.

The Boston and Albany does not give its rates on coal; they carried in 1871, 143,000 tons of coal, 72,000 of which was from Boston.

The Worcester and Nashua Company say they get $1.25 per gross ton for coal over the entire length of road, and less than $1.00 for shorter distances, but give no details. Road 39 miles in Massachusetts. Carried 37,000 tons in 1871.

The Salem and Lowell branch, 25 miles, charges $1.20 per ton. They received 76,372 tons of coal in 1871; they have room to unload 37,590 tons a month, but not enough cars to carry it off; the average business done being but 400 tons per day; the demurrage paid to vessels equalling the freight from shipping port to Salem.

Boston, Hartford and Erie, 61¼ miles in Massachusetts, Boston to Putnam. Carried 20,000 tons of coal in 1871.

We have also called attention to the fact that the rates charged prevented the increase of the consumption of coal, both for domestic and manufacturing purposes, and think the point well taken.

Coal is a primary raw material in all manufacturing industry. Cheap coal means cheap power, and cheap power is cheap manufacturing. A tariff, unchanged in other respects, which gave a reduction of 50 per cent. on the cost of carrying coal, would at once communicate an impetus to every branch of industry dependent on power.

There are about 600,000 spindles running at Lowell representing $14,000,000 of capital. Lowell's prosperity depends on manufacturing. Coal, therefore, is a necessity to Lowell, the cheaper it can be delivered at her mills, the cheaper will be her goods, and the greater her increase of manufacturing. Without water power the prosperity of Lowell depends entirely on the price of coal, and what is said of Lowell is equally true of every manufacturing town in New England. If the freight from Salem to Lowell were but 1½ cents per mile, or 37½ cents per ton, what an important growth would be added to her already teeming hives of industry.

The transportation of coal is comparatively a new question for New England. The coal fields are not more than 375 miles from Boston, and are accessible by all rail routes. The consumption of coal in New England is only limited by its price; now 3,000,000 per year, there is no reason, except cost, that it should not be rapidly increased to 10,000,000. If the prosperity attending the present consumption is great, what will it be when it consumes the greater amount.

It will thus be seen that the right steps have been taken, and we trust the matter will not be allowed to lie dormant. Prepare for next spring.

During July last there was an excursion of the Railroad Commissioners of Massachusetts, and others, to the mining region; the object was to interest these gentlemen in the building of large depots at the Railroad termini at New Haven, New London, Providence, Fall River, Boston, Salem &c., where coal may be delivered at any time during periods of navigation, and from thence distributed whenever and wherever wanted by the consumers.

This would involve a large outlay of money, but the return will be the enabling producers to transact their business more economically, by having better facilities for transhipment at the various points wherever bulk must be broken, and by making these points as few as possible, and save the demurrage now so heavy every summer.

Woolen Manufactures of the United States.

The complete statistics of the manufacture of woolen goods in the United States, as returned at the ninth census, for the year ending June 1, 1870, have just been sent to press from the Census Office and exhibit the following totals: Of the 2,891 establishments in the United States, there are in Pennsylvania, 457; New York, 252; Ohio, 223; Massachusetts, 185; Indiana, 175; Missouri, 156; Tennessee, 148; Kentucky, 125; Illinois, 109; Connecticut, 108; Maine, 107; Iowa, 85; New Hampshire, 77; West Virginia, 74; Virginia, 68; Rhode Island, 65; Vermont, 65; Wisconsin, 64; Michigan, 54; North Carolina, 52; Georgia, 46; Maryland, 81; New Jersey, 29; Texas 20; Utah, 15; South Carolina, 15; Alabama, 14; Arkansas, 13; Delaware, 11; Mississippi, 11; Minnesota, 10; Kansas, 9; Oregon, 9; California, 5; Louisiana, 2; Florida, 1; and New Mexico, 1. The capital of these 2,891 establishments is reported at $98,824,531. The number of steam engines is 1,050, with a horse power of 35 900, and water wheels with a horse power of 59,332. The number of sets of cards is 8 366, with a daily capacity of 857,392 pounds of carded wool; number of broad looms, 14,039, narrow looms, 20,144; spindles, 1,845,496. The average number of hands employed during the year has been—of males above sixteen, 42 728; of females above fifteen, 27,682; of children and youths, 9,643. The amount of wages paid to these hands during the year is reported at $26,877,575; the total value of the materials used during the year was $96,432,601, of which the amount paid for chemicals and dye stuffs was $5,838,346. There were consumed during the year 17,811,824 pounds of for-

eign wool; 154,767,075 pounds of domestic wool; 17,571,929 pounds of cotton; 19,372,062 pounds of shoody; 2,573,419 pounds of woolen yarn; 3,263,949 pounds of cotton yarn; 1,312,560 yards of cotton warp; 149,733 pounds of warp. The value of all other materials used was $5,670,250.

Among the productions of these 2,891 establishments are 63,340,612 yards of cloth, cassmeres and doeskins, 58 965,286 yards of flannel, 1,941,866 yards of felted cloth, 2,663,767 yards of repellants, 2,853,458 yards of tweeds and twills, 14,078,559 yards of satinets, 5,506,902, yards of kerseys, 24,489,985 yards of jeans, 14,130,574 yards of linseys, 1,932,382 yards of negro cloth. Number of pairs of blankets, 2,000,439; number of horse blankets, 58,553; number of carriage robes, 22,500; number of coverlids, 226,744; number of shawls, 2,312,761; number of pounds of rolls, 8,683,096. Total value of production, $155,405,058.

Statement of the Public Debt of the United States November 1, 1872.

DEBT BEARING COIN INTEREST.

BONDS ISSUED TO THE PACIFIC RAILROAD COMPANIES, INTEREST PAYABLE IN LAWFUL MONEY.

	Amount Outstanding.	Accrued Interest not paid
Central Pacific bonds, 1862-64	$25,885,120 00	$517,704 40
Kansas Pacific bonds, 1862-64	6,303,000 00	125,060 00
Union Pacific bonds, 1862-64.	27,236,512 00	544,730 24
Central Branch Union Pacific bonds, 1862-64	1,600,000 00	32,000 00
Western Pacific bonds, 1862-4	1,970,560 00	39,411 20
Sioux City and Pacific bonds, 1862-64	1,628,320 00	32,566 40
Totals	$64,623,512 00	$1,292,470 24

Interest paid by United States, $16,570,575 54; interest repaid by transportation of mails, &c., $3,952,683 48; balance of interest paid by United States, $12,617,892 06.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, Oct. 31, 1872.

WILLIAM. A. RICHARDSON,
Acting Secretary of the Treasury.

Grand Rapids and Indiana Railway.

Work on the last division of the Grand Rapids and Indiana Railroad has begun. It is now graded to Boardman River, in Traverse county, sixty miles south of Little Traverse, at the head of the Bay of like name in Emmet county. By June next the road is expected to be opened to that point. During the past summer eighty miles of road have been built through the forest and put in first rate running order. The country through which the road passes is most of it beach, maple and hard wood openings, finely adapted for farming purposes. The pine section through which the road passes is of extreme value, and the lands are eagerly bought up. The traffic thereby afforded the company is immense. As fast as the road has been opened the country has been settled and improved, and very many fine villages and stations are already on foot. There are now nearly 1,000 men employed upon the construction of the road.—*Fort Wayne Gazette.*

☞ The sales of the Land Department of the Union Pacific Railroad Company for the month of October, 1872, were 20,657 acres, amounting to $92,879, at an average of $4 50 per acre. The total sales from July 28, 1869, to the present date are 649,051 acres, amounting to $2,757,309, at an average of $4 25 per acre. There were 140 purchasers in October, 1872; average to each, 148 acres.

Erie Railway.

A meeting of the Erie directors was held yesterday at the Grand Opera house. The business transacted was not made public, but it is understood that there was considerable discussion as to the best methods of raising money to perfect the improvements contemplated on the line of the road. There is need of new rolling stock, the track is to be changed to a narrow gauge, and there are important connections to be made with other companies; all of these matters call for the expenditure of a large amount of ready money, which the company do not possess. The London money market is at present so stringent that it is of no use to look to it for a supply of funds; besides there are all kinds of rumors afloat there about Erie. Firms have been telegraphing to New York recently to know if any fraudulent or unauthorized stock is on the market. Their telegrams, in ordering the purchase of stock, charge that none be bought except that guaranteed by the Farmers' Loan and Trust Company. By cable advices it is also learned that a combination of banking firms is being formed in London to undermine the influence of the London agents of Erie, and if possible relieve Erie of the Atlantic and Great Western Railroad, with which it is now in a great measure saddled. From all of these reasons it is impossible for Erie to obtain money in London, and even if it were practicable, the rates of interest which are at present asked are alone sufficient obstacle to such negotiations.

New York, with what it knows of Erie, is worse yet, and it is doubtful if money could be obtained at any time, except at ruinous rates, in Wall-street, to carry on the projected railroad improvements. Besides, there is sufficient call upon Wall-street for money, from first-class parties and enterprises, to carry off the supply.

There is also a hitch among the Erie directors in regard to the Atlantic and Great Western Railroad, those who were put in by the latter interest finding themselves likely to be in the minority. S. L. M. Barlow has lost much of his influence. The Erie meetings are now held in the Grand Opera house, instead of his inner office, and President Watson transacts business more on his own judgment. Mr. Watson seems to be laboring earnestly for the success of the road, and, with the co-operation of Gen. Diven, may do much to give it a first-class reputation.—*N. Y. Times, Nov.* 13.

"Railways or No Railways."

Mr. Fairlie has written a book with the above title, upon which the London *Economist* comments as follows:

Mr. Fairlie may be considered to have practically demonstrated that for numerous purposes a serious waste has been involved in the random adoption of the ordinary gauge for our railways. Not only would a narrower gauge have cost less at first to construct and equip, but there would have been a continual saving in wear and tear, while the intended work would have been as efficiently performed. The one excellence of the broad guage is speed; but as moderately high rates of speed are obtainable on the narrow gauge, the use of it would have enabled railways to be constructed with far more profit then they now bring to their owners, and in many cases would have converted a loss into profit, while serving the public, to all intents and purposes, as effectually as the present system. In the present volume Mr. Fairlie has gone very fully into the theory of the question, and he also illustrates by numerous cases the practical success and gradual extension of his system. The fact that the Festiniog Railway pays a dividend of 12½ per cent. should be enough of itself to induce practical men to turn their attention to Mr. Fairlie's ideas.

☞ The track of the North Grey (Ca.) Railway is laid to Meaford, the north-western terminus of the line, 22 miles from Collingwood, and the opening will take place some time during the current month.

RAILROAD EARNINGS—MONTHLY.

American Railroad Journal.

Saturday, November 16, 1872.

Stock Exchange and Money Market.

Financial and commercial affairs have been much disturbed, during the week, by the report of the awfully destructive fire in Boston, the advices of increased activity in Money in London, and the pressure in the monetary line in the local market, arising to a considerable extent, out of the urgent speculative demand for aid, which enabled lenders to exact extreme rates for accommodation, call loans having been quoted generally at from 7 per cent. currency to the same rate gold, with, in many instances a fractional commission added to the legal rate for the use of funds in carrying speculative holdings of Gold and stocks from day to day. Apprehensions were at one time entertained that the loss of property, and the great interruption to business, resulting from the Boston fire would lead to very severe depression in values, under forced realizations, if not to panic, and distress. But the announcement that Government stood ready to extend a helping hand to the business public, in this time of extreme peril, if such help should appear to be called for, by public necessities, did much to allay those fears and to maintain popular confidence. The markets, financial as well as commercial, held their own remarkably well, and toward the close seemed comparatively strong for all the more substantial interests of the community, in a mercantile point of view. The discount movement was rather tame, with prime to good grades of business paper rated at from 10@15 per cent. per annum. The city banks have been heavy losers in the line of their legal tender reserve, while further gaining in the specie average, which has been augmented about 1½ millions. Their deposit line has been about a million. They reduced their loan and discount average moderately. The U. S. Sub-Treasury reduced its coin reserve about 1½ millions while increasing its currency balance slightly.

Under the Treasury programme for November Government proposes to sell, at least, four millions of Gold, or one million on each Thursday, and to buy in four millions of Five Twenties, or one million on each Wednesday, of the month.

Government is reported as having recalled the order for the retirement of the portion of the 8 per cent. Temporary Loan Certificates, mentioned in our last.

The U. S. Sub-Treasury office last week received $3 236,558 of currency, and $2,784,915 of gold, the latter including $1,839,000 from customs; and disbursed $3,196,687 of currency and $4,214,229 of gold, the latter embracing $2,473,000 of coin interest. The city banks reduced their loan and discount average about ⅝ths of a millions during the week, and their outstanding circulation a trifle. The U. S. Sub Treasury held a currency balance on Wednesday morning of $22,816,379, and a coin reserve of $45,362,343.

The city banks, in their latest return, show a decrease of $8,475,500 of legal tender notes, with an increase of $1,535,600 of specie, and a reduction of $999,700 of deposits, also a contraction of $600,800 in their loan and discount averages, and of $3,100 in their item of circulation. The city bank exchanges, last week, averaged 129 millions. The banks now hold $3,936,675 of specie and legal tender notes more than the 25 per cent. of their liabilities required by the National Banking Act.

The specie reserve of the city banks according to the latest return is $13,424,200, against $18,991,500 same time last year. The city bank deposits are now $203,405,600 against $214,275,400, week ending Nov. 11, 1871. The legal tender reserve amounts to $48,261,000, against $54,462,300 same time last year. The circulation now stands at $27,588,100 against $30,184 406 same time last year. The loans are now $277,281,500 against $284,672,700 at this date last year.

The coin reserve of the city banks is now about 13⅛ millions as against about 29½ millions on the 20th of July; the legal tender reserve is about 48¼ millions against about 55½ millions on the statement of June 15th; and the deposits are now down to 203¼ millions, against 247¼ millions on the 20th of July.

Government revenues have been yielding moderately since our last. The excises yielded within the week about 2½ millions, and thus far in the current fiscal year beginning with July 1, 1872, $47,356,400. The customs at the port of New York last week were $1,843,344; and at the out-

ports, equal to about $620,000, all in coin or coin certificates.

The Gold market has been more active and more than usually excited with rather wide fluctuations in the price. The speculative dealings have been quite extensive. The customs drain has been moderate and the export movement limited. The specie export on Wednesday of this week was $900,000. The range of the price during the week has been from 112⅜@114¼, and the closing quotation on Wednesday was 113¾@ against 112⅝ the preceding Wednesday. The specie outflow last week, was $443,992. The Gold Exchange Bank clearances have averaged about 87¾ millions per day during the week.

The customs demand for Gold last week, averaged $367 800 a day. The arrivals of specie from Europe, Havana and other foreign ports since Jan. 1, 1872, were $5,301,492 against $8,388,854 same time in 1871. The total customs revenue of the Government, in coin, at this port, since January 1, has been $131,530 269 against $139,205,617 during the same time in 1871.

Government has disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt, since January 1, 1872, $69,406,177, against $76,585,052 during the same time in 1871.

The export drain of specie was $443,992 last week, against $368,846 same week preceding year. The shipments since January 1, 1872, have been $63,883,456 against $58,590,068 during the same portion of 1871.

Foreign Exchange has been quoted firmer, on lighter offerings of primetbills, and a moderate demand, but closed tamely. Bankers' sixty day bills on London closed on Wednesday at 108½@ 108¾; sight bills on London, 110¼@110½.

The week's exports hence of domestic produce have been to the currency value of $5,365,829.

Government securities have been less active, most of the week, and have been offered quite sparingly in the open market, but prices have been well maintained.

On Wednesday, Government bought in a million of the offered Five-Twenties at from 112 42 @112 98. The aggregate offering was $2,536,150 @112 30@113 47.

U. S. sixes of 1881 at the close on Wednesday of the current week were quoted at 116¾@117; U. S. Five-Twenties of 1862, 112⅜@112⅝; U. S. Five-Twenties of 1864 at 112⅜@112⅝; U. S. Five-Twenties of 1865, 112¾@113½; U. S. Five-Twenties of 1865 consolidated, 114¾@115; U. S. Five Twenties of 1867, 115⅜@115⅝; U. S. Five-Twenties of 1868, 115@115¼; U. S. Ten-forties at 108¼@108⅜ U. S. Fives of 1881 (Funding Loan) 109¾@110; Six per cent. currency Sixes from 113¾@114¼.

State bonds have been moderately inquired for at irregular prices closing however, more steady.

Railway and Miscellaneous share property has been decidedly brisker, the speculative operations having been unusually extensive, but values have fluctuated widely, especially through the latter half of the week, influenced, in part, by the report of the very destructive fire in the business centre of Boston, and the renewed activity in Money in the local market.

Railway Mortgage Loans have been held with confidence, especially the favorites of the older issues, on however, a restricted investment demand, the advices of the fearful Boston fire and the Money pressure here operating against free dealings. Central Pacific Sixes have been in light supply in the open market, and quoted firm, closing at 100@100¼, on a moderate call for investment purposes. Nearly all the First Mortgage Six per cent. Gold Bonds of the Chesapeake and Ohio R. R. Co. have been disposed of, and only a very small remnant of this favorite loan is now available, through the financial agency of the Road, to investment purchasers.

In the Metal line, buyers have had any existing advantage, yet trade has been greatly devoid of animation. Copper has been dull and weak as to price; 100,000 lbs. Lake sold at 31½c., and 50 tons English at 28½c. Scotch Pig-iron has been offered more freely at lower prices, leading to a livelier trade; sales, 300 tons Eglinton, at $48 50; 300 tons Glengarnock, at $51@$52, and 200 tons Carmbrae, at $49@$50, per ton. American Pig-iron quoted firm but quiet. Iron rails in less request at former rates. Lead, Spelter, and Zinc dull, within the previous range. Tin very quiet, with Straits quoted at 32c. and English at 31½c. gold. A sale of 300 boxes Charcoal Terne sold on private terms; Plate, otherwise, dull at former figures. Of Regnins Antimony, 37 casks sold on private terms, quoted at 13½c., gold.

General business has been on a restricted scale, in nearly all kinds of domestic produce. The movements in Breadstuffs and Provisions have been lighter, with values closing generally in favor of buyers. Naval Stores, rather dull and easier. Petroleum and Wool held higher, but quiet. Middling upland cotton, closed on Wednesday at 19 cts. per lb. The receipts at all the ports, since Sept. 1, have been 839,077 bales, against 620,328 bales same time in the preceding year; exports 314,300 bales against 206,000 bales in the previous year; stock at the ports at latest dates, 848,656 bales against 301,560 bales same date 1871.

At the Live Stock Markets, Beeves have been in more demand and quoted firmer at from 8½@ 15½cts.; Veals at 7½@11½ cts.; Sheep from 4½@7 cts.; Lambs, 6½@8¾ cts.; Swine, plenty and depressed at 5⅛@5½ cts. per lb., all live weight. The week's receipts were 7,471 Beeves, 1,870 Veal Calves, 28,406 Sheep and Lambs, and 46,329 Swine.

Foreign goods have been generally in less request, but held with comparative firmness. The week's imports of foreign goods reached the amount of $8,697,573 including $1,584,316 of dry goods.

Ocean freights have been rather more active, closing more firmly, with the main inquiry for room for Grain, Flour, Petroleum, Cotton and Tobacco.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere n our columns:—

☞ The earnings of the Union Pacific Railroad for September, 1872, were $863,754 57; the expenses, including $78,000 territorial taxes, $444,019 70, and the net earnings, $419,734 87.

Destroyed or Defaced Bonds.

AN ACT to provide for the issue of bonds in lieu of destroyed or defaced bonds of the United States.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That whenever it shall appear to the Secretary of the Treasury, by clear and unequivocal proof, that any interest bearing bond of the United States has, without bad faith upon the part of the owner, been destroyed, wholly or in part, or so defaced as to impair its value to the holder, and which bond shall be identified by number and description, the Secretary of the Treasury shall, under such regulations and with such restrictions as to time and retention for security or otherwise as he may prescribe, issue a duplicate of such bond, having the same time to run, bearing like interest as the bond so proved to have been destroyed or defaced, and so marked as to show the original number of the bond destroyed and the date thereof: *Provided.* That where such destroyed or defaced bond shall appear to have been of such a class or series as has been or may, before such application, be called in for redemption, instead of issuing duplicates thereof they shall be paid with such interest only as would have been paid if presented in accordance with such call.

Section 2. That the owner of such destroyed or defaced bond shall surrender the same, or so much thereof as may remain, and shall file in the treasury a bond in a penal sum double the amount of said destroyed or defaced bond, and the interest which would accrue thereon until the principal thereof is due and payable, with two good and sufficient sureties, residents of the United States, to be approved by the Secretary of the Treasury, with condition to indemnify and save harmless the United States from any claim upon the said destroyed or defaced bond.

Approved June 1, 1872.

☞ The directors of the Baltimore and Drum Point Railroad Company advertise for proposals for the grading, masonry and bridging of two divisions of the road—the first, ten miles in length, from the Annapolis Railroad to Butler's Tavern; the other from Drum Point to St. Leonard's, twelve miles. Plans and profiles may be seen at the office of Vernon H. Brown, No. 66 South St., N. Y., after the 20th inst.

☞ The earnings of the Central Pacific Railroad in October, 1872, were $1,375,425, against $981,005 in October, 1871, an increase of $394,420. For the first ten months of 1872 the earnings were $10,679,853, against $7,897,480 for the corresponding period of 1871, an increase of $2,782,373.

☞ Track laying on the northern extension of the Chicago and Northwestern railroad is now progressing more rapidly than ever, and the prospect is that the entire line to Escanaba will be laid by the close of November. There are now about 23 miles of track laid on the southern portion of the line, and about seven miles laid on the northern part, making 30 miles in all.

☞ The Boston, Clinton and Fitchburg Railroad has purchased the New Bedford and Taunton Railroad for one million dollars, which the new Bedford *Mercury* says is less by at least $400,000 than thirty-five miles of road, the length of the track of the new Bedford and Taunton road, could now be built for, yet it is a satisfactory sale for the shareholders.

☞ The road-bed of the Galt and Doon (Ca.) Railway is about ready, but difficulty will be experienced in getting ties, so that it is possible the completion of the line may be delayed till another season. The Grand Trunk Company find it difficult to get ties enough to supply their demands.

$5,000,000.

SAFE AND PROFITABLE INVESTMENT.

THE

CHICAGO AND CANADA SOUTHERN

First Mortgage Sinking Fund

THIRTY YEARS'

7 PER CENT. GOLD BONDS

At 90 and Accrued Interest in Currency.

Interest Payable April and October.

REGISTERED OR COUPON PAYABLE IN LONDON OR NEW YORK.

This road, with the Canada Southern, forms the new Trunk Air Line from Buffalo to Chicago. It is under the same control and management, and is being built by the same parties who built the Canada Southern: Milton Courtright, John F. Tracy, David Dows, Wm. L. Scott, Henry Farnam, R. A. Forsyth, John M. Burke, M. L. Sykes, Jr., all Directors both in the Chicago and Northwest and the Chicago and Rock Island; George Opdyke, of the New York Midland; Sidney Dillon, Daniel Drew, John Ross, David Stewart, Samuel J. Tilden, Kenyon Cox, and other prominent railroad men. The road is being rapidly built, in the best possible manner, with 60 lbs. steel rails throughout its entire line, and will be completed during the coming year; nearly one-half of the road will be completed and in running order by the 1st of January next; so that the *entire line*, from Buffalo to Chicago, will, within that time, be in successful operation. The builders of this Road control enough of the leading lines running from Chicago to insure an enormous business from the start. Taking into consideration the important fact, patent to all who study the statistics of trade, "That the present Trunk Lines, *now* taxed to their utmost capacity, are not affording facilities equal to the great and constantly-increasing demand for transportation, and that this Road, through its entire length, being practically STRAIGHT AND LEVEL, and SHORTER by THIRTY-FIVE MILES THAN BY ANY OTHER NOW BUILT, or THAT CAN BE BUILT, it must be apparent that this line is not only needed, but must be a great success. The proceeds of these bonds will complete and equip the entire road, and we confidently recommend them as a most safe and profitable investment.

Journal of Railroad Law.

COMMON CARRIERS—NEGLIGENCE—BOUND TO DELIVER FREIGHT WITHIN REASONABLE TIME.

The facts in the late case of Ward and others, *vs.* The New York Central Railroad Company, (47 N. Y., 29,) are as follows:

The plaintiffs were copartners in business, and on the 9th of December, 1867, shipped by defendants from Le Roy, in Genesee County, to their consignees in New York, seventy-eight dressed pigs, weighing 9,182 pounds, the property of plaintiffs which, in the ordinary and usual course of transportation, should have reached New York in forty-eight hours. Such property was unnecessarily detained by defendants and did not reach the City of New York until the 26th of December, 1867. In the meantime the market price had fallen an average of one and one-half cents per pound. This action was brought to recover damages for the neglect to transport the same within a reasonable time; it was tried before a referee, who held that the plaintiffs were not entitled to recover for the decline in market value, and ordered judgment for defendants.

The following is the opinion of the court delivered by—

PECKHAM J.—It is insisted by the defendant, that it is not liable for any damages happening to this property after it reached Albany and was placed in the custody of the Hudson River road for further transportation, because the contract for transportation showed that its liability as common carrier ceased at Albany. The answer to this is, that the referee finds expressly, that "the defendant received this property of plaintiffs for transportation to the City of New York," and the whole evidence is not contained in the case. Only a small part is retained, and then the case adds that "evidence was introduced by the parties, from which the referee found the facts which appear in his report." Under such circumstances it cannot be said that the referee has found this fact without any evidence to support it. We are bound to presume that there was sufficient evidence.

The facts as found present the distinct question, what is the measure of damages against a carrier who has negligently omitted to deliver the goods at the time he ought to have delivered them?

Where a contract has been violated the law intends to give to the party injured the damages caused thereby; that is, the natural and proximate damages caused by the breach. It is supposed that both parties contemplated the consequences of such breach at the time they made the contract, and acted accordingly both in making and in performing or violating its provisions.

When a carrier from mere negligence, from plain violation of duty, omits to transport merchandise beyond a reasonable time and its market value falls in the meantime, the true rule of damages in my judgment both upon principle and authority, is the difference in its value at the time and place it ought to have been delivered and the time of its actual delivery. The rule is simple, and though it may sometimes operate harshly, easily applied.

Sagacious business men rely upon their ability to judge of the market in undertaking large commercial projects. According to their views of the market, they send their merchandise by a quick or a slow carrier, and make compensation accordingly.

A contrary rule would deprive them of all benefit of a rapid transit. It would be left to the caprice of the carrier when to transport, and the owner could have no relief. It would be no answer to say that the owner might make a special contract for the transport at a given time. The contract would have to contain a special provision to pay these damages or the carrier's liability would not be altered. If a special contract be needed, I think it falls upon the defendant to make it, or the company will be liable for not delivering in a reasonable time.

If the carrier would be liable for these damages upon a special contract to transport by a given time, he clearly would be for a violation of his duty. In the absence of any special agreement, the law implies that the carrier agrees to transport in a reasonable time. That is his duty. In failing to do so, he not only violates his duty, but also the contract upon which it is based. The only legal difference is that by the special contract, the carrier agrees and is required absolutely to transport by a given time. In such cases, no excuses will save him from damages for a breach such as will entirely shield him in the absence of a special agreement.

It is well settled law that a carrier, on an entire failure to deliver, is liable for the market price of the goods at the time and place for delivery. For all damages to the property while in the custody of the carrier, the measure thereof is to be settled by the market at the place for delivery. This is clearly so as to all inland carriage.

If liable for the market price at the time and place for delivery, where not delivered at all, it would seem equally rational, that if by reason of the inexcusable negligent delay of the carrier, the value of the goods has depreciated in market, he should be liable to the owner to the extent of the depreciation. The purpose of the law is to make the owner whole in each case.

There is an elaborate opinion in favor of the defendant in Wibert *vs.* The N. Y. and E. R.R. Co. (19 Barb., 36,) but the point was not necessarily decided. The referee obviously erred in finding the road guilty of negligence in not forwarding the goods. The same opinion was reiterated by the same court in 29 id., 633. With this exception I am not aware of any decision in that direction here or elsewhere. The chief objections urged against this rule are that the damages are not proximate, but remote, if any damages at all; that in fact the delay is not the cause of the damage; it did not cause the fall, that the goods being delivered in good order, the loss caused by the fall in the market cannot be charged to the carrier as damages; that markets are fluctuating and uncertain.

Had the goods been injured by reason of improper exposure by the carrier, and thus had become depreciated in their market value, it is clear that the carrier would be liable for the loss. It was his negligence that caused it. Here his negligent delay caused the loss. It did not cause the decline in the general market, but it deprived the owner of his right to the higher market price. The defendant's negligent violation of its duty thus deprived the plaintiff of his right, and placed this loss upon him. In substance this loss is the same to the plaintiff as if the injury had been done to the property itself, and thus diminished its market value. The injury also is natural and direct. There is no second step; no action of the owner with a third person by contract or otherwise. It is true there are fluctuations in the market. They prevail to some extent as to all commodities which are the subject of transportation. This is not a sufficient reason for abolishing there use in ascertaining the rights and liabilities of parties. Confessedly they regulate the rights of parties where there is an entire failure to deliver either by a carrier or by a vendor. Legally they are the true measure of the value of the goods. Arriving so late, later by the carrier's negligence, these goods were not worth as much as at the time they should have arrived; not so much when measured by the rule that governs the commercial community. Their actual value was less when measured by the only standard that regulates values.

Why should not the defendant pay this loss its negligence has caused?

In the case of Wilson *vs.* The New Castle and Ber. R. Co. the contract required the merchandise to be transported by a certain time, but was silent as to paying any damages.

But if this be not the true rule as to the measure of damages, what is?

Wilbert *vs.* The Erie road, gives no aid on this point. That holds substantially that the road is not responsible for such a loss. It is *damnum absque injuria*. It in effect holds that the road's neglect, whereby the goods are delayed and subjected to a fallen market, and the owner to that loss, is no legal injury. We all think otherwise, and that this is the only rule that does justice between the parties.

It is urged however, that there was no evidence that this property was sent to New York to be sold in market; none that it was actally sold at a loss.

From the findings of the referee, I think that it is clear that the plaintiff had sustained these damages "resulting solely from a fall in the market price;" but he held that such damages were not recoverable.

If the plaintiff sold the goods in a brief time after their arrival, without sustaining any loss, that would be matter of defence; thus showing that the fall was a mere monetary fluctuation in the market, and that the delay really did not injure the plaintiff.

The rule is undoubtedly somewhat stringent; hence the proof of negligence in this respect should be quite clear.

There are many circumstances that would excuse a carrier from transporting in the time usually required for an ordinary passage, an unusual crowd of freight, storms or freshets, etc., etc. (2 Red. on Rail., 261 § 173, and cases in note.)

Judgment should be reversed and a new trial ordered, costs to abide the event.

Judgment reversed.

☞ It is confidently expected that the Wellington, Grey and Bruce Railway will be opened to Southampton not later than the 25th inst. This completes the main line. The contractors, Messrs. Hendrie & Co., have pushed forward the work with commendable vigor.

Illinois Central Railroad.

The statement of this Company for the month of October, 1872, is as follows:

LAND DEPARTMENT.

Acres Construction Lands Sold	2,425.77 for	$21,751 23
Acres Inter't Fund Lands Sold	8,192 for	588 64
Acres Free Lands Sold	160 for	2,552 00
Total sales during the m'th of October, 1872	2,667.69 for	$24,891 87
To which add Town Lot Sales	for	
Total of all	2,667.69 for	$24,891 87
Cash collected in October, 1872		$58,500 69

Grand Trunk Railway of Canada.

The report of Mr. E. P. Hannaford, the engineer, states that in the working of his department for the six months ending 30th of June the maintenance of way amounted to 70,918*l.*, and the renewals to 76,781*l.*—total, 147,699*l.* The cost of maintenance was 5,157*l.* more than in the corresponding period of 1871, and was caused by the increased rates of wages and advance in the price of materials. Twenty-five and a half miles of re-rolled rails and 24 miles of steel rails had been laid in track during the six months. Up to 30th June 100,000 cubic yards of ballast was placed on the track, ballasting 65 miles of road. Three brick arch bridges between Montreal and Toronto were being entirely rebuilt in substantial stone masonry. Between Montreal and Portland the erection of iron bridges to replace the original wooden trusses was being proceeded with, and the cost was charged to revenue. At Portland an extensive renewal of the company's wharf was in progress, and station and freight sheds were receiving their usual repairs; at Sarnia and Portland the ferry landing stages and berths were being repaired and adapted to the new iron ferry boat which was completed and working regularly, answering all requirements for the crossing of traffic in bulk, and adding largely to the accommodation for the growing business. The large quantity of steel rails contracted for and arranged to be put into the track this year would greatly facilitate the movement of traffic. Their experience on those portions of the line laid with steel rails proved the economy of extending the works as speedily as possible.

☞ The *Levant Times* states that the first section of the Scutari-Ismidt Railway was opened from the Valley of Haidar Pasha, on the southern side of the Bosphorus, on the 4th of October, in presence of Edhem Pasha, Minister of Public Works, and a distinguished company. The length of the section opened was 25 kilometres. It was expected that the whole line to Ismidt (about 90 miles) would be finished in March next.

Steam on the Canals.

The steam canal-boat Port Byron, of which mention was made in our columns, some time ago, as competing for the State prize, arrived here on Monday morning from Troy, laden with 117 tons of iron ore.

The boat left the weigh lock at West Troy, Tuesday, October 29, at 5.30 P. M., and reached Buffalo Monday morning, November 4, at 4 A. M., having been five days, ten hours and thirty minutes on the way. The detentions noted by the captain, in waiting to lock, getting aground, and leakage in the flues of the boiler, were twenty-seven hours and twenty minutes, which deducted from the total time leaves the running time at four days and seven hours. This is claimed to be the quickest time yet made by a steam canal-boat. The Baxter, however, will dispute this, as her newspaper record is five days and ten hours from West Troy to Buffalo, including lockages and other detentions; and she claims that her actual running time was 101 hours, or 5 days and 5 hours. On the other hand, the Port Byron's owners say that the Baxter left Troy, at 7 A. M. of October 29, and arrived at Buffalo at 9 A. M. of November 3, making her way time 5 days and 14 hours, and her running time 4 days and 9 hours. The precise merits of the case we cannot determine, but are glad that the record shows both boats to be successful in their competition with horse power.

The Port Byron ran from Port Byron to Montezuma, a distance of five miles, in 50 minutes, and from the Central wharf in Buffalo to Lockport, on her last trip east, laden with 200 tons, she made the distance of 31 miles in 7 hours. From Albany to Troy by the river, she ran 7 miles in one hour and ten minutes. A peculiarity about the Port Byron is her perpendicular bucket-wheel, which makes no wash and has one-third more power than the ordinary wheel.—*Buffalo Courier, Nov.* 6.

Canada Southern Railway.

The work on this road is going forward as rapidly as possible, the managers putting forth every effort to have it completed before the first of January. To the business community the early completion of this road is an event of the utmost importance. To the grain trade of this city a day's delay is of the most serious consequence. For several years past the eastern outlets for produce at this point have become blockaded either immediately before or just after the close of navigation, and commission merchants realize that if the immense trade of the city is retained during the ensuing winter largely increased facilities for eastern shipment will be requisite, and hence they look to the Canada Southern Railway as the only remedy against a stagnation in the grain trade, such as existed at the opening of the present year. Some delay is experienced now in making shipments of grain by rail, and the pregress of the work on the Canada Southern will be noted with a good deal of interest by all engaged in the produce trade.—*Toledo Blade.*

☞ Work on the western end of the Winona and St. Peter road is progressing at a marvelous rate. Already the tracklayers are ten miles beyond Marshall, and annihilating the distance at the rate of two miles a day. The grading will undoubtedly be completed to Lake Campeska by the 20th of November, and the iron will be laid by the first of December, or the tenth at the outside.

Locomotives and Cars for Sale.

New Locomotives of best build.
Second hand Do., various gauge, 10@40 Tons, now running, in good order.
New and Second hand Passenger and Freight Cars. Also Steel and Iron Rails, Fastenings, &c.

DAVIDGE & WHEELER,
General Railway Business,
78½ Pine St., New York.
P. O. Box 4870.

☞ The new railroad from Bridgeton to Port Norris, New Jersey, a distance of twenty-one miles and a quarter, was completed last week. Cars will commence running its entire length in about two weeks.

BALTIMORE AND DRUM POINT R. R. Co.,
No. 44 Second St., Baltimore, Md.,
November 11, 1872.

PROPOSALS will be received at this office until noon of the 10th day of December next, for the grading, masonry and bridging of two divisions of this road. The first, ten (10) miles in length, from the Annapolis Railroad to Butler's Tavern—the other, twelve miles, from Drum Point to St. Leonard.

The right to reject any bid is reserved.

Profiles and specifications may be seen here, and at the office of Vernon H. Brown, No. 66 South St., New York, after the 20th inst.

By order of the Board.
JOHN G. BUTLER,
Secretary.

PACIFIC MAIL Steamship Company's

LINE TO

California, Japan and China.

VIA PANAMA,
CARRYING MAILS, PASSENGERS AND FREIGHT TO
ASPINWALL, PANAMA, SANTA MARTHA AND GREYTOWN, AND PACIFIC COAST OF MEXICO, CENTRAL AMERICA, PERU, AND CHILI.

Steamers leave 10th 20th and 30th each month, except when those days fall on Sunday, then the day previous.

Nov. 20, Steamer RISING STAR, Capt H. P. CONNER, will leave Pier No. 42, North River, at 12 o'clock noon, for Aspinwall direct, connecting at Panama with steamer MONTANA, Capt. Connelly, touching at Acapulco, Manzanillo and Mazatlan, San Diego and San Pedro, also connecting for all Central American and South Pacific ports. Departures of 10th and 20th each month connect with the Company's steamer, touching at San Benito, Tonata, Salina Cruz and Port Angel.

Freight for all way ports received until 4 P. M. of Nov. 18.

Steamer JAPAN will leave San Francisco, Nov. 30, 1872, for Japan and China.

For rates of passage, freight and all further information, apply at the Company's office on the pier, foot of Canal street.

New York, Saturday, November 23, 1872.

Ship Building on the Delaware.

The Pacific Mail Steamship Company is building on the Delaware six ocean steamers for service upon their lines. Four of these are being built at Chester, at the Delaware River Iron Shipbuilding and Engineering Works, and two at the yard of the Harlan & Hollingsworth Company in this city. Of those building here, the first is rapidly approaching completion and will be committed to her destined element on Tuesday, the 26th instant. Of those at Chester, one was launched on Saturday, another will be ready to launch in about two and a half months, while the keel of the third has recently been laid. The fourth has not been commenced yet. The steamer which was launched on Saturday was christened the Calimoi. She is an iron screw steamer, built in accord with the British Lloyd rules of 1871, and of register 100 A—which is the highest class vessel they build. In length, the Calimo is 280 feet on the twelve foot water line; over all 300 feet. Her width of beam is 40 feet, and depth of hold, from base line to upper deck, 30 feet 6 inches.

Besides the steamers of the Pacific Mail Company there are also two others under way, and contracts have been entered into for the construction of others still. An iron steamer 206 feet long, 33 feet 9 inches wide and 17 feet 4 inches deep, is being built for Mr. Dickinson, of New York, for the coasting trade. She will be fitted with a geared beam engine, and will be of 1,000 tons burthen.

There is also in frame an iron ferryboat for the Erie Ferry Company, plying between Jersey City and New York. Mr. Roach also has the contract for building the hulls of two iron colliers for the Reading Railroad Company, at $300,000.—*Wilmington Commercial.*

Baltimore and Ohio Railroad.

The annual meeting of the stockholders of this company was held in Baltimore on the 18th inst. On motion of Wm. J. Albert, Esq., Mr. Wm. McKim was chosen chairman, and Wm. H Ijams Secretary.

John W. Garrett, Esq., President of the company, presented the forty-sixth annual report for the fiscal year terminated 30th September last. The report was then read by the Secretary, after which, no other business being presented, the meeting, on motion, proceeded to the election of Directors to serve for the ensuing twelve months. Messrs. Miles White, Wm. J. Albert and Horatio L. Whitridge acted as Judges. On counting the ballots the following gentlemen were found to be unanimously elected by a vote of 39,361 shares, viz: Johns Hopkins, Samuel W. Smith, John Spear Nichols, John Gregg, C. Oliver O'Donnell, James Harvey, Galloway Cheston, Wm. W. Taylor, Sam'l Kirby, Francis Burns, John King, Jr., G. A. Von Lingen.

The members elected are the same as for the preceding year except that Mr. G. A. Von Lingen fills the place of Mr. Allen A. Chapman, resigned.

The report shows that the revenues of the Baltimore and Ohio and its branches for the fiscal year were $13,614,876 26, being an increase over the previous year of $1,057,366 84.

The full report is being printed in pamphlet form, and will be ready for distribution at an early day.

☞ The Lancaster (Ohio) *Eagle* says that a preliminary survey of the proposed railroad, from there by way of old Straitsville, to the Sunday Creek coal fields, is now being executed. If the line proposed shall prove reasonably favorable, a strong effort will be made at once to put the enterprise on its feet. This will form part of a line from Dayton, and also of one from Springfield to the great coal basin—the two lines uniting in the northern part of Pickaway county, and thence together through Lancaster to Ferrara.

Chesapeake and Ohio Railroad.—the Kanawha Coal Fields.—Splint Coal.

The opening of the Chesapeake and Ohio Railroad, which will soon take place, is producing quite a stir among the coal and iron makers. The Pittsburg *Commercial*, of November 12th, contains the following on "splint coal" of interest to the coal and iron interests:

The discovery of splint is not new. This peculiarity of coal on the Kanawha has been known forty years. It is a most valuable variety of mineral coal for the manufacture of iron and steel, being nearly free from sulphur, and does not cake in the furnace. It possesses a high percentage of carbon and little ash, and is the only fossil coal that can be successfully introduced into the Bessemer furnace. In a word, it is a complete substitute for vegetable charcoal. In view of the accumulating difficulties to your iron manufacturers and coal shippers, why do not some of your large operators go down into Virginia? I have visited the Kanawha coal field, embracing over 8,000 square miles, examined many mines and the quality of coals, and unhesitatingly pronounce that the best field now open to capitalists. It is accessible; the veins above water level; seams from four to ten feet in thickness; and coal of the finest qualities. It is manifest Pitsburg coal interest in the Southwest cannot long be made remunerative. Mr. Walton, in his remarks before the Cincinnati Coal Exchange, a few days since, states that the Pittsburg shipper paid for coal in the barge, at Pittsburg, about 11 cents per bushel. This statement was made in the face of the offer from Indiana to furnish the city 10,000,000 bushels annually from the Brazil block coal mines at 12 cents per bushel. Supplies from either source—the Monongahela or Wabash—are impracticable, in competition with the mines of West Virginia, on the Kanawha, Coal, Guyandotte, Water pot, or Sandy. It has been estimated that coal can be furnished at Cincinnati and Louisville from the Kanawha, yielding a decided profit, cheaper than the mineral can be loaded into barges at Pittsburg, and the statement of Mr. Walton confirms the declaration. Why, then, will Pittsburg coal operators permit this fine field to be occupied by other capitalists, thus depriving them of and driving them from the Southwestern trade? Coal lands of first quality can be purchased on the Kanawha and tributaries at prices varying from $15 to $30 per acre, bearing splint, bituminous and cannel coals. Transportation from the Kanawha is generally from three to five months longer than the Upper Ohio. But, independent of water transportation, a great

through line of railway is about to be completed. The Chesapeake and Ohio R. R. is now virtually finished. The last contracts have been completed for grading, bridging, tunnelling, &c. The track is about ready for iron. Soon we shall see this really great enterprise carried through, and the prophetic vision of Washington realized. This road traverses the great Kanawha coal fields from Saull's mountain—the initial point of the vast basin—to the city of Huntington, on the Ohio, nine miles above the mouth of the Big Sandy. Coal can, at all seasons, be carried from Soap Creek, Cabin Creek, Elk, Coal, Mud, Guyandotte and other important streams, striking the Ohio 335 miles below Pittsburg, beyond all devious navigation; buyers can freight it to Cincinnati in a few hours. By the completion of the Kentucky Shore Railroad, or the Hillsboro route, unbroken transportation by rail can at all times be secured. Coal can now be secured on the Kanawha at $3 50 per 100 bushels. It can be carried to Cincinnati by January, 1873, and sold at from $9 to $10. By increased facilities the cost can be materally diminished. The splint must become a substitute for coke in home manufactures. It can be brought to Pittsburg and sold at a profit in competition with Youghiogheny coke. Coal on the Monongahela and Youghiogheny is too valuable to be charred into coke. It will all be required for domestic uses.

Western and Atlantic Railroad.

The Atlanta correspondent of the Savannah *News* remarks, concerning the lease of the Western and Atlantic Railroad, that it is now believed it will not turn out to be so good a thing as the lessees supposed. A railway man of intelligence and integrity, who was in Chattanooga, recently, says he did not see one freight car there from Nashville or Louisville; whereas, heretofore the track was crowded with trains from those points. The completion of the South and North Road to Montgomery has diverted the entire Western business of Alabama from the old route over the State Road, and to that extent the freight and passenger traffic on that road has been curtailed. Nearly all the western business of Alabama—its heavy shipments of corn, wheat, bacon, hay, horses, mules, &c.—formerly passed over the Western and Atlantic Railroad, and contributed largely to its profits. The loss of that business must materially diminish the revenue of the road, and thus depreciate the value of the lease itself. The completion of the Air-Line Road from this city to Charlotte, N. C., will also have an injurious effect upon the business of the State Road. Shares in the lease do not rate so high now as they did a few months ago.—*Augusta (Ga.) Chronicle.*

Cleveland Bridge and Car-Works.

The proprietors of these extensive works are Messrs. McNairy, Claflen & Company, who have an established reputation throughout the country for the superior quality of their work in bridge and car construction. Their freight-car department is fully occupied in the building of 500 cars for the United States Rolling Stock Company, a portion of which are broad gauge; and also 50 fruit-cars for the Merchants' Dispatch freight line. A variety of work is under way in the street-car shop, including caboose, ore, hand, and street cars. Large numbers of the latter class are made at these works and shipped to all parts of the country. They are light and strong, and have the indispensable requisite of riding easy, an advantage which they possess over those made elsewhere. It is no uncommon thing for some of these cars to carry from ninety to a hundred passengers with room for more, the accommodations of course not being in all respects quite equal to those of a parlor coach. The company have more bridge-work in hand then they ever had before at any one time, and it will be necessary to keep the machinery moving day and night the whole winter, in order to execute the contracts already booked. —*National Car Builder.*

Washington Territory.

The shores of the Puget Sound basin, in Washington Territory, are covered by dense forests of Oregon pine or fir, invaluable for shipbuilding and other purposes. The western part of Washington Territory, it is estimated has 15,000 square miles of heavily timbered lands, yielding 30,000 feet of merchantable lumber to the acre. The shipments of fir from the Puget Sound district, in 1869, amounted to 136,692,512 feet, and for the first six months of 1872 they amounted to 118,856,651 feet, giving an estimated trade for the twelve months of this year of 237,713,122 feet. Puget Sound is a great land-locked harbor, having a shore line of 2,000 miles, indented with bays, channels and inlets, in every direction. The water is very deep, and the shore is bold, so that ships can make fast alongside the saw-mills, and timber is frequently run from the saw to the hold of the vessel.

Evansville and Crawfordsville Railroad.

The earnings of this road for the years ending August 31, 1871 and 1872, were as follows:

	1871.	1872.
From passengers	$210,043 42	$192,407 00
" freight	293,437 57	335,108 41
" express	15,418 03	15,219 26
" mail	10,500 00	10,308 33
" rents and storage.	5,370 90	13,421 20
" telegraph	.....	215 13
" mileage account	3,403 31	.....
Total earnings	$538,173 23	$566,679 33
Expenses viz:		
Running road	$82,313,30	$86,697 32
Repairs and renewal of track	137,200 75	88,229 05
Repairs and renewal of structures	14,701 05	15,998 55
Repairs of machinery and cars	48,555 44	67,452 91
General expenses	85,205 33	89,655 61
Total expenses	$368,015 87	$348,033 44
Net earnings	$170,157 36	$218,645 89
Interest and taxes	111,147 59	99,085 84
	$59,009 77	$119,560 05
Appropriation to Sinking Fund	29,987 00	29,950 75
Balance	29,022 77	$89,609 30

The receipts from all sources during the year (including $3,385 92 from sale of real estate) were $570,065 25; and the expenditure were:

Operating and maintaining road	$348 033 44
Interest on bonds and loans	90,000 59
Taxes	9,085 25
Appropriation to sinking fund	29,950 75
Construction	7,469 96
Equipment	44,036 28
Increase in wood and supplies	529 61
Decrease in liabilities	$41,369 12
Less decrease in assets	409 75
	40,959 37
Total, as above	$570,065 25

The gross earnings for the year were $566,679 33, being $28,506 10 in excess of the earnings of last year. The working expenses, including all repairs and renewals, are $348,033 44, being $19,982 43 less than last year, and the net earnings $218,645 89, showing a total gain in net earnings of $48,488 53. Deducting from these earnings the sum of $129.036 59 paid for interest, taxes, and the stipulated appropriation to the sinking fund, there remains as surplus $89,609 30, of which $51,506 24 has been expended on construction and equipment, and the remainder in the payment in full of the floating debt.

The increase of capital account has been chiefly for additional equipment; one Engine, one Baggage and Mail Car, twenty-five Compromise Box Cars and twenty Coal Cars, having been added during the year.

The total cost of the property to date is as follows:

Construction	$2,439.897 66
Equipment	439,850 20
	$2,879,747 86

Which is represented by—

Common stock	$1,044,252 93
Preferred stock	100,000 00
Bonds outstanding	1,127,000 00
Earnings expended	608,494 93
	$2,879,747 86

The road bed and structures are in good condition. 3,000 feet of additional sidings have been laid down, 55,000 cross ties have been purchased, of which 46,000, equal to 17 miles had been placed in the track at the close of the year; three and one-fourth miles of rail have been taken out and renewed with re-rolled rail of a heavier pattern, and 454 rails have been repaired at our shops; 2,200 car loads of gravel ballast, equal to 13,200 cubic yards, have been placed on the track, and eight small trestle bridges have been filled up with earth and masonry. Six othef are now being filled and will shortly be completed.

The safety of our Passenger Trains has been greatly increased by placing the Miller Platform and Westinghouse Air Brake on our entire Passenger Equipment, at a cost of something over $10,000. Extensive repairs have been made on our passenger coaches, and one new baggage, mail and express car has been built at our shops, and the others re-modeled with raised roofs.

One new freight engine, twenty-five box cars, and ten coal cars have been purchased during the year, and ten coal cars built at our shops. In addition to these a large number of freight cars have been re-built, and five box, one coal, and six construction cars have been torn up, and new cars built to replace them.

The rolling stock of the road is now as follows: 17 engines, 10 passenger coaches, 1 paymaster's, 5 baggage, mail and express, 6 caboose, 79 local freight box, 71 compromise box, 30 Platform, 74 coal, 10 stock, 10 construction, 34 hand and 26 push cars.

The train service for the year is as follows:

Passenger trains	156,696 miles.
Freight trains	176,629 "
Construction trains	26,190 "
Total	359,515 miles.

—showing a decrease by passenger trains of 5,505 miles, an increase by freight trains of 32,673 miles, and a decrease by construction trains of 13,385 miles, making a total increase for the year of 13,783 miles.

The number of freight cars hauled during the year is:—

Loaded cars	25.361	Mileage	1,526,719
Empty cars	14,999	"	581,539
	37,860		2,108,258

—being an excess of 2,986 loaded, and 3,187 empty cars, and of 248 858 miles run, over last year. The tonnage of freight carried amounts to 208,800 tons, an excess over last year of 28,800 tons, with an increase of revenue from this source of $41,670 84.

The number of passengers carried is 146,036 exclusive of commuters, which is 9,759 less than last year, with a decrease in revenue of $17,636 42, resulting chiefly from the opening of the direct line Evansville to St. Louis, via St. Louis and Southeastern Railway, early in the year, which at

once took from us nearly all the travel between Evansville and the West.

The direct line between Terre Haute and Chicago was completed early in January, and this line has felt its favorable influence in the freight department.

Difficulties apparently unavoidable, have so far prevented the running through passenger trains between Evansville and Chicago, but it is believed that they are now overcome, and arrangements are being perfected to place through trains, with sleeping cars attached, on the line at an early date, probably before the close of the present month, thus opening a new route, shorter than any other between Nashville and Chicago.

Our Southern Connection, the Evansville, Henderson and Nashville Railway, while giving us but little business for the North or East, has proved a valuable outlet for the movement of grain, hay, and other Northern products, over our road, for consumption in the South. Our business in this direction during the past season was large and profitable, although seriously crippled by the inability of Southern Lines to move the freight offered. It is from this source, from the great activity in grain freights generally since the harvest, and from the increase in coal traffic, that the large increase in freight tonnage and revenue has been realized.

Arrangements are now being perfected for transferring cars to Henderson without breaking bulk, which will materially lessen the cost of transfer, and as the Evansville, Henderson and Nashville Railway is being furnished with a large amount of additional equipment, both engine and cars, we may reasonably expect to control hereafter our full share of Southern business.

Pursuant to orders of the board an additional section of four stalls is being added to the brick engine house of the company, at Evansville, and is now nearly completed. A brick store room and office for the Master Machinist is also being built at Evansville, and a commodious brick car house at Terre Haute. Both will be ready for winters' use.

Twenty-seven bonds of $1,000 each, have been redeemed by the Sinking Fund during the year, making a total of 113 bonds redeemed to date. The sinking fund still holds the balance of the annual appropriation, for the purchase of 5 additional bonds,so soon as presented for redemption.

In June last, a well guarded lease of the Rockville extension of this road, advantageous to both the contracting parties, and terminable in one year after notice given by either party after July 1st, 1873, was made by this company to the Logansport, Crawfordsville and Southwestern Railway Company, which lease was duly ratified by our stockholders, and took effect July 1st, 1872.

Our road and equipment have been well maintained, and we have enjoyed the same provident care over our trains and passengers, always so conspicuous in their security from serious accident.

Too much praise cannot be awarded to the officers and employees of the company in general, for their efficiency and faithfulness in the discharge of their duties during the year.

GENERAL BALANCE SHEET, Aug. 31, 1872.

Construction of road		$2,439,897 66
Equipment		439,850 20

Secretary and Treasurer.—J. E. MARTIN.

Superintendent.—L. PEARSON.

The Virginia State Debt Coupon Cases.

It was agreed on Saturday, the 16th inst., by counsel that the Virginia state debt coupon cases should be submitted to the State Supreme Court on printed briefs, already filed, as soon as all the judges were present. The following history of these cases is from the Richmond *Enquirer*:

The Legislature of 1870-'71, undertook to settle the public debt of Virginia by funding the old debt, on much of which interest had not been paid for many years, by issuing new bonds for two-thirds of the old debt, and giving a certificate for the other third, that it would be paid in accordance with such settlement as should be hereafter made with West Virginia. The old creditors were offered a special privilege if they would surrender their old bonds and take these new ones. They were asked to extend the time of payment by making the new bonds payable in thirty five years, and also to defer all claims for the one-third until West Virginia had settled. In consideration of the creditor doing this, the Legislature offered to give him a new bond, the coupons on which should forever be receivable for taxes and all demands due the State. The holder of this bond was thus secured in the payment of his interest; for, if the State failed to pay it, he could sell his coupons as fast as they became due to the taxpayer, who could pay his taxes with them. The bondholder was thus offered a new bond for two-thirds of his debt, the payment of interest on which was secured. A great many of them accepted this offer, and out of forty-five millions of bonds thirty-three millions came in, and new bonds, to the amount of twenty-two millions, were issued for them for the two thirds, and eleven millions of deferred certificates for the other third.

These new bonds are known as Virginia consols. There are fifteen millions of coupon bonds, the coupons on which are considered as receivable in payment of taxes, and seven millions are registered and have no coupons. The Legislature of 1871-'72 was dissatisfied with this law, and passed another act forbidding these coupons from being received in payment of taxes. Whereupon the bondholders claimed that this last act was unconstitutional, because, they say, Virginia had made a contract with them if they would give her further time to pay, then she would secure the payment of interest on two-thirds of the old debt by making these coupons recivable for taxes. Counsel were employed, who sued out a mandamus in the case of Smith, before Judge Wellford, of the Circuit Court of the city of Richmond, to compel Wright, a sheriff, to receive coupons in payment of Smith's taxes. Judge Wellford decided the act of 1872 unconstitutional, and issued the mandamus to the sheriff, from which Mr. Attorney General Taylor appealed for the Commonwealth.

About the same time a motion for a mandamus was made in the name of Antoni against Wright, to make him receive also coupons in payment of his taxes. The causes were set for the Wytheville term of the Supreme Court, last June, but were continued until this term, and are now before the court for decision. Attorney General Taylor for the Commonwealth, and Ould & Carrington, Page & Maury, Johnson & Royall for petitioners.

Railroad from St. John to Halifax.

The flourishing ports of St. John, New Brunswick, and Halifax, Nova Scotia, have at length been united by railroad communication. The line forms a portion of the Intercolonial Railroad, the construction of which was undertaken by the Dominion Government, in accordance with the terms of the Confederation. The road has not been executed without overcoming engineering difficulties of the most formidable character, an idea of which may be gathered from the fact that a single tunnel and embankment consumed more than two years in construction, all the men that could work to advantage being engaged on them. The length of the line is about 280 miles, and consists of three divisions—the western, central, and eastern—the western division consisting of the road between St. John and Shediac, the central from from Paiosec to Truro, and the eastern from Truro to Halifax and Windsor. The chief offices and workshops are located at Moncton.

☞ The Philadelphia *Ledger* of 18th inst., reports the net anthracite coal tonnage for the week ending on the 9th inst., from all sources, at 404,848 tons, and for the year 17,178,299 tons, against 13,431,556 tons to the same date last year, being an increase in the tonnage of anthracite coal of 3,746,843 tons. The production of bituminous coal for the week was 56,917 tons, and for the year 2,226,215 tons, against 1,925,429 tons to the corresponding time last year—an increase of 296,886 tons. The total production of all kinds of coal for the week was 461,765 tons, and for the year 19,404,614 tons, against 15,356,985 tons to corresponding time last year, showing an increase of 4,047,629 tons.

☞ The surveyors of the Philipsburg, Farnham and Yamaska Railway have completed the survey of the proposed line. The total length of the road from Missisquoi Bay, Philipsburg to the St. Lawrence, opposite Three Rivers, is 101 miles. The track will run through a fertile agricultural and, generally speaking, level country, and it is estimated that this road can be built and equipped for about $10,000 a mile upon the narrow gauge (three feet) system, or a total cost of $1,000,000. It is believed by the directors that no insuperable difficulties lie in the way of procuring that amount.

☞ The County of Prince Edward has granted a bonus of $87,200 in aid of the proposed Prince Edward County Railway, to run from some point on the Grand Trunk through the County of Prince Edward, Ont., to a point which is, we believe, not finally decided upon.

Bridge over the Mississippi River.

AN ACT to authorize the construction of a bridge, and to establish the same as a post-road.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That it shall be lawful for any person or persons, company or corporation, having authority from the States of Iowa and Illinois, to build a bridge across the Mississippi River at Fort Madison, Iowa, and to lay on or over said bridge railway tracks for the more perfect connection of any railroads that are or shall be constructed to the said river at or opposite said point, under the limitations hereinafter provided; that said bridge shall not interfere with the free navigation of said river beyond what is nesessary in order to carry into effect the rights and privileges hereby granted; and in case of any litigation arising from any obstruction or alleged obstruction to the free navigation of said river, the cause may be tried before the district court of the United States of any State in which any portion of said obstruction or bridge touches.

Section 2. That any bridge built under the provision of this act may, at the option of the company building the same, be built either as a pivot draw-bridge, with a pivot or other form of draw, or with unbroken or continuous spans: *Provided*, That if the said bridge shall be made with unbroken or continuous spans, it shall not be of less elevation in any case than fifty feet above high water mark, as understood at the point of location, to the bottom chord of the bridge, nor shall the spans of said bridge be less than two hundred and fifty feet in length; and the piers of said bridge shall be parallel with the current of the river, and the main span shall be over the main channel of the river, and not less than three hundred feet in length: *And provided also*, That if any bridge built under this act shall be constructed as a pivot draw-bridge, the same shall be constructed with a draw over the main channel of the river at an accessible and navigable point, and with spans of not less than one hundred and sixty feet in length in the clear on each side of the central or pivot pier of the draw, and the next adjoining spans to the draw shall not be less than two hundred and fifty feet, if the proper location of the draw over the channel will admit spans of this width between it and the shore, and said spans shall not be less than thirty feet above low-water mark and not less than ten above extreme high water mark, measuring to the bottom chord of the bridge: and the piers of said bridge shall be parallel with the current of the river where said bridge may be erected: *And provided also*, That said draw shall be opened promptly, upon reasonable signal for the passage of boats; and in no case shall unnecessary delay occur in opening the said draw during or after the passage of trains.

Section 3. That any bridge constructed under this act, and according to its limitations, shall be a lawful structure, and shall be known and recognized as a post route, upon which, also, no higher charge shall be made for the transmission over the same of the mails, the troops, and the munitions of war of the United States than the rate per mile paid for their transportation over the railroads or public highways leading to the said bridge; and the United States shall have the right of way for postal telegraph purposes across said bridge.

Section 4. That all railway companies desiring to use the said bridge shall have and be entitled to equal rights and privileges in the passage of the same and in the use of the machinery and fixtures thereof and of all the approaches thereto, under and upon such terms and conditions as shall be prescribed by the Secretary of War, upon hearing the allegations and proofs of the parties in case they shall not agree.

Section 5. That the structure herein authorized shall be built under and subject to such regulations for the security of navigation of said river as the Secretary of War shall prescribe; and to secure that object the said person or persons, company or corporation, shall submit to the Secretary of War, for his examination and approval, a design and drawings of the bridge and piers, and a map of the location, giving, for the space of at least one mile above and one mile below the proposed location, the topography of the banks of the river, the shore-lines at high and low water, the direction and strength of the currents at all stages, and the soundings accurately showing the bed of the stream, the location of any other bridge or bridges, and shall furnish such other information as ma ybe required for a full and satisfactory understanding of the subject; and until the said plain and location of the bridge are approved by the Secretary of War, the bridge shall not be built; and if any change be made in the plan of construction of said bridge during the progress of the work thereon, or before the completion of said bridge, such change shall be subject to the approval of the Secretary of War; and the said structure shall be at all times so kept and managed as to offer reasonable and proper means for the passage of vessels through or under said structure; and the said structure shall be changed at the cost and expense of the owners thereof, from time to time, as Congress may direct, so as to preserve the free and convenient navigation of said river. And the authority to erect and continue said bridge shall be subject to revocation or modification by law whenever the public good shall, in the judgment of Congress, so require, without any expense or charge to the United States.

Section 6. That the right to alter or amend this act, so as to prevent or remove all material obstructions to the navigation of said river by the construction of bridges, without expense to the United States, is hereby expressly reserved.

Approved May, 25 1872.

Railways of the United Kingdom.

The annual returns relating to the railways of the United Kingdom are now as complete as they can be made. They are no longer made out by the Board of Trade from the half yearly statements of accounts laid before the shareholders, as, under the act of 1871, every company is required to make a special return upon a form provided for the purpose. In three instances the board had to institute proceedings for the recovery of penalties before they could obtain compliance with the act.

The capital raised and received amounted at the close of the year 1871 to £552,680,107. It is made up thus—ordinary capital, £230,250,152 guaranteed, £64,555,255; preferential, £108,496,620; debenture stock, £67,282,535; loans, £82,095,545. At the end of the year 1871 the capital received in England and Wales amounted to £461,368,616, and the net receipts in the year (after payment of working expenditure) were £21,995,582; the companies of Scotland had received capital amounting to £64,282,911, the year's net receipts being £2,653,543; the companies of Ireland had received £27,028,580 capital, while the year's net receipts were £1,090,795.

The net receipts of the United Kingdom in 1871 were, therefore, £25,739,920, or 4.65 per cent. on the total capital raised.

The length of line constructed was stated in the return issued last year as 15,537 miles at the end of 1870: the present more trustworthy returns show that at the end of 1871 the length was 15,376 miles—viz., 10,850 in England and Wales, 2,588 in Scotland, 1,988 in Ireland. The Board of Trade summary states the capital received as averaging £35,944 per mile constructed; but that is without distinguishing between double and single lines, and allowing no more for one than the other. The close of the year 1871 saw England and Wales with 6,799 double and 4,051 single lines; Scotland with 1,043 double and 1,495 single lines; Ireland with only 496 double and 1,492 single lines.

In the course of the year trains traveled 179,075,894 miles; trains of English railway companies, 147,419,872 miles; of Scottish, 23,010,976; of Irish, 8,645,046 miles. The numbers of miles run respectively by passenger and by goods trains were about equal in the English returns; the Scotch show a greater number of miles run by goods than by passenger trains; the Irish show passenger trains running more than double the number of miles run by goods trains. The result for the United Kingdom is to leave the numbers nearly equal.

The trains carried in the year 1871 no less than 375,220,754 passengers—viz., English, 328,552,946; Scottish, 31,119,874; Irish, 15,547,934 passengers. Only 35,642,199 passengers traveled first-class, being less than a tenth of the whole number; 81,021,940 traveled second-class—above a fifth of the whole number; 258,556,615 traveled third-class—nearly seven-tenths of the whole number. But this statement of the number of passengers is exclusive of the holders of season or periodical tickets, who were 188,392 in number; there are no *data* for estimating how many journeys these took in the year, unless any be found in the statement that the total fares paid by them in the year amounted to £781,778, or about 83s. per person for all his journeys put together.

The year's receipts from first class passengers amounted to £4,148,108, from second-class £5,167,535, from third class £8,115,304, and receipts amounting to £3,853 were not classified; the total receipts from passengers, with the season ticket holders included, amounted, therefore, to £18,216,578. There was also received in respect of passenger trains £1,806,802 for excess luggage, carriages, horses, dogs, parcels, &c., and £599,200 for mails, bringing the passenger receipts up to £20,622,580.

The goods traffic comprised 67.142,234 tons of general merchandise and 102,222,464 tons of minerals. This last number is constituted of 81,412,357 of minerals carried by English railway companies, 20,337,781 by Scottish, but only 472,326 tons carried by Irish companies. The receipts from goods traffic amounted to £26,484,978—viz., £15 418,171 for general merchandise, £1,037,554 for live stock, and £10,029,253 for minerals. To this statement of receipts from passengers and goods must be added £1 785,222 received from rents, tolls, navigation, and miscellaneous sources. The gross receipts of the year are thus brought up to £18,892,780. This amount is reduced to little more than half—viz., to £25,739,920, the net receipts, by the deduction of working expenses, which amounted to £23,152,860, or about 47 per cent.

The English companies show 47 per cent. expenditure, reducing their gross receipts of £41,383 065 to a net sum of £21,995,582; the Scottish had a working expenditure of 49 per cent., reducing their £5,237,329 to £2,658,543; the Irish had a working expenditure of 52 per cent., reducing their £2,272,386 to £1,090,795.

The chief items of the year's working expenditure are as follows for the United Kingdom:—Maintenance and renewal of way, works, &c., £4,457,625; locomotive power, £5,933,489; repairs and renewals of vehicles, £1,981,771; traffic charges (coaching and merchandise), £6,658,080; rates and taxes, £953,753; Government duty, £520,555; compensation for personal injury, £312,334; compensation for damage and loss of goods, £141,288; legal and parliamentary expenses £251,980; navigation expenses, £520,814; the remainder consists of £951,776 for general charges, and £469,395 for miscellaneous working expenditure. Of the total receipts of the companies, 8.65 per cent. arose from navigation, rents, tolls, and miscellaneous sources; the remaining 96.35 per cent. was constituted thus—42.18 per cent. from passenger traffic and 54.17 per cent. from goods traffic.

The ratio of passenger traffic to goods traffic is far from being the same in the three kingdoms. The English companies received £17,450,447 from passenger trains and £22,891,947 from goods trains; the Scottish, £1,919,603 from passenger and £3,121,882 from goods trains; the Irish £1,252,530 from passenger and £971,149 from goods trains. These, the gross receipts from passenger and from goods trains, amounted in the year to £3,063 per mile of railway, and to 5s. 3d. per train mile.—*London Railway Times, Nov. 2.*

Texas and Pacific Railroad.

Col. J. M. Eddy, of the Texas and Pacific Railroad, furnishes the Jefferson (Texas) *Times*, of the 23d ult., with the following information:

The company has already spent over a half million in money in Jefferson.

The orders of the various railroad companies are large, and the merchants ought to endeavor to secure a portion of this trade. One bill alone, ordered by telegraph, comprised of 5,000 barrels of flour, 250 barrels beans, 150,000 pounds sugar, 150,000 pounds coffee, 5,000 sacks corn, 5,000 of oats, 5,000 bales of hay, 200,000 pounds bacon. A very small effort and a little management might bring this trade, or a large portion of it to Jefferson.

The work is to be prosecuted with great vigor.

Five hundred miles of tieing and bridging have been put under contract, and the contractors are doing their full duty, showing that they understand fully what is expected of them.

Track laying will commence in five different places before January, 1873; Longview, west; Dallas, east; Jefferson, north and south; Sherman, east.

Fifteen thousand mechanics and laborers are en route to work on this road, and excellent wages will be paid.

Two hundred miles of iron are on the way, seven engines and three hundred cars.

The gauge of five and a half feet will be changed to four feet eight and one-half inches as soon as iron can come up Red River. The iron is now at New Orleans and at the mouth of Red River, waiting for water.

A contract for a telegraph line from Longview to Dallas has been let, and a large force is now on the work. A line also from Marshall via Texarkana has been let, and work commenced yesterday. J. H. Creighton is the builder on the north line. He is considered one of the best telegraph men in the United States.

The first invoice of "ye heathen Chinee" will arrive on the ground within six days. A contract for ten thousand of these laborers has been made.

Red River, though low, has not cut off the railroad supplies, as one hundred teams are between Monroe and Shreveport; and the first mule trains, loaded with railroad supplies, arrived in Shreveport on the 22ult. A very large mule train is also now between the end of the Missouri, Kansas and Texas track and the depot at Sherman.

This railroad has bought largely at Galveston, and has established an extensive depot at Dallas. The company has its own cars and engines at Corsicana to carry material, and is erecting derricks, etc., to transfer material from steamers at Shreveport to supply the interior. The track has been extended at Shreveport through the largest warehouses. Ten thousand tons of railroad material have been ordered, and is now en route to the different depots.

The *Railroad Journal* has, in a late number, an article on this great enterprise, which shows how much attention it is attracting throughout the country since Col. Scott took hold of it. The *Journal* says:

"We are now able to state that five hundred miles of road will be under contract within thirty days, and will be open to travel before July next. The divisions of the road which are to be completed by the time mentioned are as follows: 1. A division west from Dallas to Fort Worth, Tarrant Country, Texas, a distance of 155 miles. 2. A branch north from Marshall to Texarkana, a distance of 65 miles. 3. A division from Texarkana west to Fort Worth, a distance of 224 miles.

"From the above it will be seen that Fort Worth is that point on the trunk line from which diverge its eastern branches or outlets; one the distinctively southern branch leading to a connection with the Vicksburg line, and the other tending northward making a direct connection with Mississippi, Ouachita and Red River and the Cairo and Fulton Railroads at Texarkana, a point on the boundary of Arkansas and the western terminus of these roads.

"We understand the Arkansas roads referred to are in a very forward state, and can be completed by the time the Texas divisions of the Texas and Pacific are opened.

"The Cairo and Fulton will be opened to Little Rock some time this fall. This will leave a gap between Little Rock and Texarkana of only 145 miles, on which, however, no work has yet been done; but the company has abundant means and will unquestionably prosecute the work vigorously to its completion to the Texas line.

"On the Mississippi, Ouachita and Red River the work is in a more advanced state. On this road thirty miles of track are laid and eighty-five miles of road are graded, leaving less than fifty miles of road-bed to be graded to make the work continuous to the starting point of the Texas Pacific Railroad."

The above from the *Journal* is good as far as it goes; but it is well understood, as Col. George Williamson stated when there, that Col. Scott considers New Orleans to be the terminus of the Texas and Pacific Railroad, and is exceedingly desirous for the road from New Orleans to Shreveport to be built in time to meet the great transcontinental road there.

Louisville, Cincinnati and Lexington R. R.

Dr. Norvin Green having resigned the presidency of the Louisville, Cincinnati and Lexington Railroad Company, we are pleased to learn that Gen. John Echols, of Staunton, Virginia, has been elected to succeed him in that important position. Gen. Echols is a gentlemen of high reputation and commanding abilities, and will bring to the fulfillment of his new duties the invaluable experience of many years spent in civil engineering, and as a prominent and active officer of the Chesapeake and Ohio Railroad Company, of which we believe he is still a leading director. The intimate connections, already in great part consummated between the Chesapeake and Ohio, and the Louisville, Cincinnati and Lexington, roads make General Echols' promotion under the circumstances, peculiarly appropriate.—*Frankfort Yeoman.*

☞ The Mansfield and Tuscarawas Valley Railroad Company, has been organized with a capital stock $50,000, to build a railroad from Mansfield, Ohio, through Richland, Ashland, Holmes, Coshocton and Tuscarawas counties, to Newcomerstown. The corporators are Henry H. Sturges, J. H. Cook, Lyman B. Matson, Z. S. Stocking and Barnabus Burns.

☞ The Shawnee and Millerstown Railroad Company has been organized to construct a railroad through Perry county, Ohio, between Millerstown and Shawnee City. The capital stock is $300,000. The corporators are James W. Taylor, H. L. Anderson, Wm. L. Anderson, W. H. Wilmot, W. H. Beaumont, J. W. Carter and Allen Miller.

☞ The contract for the construction of the extension of the Boston, Barre and Gardner Railroad from Gardner to Winchendon has been awarded to Mr. N. B. Farren, a well known railroad builder. The price is $25,000 per mile. The work will be begun at once.

☞ The Poughkeepsie *Press* reports that the Dutchess and Columbia Railroad is doing considerable business at present in the way of transporting ore from the beds in Connecticut. The ore to the extent of eight car loads per day is shipped direct to Dutchess Junction.

☞ The traffic receipts of the European and North American Railway for the month of October, 1872, were $33,834 20, against $27,882 57 in October, 1871, and $22,566 98 in October, 1870.

$5,000,000.

SAFE AND PROFITABLE INVESTMENT.

THE

CHICAGO AND CANADA SOUTHERN

First Mortgage Sinking Fund

THIRTY YEARS'

7 PER CENT. GOLD BONDS

At 90 and Accrued Interest in Currency.

Interest Payable April and October.

REGISTERED OR COUPON PAYABLE IN LONDON OR NEW YORK.

This road, with the Canada Southern, forms the new Trunk Air Line from Buffalo to Chicago. It is under the same control and management, and is being built by the same parties who built the Canada Southern: Milton Courtright, John F. Tracy, David Dows, Wm. L. Scott, Henry Farnam, R. A. Forsyth, John M. Burke, M. L. Sykes, Jr., all Directors both in the Chicago and Northwest and the Chicago and Rock Island; George Opdyke, of the New York Midland; Sidney Dillon, Daniel Drew, John Ross, David Stewart, Samuel J. Tilden, Kenyon Cox, and other prominent railroad men. The road is being rapidly built, in the best possible manner, with 60 lbs. steel rails throughout its entire line, and will be completed during the coming year; nearly one-half of the road will be completed and in running order by the 1st of January next; so that the *entire line*, from Buffalo to Chicago, will, within that time, be in successful operation. The builders of this Road control enough of the leading lines running from Chicago to insure an enormous business from the start. Taking into consideration the important fact, patent to all who study the statistics of trade, "That the present Trunk Lines, *now* taxed to their utmost capacity, are not affording facilities equal to the great and constantly-increasing demand for transportation, and that this Road, through its entire length, being practically STRAIGHT AND LEVEL, and SHORTER by THIRTY-FIVE MILES THAN BY ANY OTHER NOW BUILT, or THAT CAN BE BUILT, it must be apparent that this line is not only needed, but must be a great success. The proceeds of these bonds will complete and equip the entire road, and we confidently recommend them as a most safe and profitable investment.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "†."

American Railroad Journal.

Saturday, November 23, 1872.

Stock Exchange and Money Market.

Money has been close and stringent throughout the week. The drain on the banks for currency and for discount aid has been severely felt in the call loan line, in which accommodation has been more difficult to obtain. The governing rate to even the best class of borrowers in a temporary form has been 7 per cent., and many needy parties have been forced to pay the same rate in gold, with, in several instances, a fractional commission for the use of funds from day to day in the carrying of Stock on speculative account. In the discount line, the several failures growing out of the Boston fire tended to stiffen rates as against the borrowing classes, and on commercial paper, the figures outside of the banks have been from 9@15 per cent. per annum, on the choicest to really good mercantile credits. This state of affairs, in the financial way, has operated very seriously against free movements in all lines of business, and the week has shown much less animation in produce and merchandise, as well as at the Gold and Stock Boards. The English advices are of some relaxation in the Money pressure there, though high rates are yet the rule in the London market, as well as in the provinces. Our city banks have been again quite heavy losers in the line of their legal tender reserve, while further gaining slightly in the specie average. Their deposit line has been augmented about 1⅛ million. They reduced their loan and discount average a little. The U. S. Sub-Treasury reduced its coin reserve about 7-10ths of a million and its currency balance 1⅝ million.

Under the Treasury programme for November Government proposes to sell, at least, four millions of Gold, or one million on each Thursday, and to buy in four millions of Five Twenties, or one million on each Wednesday, of the month.

The U. S. Sub-Treasury office last week received $3,006,511 of currency, and $2,998,949 of gold, the latter including $1,806,987 from customs; and disbursed $4,644 228 of currency and $3,679,283 of gold, the latter embracing $1,942,408 of coin interest. The city banks reduced their loan and discount average about 3-10ths of a million during the week, and increased their outstanding circulation a trifle. The U. S. Sub Treasury held a currency balance on Wednesday morning of $22,181,932, and a coin reserve of $45,295,230.

The city banks, in their latest return, show a decrease of $1,529,400 of legal tender notes, with an increase of $166,000 of specie, an addition of $1,119,000 to their deposits, also a contraction of $298,500 in their loan and discount averages, and of $11,200 in their item of circulation. The city bank exchanges, last week, averaged 146½ millions. The banks now hold $2,290,825 of specie and legal tender notes more than the 25 per cent. of their liabilities required by the National Banking Act.

The specie reserve of the city banks according to the latest return is $13,590,200, against $16,239,300 same time last year. The city bank deposits are now $204,524,600 against $219,186,900, week ending Nov. 18, 1871. The legal tender reserve amounts to $46,731,600, against $55,181,500 same time last year. The circulation now stands at $27,599,300 against $30,188 600 same time last year. The loans are now $276,933 000 against $286,204,500 at this date last year.

The coin reserve of the city banks is now about 13⅝ millions as against about 29¼ millions on the 20th of July; the legal tender reserve is about 48¾ millions against about 55¼ millions on the statement of June 15th; and the deposits are now down to 204½ millions, against 247½ millions on the 20th of July.

Government revenues have been somewhat less satisfactory in their yield, since our last. The excises yielded within the week about two millions, and thus far in the current fiscal year beginning with July 1, 1872, $49,872,923. The customs at the port of New York last week were $1,806,987; and at the outports, equal to about $600,000, all in coin or coin certificates.

There has been a restricted business reported in the Gold line, the Money pressure having been against the speculative element, while the customs call has been on a very moderately scale. The export drain was heavier, reaching nearly three millions. The price was very well maintained partly by the confident action of the operators

for a rise. The range of the price during the week has been from 113⅛@113⅞, and the closing quotation on Wednesday was 113¼ against 112¾ the preceding Wednesday. The specie outflow last week, was $2,975,449. The Gold Exchange Bank clearances have averaged about 55⅞ million per day during the week.

The customs demand for Gold last week, averaged $323,340 a day. The arrivals of specie from Europe, Havana and other foreign ports last week were $18,370, and since Jan. 1, 1872, were $5,347,772 against $8,409,313 same time in 1871. The total customs revenue of the Government, in coin, at this port, since January 1, has been $133,538,248 against $141,902,942 during the same time in 1871.

Government has disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt, since January 1, 1872, $70,514,397, against $78,833,285 during the same time in 1871.

The export drain of specie was $2,975,449 last week, against $629,666 same week preceding year. The shipments since January 1, 1872, have been $66,858,905 against $59,219,734 during the same portion of 1871.

Foreign Exchange has been depressed and lower, on a restricted business. Bankers' sixty day bills on London closed on Wednesday at 108@108¼; sight bills on London, 109⅞@110⅛.

The week's exports hence of domestic produce have been to the currency value of $5,725,763.

Government securities have been in rather more demand and generally strong in price, especially considering the activity in Money, which was against the investment call.

On Wednesday, Government bought in two million of the offered Five-Twenties at from 112 39 @112 90. The aggregate offering was $2,914,000 @112 89@113 14.

U. S. sixes of 1881 at the close on Wednesday of the current week were quoted at 116⅜@116¾; U. S. Five-Twenties of 1862, 112⅛@112¼; U. S. Five-Twenties of 1864 at 112⅛@112¾; U. S. Five-Twenties of 1865, 112¾@113; U. S. Five-Twenties of 1865 consolidated, 114⅞@115; U. S. Five-Twenties of 1867, 115⅜@115⅝; U. S. Five-Twenties of 1868, 115@115¼; U. S. Tenforties at 108@108¼ U. S. Fives of 1881 (Funding Loan) 109¾@110; Six per cent. currency Sixes from 113½@113⅞.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Nov. 6.	Nov. 13.	Nov. 20.
Consols	92⅜	92¼	92½
U. S. 5-20s, 1865	91¼	90½	90½
" 1867	93⅛	92½	93
" 10-40s	88	87	87¼
New Fives of 1881	89	88¼	88½
Erie	43¼	38¾	41½

State bonds have been less freely dealt in, and quoted easier and irregular in price closing however, somewhat steadier.

Railway and Miscellaneous share property has been less active, the severe stringency in Money operating against the speculative movement, and values have been generally weak and yielding, closing heavily.

Railway Mortgage Loans have been moderately sought after on investment account at about steady prices for all the more substantial loans, especially of the older issues. Central Pacific Sixes closed firmly from 100@100¾.

The Committee on Stock List of the New York Stock Exchange have recommended the following among other additions to the regular list.: The first mortgage bonds of the Western Pacific Railroad Company: the State aid bonds of the Central Pacific Railroad Company.

Trade has been unusually dull in all kinds of Metals. Small lots of Ingot Copper sold at 31½c.: market weak. Iron very tame, and nominally unchanged as to values; 90 tons Glengarnock Pig sold at $50; American quoted as before. Pig-lead inactive, with ordinary Foreign quoted at 6⅝c., gold. Spelter dull at 6¾c., gold. Tin tame and weak; sales, 1,000 slabs Straits on private terms, quoted at 30½c., gold. Charcoal Plates nominal at $11 50@$11 75, gold, showing a further decline, on an important movement. Zinc quiet but steady.

General business has shown less animation. Prices of Breadstuffs, Cotton, Petroleum and Tobacco, were very well supported. Provisions were less firm. Wool quoted at 3@5 ct. per lb. higher with an exceptionally brisk inquiry noted for desirable grades. Middling upland cotton, closed on Wednesday at 19⅜ cts. per lb. The receipts at all the ports, since Sept. 1, have been 956,462 bales, against 718,498 bales same time in the preceding year; exports 490,000 bales against 269,500 bales in the previous year; stock at the ports at latest dates, 359,400 bales against 327,300 bales same date 1871.

At the Live Stock Markets, Beeves have been in good demand at from 9½@15 cts.; Veals at 7@11 cts.; Sheep in moderate request at from 4@7¼ cts.; Lambs, 6¼@9 cts.; Swine, at 4¾@5 cts. per lb., all live weight. The week's receipts were 8,832 Beeves, 1,470 Veal Calves, 28,884 Sheep and Lambs, and 57,835 Swine.

Foreign goods have been moderately dealt in at generally steady rates. The week's imports of foreign goods reached the amount of $5,717,907 including $1,218,039 of dry goods.

Ocean freights have been less active, but firm with the demand for room mostly for Flour, Grain, Cotton, Lard, Petroleum, and Tobacco.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Boston, Hartford and Erie R. R., 7¼; do. 1st mort., 39½: Louisville and Nashville consols, 1898, 92; Burlington, Cedar Rapids and Minnesota 1st mort., 89⅜; Toledo, Peoria and Warsaw 1st mort., W. Worcester and Nashua Railroad.

The annual report of the directors of the Worcester and Nashua Railroad Company made to the Railroad Commissioners, exhibits the business of this corporation in a very favorable light.

The gross receipts for the past year were $587,358, from the following sources: Passengers $189,033; freights $356,837: car service on other roads $16,648; express business $10,287; carrying the mails $4,625; and rents of property $10,427. The expense of operating the road was $391,905.

The net income of the year is $195,902. The total surplus with which to begin the new year will be $186,274, 381,954 passengers have been carried during the year, and 868,042 tons of freight. The percentage of net income to capital and debts is a little more than 11⅛ per cent. for the year.

☞ The Philadelphia, Wilmington and Baltimore Railroad Company have commenced running some of their trains on the new road known as the Darby Improvement. The new stations between Philadelphia and Chester are Fifty-eighth street, Mount Moriah, Bonnaffon, Paschall, Darby, Sharon Hill, Glenolden, Ridley Park and Crum Lynne.

Tasmanian Main Line Railway.

Herapath's Railway Journal of Oct. 26, says: The first batch of men engaged by Messrs Clark, Punchard and Co., of Westminster, for employment in the construction of the Tasmanian Main Line railway, were despatched in the Essex from Gravesend on the 23rd inst. to Launceston, via Melbourne. These men have been sent out under the provisions of the Tasmanian Act of Parliament, 31 Victoria, No. 26, which entitle each adult to a land order warrant of the value of £18, and the secretary of the Tasmanian Main Line Railway Company, Limited, who has been appointed the agent of the Board of Emigration in Tasmania, is empowered to issue 1,500 such land orders. A further number of men to the extent of 150 to 200 will be despatched in about a month.

☞ The directors of the Suncook Valley Railroad Extension Company, recently elected, are: Samuel N. Bell and Frederick Smyth of Manchester, Nat. Head of Hooksett, James H. Colberth and Daniel E. Tuttle, of Barnstead, Thos. Cogswell, and John M. Durgin of Gilmanton Iron Works. The estimated cost of this extension, which is sixteen miles in length, is $200,000. The extension will complete the line to Alton Bay, and will be built next summer.

☞ Measures are in progress for the construction of a bridge across the St. Lawrence from St. Cecile de Valleyfield to some point on the opposite side between Coteau Landing and Coteau du Lac. An act for this purpose was obtained by a company at the last session of the Dominion Parliament, and the bridge will connect a railway in course of construction between Ottawa and the Coteau with the network of railways in the State of New York.

☞ The Baltimore *Sun* says it is understood that the necessary stock subscriptions for a narrow gauge steam railway line from Swan lake—connecting with the Northern Central Railway at Relay House—to Towsontown have been taken, and the newly organized company have arranged the details of a contract to build the same, which has been given out, and the work will be at once pushed forward. This will give direct steam connection between Baltimore and Towsontown.

☞ A dispatch from Parsons, Kansas, says the Missouri, Kansas and Texas Railroad is now completed to within eleven miles of the Red river. The bridge across that stream is being rapidly built. The Texas Central Railroad will be completed to Denison by the first of January next. The gap between the two roads is now only forty-two miles.

☞ The newly elected Board of Directors of the East Tennessee, Virginia and Georgia Railroad Company have elected the following officers; President, R. T. Wilson; vice-president, C. M. McGhee; vice president and superintendent, Joseph Jaques; secretary and treasurer, James G. Mitchell.

☞ Surveys, etc., are now being made preparatory to an estimate of the cost of a railroad bridge over the Ohio river opposite or near Paducah.

BANKING HOUSE OF

FISK & HATCH,

5 Nassau Street..... .....NEW YORK.

We receive DEPOSITS and allow interest on daily balances, issue interest-bearing CERTIFICATES OF DEPOSIT, make COLLECTIONS in all parts of the United States and Canadas, and execute orders at the Stock Exchange for INVESTMENT STOCKS AND BONDS.

We buy and sell, as usual, GOVERNMENT and CENTRAL PACIFIC and CHESAPEAKE AND OHIO BONDS.

The smaller denominations of the latter are nearly exhausted, and of the $1,000 bonds we have only a small supply remaining. At their present price they yield *over seven per cent. income in gold.* We strongly recommend them.

This great work is about completed; there are now nearly 400 miles finished, and only about 30 miles remain to unite the Atlantic tide-waters to the Ohio River valley by the shortest and easiest route.

The company have, at considerable expense, caused a geological survey to be made of the route of the road by Prof. Ridgway. Copies of this valuable Report, and also a pamphlet containing the latest information in reference to the present condition and future prospects of the road, can be had at our office.

The quantities of white oak, chestnut, walnut and other valuable timbers; the cannel, splint and bituminous coals; the varieties of iron ores; the limestone, salt and other products, render the route of the Chesapeake and Ohio Railroad probably the most attractive location for iron and kindred industries in the United States.

FISK & HATCH,

☞ At the annual meeting of the stockholders of the Alexandria and Fredericksburg Railroad Co., held on the 12th inst., the President submitted the annual report, which, in substance, states that the receipts of the road have been comparatively very small, so light as to be insufficient to pay the interest on the bonds of the company, the limited receipts being attributed to a failure to make satisfactory arrangements with the Richmond, Fredericksburg and Potomac Railroad Company for the transportation of passengers and freight, whereby additional inducements could be held out for trade and travel. George B. Roberts was unanimously re-elected President, and Albert Hewson Secretary and Treasurer.

☞ For the month of October 99,374.04 tons of George's Creek coal, cleared at the port of Cumberland. The shipments were made by the following Co's: American, 16,134 tons; Borden, 12,073 tons; Consolidation, 28,757 tons; George's Creek, 797 tons; Hampshire, 5,955 tons; Maryland, 13,268 tons; New Central, 14,769 tons; Individuals, 7,618 tons.

☞ The laying of the track of the Orange and Alexandria Railroad has been finished to the Virginia and Tennessee Railroad at the transfer platform, and the connection between these two important lines of travel is now complete.

☞ We understand that the St. Joseph and Denver Railroad will be pushed forward to Kearney before the first day of next January.

Journal of Railroad Law.

RAILROAD COMPANIES—LIABILITY FOR INJURY TO ANIMALS OCCASIONED BY WILLFULLY GIVING PREFERENCE TO OTHER FREIGHT.

The facts in the late case of Kenney et al *vs.* The Grand Trunk Railway Company of Canada (47 N. Y., 525,) are fully and clearly stated in the following opinion by:

GROVER, J.—In March, 1866, the defendant was a corporation under the laws of Canada, and engaged in the transportation of persons and property by rail, between Goderich and Buffalo. On the fifteenth of that month, the defendant received from plaintiffs, at Goderich, a quantity of cattle, which it agreed with them to transport and deliver to them at Buffalo, in consideration of the payment of the usual freight, under the following stipulations, regulating its liability: 1st. That the owners of the cattle undertake all risks of loss, injury, damage, and other contingencies in loading, unloading, conveyance or otherwise. 2d. The company do not undertake to forward the animals by any particular train, or at any specified hour; neither are they responsible for the delivery of the cattle, within any certain time, or for any particular market. 3d. When free passes are given to persons in charge of animals, it is only on the express condition that the railway company are not responsible for any negligence, default, misconduct, or otherwise, on the part of the company or their servants, or of any other person whomsoever causing or tending to cause the death, injury or detention of persons with such free passes; and that whether such passes are used in traveling by any regular passenger train, or by any other train. A portion of the cattle were loaded upon the defendant's cars at Goderich on the same day, and transported to Brantford, where the car containing them was detached from the train and placed upon a side track, where it remained for three days, and the residue loaded and taken to Brantford upon the sixteenth of the same month, and the car containing them also detached and placed upon the same track, where it remained for two days. The case further shows that the weather was very cold during this interval. That the cattle could not be unloaded from the cars where they were, nor fed or watered while therein. That from exposure to the weather while there, and the want of food and water, some of the cattle died, and the others were seriously injured. It further appeared that the usual time of transporting cattle from Goderich to Buffalo was from eighteen to twenty hours. By the contract the defendant undertook to transport the cattle in the usual way and in the usual time, and deliver them safely at Buffalo; and in default of performance became liable to the plaintiffs for the damages thereby sustained, unless exempt therefrom by the stipulations of the contract or some other legal excuse for its failure to perform its contract. The first stipulation restricting the common law liability of the defendant has no application to the case, as the injury to the cattle did not occur while loading, unloading or carrying them under the contract. The concluding words of this stipulation "and otherwise" if they have any meaning, clearly have no application to the present case, as it cannot be claimed that either party thereby understood that it was intended to shield the defendant from liability for running the cattle on a side track, and unnecessarily abandoning them there to perish by cold and famine. The second clause merely exempts the defendant from liability for failing to forward the cattle by any particular train or at any specified hour, or for a failure to deliver within any certain time or for any particular market. This obviously was designed only to shield the company from liability for its failure to load and place the animals upon any particular train, or if so loaded and placed, for failing to start such train at the particular time advertised or at any particular hour, and for failing to deliver within any certain time or in season for any particular market, but not to protect it from liability for an entire failure to perform its contract, or for any substantial breach after entering upon its performance. The third stipulation relates entirely to the liability of the company for injuries to the persons in charge of the cattle riding upon free passes, and has nothing to do with the present case. Leaving the cattle upon the side track at Brantford for the length of time they were left, and under the circumstances of exposure to injury, can in no sense be regarded as an act of negligence in the execution of the contract. It was for the time an entire abandonment of all efforts to perform, intentional on the part of the employes of the company; and if such effort had not thereafter been resumed and all the cattle had perished while in the cars upon the side track, no one would, I think, have pretended that the company was excused from liability for their loss, but the reason that the company was, under the contract exempt from liability for injuries caused by the negligence of its servants in its execution. It is immaterial, therefore, to inquire whether, by the true construction of the contract, the company was so exempt or not, or if not so exempt, by the common-law, (see Steinway *vs.* Erie Railway 43 N. Y. 123,) such an exemption under the law of Canada was shown by the testimony of the learned barrister, introduced by the defendant upon the trial. The judge did not err in denying the request of the defendant's counsel to direct the jury to find a verdict for the defendant. By the law of New York and of Canada, the defendant was liable for the injury in question, unless excused therefrom by such an unusual and unexpected accumulation of freight between Brantford and Buffalo, which the defendant was required by law to transport prior to the receipt of the cattle in question, as rendered delay in transporting the latter absolutely necessary. The evidence was far from proving this. Taking the most favorable view of the testimony bearing upon this fact, the most that the defendant could claim was that the question should be submitted to the jury. An examination of the charge shows that it was submitted to the jury, more favorable to the defendant than the law authorized. The court charged the jury, in substance, that the contract required the defendant to transport the cattle according to the usual course of business, and that there should be no affirmative discrimination against this species of freight. That it was the duty of the defendant to forward freight in the order in which it was received. That the defendant had no right to give preference to freight about to become dutiable over that in question, and if it did so was liable. So far the charge was correct. The court then erroneously charged the jury that, if such preference was given, and the consequent delay had resulted from the misconduct or negligence of what was ordinarily known as the employes of the defendant, it would not be liable; but that the defendant was liable for its own negligence or misconduct, or that of the witness Barnard. The latter portion of the charge was correct, except so far as placing the cattle and leaving them on the side track, is called negligence. We have already seen that this was a deliberate intentional act, constituting a breach of the contract and in no sense negligence in its performance. Barnard was superintendent of that portion of the defendant's road, and had the entire supervision of its business and control of its servants there. He sent a telegram to Brantford to detain all stock there, and forward other freight which would become subject to duty upon the expiration of the reciprocity treaty, which would occur the next Saturday night. The effect of the charge was, that if the jury believed that an illegal preference had been given to other freight, by means of which the cattle were detained at Brantford, and that this preference and consequent delay was caused solely by these orders of Barnard, they should find for the plaintiffs, otherwise for the defendant. Under this charge the jury must have found that the detention was caused by giving an illegal preference to other freight, and in addition thereto, that such preference was caused by the orders of Barnard. The latter was an immaterial question. The accumulation of freight creating the obstacles testified to by defendant's witnesses, was principally at Fort Erie. The difficulty was in crossing the river from that point to Buffalo. No reason was shown for not continuing the cars containing the cattle in the respective trains to Fort Erie. The case further shows that defendant had a track running to a ferry at Black Rock, at which the cattle might have been crossed and saved. This might have been a little more expensive, but it was the duty of the defendant under the contract to have resorted to this, rather than let the cattle perish on the side track at Brantford.

The judgment appealed from must be affirmed, with costs.

Judgment affirmed.

☞ The suit between the Delaware and Hudson Canal Company and the Pennsylvania Coal Company, for damages for violation of a contract, which has been pending since 1857, and involving nearly $250,000, has just been decided in favor of the latter by the referee, Judge Hogeboom.

☞ The directors of the California Central Narrow Gauge Railroad Company have elected the following officers: Cornelius Cole, President; M. D. Townsend, Vice President; R. L. Tracey, Treasurer; W. W. Magary, Secretary; W. S. Watson, Chief Engineer.

☞ The Springfield and St. Louis Railroad Company have closed a contract with Messrs. Ware & Co., for the construction of their road from Springfield to Litchfield.

☞ The Cairo, Arkansas and Texas Railroad, to run from Cairo to Poplar Bluff, is now entirely under contract, and is being speedily pushed to completion.

Burlington, Cedar Rapids and Minnesota Railway.

On their main line from Burlington to Austin, the road bed is being put in the best possible condition for winter. The bridges have been strengthened by additional piling and double stringers packed and bolted. A new Howe Truss 104 feet in length is being built over Mud Creek this side of Vinton, which will be finished in a few weeks. The bridge over the Shell Rock which they had trouble with last winter, is now one of the strongest in the State and secure against any further possible accident, so that the traveling public may rest assured of an easy and safe transit on any point of the line this winter.

On their new roads special attention has also been given to bridges which are either of the V. or Howe Truss Pattern. The latter spans the Turkey River for 300 feet on the Pottsville route, and also the Cedar on the Muscatine Western, which is the longest of all being 1,200 feet in length.

On account of the impossibility to obtain iron, the Postville line will only be laid 6 miles south of West Union this fall, where it will intersect with the Davenport and St. Paul road building north. The entire line is ready, or nearly so, for the iron from Cedar Rapids to Postville, but the unprecedented scarcity and high price of this article entirely precludes the possibility of obtaining it. On the Southern end the iron will be laid to Centre Point, 18 miles, this week, and then the tracklayers will go to Vinton to work on the Liscomb branch, 25 miles of which is now nearly ready for them. The company have laid out two towns on it, one 15 miles west of Vinton called Dysart, and another 11 miles from Buckingham, called Traer, to which point the track will be laid this fall. It is expected when this is completed that trains for this division will leave Cedar Rapids daily so that it will add another railroad to our city and thus increase the facilities. On their Muscatine Division, trains are now running regularly for 27 miles while the grading is done for some distance beyond. In the spring, work will be resumed with the greatest vigor on all these branches. The Liscomb division, will be pushed to some point probably between Sioux City and the Northwestern. The Muscatine Division towards Council Bluffs and perhaps the Postville line north into Wisconsin. Parties have already been in Cedar Rapids consulting with the company to have this done.

On the Southern end, work is progressing rapidly below Keokuk and the track will be laid on the 96 miles of gap between Keokuk and St. Louis so that the cars will probably pass over by January, 1874. Mr. W. W. Walker has this work in charge, which is a sufficient guarantee that it will be well and faithfully done. Tracklaying has been progressing for the past month, and 17 miles are now laid.

The rolling stock of the company has been increased this fall and now consists of 660 box, flat and stock cars, and 20 new and elegant passenger coaches. Two more to be placed on the line from Postville south, will be out of the shops in a few weeks. Two new engines from the Grant Works at Paterson, N. J., will be here in November, two more in December, and two in January. Sixteen of their wood burners have been altered for coal, and the rest will be immediately. All their passenger trains are now provided with the Westinghouse Air Brake and Miller Platform.—*Cedar Rapids Republican.*

☞ The Oxford (Pa.) *Press* says: "Grading is progressing rapidly on the Peach Bottom Railway. Nearly the whole distance from Oxford to Octoraro is nearly finished, and six gangs of workmen are operating on the York county side. About six miles is already graded."

☞ Ten miles of grading on the Arkansas Central Railway have been let west of White river, and gangs of men are being put on the work.

Cairo and Fulton Railroad.

We are informed, by reliable authority, that work is progressing quite rapidly on this great thoroughfare between Little Red river, the present terminus, and the Missouri state line, to which point the "Iron Mountain extension" has been finished and running for several days. There only remains a very small amount of grading to be done, which will be completed before the tracklaying reaches such points. Track-laying is progressing rapidly south from the Missouri line, north from White river, south from White river, and north from Little Red river, which insures the early completion of this great enterprise, say by some early day in December next.

The temporary bridge at Little Red affords a ready passage over that stream, and the permanent bridge is being rapidly built. The bridge at White river is likely to be the last thing completed, but a large force is at work on it, and the time is near at hand when we of Little Rock may take our seats in an Arkansas made car and find ourselves in St. Louis in twelve or fourteen hours. —*Arkansas Gazette, Nov.* 12.

☞ The Texas papers are filled with accounts of the rapid progress of the Texas and Pacific Railroad. The Jefferson *Times* says that the work is lively and progressing. Graders are busy on all parts of the line, contracts are being let and all available labor is pressed into service. There is every reason to believe that by, or before, January the road will be completed to Marshall, a substantial, elegant railroad bridge finished over the bayou at Jefferson somewhere near Mayberry's bridge, and a connection formed with the branch road to Texarcana. Beyond Little Cypress the 12th, 13th, 14th, 15th, 16th and 17th miles are being graded. The last mile is within the city limits.

☞ The Wilmington (Del.) *Commercial* says that the surveyors and engineers of the Wilmington and Western Railroad will in a few days commence a survey of the proposed route as far as Oxford, Pa. The proposed road will make a detour to the left about half a mile east of Landenberg, and cross White Clay Creek and the Pennsylvania and Delaware Railroad on a high trestle bridge, and from thence to the town of Kimbleville, and on through a rich agricultural region, and near a large number of various kinds of manufactories, to Oxford, where it will connect with the Peach Bottom Railroad, which is already under contract and partially graded.

☞ The Shenandoah Valley Railroad Company are about to place under construction the second division of their road. The division embraces the line through the counties of Warren and Page, the graduation of which, however, through Warren county was completed nearly two years ago by the Central Improvement Company, and but fifteen miles of work is required to reach Luray.

BALTIMORE AND DRUM POINT R. R. Co.,
No. 44 Second St., Baltimore, Md.,
November 11, 1872.

PROPOSALS will be received at this office until noon of the 10th day of December next, for the grading, masonry and bridging of two divisions of this road. The first, ten (10) miles in length, from the Annapolis Railroad to Butler's Tavern—the other, twelve miles, from Drum Point to St. Leonard.

The right to reject any bid is reserved.

Profiles and specifications may be seen here, and at the office of Vernon H. Brown, No. 60 South St., New York, after the 20th inst.

By order of the Board.
JOHN G. BUTLER,
Secretary.

STREET RAILROAD CARS FOR SALE.

THE undersigned offers for sale ten Two-horse cars which have been in use a few months on a street road. They are nearly as good as new cars, and will be sold cheap for cash.

CAMP'S IMPROVED DUMPING CAR.

(Used by the American Dredging Company.)

RIGHTS FOR SALE BY

N. H. CAMP,

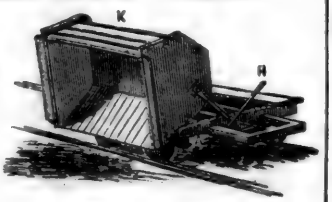

Fig. No. 1, Car Loaded. Fig. No. 2, Car Dumped.

TO DUMP THE CAR.

The Brakeman seizes the lever H, and raises it, thus removing the step from under the box-support A, when the weight of the load causes the box to roll over to the position shown in Fig. 2.

To replace the box in readiness for another load.

The Brakeman, standing on the platform, reaches over, and grasping the corner of the box, pulls it back to its place.

Address, N. H. CAMP,
Care N. C. MILLER, 61 Broadway, New York City:

HAND'S IMPROVED DUMPING CART.

PATENTED APRIL 4th, 1871.

THE MOST PERFECT YET INVENTED.

Can be dumped by a single motion of one hand while you hold the horse with the other.

The tail-board being attached to the shafts, lifts of its own accord when the cart is dumped, as seen on the right of the engraving. As soon as the load is dumped all you have to do is to start the horse, and the cart will resume its proper position, as seen in the left of the engraving, hook itself and replace the tail-board, without any assistance of the driver whatever. The shafts are attached to the outside of the body, near the hubs, which gives the horse great control over the cart, and prevents the body from playing from side to side as they do when the shafts are pivoted underneath.

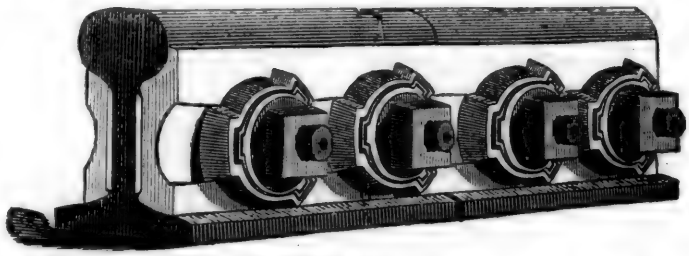
FISHER'S PATENT

Wrought Iron

RAIL JOINTS,



MADE BY

FISHER & NORRIS,

TRENTON, N. J.

The Superiority of these Joints has been proved by eight years' use on different Roads.

PRATT'S PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

The New Middle Line of Rail to the West.

The Chesapeake and Ohio Company are already perfecting the connections of their main line, now drawing to completion, south-west of the Ohio River, at Huntington, the western terminus of the main line. Mr. Huntington, the energetic Executive of the Company, the same who built the Central Pacific Railroad, has secured control of the Cincinnati and Louisville Short Line, and of the Lexington, Frankfort and Louisville Road, and is now rapidly building the connecting link between Huntington and Lexington, 125 miles, under the old Big Sandy, Mount Sterling, and Lexington surveys. Of this link 33 miles are already opened to traffic and by an early day the entire route will be an accomplished fact from tide-water at Richmond and from the Potomac at Washington, to Louisville, Kentucky. The Cincinnati and Louisville Short line, now controlled by Mr. Huntington, extends not only to, but through the City of Louisville, to a point three miles south-west of the city, where connection is made with the Louisville, Nashville, and Memphis Road. Another connection south will be practicable in the course of a year or eighteen months, by the extension of the Elizabethtown and Paducah R. R. as an independent line, from Elizabethtown to Louisville. The connections of the Chesapeake and Ohio with the St. Louis Roads from Louisville, will also be perfected by the time the route is made continuous to Louisville, so as to establish another through line between St. Louis, Louisville and Cincinnati at the west and Richmond and Washington at the east.

Atlantic, Mississippi and Ohio Railroad.

The action brought by Mr. J. E. Tyson, of Baltimore, against the Atlantic, Mississippi and Ohio railroad, in the Circuit Court at Lynchburg, Virginia, has been finally concluded by a judgment adverse to the plaintiff in all points of the bill. The case involved the legality of the consolidation of the several roads forming the Atlantic, Mississippi and Ohio road, under the presidency of Gen. Mahone. The Lynchburg *Virginian*, reviewing the case, says:

It will be remembered that an act was passed by the Legislature of Virginia at its last session entitled "An act to complete the organization of the Atlantic, Mississippi and Ohio Railroad Company." This act recited that the former act of June 17th, 1870, contemplated the ultimate absorption of all the stock of the Virginia and Tennessee, Virginia and Kentucky, Southside, and Norfolk and Petersburg railroads into the new company, and stated that, while a large majority of the private stockholders in each of the four companies had merged their stock into the said new company, a few in each still refused to do so, and then provided for the appointment of a board of commissioners to value the stock of each of the outstanding stockholders, and prescribed that the board for the Virginia and Tennessee stockholders should report their valuation to the Circuit Court of Lynchburg for conformation. Said board was appointed, met, and valued the stock of Tyson and others, and made report to the court.

Said report coming up now for confirmation, it was opposed on the ground that the act of the last session was unconstitutional, and that no power existed in the Legislature to condemn the stock of Tyson and others for the benefit of the Atlantic, Mississippi and Ohio Railroad Company. It was further opposed on the ground that the market value was not a fair basis of compensation for these outstanding stockholders. The court, however, overruled both objections, held that the act was constitutional, and the market value of the condemned stock was the true basis of compensation to the holders thereof. The counsel for Tyson intimated their purpose to ask a supersedas from the Court of Appeals.

The Canals of New York.

In the aggregate, the canals of the State of New York are eight hundred and thirty-four miles in length. The Erie extends from Buffalo to Albany, three hundred and fifty miles; the Chenango, from Binghamton to Utica, ninety-seven miles; the Genesee Valley, from Olean to Rochester, ninety-five miles; a branch of the same, from Conesus to Danville, twenty miles; Black River, from Rome to Carthage, including a distance of forty-two miles by river, seventy-seven miles; the Chemung, from Elmira to Montezuma, including a distance of thirty-five miles through Seneca Lake, eighty miles; the St. Paul's, a branch of the Erie, from Montezuma to Seneca Falls, thirty miles; and the Delaware and Hudson, from Honesdale, Penn., to a point on the Hudson River opposite Rhinebeck, about eighty-five miles of which are in the State of New-York. These, in the season, are navigated by nearly 7,000 different boats, or an average of eight boats to each mile of canal. Of these boats the largest have each a carrying capacity for 225 tons of assorted cargo, or 2,000 barrels of flour, or 9,000 bushels of grain. The smaller boats have a carrying capacity of 125 tons, in proportion as indicated above. The average cost for the construction of the boats used is, for the larger, $5,000, and for the smaller, about $2,000. The average monthly cost of running, including tolls and towing, is about $800 per boat, which, it will be seen, involves a very large capital for simply the running expenses of a season. The men nearly all complain of the manner in which the canals have been managed by the State authorities, and express the hope, earnestly, that the next Legislature will inaugurate a reform. They charge the great falling off in the canal trade upon the failure to keep the canals in proper order, and the heavy tolls, by which, they declare, a vast business which now seeks railway and other conveyances, has been driven away. They are anxious that "the West" should be induced to return to the canals with all its former work, and they insist upon it that a proper system of repairs and charges would secure a return and large additional profit to the State. Soon after the opening of the Legislature attention will be called to the canal question and many reforms asked, by the adoption of which a large increase of trade, will, it is supposed, be the result.—*N. Y. Times.*

Euphrates Valley Railway.

We learn from the Levant *Herald* that the Turkish Grand Vizier has commissioned M. Pressel to undertake the survey of the ground for a line of railway to connect the Mediterranean sea with the Persian Gulf. It is to commence at Tripoli, on the Syrian coast, passing by way of Palmyra, and crossing the Euphrates, thence traversing Mesopotamia and the Tigris, and terminating at Bagdad, where it would meet the Persian Gulf line as originally planned. A preliminary step has already been taken in the despatch to Tripoli of two experienced engineers, one of whom took an active part in the pioneering work of the Roumelian line. The road will be 550 miles in length.

Chicago and Tomah Railroad.

The Chicago and Tomah Railroad Company has been formed with the view of building a railroad from Chicago, in the State of Illinois, to Tomah, Wisconsin. The line of the proposed road through the State of Wisconsin is as follows: Through Green, Lafayette, Iowa and Grant counties, crossing the Wisconsin river at the mouth of the Kickapoo, and following that stream northward, cross the ridge and intersect the Milwaukee and St. Paul Railroad at Tomah. It is to be a three feet or narrow gauge road. The bonded indebtedness of the road is limited by its charter to $15,000 per mile of constructed road.

Louisville, Cincinnati and Lexington R. R.

The earnings of this road for the years ending June 30, 1871 and 1872, were as follows:

	1871.	1872.
From passengers	$516,517 74	$491,287 42

The President, in his report dated September 1, 1872, says:

The capitalization of the company has been increased by the sale of one million of additional common stock, and almost the entire proceeds thereof invested in construction and equipment and added to the property value of the company. Substantial and commodious new machine and car-shops have been constructed and improved machinery purchased, greatly increasing the capacities and facilities of those departments. Five new locomotives, two new passenger and sixty-one freight-cars have been added to the equipment. Twenty-nine freight, four passenger, and two express cars are in course of erection at the company's shops, and nearly completed. A number of old passenger-cars have been reconstructed on an improved model in the shops of the company, and the Westinghouse atmospheric brake attached to all the passenger equipment. Ample depot grounds have been purchased in Newport. One hundred acres of land have been purchased near Newport for machine-shops, coal-yard, with elevator and stock-pens. Additional sidings have been laid, and permanent masonry and embankments have been substituted for trestle-work on the Cincinnati line.

The floating debt of the company has been essentially reduced by the sale of second mortgage bonds at materially advanced rates. The improved condition and prospects of the company have so enhanced the credit of and demand for its securities, that much of the floating debt for which bonds were hypothecated has been paid in advance of maturity.

The earnings compared with the previous year show an increase of $43,847 62, or 4.23 per cent. notwithstanding the reduction in rates over the preceding year.

The operating expenses have increased $61,732 17, or 8.34 per cent., which is due to the increase in traffic mileage of 10.70 per cent. over that of last year, the enhanced cost of fuel for locomotives, removal of temporary trestling, payments on account of accidents, etc., and the purchase of lease and fitting up new general ticket-office.

The cost per mile of the operating expenses has been reduced 1.33 cents per mile run over the previous year. It is more than probable the roads might have been operated with less train mileage and without a loss of business corresponding to the expenses saved; but the policy of operation, in which I fully concurred, has been to run a sufficient number of trains to meet all the connections at either end of the line, in order to build up and establish more promptly the great through business we are bound to command whenever there is business to be done. If the liberal scale of operation has failed to prove more remunerative than a more economic scale would, it has only been because the season has been extremely dull, with a less amount of travel and freight traffic to and from the South than has been known during any year since the war. Our roads have certainly done a very largely increased proportion of the business offered. The encouraging feature of our exhibit is that we are able to show an aggregate increase of nearly five per cent. in gross earnings, while all the roads around us, as far as I have been able to obtain information, have to accept a falling off.

Since the close of the fiscal year the months of July and August inaugurate the ensuing year with a handsome increase in both freight and passengers, giving further assurance of a sure and steady advance to a large and profitable business. The completion of the Lexington and Big Sandy Railroad to Mount Sterling, now being operated by this company, is giving a very considerable increase of traffic to the Lexington line, which will tell handsomely on the net results of another year, as the increased earnings it will afford occasions a very trifling increase of expenditures on the old line. It serves also to demonstrate the vast benefits which must be derived to this company and to the commerce of this city from the further extension and completion of that line through to a connection with the Chesapeake and Ohio at the Big Sandy or at Huntington.

We were compelled to submit to a still further postponement of the opening of the Cincinnati-Newport bridge than even the latest period promised you in my last annual report, and have only enjoyed the benefit of crossing it to immediate connections with northern roads in Cincinnati since the first day of April—only three months the river has maintained a fine navigable stage, with a sharp and active competition for freight by water-carriage at very low rates; notwithstanding which our freight traffic has been very largely increased.

Our connections of the Short-line are now fully completed at either end, the condition of our roadbeds steadily and vastly improved, the finances of the company in safe and easy condition, and we have reached a condition of readiness to begin to make money. That we shall be able to do so is as certain as that there shall be any people traveling or freights to carry.

Our next great object is to do what we can to put the Lexington line in the best possible condition for the great through traffic it will soon be called upon to perform. In order to do that we have about completed the purchase of the Shelby Railroad, and shall proceed at once with the work of extension beyond Shelbyville to make a shorter line to Lexington. The precise route of the cut-off has not been determined; but by either one of two routes already surveyed the distance between Louisville and Frankfort will be reduced thirteen and a half miles, with a material reduction also in grades and curvatures. When these connections shall be completed, and both the roads of this company become indispensable links in the two shortest and best lines north and east, the very large profits of their operation can not be doubted.

The receipts from all sources and payments during the year were as follows:

Receipts.	
Transportation earnings	$1,038,273 25
Sale of 77 Cincinnati Branch bonds	77,000 00
Sale of 359 L., C. & L. R.R.Co. bonds	359,000 00
Sale of 20,000 shares common stock	506,159 88
Chesapeake & Ohio R.R. loan acc't	100,000 00
Decrease in cash on hand	109,493 63
Accounts for labor and material unpaid	52,483 02
	$2,242,409 78
Payments.	
Operating expenses	$802,478 85
Construction and equipment	466,215 58
Bills payable	423,823 90
Louisville and Frankfort R. R. Co. bonds matured	28,000 00
Change of gauge	78,172 46
Interest on this company's bonds	256,238 80
Interest on Louisville Railway Transfer Co. bonds	15,004 63
Dividends on stock	77,237 37
Interest on floating debt	73,391 56
Increase in supplies on hand	21,852 18
	$2,242,409 78

The company have 31 locomotives, 9 twelve-wheel and 10 eight-wheel passenger cars, 6 baggage, 6 express, 71 house freight, 187 house stock, 116 platform, 8 caboose, 1 pay, 1 wrecking, 6 boarding, 68 hand, 40 truck, and 23 road cars. Number of miles run by locomotives with passenger trains, 449,183; with freight trains, 292,309; distributing trains, 52,959; Louisville connection, 22,820; other roads, 18,721—total, 835,992; of which, 641,670 miles were run by coal burners at a cost per mile for fuel of 12.58 cents and for repairs 2.63 cents; and 194,322 miles by wood burners, at a cost per mile for fuel of 12.05 cents, and for repairs 3.78 cents. Av. cost per mile for fuel, 12.43 cents; and for repairs, 2.90 cents. Total cost per mile run, 25.81 cents. Total mileage of cars, 4,613,965. Number of passengers carried, 442,233; total mileage of passengers, 15,276,176. Av. number of miles traveled by each passenger, 34.54. Number of tons hauled 244,446; number of tons hauled one mile, 18,955,478; average distance each ton was hauled, 77.95 miles. Earnings per total revenue mile, 161.16 cents; ex-

penses, do., 125.02 cents—net earnings do. 36.74 cents. Earnings per total engine mile, 130.89 cents; expenses, do., 101.01 cents. Proportion of operating expenses to earnings, 77.29 per cent.

GENERAL ACCOUNT, June 30, 1872.

President.—NORVIN GREEN.

Vice President.—JOSHUA F. SPEED.

Directors.—By the stockholders: Joshua F. Speed, J. Guthrie Coke. J. W. Kalfus, J. M. Monohan, J. B. Wilder, R. Ferguson, E. D. Sayre, M. C. Johnson, Jas. O. Harrison, Henry Bell. By the State of Kentucky: Littleton Cooke, E. D. Standiford.

Chief Engineer.—I. M. ST. JOHN.

Superintendent.—J. E. GIMPRELING.

Secretary and Treasurer.—R. H. COURTNEY.

Auditor and Purch. Agent.—WILLIAM MAHL.

Boston and Providence Railroad.

The annual meeting of stockholders of this company was held in Boston on the 20th inst. The report of the Board of Directors was read by J. H. Clifford, President, showing the gross earnings of the road for the past year to be $1,716,399 42, and the net income, notwithstanding many extraordinary outlays, $465,346 83—more than $30,000 over last year's income.

The road has transported during the year 540,263 passengers, carried 203,168 tons of freight, and run 117 miles more than in the previous year. The company has erected depots at Pawtucket, Dodgeville, Boylston Station, Hyde Park and Heath street, Boston.

They have now in process of erection one at Camden street, Boston, Forest Hills and Attleboro, and are forwarding diligently the new principal passenger station in Boston. The Directors wish particularly to bear evidence to the fidelity of their employes in every department. Other proofs of the prosperity of the road are found in the report, which was received with satisfaction by the stockholders.

Mr. Clifford then spoke of the matter of the Stoughton Branch Railroad, the stock of which the Directors of the Providence Road had purchased, and it was voted that petitions be made to the Legislature for the merging of the two roads into one corporation.

Messrs, W. R. Lee, of Boston, and J. W. Smith, of Providence, were appointed a committee to sort and count votes for directors for the ensuing year. The committee reported the following as elected: Messrs. John H. Clifford, Geo. W. Hallett, T. P. I. Goddard, Wm. R. Robeson, Francis M. Weld, Joseph W. Balch, Henry A. Whitney. Forty-eight stockholders voted, representing 6,389 shares.

On motion of Mr. Isaac A. Anthony, the thanks of the stockholders were voted to the employes of the road for the faithful discharge of their duties.

Messrs. W. G. Russell, John A. Thomas and J. R. Smith were appointed an Auditing Committee for the ensuing year.

Richmond, Fredericksburg and Potomac Railroad.

The annual meeting of the stockholders of this company was held in Richmond on the 20th inst. The report of the president, John M. Robinson, alludes to the opening of the all rail night line on the 18th of July, the arrangements being made with the Alexandria, Fredericksburg and Baltimore and Potomac Company's line, and the cars have been regularly run by this line between Weldon and Baltimore. The board determined to continue connection with the day steamboat line on the Potomac, the favorite route to the passenger, affording rest to the traveler after a tedious ride.

So far the company has experienced but little advantage from their connection with the railroad companies north of Quantico beyond what they enjoyed in connection with the Potomac steamers; but in the future, when the Baltimore and Potomac Railroad shall have been extended into and through the city of Baltimore, it is believed that freight may be conveyed by the all-rail line at such rates as will produce a large and valuable freight business not only between Richmond and Baltimore, but also in connection with roads to the south of Richmond. Such trade, it is believed, must eventually be obtained.

The report of general superintendent E. S. D. Myers, gives an encouraging exhibit of the affairs of the company, the income for the past fiscal year being $351,919 29, expenses $205,909 45, showing a net increase on the earnings of the year previous of $23,666 90. Mr. John M. Robinson was unanimously re-elected president. H. A. Claiborne, Charles S. Mills, Elisha Chauncey and W. B. Myers were elected directors on the part of the stockholders, and Mr. Andrew Johnson was announced as director on the part of the State. Messrs. C. F. M. Garnett, James Hunter, John M. Robinson, John R. Baylor and L. B. Anderson were re appointed the committee of examination.

The Ohio Coal Fields.

We give below, from the Cincinnati *Gazette*, the very able address of Prof. E. B. ANDREWS, State Geologist of Ohio, delivered before the Cincinnati Boad of Trade on the 7th inst.:

Prof. Andrews first showed that Cincinnati, being a great city, should make articles of prime necessity free from any uncertainty or precariousness of supply. In the earlier days when the place was small, the abode of the first pioneers, the elements of precariousness mattered comparatively little; it rather gave zest to pioneer life. If the intervals between the capture of bear or turkey were somewhat long, the appetite was the keener and the relish greater when the supply came. The spring on the hillside drying up in summer gave way in time for wells, and in the growth of the place, wells gave way to water works, with certain and abundant supply. The surrounding forest afforded the first fuel, and as the forest receded wood was floated down the river, and when this became uncertain coal slowly made its way against many prejudices, hickory and maple being regarded by many as possessing in themselves all the caloric virtues.

But coal at last supplied all the wants, and this was brought by the river almost exclusively. But the river has elements of uncertainty, and now the city, in the magnitude of its wants, often suffers for the want of an adequate and continuous supply. Has, then, the city outgrown the Ohio river? If the question is change? it answers itself. Shall an article of cheap necessity—indeed, a prime factor in the well being and growth of the city, the demand for which is constant and increasingly vast—be subjected to a doubtful and precarious supply?

The Ohio river has served a noble purpose, and through its aid Cincinnati has grown steadily in population, in wealth, and business enterprises, and with this wealth has come regard to the requisitions of taste and culture, and now the city, with its almost unrivaled environs, ranks among the first and most beautiful in the land. In past years the river floated your commerce, and travelers came and went by it, and all gave it merited honor. It was for years the great thoroughfare over which the statesmen of the West passed to and from the National Capital, and business men to and from the Eastern marts. Down it immigrants, in constant throng, passed, to find homes here, or in the broad West beyond. But its day has passed, not for the beauty and picturesqueness of its scenery, but for the prosaic purposes of traffic, and now Cincinnati must look elsewhere for the supply of one of her most urgent demands. Fortunately an ample supply of fuel is not far away, and I shall point out such of our coal fields lying East as are proximate to the city. But before the Professor takes an excursion with his audience, among the Eastern hills and valleys, he wishes to spend a moment on the subject of coal

itself—its origin and leading varieties, that we may make our excursion more intelligently.

(Here the Professor drew a geological section across the State, from Cincinnati eastward, and illustrated by a diagram.)

Coal is formed from vegetable tissues. The leaves, bark and vegetable tissues are visible in the coal itself.

Coal vegetation grew where now found, and was not a mass of vegetable detritus carried from the land and buried under the sea, as some think. Coal vegetation grew in marshes and on low islands skirting an ancient shore. Fishes and marine shells are found in coal, and accompanying slate. These marshes were sometimes flooded, and beachworn sticks carried into the marshes and are now lodged into the coal.

The marsh settled down and the vegetation was buried by sands and clay sediments, which now forms sandstones and shales. This subsidence was a regular and uniform thing until arrested, and the waters were silted up with sand and mud. A new marsh formed, making another seam of coal. Hence a beautiful parallelism between the seams of coal, for each represents a water line. The coal thus formed is of three kinds: highly bituminous and coking, splint and cannel. These pass into each other by almost imperceptible gradations.

Coking coal—formed from the vegetation which has before burial undergone the least change from decomposition. A tree or branch buried in impervious clay always makes bright resinous coal. Pittsburg and Youghiogeny are of this general class. Good steam coal where it can be stoked. Not so pleasant for the grate as the dry burning coal. It is good for coke, and generally for gas.

Splint coal—Is formed from vegetation more changed, which has been more subjected to wetting and drying. It is generally laminated, and breaks into tabular blocks in fracture and dry burning. It is generally rich in carbor, and from its non-cementing nature is especially adapted to the blast furnace.

Cannel Coal.—In the ancient marshes there were areas where the water stood more or less, and there were accumulations of vegetable mud or muck, such as we find in bogs now. All vegetable structure is gone, and, when dry, such muck forms a dark and impalpable powder. Such muck beds, in the ancient marsh, when burned up and compressed, and bituminized, formed cannel coal, which shows no structure, seldom any lamination, and breaks with a conchoridal fracture. This coal, when free from impurities, makes a popular parlor grate coal, and gives to gas a high illuminating power.

Ash in Coal—Is derived from the ashes or inorganic matter in the original vegetation, and from the sediments which were brought into the old coal marshes. A coal from Jackson county gave .77 per cent. of ash. From this minimum it ranges to even 20 or 30 per cent., and, when excessive, destroys the value of the coal.

Sulphur in Coal—Is derived in part, from the original vegetation, but probably more from sulphates in ocean water, decomposed by the action of decomposing vegetable matter. Part of the sulphur is united with iron to form pyrites or bisulphide of iron; part is united with the bituminous matter and is volatilized in coking the coal, and part is found with the fixed carbon of the coke. A mere trifle is found in the ashes.

For iron making, in blast furnaces, the more sulphur passes off in the coking which takes place in the top of the furnace stack the better, since pure coke is chiefly needed. For gas making, it is just the opposite.

The Professor gave the following distances to coal fields.

CINCINNATI AND MUSKINGUM VALLEY RAILROAD.

Cincinnati to Lancaster, 125 miles; Cincinnati to New Lexington, 146 miles; do. to McLunay, 152 miles; New Lexington to Moxahala, 5 miles; to Sunday Creek, 10 miles; Cincinnati to Sunday Creek, 156 miles; Cincinnati to Wolf Station about 141 miles; Wolf Station to Shawnee, 12 miles (estimate); Lancaster to Straitsville field, by a proposed direct road, 17 to 20 miles; Lancaster to Straitsville, Columbus and Hocking Valley railroad, 31 miles; Lancaster to Haydenville, 25 miles; Lancaster to Nelsonville, 30 miles; Cincinnati to Nelsonville, via Columbus and Hocking Valley railroad, 155 miles; Cincinnati to Straitsville, via Columbus and Hocking Valley railroad, 156 miles.

The coal by the Cincinnati and Muskingum Valley railroad would find dumpage from the bridge alone, and will naturally supply the southern part of the city.

MARIETTA AND CINCINNATI RAILROAD.

Cincinnati to Byers' Station, about 120 miles; from Byers' to Pigeon Creek, by branch to be built, 3 to 5 miles. Cincinnati to Hamden, 129 miles; Hamden to Jackson, 12 miles; total, 141 miles. Cincinnati to Zaleski, 140 miles; Cincinnati to Mineral City, 150 miles; King's Switch and Mooresville between Zaleski and Mineral City; Cincinnati to Carbondale, 155 miles; Cincinnati to Athens, 160 miles; Nelsonville, via Marietta and Cincinnati railroad, 174 miles; Cincinnati to Big Run and Federal Creek, 174 miles. Coal by the Marietta and Cincinnati railroad would supply the north part of city.

OHIO RIVER.

Cincinnati to Big Sandy, 158 miles, Cincinnati to Pittsburg, 466 miles; Cincinnati to Pomeroy, 230 miles; Ohio river to Peach Orchard coal, Big Sandy, 42 miles; Ohio river to Warfield, 53 miles; Ohio river to Twelve Pole, by rail, 24 miles; Ohio river to Guyandotte coal field, 32 miles; Ohio river to Coal river coal field, by water, 72 miles, by rail a little less; Ohio river to Coalburg, Kanawha, by water, 70 miles, by rail, 69 miles.

The speaker passed up the Cincinnati and Muskingum Valley railroad to Lancaster, and thence to the great Perry county and Hocking valley coal fields by various routes.

Continuing to New Lexington and McLunay Station, we find coal in the hills bordering the railroad. It is of good quality and popular where used. Ten miles south of New Lexington, by a railroad now in progress, the great Sunday Creek coal seam is reached the maximum development of coal in the State being thirteen feet lacking two inches of pure coal. The quality is very superior, and has great adaption to all the higher uses. In another year this coal will be reached, and can be mined and shipped to great advantage. Excellent coal is found in the Moxahala valley, south of New Lexington. At the junction, about six miles west of New Lexington, the Newark and Straitsville crosses the Cincinnati and Muskingum Valley railroad, and reaching Shawnee City in the immediate neighborhood of Straitsville, where very excellent coal is found in great abundance.

A road is projected from Lancaster to the Straitsville region, which will reach the coalfield in seventeen miles.

By using the Hocking Valley road, all the vast treasures of the Hocking Valley and Straitsville region are made accessible. This is a coal of the finest quality, and it is authenticating itself for all important uses, over a vast district which it is now supplying. The business in this region is becoming very extensive and profitable.

MARIETTA AND CINCINNATI RAILROAD.

A branch from Byers Station up Pigeon creek reaches in three to five miles, the Sells coal, the equivalent of the Anthony seam. This is one of the best and purest coals in the State.

Hill coal and shaft coal are found nearer Jackson—all superior coals. A branch to the Elk Fork coal (Wolff's), north of McArthur. This is a very excellent coal, and perhaps the equivalent of the Briar Hill and Jackson shaft.

At Zaleski, King's Switch, Moonville, Carbendale, are coals of varying values, but generally good, and popular where used. From Carbondale, a road three to five miles would strike the Nelsonville region, or Floodwood, or Meeker's run, where the coal is from six to eight feet. Hocking Valley coal may now be brought to Athens, thence by the Marietta and Cincinnati railroad, east of Athens, on Federal creek and branches, the equivalent of the Pomeroy seam in Ames, Browne, Homer, Marion, and ——town-ships. This is a good coal for all uses except gas making and the blast furnace. It makes a good coal for steam purposes and for the grate where a coking coal is desired.

SYMMES CREEK ROUTE.

Distances furnished by Colonel Trimble.—Cincinnati (Miami Depot) to Works Mines, 5 miles west of Jackson, 106 miles; Cincinnati to Jackson Court House 111 miles; Cincinnati to Symmes Creek seam of coal, Greenfield township, 120 miles; Cincinnati to Waterloo, Walnut township, 131 miles; Waterloo to Ohio River, 23 miles.

COAL IN JACKSON COUNTY.

Shaft coal at Jackson—Very pure and excellent; used for making iron in blast furnace; resembles the Briar Hill block coal, but less blocky, probably the geological equivalent of the Briar Hill seam.

Anthony coal, one of the purest and best coals of the State, extends through the hills to the north for a considerable distance; seen on Buffalo Skull Creek and Pigeon Creek, etc.

Hill Coal.—Another very pure coal, and would make a very popular fuel. It has little sulphur and little ash.

Over the ridge on Symmes Creek is the Sheridan Coal, which is thicker, and found to be very full and good. This coal ranges through Walnut, Greenfield, and, perhaps, other townships in Gallia county.

There are four other coal seams on this railroad line—one 75 feet below ferriferous limestone; one just under the limestone, and one 20 feet above, and one 50 feet above the Symmes Creek seam.

By a branch south of Jackson the Webster Furnace block coal could be reached. This is the geological equivalent of the Briar Hill coal; the coal is very superior.

There is, on the aggregate, a vast supply of coal on this route.

By the Ohio valley the coal fields are reached in about one hundred and twenty five miles.

On the Little Scioto, near Webster furnace, the coal is very fine, and in places typical block coal, but this coal is needed at home for smelting the ore of this region. It is, however, within reach of the Ohio river over the Portsmouth branch of the Marietta and Cincinnati railroad.

In the vicinity of Hanging Rock and Ironton the principal coal is the Newcastle vein, twenty feet above the ferriferous limestone. This coal is used successfully for general purposes, but is not well adapted for blast furnaces.

The Sheridan coal, now mined and shipped on the Ohio side, about six miles above Ironton, is an excellent coal for steam purposes, and for most other uses. It is a widely spread seam, extending back into Symmes Creek. The Symmes Creek coal ranges from four to six feet; is a good coal, with a large per cent. of fixed carbon. This coal is accessible to the Ohio valley by the valley of Symmes Creek.

The distance from the river to the best of these coals is about twenty-three miles. This deposit is quite extensive, and is well developed and very pure throughout several townships. Following up the river, the next important seam is that of Pomeroy and vicinity, which is well known in Cincinnati. The range of this coal is extensive and the supply abundant, and is very accessible, the river curvature affording a large frontage for mining.

The coal fields on Duck Creek, above Marietta, are now rendered accessible by the Marietta and Pittsburg railroad. These veins have a thickness of from five to six feet. The coal is highly valued for steam purposes, and is used in the puddling furnaces at the Marietta Iron Works, and is now in general use at Marietta, taking the place of the up-river coals.

On the south side of the Ohio, the Coalton coal

seam is worked on the railroad, twelve miles south of Ashland. This is a valuable coal for furnace use, for which reason it is not shipped by its owners to the general market.

The Peach Orchard district, forty-two miles up the Big Sandy, contains very fine deposits of coal, which at one time won a high reputation in this city; but the mines had to be abandoned during the war.

On Twelve Pole creek, twenty-four miles from the Ohio river, is also a valuable boring of coal, generally a splint, but running into cannel in places; the heaviest good cannel the lecturer had ever examined.

The Guyandotte coal, thirty-two miles back from the river, is, doubtless, the same as that on Twelve Pole. This is reported to be of fine quality, and from six to seven feet thick. The Coal river basin extends further up, and embraces, with the Kanawha coals, an extensive field and the coal is highly spoken of.

All these several coal deposits, affording an inexhaustible supply of every class of coal, are in easy reach of a line of railroad along the Ohio river directly, or by branch roads, extending a short distance up the valleys of these lateral streams.

GENERAL CONCLUSION.

I fear I have confused your minds by the large number of locations of excellent coal to be found within reasonable distance of Cincinnati. There is one very manifest inference from these facts—viz: that Cincinnati should not go to Western Pennsylvania for coal. As it now is, you go 300 miles further than you need go, and that 300 miles the worst part of the Ohio river, through which the coal boats must run the gauntlet of low water, sand bars, bridge abutments, &c. Fewer runs can be made on the same rise of river, so much more time being consumed on the way. Furthermore, of the millions of dollars sent to Pennsylvania for coal, not a dollar comes back to you in the reflex current of trade. This vast sum is not only lost to you, but goes largely to enrich Pittsburg, a rival city. Fortunately, adequate supplies are at hand.

During the address, while the Professor was speaking of the line of the Cincinnati and Muskingum Valley railroad, a gentlemen inquired:

"What grades are to be overcome in getting coal to Cincinnati from that district—about the maximum?"

Professor Andrews—I have not the exact grades, but they are not very serious until you get on the ridge between Lancaster and Circleville. Between the waters of the Hocking and the waters of the Scioto there is but one place where, for heavy freight trains, an extra engine would be needed.

Q.—How many feet to the mile is the grade?

Prof. A.—I do not know positively, but I understand it is about 64 feet. The difficulty there could be obviated by using an extra engine.

Q.—How many cars loaded with coal can be taken over that road with one engine?

Prof. A.—With the exception of that one place, I have been told they can take twenty-eight, of 300 bushels each. That is about the average size of the trains on the Hocking Valley road—not where it is taken out of the ridge, but where they make up their trains.

Q.—How long is that grade?

Prof. A.—It is not long. It is the first rise west of Lancaster, and of course it is the up grade coming this way, to the summit. I am told it is nothing serious. Whether it can be remedied by some new engineering, I do not know.

Q.—What is the relative value of Ohio and Kentucky coals, of which you have spoken, and the Pittsburg coal?

Prof. A.—It is very difficult to speak of their relative values. The Pittsburg coal is the standard of that class of coking coal. For household use, and for the generation of steam, the other coals are preferred by many people. I have burned the Pittsburg and other coals, and my preferences are for the dry burning coals of the Hocking Valley. They are much cleaner, and have less ash. The chief heating quality of coal lies in the carbon. The difference in the amount of gas between the Straitsville coal and the Pittsburg coal is not much. There is a little excess of gas in the Pittsburg coal, but in Columbus, Lancaster, and other places where Straitsville coal is easily obtained, that coal has driven out the Youghiogheny coal. One of the reasons is that the Straitsville coal makes gas of a superior quality.

By photometric test, the Youghiogheny coal produces a gas which averages fourteen candles, while, by the same test, Straitsville averages eighteen candles. I have never in my life found so beautiful and satisfactory a light for my evenings' work as I get in Lancaster, where they use Straitsville coal. If your gas companies could get it as cheap as the other coals I have no doubt they would use it.

Q.—Are there any uses to which the Youghiogheny coal is applied, for which the coal you have been speaking of cannot be applied?

Prof. A.—With the single exception of making hard coke, I do not know of any. The best cokes are made of coals which melt, become porous, and swell up. When they harden, they harden like a cinder, and that makes the most valuable and compact coke.

Q.—I understand the most valuable uses of the Youghiogheny coal are for making steam and blacksmithing?

Prof. A.—I find all over the country that the blacksmiths have very different ideas about coal, but they generally prefer a bituminious or coking coal. They want what they call a "hollow" fire, which is better attained by a coking coal. As to the relative values for the generation of steam, I cannot say. A gentlemen in Columbus is testing coals with reference to that subject. If I can get him to test a sample of Youghiogheny coal for me, I will know the relative values of coals for that purpose. I do not disparage the Youghiogheny coal, because it is a valuable coal of its class; but the class is not what I should prefer for general use. The Straitsville coal, I judge, would be very valuable for domestic use.

Q.—What is the probable supply of that Straitsville coal?

Prof. A.—It is indefinite. It runs through several counties, and in its maximum development, it has a development of 13 feet for miles and miles.

Two years ago I was called to address the State Board of Equalization, to state what value coal gave to land, and I was obliged to state that, in some districts, they had so much coal that the consumption of the large part of it would have to be adjourned for more than two hundred, and from that to a thousand years; and that the coal to be mined two hundred years from now had no present effect on the taxable value of the land. I have no fear that it will be exhausted for a long time to come.

Q.—What is the relative value in carbon of the Straitsville and Youghiogheny coal?

Prof. A.—I think the Straitsville coal has two or three per cent. more carbon.

Q.—Do you consider the Scioto coal at the Webster Furnace of any better quality than the Ashland coal? [in Kentucky]

Prof. A.—I should say the coal at Webster Furnace would take rank with the other coals in that vicinity, but it has not been very extensively opened.

Q.—Isn't it a stronger coal than the others?

Prof. A.—I should think it would be stronger in heating power—that is, has more fixed carbon—than the Ashland coal.

In conclusion, Professor Andrews said:

"The coal fields I have mentioned are so extensive, and of such quality, that in five years it should drive out of your market all of the Pennsylvania coal."

A vote of thanks was tendered to the Professor, and the meeting adjourned.

☞ The Midland (Ca.) Railway is now completed to Atherly, within three miles of Orillia.

Finances of Boston.

From the annual report of the City Auditor, for the year 1871-72, we gather the following interesting statistics:

Funded city debt	$20,799,766 80
Unfunded city debt	197,857 91
Water loans	6,812,711 11
Roxbury debt	634,700 00
Dorchester debt	183,500 00
	$28,628,535 82

The classification of this debt, funded and unfunded, April 30, 1872, is as follows:

City debt, proper	$16,292,885 08
Water debt	9,602,950 74
War loans	1,914,500 00
Roxbury debt	634,700 00
Dorchester debt	183,100 00
	$28,628,535 82

During the year ending April 30, 1872, the debt was increased by the sum of $745,899 69.

The consolidated debt has increased each decade as follows, since 1824:

1824	$100,000 00
1830	891,930 75
1840	1,698,232 56
1850	6,195,144 35
1860	8,491,599 77
1870	18,687,350 91
1872	28,628,535 82

THE POPULATION, VALUATION, AND RATE OF TAXATION.

Year.	Population.	Valuation.	Rate.
1825	58,277	$52,442,600	7 00
1830	61,392	59,856 000	8.10
1835	78,603	79,302,600	9.70
1840	93,383	94,581,000	11.00
1845	114,366	135,948,700	5.70
1850	138,788	180,000,500	6.80
1855	161,429	241,932,200	7.70
1860	177,902	276,861,000	9.30
1865	192,324	371,892,775	15.80
1870	250,526	584,289,400	15.30
1871		612,663,550	13.10

Of the valuation in 1871 the property was classified as follows:

Real	$395,214,950
Personal	217,448,600

Canal Towages.

A new and novel invention for steam towage on the canals, in competition for the $100,000 prize made its appearance in our city this morning, and will make its first trip on the Erie Canal between this city and Schenectady on Friday of this week. The new invention comprises a boiler and engine, six-horse power, the former being on the boat, and the engine on the tow-path furnishing the propelling power. The latter is placed on a truck of three strong wheels, two in front and one in rear for directing the course of the machine, which is eight feet long three feet wide and three feet in height, having a capacity for using three hundred and fifty pounds of coal in twenty-four hours and weighing only eight hundred pounds. The machine also carries a tank for ballast purposes, which will contain an aggregate of 2,000 pounds of water. The engine is connected with the boiler on the boat and is supplied with steam by means of a gutta percha or india rubber tube or pipe, and the connection is further strengthened by auxiliary lines. The cylinder of the engine is four by six inches. The inventor is Mr. J. P. Tice of New York, and he is very sanguine of the success of his invention.—*Albany Journal, Nov.* 20.

☞ The Rensselaer and Saratoga Railroad, during the year ending Oct. 1st, transported 557,000 tons of freight; amount carried one mile 29,451,800. The number of passengers carried for the same time was 664,000, number carried one mile 17,241,410.

RAILROAD EARNINGS—MONTHLY.
